Role of the Site Liaison

1. Create and foster a supportive learning environment by acting as a resource to and liaison between students, preceptors and staff.

2. Provide hands-on clinical instruction by working one on one with students in the department.

3. Orientate students to a site with a site tour and review of safety procedures/protocols.

4. Provide constructive feedback in a timely manner and document student progress and achievement of clinical objectives.

5. Ensure students meet clinical objectives and follow radiation protection practices while achieving a high level of patient care.

6. Schedule weekly formal critique session for review of student images and discussion of logbook progress.

7. Assist the student in setting realistic, attainable goals based on upcoming rotations to capitalize on all educational opportunities.

8. Identify barriers to learning and propose strategies for achieving success.

9. Provide extra support for students experiencing clinical difficulties, including conflict resolutions strategies and supplemental labs/lectures as required.

10. Assist the student in applying didactic knowledge in a practical setting.

11. Participate in meetings with Edenbrook and clinical representatives to ensure consistency in the practical setting.

12. Educate preceptors and clinical staff on site policies, Edenbrook policies and professionalism expectations of MRT students in clinical placement.

13. Assist the student in conflict resolution as required.
