Labelling Questions

Module 9

1. Label the anatomy seen in the radiograph, & identify the projection:

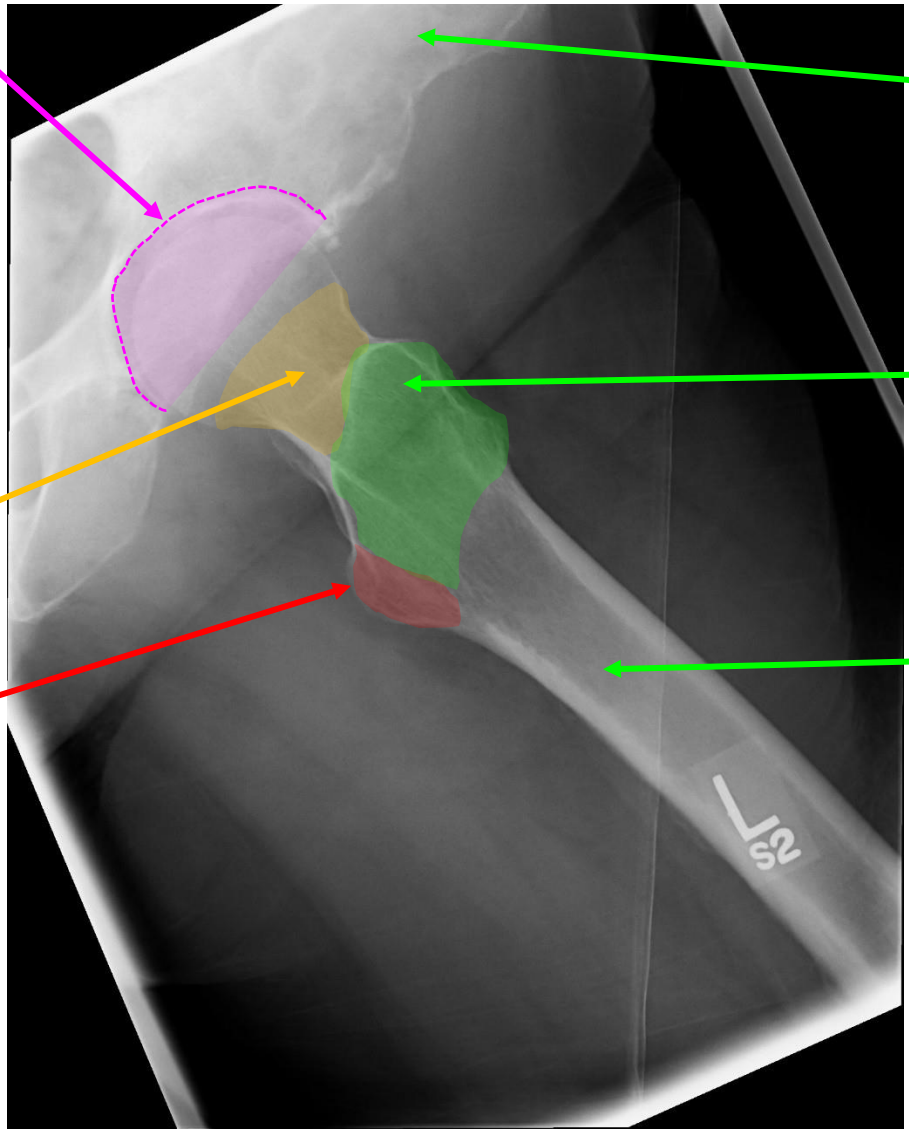

AP Hip Projection

2. Match the anatomy listed to the anatomy seen in the radiograph & identify the projection:

Lateral Hip Projection

a. Acetabulum

e. Ilium of pelvis

