Laboratoire
Dr Renaud

History

1947 Laboratoire Dr Renaud is founded in France by visionary dermatologist and cosmetology pioneer Dr. Louis Raymond Renaud. He is the first to develop expertise in esthetic care and train carefully selected apprentices. He creates the profession of esthetician.

1963 Laboratoire Dr Renaud moves to Montreal.

2016 Laboratoire Dr Renaud, a leader in institute dermo-cosmetics, spreads throughout Canada, the United States and Asia.

What Makes Us Different

From its cutting-edge laboratories, Laboratoire Dr Renaud perfects exceptional products that are the fruit of continuous research and made with the best, most innovative active ingredients. The recognized efficacy of our products is due to their unique complex formulations. Our goal: to offer visible, lasting results.

The UNIQUE Program

The Unique Program is an innovative and powerful guidance tool. From skin analysis to our personalized beauty notebook and adapted treatment recommendations, it's a unique, tried-and-tested tool for fostering customer loyalty.

Fundamental Care Products

The foundation of any beauty ritual, the Fundamental care products contain Laboratoire Dr Renaud's phyto-effervescents. A major source of amino acids, vitamins, glycans and mineral salts, they fight various skin problems. Their diffusing power accelerates microcirculation to boost oxygenation at the cell level, ensure better active substance absorption and facilitate blackheads extraction.

Exclusive OPTIMAL Care Products

Our highly specialized OPTIMAL treatments are renowned for their effectiveness. A complete, five-treatment series targets specific issues to generate significant, lasting improvement. Optimal treatments are packaged in boxes with five ready-to-use trays. All products in the trays are packaged in hygienic, cost-effective and easy-to-use individual doses.

THE ESSENTIAL GESTURES

“With a beauty product,
it’s 50% about quality and 50%
about the aesthetician’s work.” *– Dr Renaud*

THE ESSENTIAL GESTURES

Cleansers

Skin hygiene: a crucial step

We recommend using suitable cleansing milk and lotion every day, even if your customer never or rarely wears make-up. To maintain truly healthy skin and a more youthful appearance, it is crucial to wash away natural secretions, make-up and environmental impurities every day. Furthermore, it has been proven that skin care products are much more effective when applied on clean skin. All Laboratoire Dr Renaud cleansers also have a treatment action. They respect the skin's ecology, preserving its acid pH and hydrolipidic film.

Optimal advice from your aesthetician

Tip #1
It is highly recommended that you have your skin cleansed by a professional aesthetician every three months.

Tip #2
Your skin changes with the seasons and the latitude at which you reside.
Your esthetician can help you find cleansing products to suit your needs.

Tip #1
Antipollution Cleansing Mousse, HydraPure Micellar Water and **Clear Up Cleansing Gel** can be used alternately with/or instead of cleansing milk.

Tip #2
It is important to use a cleanser twice a day, in the morning and at night.
In the morning, cleansers serve to brighten the complexion and highlight features, while at night they remove make-up, pollution and particles on the skin's surface.

Tip #3
For alipic and/or superficially or deeply dehydrated skin, recommend **HydraPure Micellar Water** to brighten the complexion in the morning, along with the appropriate cleansing milk at night.

Tip #4
Fast and precise, **HydraPure Micellar Water** is the most practical product for eye make-up touch-ups.

HydraPure Micellar Water

Three simple steps to persuade your customer in two minutes:

- Draw a line with a pencil on the back of your customer's hand.
- Wet a cotton pad with **HydraPure Micellar Water** and apply it to the line.
- Explain the product's benefits to your customer.
- Rub the line with the cotton pad and watch it disappear.

HydraCalm Cleansing Milk

Normal, dehydrated, fragilized, alipic and/or sensitive skin

Removes make-up and dissolves impurities

- Gentle make-up removal
- Removes deep impurities and protects skin against aggression from pollutants
  with Moringa oleifera extract
- Provides immediate and lasting hydration
  with organic sugar (Fucogel 1000®)
- Soothes the skin
- Effectively reduces itchiness and burning
- Prevents reactions
  with Tasmanian pepper extract

Tasmanian pepper extract:
Reduces itching by 79% in just five minutes
Reduces burning by 59% in just five minutes

"High-Tolerance" formulation

Hydrophilic emulsion with a delicate grapefruit fragrance
Retail size: 225 ml bottle with pump / Professional size: 1 L bottle

HydraCalm Toning Lotion

Normal, dehydrated, fragilized, alipic and/or sensitive skin

Toning lotion

- Soothes the skin
  Effective at reducing itching and burning sensation
  Prevents reactions
  with Tasmanian pepper extract
- Provides immediate and lasting hydration
  with Pentavitin®
  with organic sugar (Fucogel 1000®)

Tips from the pros

Top-quality toning effect
Pump the product once into the palm of your hand and spread over your whole face with your fingertips

- Can also be used as a compress for a quick soothing effect
- Serves as an excellent aftershave lotion for men

"High-Tolerance" formulation

Aqueous solution
Retail size: 225 ml bottle with pump / Professional size: 1 L bottle

SeboBalance Cleansing Fluid Milk

Oily skin

Removes make-up, dissolves impurities and purifies the epidermis

- Gentle make-up removal
- Eliminates excess sebum
- Purifies skin
- Dissolves impurities and protects skin against aggression from pollutants
  with Moringa oleifera extract
- Purifies the skin with mandarin and rosemary essential oils

Opalescent fluid gel-milk with mandarin and rosemary fragrance
Retail size: 225 ml bottle with pump / Professional size: 1 L bottle

SeboBalance Clarifying Lotion

Oily skin

Calms and purifies the epidermis

- Purifies, calms and refreshes
- Controls sebum production
  Reduces pore size
  with lentil extract
- Reduces and prevents pimples
  with biotechnological sugar
  with ethyl lactate
- Purifies skin
  with orange, rosemary and sage essential oils

