PRCT 358 – Clinical Placement 3

Role of the Student

1. Prepare to meet the objectives for each clinical rotation.
2. Formulate goals for each rotation and discuss these goals with the preceptors and site liaisons you are working with.
3. Complete a daily log, including preceptor feedback.
4. Participate in reflective practice by completing applicable self-evaluation assignments.
5. Receive formative and summative feedback by ensuring rotation summaries are completed after each site / rotation.
6. Be accepting of feedback from preceptors and instructors, taking responsibility of their own progress and experience.
7. Take advantage of all learning opportunities provided in the MRT clinical placement experience.
8. Utilize appropriate resource(s) to resolve concerns or answer questions.
9. Ensure appropriate supervision by a certified technologist for every exam performed. Ensure all images have been checked and approved before dismissing each patient.
10. Respect the clinical placement sites' policies and procedures and strive to comply with standards of practice, code of ethics, regulations and legislation in place.
11. Provide a safe and comfortable environment for patients; putting the patients' safety and well-being first.
