Clinical Placement Record of Performed Exams

Rationale

The purpose of the **Clinical Placement Record of Performed Exams** is to document a summary of the student's work in clinical and the number of cases they observe, assist and perform for the duration of their clinical placements.

Students should have this book in clinical with them at all times.

No confidential patient information should be recorded in this book.

The student will use the Record of Performed Exams for Image Critique to record the cases thatare eligible for logbook entry. These cases must be individually signed by the supervising preceptor in order to be considered for logbook entry at Image Critique Sessions with the site designate(s) or instructors. If there is doubt or concern about the accuracy of the student's performance or exposure to certain cases, precise numbers may be pulled from the image critique records and from the site's documents to ensure accuracy of the student's initiative and level of performance.

This publication and materials herein are protected by applicable intellectual property laws. Unauthorized reproduction and distribution of this publication in whole or part is prohibited.
