MRAD 360 – Clinical Integration 2

Patient Care and Professional Practice

Learning and becoming competent in the different aspects of patient care is a vital component of being a Medical Radiological Technologist. Meeting patient's needs and functioning as a responsible and valuable member of the healthcare team are important for providing quality healthcare.

Learning Outcome

Explain best practices of patient care and the skills required.

Tasks and Activities

Attempt the MRAD 360 - Patient Care - Medical Terminology Review Quiz in D2L. This activity is designed to help you review vocabulary required to describe physiological signs, pathological signs and symptoms that may be witnessed in a medical emergency.

Attempt the pre-tests associated with Patient Care - you first encountered these in MRAD 358. The following are in the Quiz tab in D2L.

MRAD 360 - Patient Care and Professional Practice - Communication Review

MRAD 360 - Patient Care and Professional Practice - Patient Safety

MRAD 360 - Patient Care and Professional Practice - Contrast Media and Pharmaceuticals

MRAD 360 - Patient Care and Professional Practice - Documentation Review

Complete: MRAD 360 - Patient Care Self-Test

Resources:

- Remember to review your course notes and textbooks.
- Review the appropriate links on the MRAD 360 Additional Resources

When you feel you are ready, you may attempt one of the three comprehensive quizzes (refer to the course schedule to see when each quiz is available). Each comprehensive quiz is worth 10%.