Aqueous solution with orange, rosemary and sage fragrance
Retail size: 225 ml bottle with pump / Professional size: 1 L bottle

Clear Up Cleansing Gel 1

Acne-prone and problematic oily skin

Cleanses and helps control acne

- Cleanses
- Reduces whiteheads and blackheads
  Reduces the number of pimples
  Decreases inflammation
  Improves the penetration of key ingredients for faster results
  with 2% salicylic acid and 2% glycolic acid
- Purifies the skin
  with orange, rosemary and sage essential oils
- Non-drying

Slightly opalescent foaming gel with orange, rosemary and sage fragrance
Retail size: 200 ml tube

DermaBarrier

For normal, sensitive, alipic and/or dehydrated skin

A gentle sulfate-free cleansing cream that removes makeup and cleanses the epidermis while respecting the physiological balance of the skin

- Removes make-up and cleanses without drying out the skin
  with gentle cleansing agents, well-tolerated by the skin that do not have a delipidating action
- Improves the protective barrier, hydration, and contributes to the self-defense mechanism of the skin
  meadowfoam seed oil regulates the transepidermic water loss
  coconut triglycerides, promotes the immediate repair of the skin barrier
  with Niacinamide
- Provides a pleasant feeling of freshness and cleanliness, suppleness, and comfort

Tips from the pros

- Morning and/or evening, moisten the skin and apply a small amount of DERMABARRIER to the forehead, cheeks, chin, and neck. Moisten the fingertips and gently massage the face. Rinse thoroughly with warm, then cold water.
- DERMABARRIER can also be used in alternation with the appropriate cleansing milk, according to the aestheticians recommendation.

Retail size: 75 ml tube

Antipollution Cleansing Mousse

Normal to oily skin, combination skin and acne-prone skin

Cleanses and removes make-up without the need for soap

Biodegradable

- Cleanses
  Removes make-up
  with gentle cleansing agents
- Purifies
  Deeply decontaminates skin
  Dissolves impurities and protects skin against aggression from pollutants
  with Moringa oleifera extract
- Reduces redness and irritation
- Reduces and prevents pimples
  with biotechnological antibacterial sugar (Bioecocomplex)
- Makes skin supple, comfortable and soft

Liquid aqueous solution transforms into a light gentle foam in pump
Retail size: 50 ml bottle with pump / Professional size: 200 ml bottle with pump

HydraPure Micellar Water

Normal, combination, oily or comedonal acne-prone skin
Suitable for sensitive skin

Cleanses and removes eye and face make-up without rinsing

3-in-1 HydraPure Micellar Water is the most practical product for frequent travellers

- Cleanses and removes make-up
  with micelles
- Tones
  with witch hazel extract
- Provides immediate and lasting hydration
  with hyaluronic acid and organic sugar (Fucogel®)
- Calms and soothes
  with bisabolol

Ultra-fluid, water-like texture
Retail size: 150 ml bottle with pump

THE ESSENTIAL GESTURES

Exfoliants

Exfoliation: a necessary step for healthy, youthful and radiant skin

Over time, dead cells from the corneal layer accumulate on the skin's surface.
This has several consequences. Skin looks dull. It becomes dryer and rougher. It receives less oxygen and seems to lose its vitality. Wrinkles are more apparent. Dead skin cells can obstruct pores, leading to blackheads and whiteheads. It is important to eliminate excess dead skin cells with Laboratoire Dr Renaud exfoliants, to reveal skin that is:

- more radiant because of improved oxygenation
- smoother because exfoliation accelerates cellular renewal
- softer and silkier
- cleaner, since the skin is free of blackheads and whiteheads

Finally, any treatment will penetrate better when applied to adequately exfoliated skin. Key ingredients are more effective for better and faster results.

Persuade

Demonstrate the importance of exfoliation with the following test:

1. Apply a piece of adhesive tape to the back of the hand
2. Remove it
3. Hold the tape up to a light and point out the dead skin cells attached to the surface
4. Exfoliate the other hand with the appropriate product
5. Perform the tape test on the exfoliated hand
6. Compare the two pieces of tape

Satinage

Directions for home use

- Follow the directions for use in an institute
- After rinsing, apply the appropriate toning lotion
- Follow with your regular skin care routine

Directions for use at the institute

- Moisten fingertips and gently massage onto skin with circular movements for a few minutes. Avoid the eye area
- Rinse thoroughly with lukewarm water

Dermazyme

Once or twice a week in the morning or evening on thoroughly cleansed skin:

1. Apply a small amount of step 1. Do not rinse.
2. Next, apply step 2 over step 1. Then, gently lather, lightly massaging in a soft circular motion. Lather will form. Let the product work for 3 to 5 minutes.
3. To finish, wet your fingertips, and lightly massage for a few seconds. Rinse off gently. Delicately dry off the skin and proceed with your usual routine.

Peel Pads

- Each morning and evening, on thoroughly cleansed skin, gently wipe one pad over the entire face and neck, avoiding the eyelids and lips
- For sensitive skin
- Use once a day during the first week, then gradually increase use to twice a day
- It is normal to feel a temporary tingling sensation
- This will quickly fade

At home

Advice for your customers

Peel Pads
Use as a one-month treatment, 4 to 6 times a year, at the change of seasons or when your complexion lacks radiance.
For optimal results, follow use of **Peel Pads** with **InnovHyal Serum** and your usual cream. Then, apply **UV-Science SPF 30 Rich Emulsion** or **Fluid Lotion** and **Loose Powder SPF 50.**

Satinage Gentle Scrub

For all skin types except skin with couperose and thin, alipic and/or sensitive skin, often known as fragilized skin, including skin with signs of acne inflammation

A mechanical exfoliant — Triple-sphere technology for unequalled effectiveness

- Leaves skin silky and re-texturized
  Smoothes the epidermis and erases wrinkles, fine lines and acne scars
  Helps with discolouration, tightens pores and reveals a radiant complexion
  with three types of spheres in complementary sizes
  - bamboo spheres
  - jojoba spheres
  - diatomaceous spheres
- Soothes
  with caper flower bud extract
- Cleanses and purifies skin
  with a gentle, plant-based cleansing agent

Tips from the pros

- Never use a brush with Satinage on the face or neck
- Never apply Satinage on lesions or sunburned skin
- Never rub onto skin roughly or for a long time. Never use for more than three minutes on the face or neck. Ideally, you should exfoliate for one to two minutes.
- Never use a cosmetic peel before or after applying Satinage
- Always make sure to avoid the eye area and mucous membranes

Smooth, creamy and light foaming cream
Retail size: 60 g tube / Professional size: 200 ml tube

DermaZyme
2-Step Enzymatic Exfoliant

For all skin types, especially acne-prone, dehydrated, thin, couperose-prone skin, fragile, alipic and/or sensitive skin

2-Step Enzymatic Exfoliant for all skin types

- Step 1 gently exfoliates the skin
  Keratolytic enzymes
  Fruit acids (AHA of vegetal origin: pomegranate, starfruit, passion fruit, kiwi, mangosteen, pineapple, lychee, Indian jujube and guava)
  Tazman pepper to soothe skin.
- Step 2 has an effervescent texture that boosts enzymatic action, stimulates exchanges and energizes the skin
  VO2 Technology enhances cellular respiration and performs a deep cleansing of cells
  Moringa oleifera protects and purifies the skin

Tips from the pros

- Use DermaZyme once or twice a week for optimal results
- Keep hands slightly humid while applying step 2 for best oxygenation
- Never apply DermaZyme on injured, irritated or sunburned skin
- Never apply on the eyelids or mucous membranes
- Never massage vigorously or rub

Transparent gels
Retail size for Step 1 and Step 2: 30 ml airless pump

Peel Pads
Radiance & Texture – Triple Performance

For all skin types, including sensitive skin

Exfoliant with AHA complex and fruit enzymes

- Improves skin brightness in seconds
- Rejuvenates skin's appearance (wrinkles, fine lines, brown spots)
  with AHAs complex
  (lactic, glycolic, citric, tartaric and malic acids)
  8.6% AHAs; pH 4
  with fruit enzyme complex
- Moisturizes skin
  with glycolic acid and Pentavitin®
- Non-irritating
  with aloe vera and oat extract

Tips from the pros

Do not use:
- on broken or irritated skin
- after hair removal
- on sunburned skin
- after mechanical or chemical exfoliation
- after laser treatment

Discontinue use if signs of rash or irritation appear. Avoid contact with eyes and mucous membranes. If contact occurs, rinse immediately and thoroughly with fresh water. Consult a physician.

Pads pre-infused with kaffir lime fragrance
60-unit package for 30 days of twice-daily use

THE ESSENTIAL GESTURES

The HydraScience AHD³ Program for Dehydrated Skin

Optimal daily hydration: the key to youthful, healthy skin

Skin is made up of 70% water. It's the basis for all biochemical processes in the skin. The better the skin's hydration, the smoother, healthier, more radiant and more resistant to exterior aggression it becomes. To maintain or restore optimal hydration, three actions are necessary:

1. Maintain or restore a healthy cutaneous barrier
2. Moisturize superficially and deeply
3. Irrigate skin evenly with aquaporins

HydraScience takes control of all skin's hydration mechanisms for 100% superficially and deeply hydrated skin. Thanks to Laboratoire Dr Renaud's exclusive complex, HydraScience AHD³, skin is plumped, features are smoothed and skin appears more youthful.

Major active ingredients

ADH³ complex

Peptides, wild pansy extract and plant-based complex sugars

- Optimizes epidermal and dermal water reserves
- Optimizes the skin's barrier function
- Reboots aquaporin production to promote water circulation between skin cells

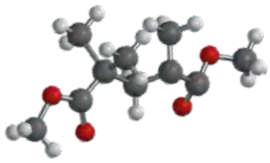

Reviviscence P.A. complex

Flower of stone, tamarind and trehalose extracts

- Guarantees optimal hydration for 24 hours, regardless of external conditions

Rhamnosoft® HP

Rhamnose

- Prevents inflammation
- Provides immediate and lasting relief to fragilized skin

Biomimetic lipids

Biomimetic Lipids

- Repair the cutaneous barrier
- Increase skin's resistance

Advice from your esthetician

At the institute

For visibly younger skin from the first treatment, recommend the **HydraScience AHD³ professional treatment** (see Optimal Professional Care section). The **HydraScience AHD³ professional treatment** is recommended for both intensive treatment and maintenance:

- At the change of seasons
- Before the summer or when travelling to the South to minimize the drying effects of swimming and sun
- Before any anti-ageing surgery to promote scar healing and recovery
- For anti-ageing prevention, as often as desired
- As needed for extreme dehydration
- After air travel, prolonged exposure to wind or cold, swimming in chlorinated water, fever, etc.

It is also an excellent preparation for all other professional treatments in the Laboratoire Dr Renaud Optimal Program. The **Ultra-Moisturizing Collagen Veil with hyaluronic acid** is recommended for a quick boost. It's especially suited to ageing skin with surface and/or deep dehydration.

Cleanse

HydraCalm Cleansing Milk
HydraCalm Lotion

See section on Cell'Defense Sun Care

THE ESSENTIAL GESTURES

The Tolérance Program for Sensitive, Reactive Skin

Soothes skin and regenerates defense mechanisms against external and internal aggression

---

More and more people are experiencing skin fragility or sensitivity. Alipic skin, in which the cutaneous barrier is significantly altered, is particularly affected. However, the problem is becoming more frequent in combination and oily skins as well. Fragilized skin is irritable, reactive, intolerant and hypersensitive. It overreacts to cold in winter and to wind, UV rays, pollution and stress year-round. Faced with internal or external aggression, fragilized skin becomes dry, red, tight and itchy, and marks easily. To eliminate these problems, it is crucial to restore the skin's barrier function and reinforce its internal defense mechanisms.

TOLÉRANCE skin care products instantly calm skin. Skin quickly becomes visibly stronger and more resistant. Reactivity is decreased.

Major active ingredients

DEFENSIL® Soothing plant complex

Balloon plant, purple viper's bugloss seed oil, sunflower unsaponifiables

- Reinforces the skin's own defense mechanisms
- Restores the cutaneous barrier's shield function

Caper flower bud extract

Caper bud extract

- Decreases the skin's reactivity to external and internal aggression

AquaCacteen

Prickly pear extract

- Instantly calms and soothes
- Increases the skin's resistance

ExperMoist

Marine microorganism extract + amino acids

- Increases the skin's hydration rate by 90% in just 14 days of treatment

Cleanse

HydraCalm Cleansing Milk or HydraCalm Lotion **DermaPure Gentle Cleansing Foam**

Advice for your customer

Tolérance skin care products provide exceptional complementary care after the use of irritating cosmetic products, prolonged exposure to cold or wind or any other circumstances that require calming care.

Sun awareness

Always keep your skin protected with **UV-Science SPF 30 Daily High Protection, UV-Science SPF 30 Fluid Lotion, Moisturizing Anti-Wrinkle Suncare SPF 30** or **Loose Powder SPF 50 Broad Spectrum**

See section on Cell'Defense Sun Care

THE ESSENTIAL GESTURES

The SeboBalance Program for adults with oily skin

Sebaceous hypersecretion doesn't just affect young skin. In fact, many adults also experience hyperseborrhea. Many adult women regularly experience "mini acne," often on the chin. This usually occurs before or during menstruation. During the premenopausal period, skin temporarily becomes oilier and displays imperfections. These skin types require products that reduce shine, moisturize and protect against the effects of skin ageing. This is the objective of the SeboBalance range.

The ideal program for adults with oily skin. Skin is mattified, imperfections disappear, facial features are relaxed and contours are better defined.

Advice for your customer

At home

SeboBalance 24H Anti-Ageing Fluid is also recommended for normal or combination skin in the summer or in hot, damp climates. Because pimples can appear at any moment, make sure you have **Spot Control Gel** in your beauty bag.

Oily skin treatment program

Cleanse

- Cleanse your face and neck with the cleansers recommended by your esthetician.

See section on Cleansers

Serum

Maximize your treatment with serum adapted to your skin's needs

See section on Expert Serums

Target

SeboBalance 24H Anti-Ageing Fluid

For oily and shiny skin, including sensitive oily skin, at the first signs of ageing

Anti-ageing care for oily skin

- Instant, lasting mattification
  with ultra-fine Sepimat powder
  with an amino acid derivative rich in sarcosine
- Reduces imperfections
  Prevents pimples
  with astragalus extract
- Prevents ageing
  with Venuceane™, an active bioprotector
  with resveratrol
- Replenishes skin's radiance and luminosity
  with Perfection Peptide P3, a tripeptide
- Provides advanced, lasting moisture
  with Pentavitin®
  with plant-based Fucogel 1000®

Ultra-fine Sepimat powder absorbs up to 70% of its weight in sebum

Light, non-oily emulgel
Retail size: 50 ml airless tube with pump

SeboBalance Skin Moisturizing Repair

For oily, comedonal acne-prone skin

For all skin types with acne lesions and/or burns, insect bites and lesions from esthetic medicine treatments

- Accelerates scar healing
  with Centella Asiatica extract
- Repairs
  with Resveratrol (Metabiotics Resveratrol)
- Provides advanced, lasting moisture
  with Pseudoalteromonas Antarctica extract
  with plant-based Fucogel 1000®
  with liquid crystal emulgel
- Instant, lasting mattifier
  with an amino acid derivative rich in sarcosine
  (Mat XS Clinical, largely superior in power to zinc derivatives)

Accelerates scar healing time by 40%
+90% hydration after 14 days of treatment

Tips from the pros

For acne-prone skin with lesions in the scarring phase. Apply Skin Moisturizing Repair at night only, on carefully cleansed skin. Apply two pumps of Skin Moisturizing Repair to face and neck. Massage in with light effleurage. For normal skin damaged and irritated by burns, insect bites and lesions from esthetic medicine treatments. For fast action, apply morning and night to thoroughly cleansed skin. Use two pumps. Massage in with light effleurage.

Soft, creamy emulgel with mandarin and rosemary fragrance
Retail size: 50 ml airless tube with pump

Exfoliate

For more effective, faster results, exfoliate with the product recommended by your aesthetician

See section on Cell'Defense Sun Care

THE ESSENTIAL GESTURES
Skin Ageing Prevention Program

To keep skin looking younger longer, it's crucial to protect against free radicals, the main cause of skin ageing. Free radicals are generated by exposure to UV rays, pollution and other oxidative stressors. Good protection starts with a healthy cutaneous barrier. Next, the skin should be protected against the effects of solar radiation, pollution and stress. Its natural defenses against daily aggressors should be boosted, and free radicals should be neutralized to limit their damaging effects.

To keep skin youthful, it must be protected during the day and allowed to recuperate at night

Cleanse

Cleanse face and neck thoroughly with the cleansing products recommended by your aesthetician

See section on Cleansers

Serum

Maximize your treatment with a serum that is suited to your needs

See section on Expert Serums

Target Day

Énergie Vitale Energizing
Multivitamin Day Cream

For all skin types, even the most sensitive,
except very oily and acne-prone skin

Energizing multivitamin day cream
Provides a healthy, rested and relaxed appearance

- Restores vitality and radiance
  with a cocktail of vitamins and mineral salts
  (Vitamin E, vitamin A, calcium, magnesium, potassium and silicon)
- Provides a healthy, rested and relaxed appearance
  with beech bud extract
- Provides lasting hydration
  with liquid crystals, potassium, essential fatty acids and shea butter

An energy-boosting breakfast for your skin. Ideal as a complementary product in periods of stress or fatigue, or following exposure to polluted environments.

Oil-in-water emulsion with a light, creamy texture
Retail size: 50 ml airless tube with pump

Prevention Collagene

For all skin types, even the most sensitive, except very oily and acne-prone skin

Target Evening

Reparative night cream for young skin

- Reinforces nighttime defenses
  with native acid-soluble collagen
- Optimizes cellular repair
  with a combination of elastin peptides and silicon derivatives
- Stimulates collagen production
  with vitamin C (MAP)
- Protects the collagen network
  with argan tree leaf extract
- Hydrates
  with Pentavitin®

Oil-in-water emulsion
Retail size: 50 ml airless tube with pump / Professional size: 200 ml tube

Natigène Collagen gel

For all skin types

Target Day/Night

Smoothes features and repairs

- Smoothes features
  Slows signs of ageing
  Attenuates imperfections
  with native acid-soluble collagen
- Gives the skin new suppleness and softness
  with a moisturizing complex (amino acids, urea, lactates, lactic acid)

Transparent gel
Retail size: 50 ml airless tube with pump / Professional size: 200 ml tube

See section on Cell'Defense Sun Care

THE ESSENTIAL GESTURES

ExCellience Skin Ageing Correction Program

At the origin of **ExCellience** skin care products is the incredible, nearly unlimited renewal power of stem cells. Skin stem cells, or mother cells, are responsible for epidermal regeneration, the constant renewal of the epidermis. Representing just one cell out of ten, they are extremely precious. These cells live in a special microenvironment that preserves their functions. Over time, the number of stem cells in the skin decreases. They are no longer able to ensure sufficient cellular renewal. Wrinkles form. ExCellience youth enhancers recreate an optimal environment for skin cells to preserve their regeneration and repair functions. Production of essential dermal and epidermal components is ensured.

ExCellience youth enhancers smooth the skin by filling wrinkles from within.

Major active ingredients

Apple PhytoCellTec®
Argan PhytoCellTec®

Argan and Swiss apple

- Recreate an optimal environment for skin stem cells
- Smooth skin by filling wrinkles from within
- Tone and firm skin

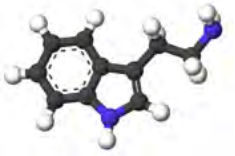

Orsirtine

Plant-based active ingredient extracted from rice

- Boosts the production of sirtuins, the cell's "longevity enzymes"
- Preserves optimal skin cell function
- Protects cellular DNA

Chronoline

Chronoline

- Strengthens collagen's anchoring powers
- Repositions skin volumes
- Repairs the epidermal junction

The ExCellience program

Cleanse

Cleanse face and neck thoroughly with the hygiene products recommended by your esthetician

ExCellience Youth Enhancer with M²PE-Night

35+

Target Night

Original Fragrance, Night:
Geranium, lavender, rosewood. Smooths the face by filling wrinkles from within

ADD increases penetration of actives with M²PE technology

- Recreates an optimal environment for skin stem cells
  Smooths, tones and firms skin
  with PhytoCellTec® argan
- Prolongs skin's youthful appearance
  with orsirtine, a rice extract
- Firms skin
  with high-performance active ingredients Dermican, ChroNOline, Arganyl and Eurol BT
- Hydrates
  with Pentavitin® and Filaggryl, a protein

M²PE™ technology (multiplexed molecular penetration enhancers) consists of a combination of FDA-approved excipients that allow active ingredients to better penetrate the skin. It's required four years of medical research and seven million dollars in investment. It is the unique patented technology of Crescita Therapeutics, owner and manufacturer of Laboratoire Dr Renaud skin (patent no. US8343962B2: topical formulation, expiring in March 2027).

Light and creamy oil-in-water emulsion
Retail size: 50 ml airless tube

Mask	To enhance results, use the mask recommended by your esthetician See section on Masks
Treatment	To enhance results, use the home treatment recommended by your esthetician
Eye Contour	Care for your eye area with the Eye Contour Cream adapted to your needs See section on Eye Contour Care

ESSENTIAL GESTURES
Mature Skin Regeneration Program

In addition to having wrinkles, mature skin is in lack of volume and density. Volume loss is associated with the slackening of facial contours, subtly transforming facial expressions and making you look negative, sad, tired or stressed. Common among postmenopausal women, signs of a loss in density include thinner, weakened skin. Density loss is generally associated with deeper wrinkles, a lack of radiance and a dull complexion.

Regeneration program for mature skin

Cleanse

Cleanse face and neck thoroughly with the hygiene products recommended by your aesthetician

See section on Cleansers

Serum

Maximize your treatment with a serum that is suited to your needs

See section on Expert Serums

Target Day

Haute Régénération Pro-Collagen IntenseLift Cream

For all skin types, even the most sensitive, except very oily and acne-prone skin
Especially suitable for mature, demanding, devitalized and/or tired skin

Fights visible signs of slackening and deep wrinkles

- Remodels the oval of the face
  Readjusts volume
  Lifts skin
  Fills wrinkles and fine lines from within
  with Pro-Collagen IntenseLift Complex
  (combination of natural peptides and proteins)
- Protects skin against the damaging effects of UV and infrared rays
  with Venuceane™ complex
- Protects collagen and elastin fibres
  with olive leaf extract
- Provides lasting hydration
  with Pentavitin®
- Restores lipids
  with a cocktail of fine precious oils
  (inca inchi, avocado, grapeseed and argan)
  with shea and mango butters

Decreases wrinkle depth: -29% in just one month

Like a surgery-free facelift, **Haute Régénération Pro-Collagen IntenseLift Cream** remodels the face and replenishes volume.

Oil-in-water emulsion (100% virgin natural oils)
Smooth, creamy emulsion with chamomile, orange, ylang-ylang, lavender and rose absolute
Retail size: 50 ml airless tube with pump / Professional size: 200 ml

LIFT JEUNESSE with M²PE™

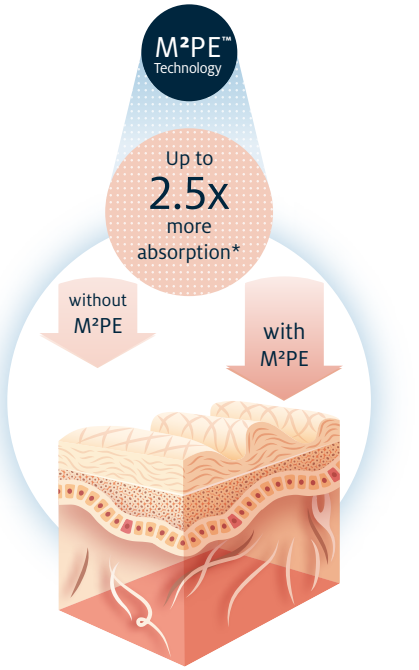

Intense restructuring night care
For all skin types, even the most sensitive, except very oily and acne-prone skin
Especially suitable for mature, demanding, devitalized and/or tired skin

Target Night

Fights visible signs of slackening and deep wrinkles. Detoxifies the skin for enhanced action. Use in combination with Haute Régénération day care.

- Remodels the oval of the face
  Readjusts volume
  Lifts skin
  Fills wrinkles and fine lines from within
  with Pro-Collagen IntenseLift Complex
  (combination of natural peptides and proteins)
- Visibly lifts features
  with pro-elastin lipopeptide
- Corrects signs of fatigue
  (look of fatigue, dull complexion, lack of radiance, bags and dark circles)
  with Persian silk tree extract
- Restores lipids
  with a cocktail of fine precious oils and 100% natural active ingredients
  (Omega-3; floral caper bud extracts; flaxseed extract; pomegranate and musk rose oils; mimosa, jojoba and sunflower waxes)

M²PE™ technology (multiplexed molecular penetration enhancers) consists of a combination of FDA-approved excipients that allow active ingredients to better penetrate the skin. It's required four years of medical research and seven million dollars in investment. It is the unique patented technology of Crescita Therapeutics, owner and manufacturer of Laboratoire Dr Renaud skin (patent no. US8343962B2: topical formulation, expiring in March 2027).

How it works
By temporarily altering the skin without using abrasive or invasive means, M²PE™ technology increases the skin's absorption of active ingredients and provides optimal effectiveness by targeting the sites of action, without damaging the skin. Once the product is applied, thousands of small channels quickly form on the skin's surface, and the active ingredients go through them to penetrate into the skin. These channels close up on their own within four hours of the product's application, leaving ample time for the concentrated active ingredients to penetrate and reach their sites of action.

Tips from the pros

Apply one of the three Laboratoire Dr Renaud Expert Serums before applying Restructuring intense Lift Jeunesse with M²PE™. The M²PE™ technology will maximize the efficiency of the Serum!

Rich, creamy oil-in water emulsion with rose and citrus fragrance
Retail size: 50 ml airless tube with pump

Sun awareness

Always keep your skin protected with **UV-Science SPF 30 Daily High Protection, UV-Science SPF 30 Fluid Lotion, Moisturizing Anti-Wrinkle Suncare SPF 30** or **Loose Powder SPF 50 Broad Spectrum**

See section on Cell'Defense Sun Care

Regenerating Youth Emulsion

Triple Lipid emulsion is specifically formulated to offset the effects of hormonal imbalance surrounding perimenopause and menopause. It is also an excellent choice for anyone with dry skin regardless of age or the origin of the dryness.

Target 24H

Triple Lipid contains the 3 essential skin lipids in an optimal 1: 2: 1 ratio

- Restores and regenerates the skin's essential lipids with ceramides, natural cholesterol and fatty acids
- Reshapes and reinforces the skin barrier of dry skin
- Increases elasticity; improves skin texture; diminishes the appearance of wrinkles and pores
- Helps reduce the appearance of discolouration; evens skin tone; restores radiance
- Provides even more moisturization over a 24-hour period; ideal for dry skin with niacinamide
- Restores the skin's functional immune barrier and rebalances the flora of mature skin with Ecobiotys

Soft and light oil-in-water emulsion, ultra-moisturizing "comfort" texture.
It's also an excellent make-up base with a natural aroma of rose extract.
Retail size: 50 ml airless tube with pump

Exfoliate

For more effective, faster results, exfoliate with the product recommended by your esthetician

