PRCT 250 – Introduction to Clinical Placement

Role of the Preceptor

1. Discuss expectations with the student at the beginning of the scheduled rotation (whether it is for one shift, one week, or longer).
2. Be constructive in the assessment of the student's capabilities and offer formative feedback. Include both the positive and negative aspects observed.
3. Provide feedback in a timely manner to the student so that improvements can be made during the rotation.
4. Orientate the student to equipment and procedures in each rotation.
5. Assist the student in establishing goals for the assigned rotation.
6. Offer guidance and advice to the student to coach the student toward achieving clinical rotation objectives and goals.
7. Provide direct supervision for all procedures in PRCT 353 and PRCT 356. Provide indirect supervision for all procedures in PRCT 358 (at preceptor's discretion).
8. Ensure that the student follows hospital policies and procedures while under supervision.
9. Respect the student's values and opinions and work collaboratively towards successful patient outcomes.