f. Greater trochanter

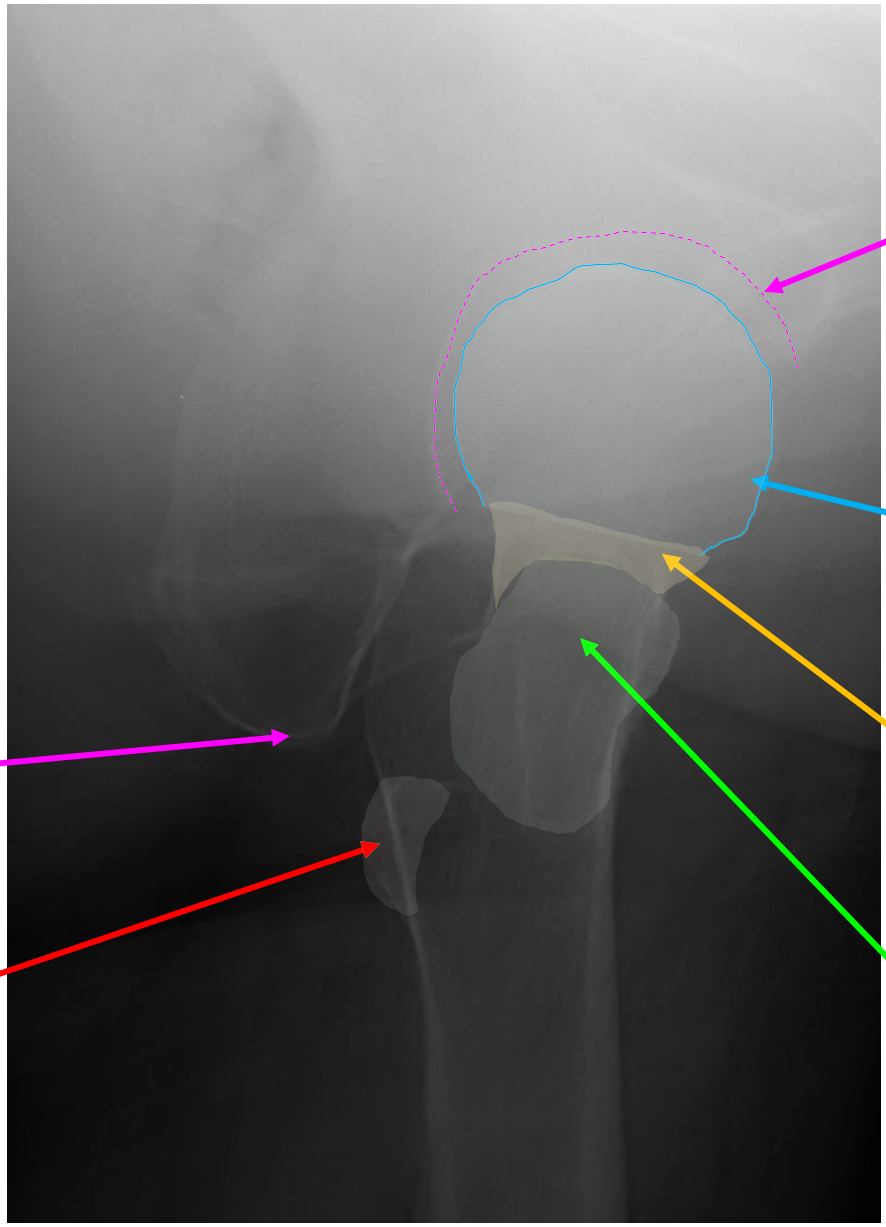

c. Femoral neck

d. Body of femur

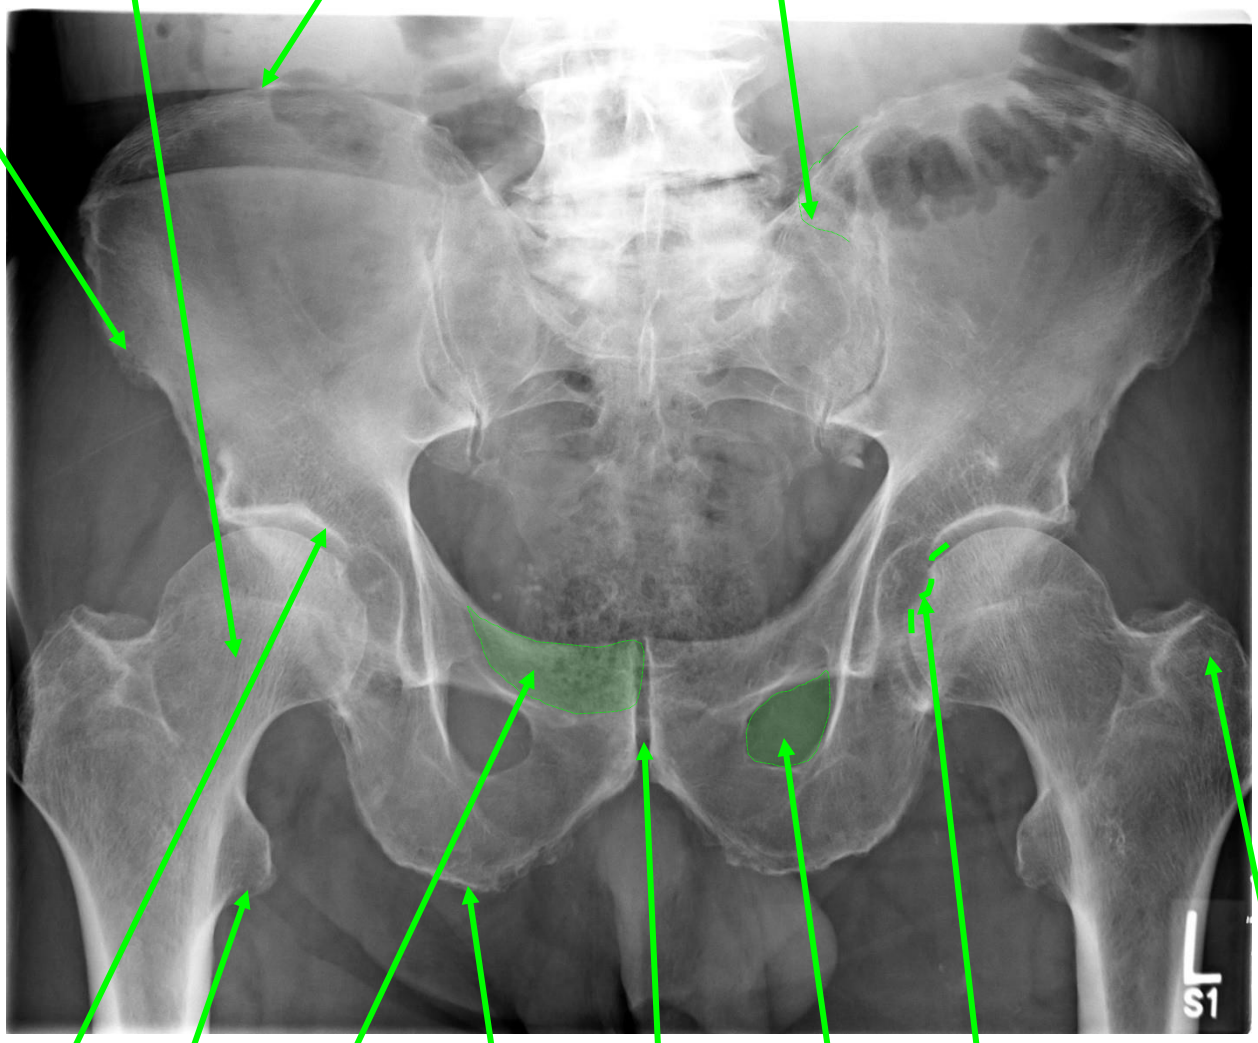

b. Lesser trochanter

3. Label the anatomy seen in the radiograph & identify the projection:

Cross-table Lateral Hip Projection

4. Match the anatomy listed to the anatomy seen in the radiograph:

l. Right femoral neck

e. Right iliac crest

c. Left PSIS

b. Right ASIS

d. Right acetabulum

h. Right lesser trochanter

f. Right superior ramus

j. Right ischial tuberosity

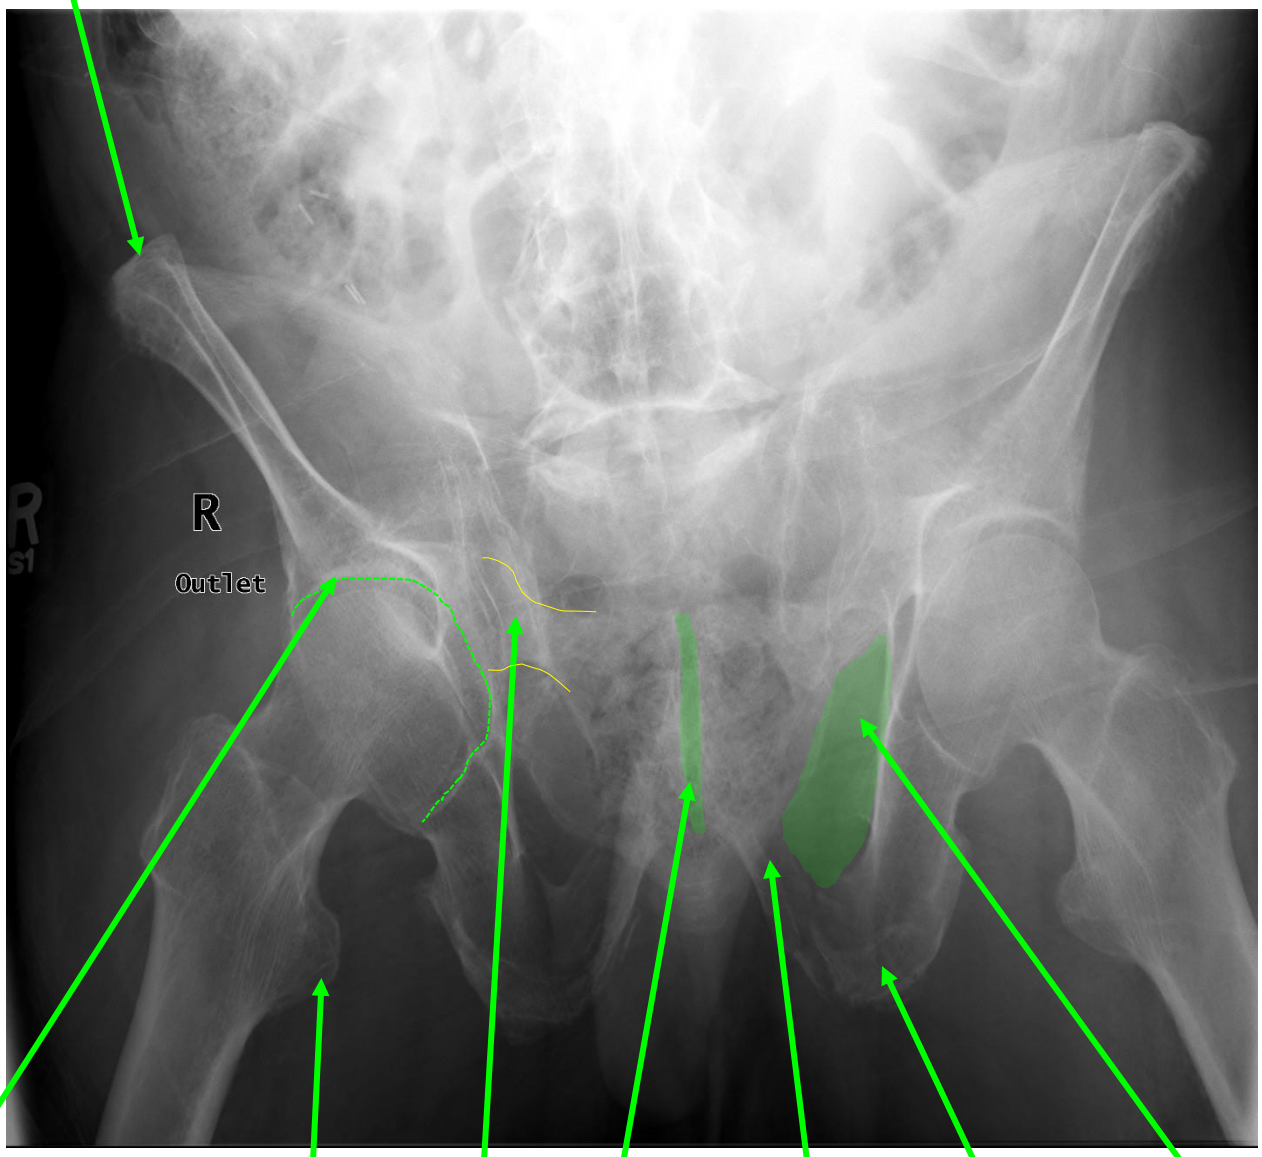

i. Symphysis pubis

a. Left obturator foramen

g. Left fovea capitis

k. Left greater trochanter

5. Match the anatomy listed to the anatomy seen in the radiograph:

g. Right iliac crest

c. Right acetabulum

h. Right lesser trochanter

e. Body of right pubis

d. Symphysis pubis

b. Left inferior ramus of pubis

a. Left ischial tuberosity

f. Left obturator foramen

6. Label the anatomy seen in the radiograph:
