Interventional/Angio objective form

Student Name:_____

OBJECTIVES FOR VASCULAR/INTERVENTIONAL ROTATION

Upon completion of each objective, please have your preceptor initial beside the objective for verification.

A. Performance Objectives

Date	Initial	Objective Demonstrated
		1. Understand the gross anatomy, relational anatomy, and physiology as related to vascular/interventional studies.
		2. Understand the pathology and anomalies related to the vascular/interventional studies, with respect to: patient signs and symptoms, clinical presentation, and diagnostic image presentation.
		3. Utilize the clinical information provided to adapt the requested examination to an individual patient, as required.
		4. Demonstrate an understanding of related disciplines in order to review data available from reports and/or images of previous studies.
		5. Assess patient for hypersensitivity/contra indications to the contrast media.
		6. Use automatic injection devices when required.
		7. Verify and set injection parameters on automatic injectors.
		8. Prepare for the administration of medications with direct supervision (if applicable).
		9. Monitor and respond to adverse reactions to contrast media.
		10. Recognize and maintain sterile field.
		11. Follow radiation protection practices adhering to ALARA.
		12. Student to “buddy scrub” to assist with nursing duties.
		13. Participate in vascular/interventional imaging.
		14. Evaluate quality of images for the purpose of diagnostic interpretation.
		15. Participate in processing and post processing of images.
		16. Counsel patient with respect to post procedural care.

Student Name:_____

B. Patient Care Objectives

Date	Initial	Objective Demonstrated
		1. Assess Vital Signs • Pulse • Respiration • Blood Pressure
		2. Oxygen Equipment set-up
		3. Oxygen Administration
		4. Suction Equipment set-up
		5. Sterile Technique
		6. Intravenous Care
		7. Patient Transfers
		8. Isolation Techniques
		9. Universal Precautions

Date of Rotation: _____ Site: _____
