Competency Assessment:
Logbook Requirements – Image Critique Logbook Entries

1. All exams listed in the logbook are intended to be completed in the clinical environment. Exams that may be simulated at the conclusion of PRCT 358 are considered to be ordered less frequently, or not performed at Edenbrook MRT partner sites. At the end of PRCT 358, students who did not perform those exams in their clinical placement will have the opportunity to get that procedure signed off under simulated conditions.
2. All exams are chosen in consultation with the clinical partners, to carefully consider the following;
    a. All students must be evaluated by identical gradable components, regardless of their placement.
    b. To provide students the opportunity to succeed, and not limit students by their placement.
    c. To ensure the logbook is reasonable and achievable based on frequency of clinical procedures, and in compliance with the sites' procedures.

Competency Assessment

Clinical Placement I, **10** competency assessments, image critique logbook lines
Clinical Placement II, **35** competency assessments, image critique logbook lines
Clinical Placement III, **30** competency assessments, image critique logbook lines

Total Competency Assessments, image critique logbook lines = **75**
Out of 75 required, 23 are simulated, 2 are observed, and 2 are assisted.

<u>Upper Extremity</u> = 8 Required

	# Required	CompTracker ID	Notes
Finger	1	IC-Finger	
Thumb	1	IC-Thumb	
Hand	1	IC-Hand	
Wrist	1	IC-Wrist	
Scaphoid	1	IC-Scaphoid	
Forearm	1	IC-Forearm	
Elbow	1	IC-Elbow	
Humerus	1	IC-Humerus	

<u>Shoulder Girdle</u> = 4 Required

	# Required	CompTracker ID	Notes
Clavicle	1	IC-Clavicle	
Shoulder (3+) projections	1	IC-Shoulder3+	
AC joints	1	IC-AC Joints	Sim
Scapula	1	IC-Scapula	Sim