Mask

To maximize the results, use the mask recommended by your esthetician

See section on Masks

Eye Contour

Care for your eye area with the Eye Care product adapted to your needs

See section on Eye Contour Care

Retinol 0.22
with POLY-PORE® technology - Time-release retinol

Age correction and protection

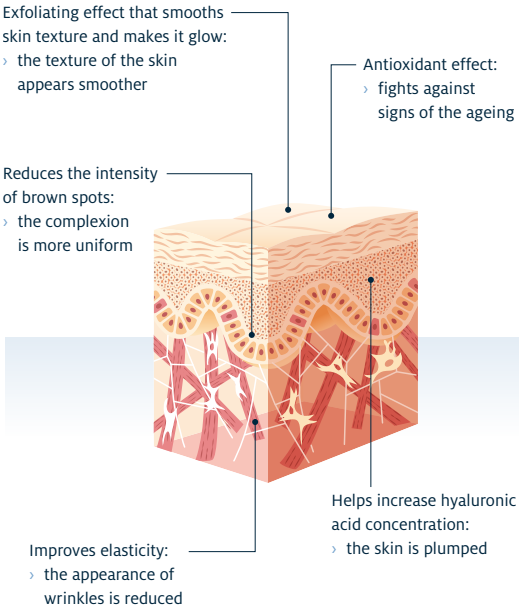

Target Night

Retinol
Retinol, vitamin A in its purest form and a precursor to retinoic acid, is essential for the maintenance of normal and healthy skin. It quickly revitalizes the appearance of ageing skin that has been damaged by the sun by increasing cell renewal and stimulating collagen synthesis.

Retinol 0.22 by Laboratoire Dr Renaud is formulated with pure retinol in a protective time-release form. The encapsulated retinol is gradually released, refining and smoothing the appearance of the skin's heterogeneous texture and tone, revealing a younger-looking skin, with minimal irritation.

The effects of retinol on the skin

On the surface:
- Provides an exfoliating effect that smooths skin texture and makes it glow
- Provides an antioxidant effect
- Regulates melanocytes: reduces the intensity of brown spots

In the deeper dermal layer:
- Stimulates collagen and elastin production
- Increases hyaluronic acid concentration

Tips from the pros

RETINOL 0.22 is used as a treatment, in the evening only, on skin that has been thoroughly cleansed.

IMPORTANT: Since retinol makes the skin photosensitive, use sunscreen of minimum SPF 30 during the day. Avoid the use of exfoliants throughout the duration of the retinol treatment. Absolutely avoid the eyes and the corners of the eyes.

Warning: Note that it is not recommended that retinol be used if you are or plan to become pregnant, or if you are breastfeeding. If you are pregnant or breastfeeding, consult your doctor before using any product containing retinol. Although no studies have shown any adverse effects of topical retinol on the development of the fetus, problems have been observed with the ingestion of retinoic acid.

Light emulsion, cosmetological form ideal for optimal performance, biocompatibility and stability.
Retail size: 30 ml aluminum tube with shutter

Sun awareness

Always keep your skin protected with **UV-Science SPF 30 Daily High Protection, UV-Science SPF 30 Fluid Lotion, Moisturizing Anti-Wrinkle Suncare SPF 30** or **Loose Powder SPF 50 Broad Spectrum**

See section on Cell'Defense Sun Care

ESSENTIAL GESTURES
Eye Contour Care

The epidermis of the eye contour is three times thinner than that of the rest of the face. It endures constant strain. You blink 10,000 times a day to ensure good distribution of the lacrimal fluid in the eyes. The thinness of the eye contour area, along with the extreme mobility of the eyelids, increases its fragility. There are no fewer than 22 muscles in the eye area, 14 of which are active every 10 seconds. These repeated contractions make the area vulnerable to the formation of wrinkles and fine lines. With time and fatigue, the eye contour area is less and less able to perform its detoxification and repair functions. Dark circles and bags appear. The eyelids droop and wrinkles become deeper. Your eye area loses its youthful look.

Optimal advice for your customer

At the institute

Beautifying Eye Care professional treatment is ideal for erasing signs of fatigue and reducing signs of premature eye contour ageing. Its unique formula contains powerful, biocompatible active ingredients that have been carefully selected. Use alone or with the recommended fundamental care products.

At home

For a smooth, fresh and restored eye area, apply **Multi-Active Eye Contour Tensor** in the morning and **Eye Contour Cream**, a complete anti-fatigue and anti-wrinkle corrector, at night. **CC Cream Instant Eye Multi-Corrector** is the ideal product for instantly brightening and illuminating the eye area before you go out. It fades all signs of fatigue in the eye contour area in seconds.

Laboratoire Dr Renaud Eye Area Care Products

Dual-Phase Eye & Lip Make-Up Remover

Adapted formulation for sensitive eyes and contact lens wearers

Removes make-up and strengthens lashes

- Removes all types of make-up, including long-lasting and water-resistant formulations
- Leaves the eyelids feeling fresh and rested
- Fortifies lashes
- Promotes eyelash growth
  with D-panthenol and pro-vitamin B5
- Superior translucent phase composed of gentle oils to dissolve the most resistant make-up
- Bluish phase eliminates all residue

Tips from the pros

Shake bottle before each use. Soak a cotton pad with product and gently wipe eyelashes (from root to tip) and eyelids, keeping the eyes closed. Do not rub. Use a new cotton pad for each eye, and for the lips.

Retail size: 135 ml bottle / Professional size: 350 ml

CC Cream Instant Eye Multi-Corrector

For all skin types, even the most sensitive

Corrects the colour of dark circles, smooths and brightens the eye area

- Corrects the colour of dark circles
  with high-definition pigments
- Erases signs of fatigue
  with Persian silk tree extract
- Reduces the appearance of bags
  with natural horse chestnut extract
- Reduces the appearance of wrinkles
  with hyaluronic acid (high molecular weight; cross-linked)

Corrects dark circles: -40%
Corrects bags: -37%
Corrects signs of fatigue: +51% improvement
In vivo study – 20 volunteers between 31 and 50 years of age – 2 months

Tips from the pros

The ceramic applicator, specially designed for the eye contour, is extremely practical. In the morning or before going out, on thoroughly cleansed skin, gently press the tube to release a small amount of product, the size of half a grain of rice. With the ceramic tip, apply the product under the eye from the inner corner to the outer corner. Dab gently with fingertips until fully absorbed.

Non-oily emulgel in a 15 ml tube with ceramic tip

Eye Contour Cream

For all skin types, even the most sensitive

Reduces the appearance of permanent wrinkles, contraction wrinkles and bags

- Effectively decongests and drains eye contour area
  with a natural blend of alfalfa and white lupine
- Firms and tones skin and improves the appearance of permanent wrinkles
  with a natural blend of alfalfa and white lupine
- Diminishes the look of expression lines
  with Argireline (Botox effect)
- Effectively fights cutaneous ageing
  with vitamin E
- Hydrates
  with hyaluronic acid
- Reinforces cutaneous elasticity
  with horsetail butter

Immediately penetrates skin leaving no sticky film

Corrects dark circles: -40%
Corrects bags: -37%
Corrects signs of fatigue: +51% improvement
In vivo study – 20 volunteers between 31 and 50 years of age – 2 months

Oil-in-water emulsion in 15 ml airless bottle with pump

ESSENTIAL GESTURES

Masks

Concentrated beauty care

Unlike serums or creams, masks should be used occasionally, once or twice a week on cleansed skin. Face masks are designed to address a specific skin problem. They are standalone products. Masks can complement a care routine or serve as a flash product to apply before a special event, etc. They are most effective when applied after a scrub.

HydraCalm Moisturizing, Soothing Mask

For all skin types, with the exception of oily skin and asphyxiated, acne-prone skin

Calms and provides advanced hydration
Anti-stress hydrating concentrate

- Provides advanced hydration
  with wild pansy extract and hyaluronic acid
- Calms skin intensely, with lasting effects
  Reduces skin sensitivity and reactivity
  Restores skin's balance, well-being and comfort under stress
  with Tasmanian pepper extract
- Reinforces the skin's natural protection and defense mechanisms
  with ceramides

Tips from the pros

Once or twice a week or in case of stress, apply a medium-sized layer of HydraCalm Mask to the face and neck after thorough cleansing. Leave on for 15 to 20 minutes. Then, massage in excess product or delicately remove it with a damp cotton pad. Do not rinse. Apply the day or night cream recommended by your esthetician as needed.

Retail size: 60 g tube / Professional size: 200 g

SeboBalance Purifying Sebo-absorbing Mask

For oily, acne-prone and comedonal skin

Purifies skin and absorbs excess sebum

- Absorbs excess sebum
  with volcanic clay
- Eliminates blackheads and whiteheads
  with salicylic acid (1%)
- Prevents and reduces pimples
  with oleanolic acid and nordihydroguaiaretic acid
- Soothes
- Softens skin
- Provides a feeling of freshness and comfort

Tips from the pros

Leave on for 10 to 20 minutes, then rinse thoroughly with warm water, then with cold water. The mask may stain white and light-coloured fabrics.

High-tolerance formulation

Creamy greyish-purple paste with orange, rosemary and sage fragrance
Retail size: 60-g tube/Professional size: 200 g

ExCellience “Lifting” Anti-Fatigue Tissue Mask

For women and men with any skin type, even sensitive skin

Tissue mask with instant lifting and anti-fatigue effects

- Reduces signs of fatigue
- Hydrates
  with hyaluronic acid
- Smooths wrinkles and fine lines
  with apple PhytoCellTec®
- Tightens features
  with 100% natural sugar tensors derived from oats

Tips from the pros

Use once or twice a week
Use as desired to add radiance before an evening out or special occasion

- Cleanse face and neck thoroughly
- Open the aluminum pouch and unfold the tissue mask
- Apply the largest surface to the entire face and fix it in place by attaching the cut-out sections around the ears
- Adjust the lower part at the chin and readjust behind the ears
- Leave on for 15 to 20 minutes
- Remove the mask and gently massage in excess serum
- Do not rinse

Specifically designed to bond perfectly to facial contours and chin to allow for better interaction between active ingredients and skin. Packaged in an aluminum pouch for optimal protection. Keep away from direct sunlight.
Retail size: Box of 10 masks

THE ESSENTIAL GESTURES

Expert Serums

Choice products for targeted results

Serums contain concentrated active ingredients to target specific needs for a cutting-edge skin care routine. They are also ideal for when skin "slows down" because of major fatigue or changing seasons. If you notice that your regular cream isn't working as well as it usually does, it is time to start using a serum. It will make your skin care routine effective again. Choose a serum based on your skin's needs. Laboratoire Dr Renaud serums offer concentrated power with a light, fluid texture. They penetrate quickly and act immediately to tackle specific needs such as wrinkles, hydration, firmness and radiance.

InnovHyal^{Ha} Volumizing HydraSerum

For all skin types
Women and men

A cosmetic alternative to hyaluronic acid injections

- Adds volume by increasing hyaluronic acid (synthesis and protection)
  Fills wrinkles by stimulating collagen production and protection
  Reinforces the dermo-epidermal junction (support and exchange)
  Prevents skin ageing
  with InnovHyal^{HA} technology
- Plumps skin with high-molecular-weight hyaluronic acid
- Guarantees even, optimal and deep hydration
  with an expert hexapeptide
  with Pseudoalteromonas antarctica extract

Tips from the pros

InnovHyal^{HA} Volumizing HydraSerum is especially recommended as an alternative to dermal filling techniques used in esthetic medicine. For those who opt for such techniques, **InnovHyal^{HA} Volumizing HydraSerum** can reduce treatment frequency. **InnovHyal^{HA} Volumizing HydraSerum** is used as a treatment. Apply twice daily until the bottle is empty.

Light solution
Retail size: 30 ml bottle with pump

InnovHyal^{Ha} Volumizing HydraCream

For all skin types, even the most sensitive ones

A cosmetic alternative to hyaluronic acid injections

- Adds volume by increasing hyaluronic acid (synthesis and protection)
  Fills wrinkles by stimulating collagen production and protection
  Reinforces the dermo-epidermal junction (support and exchange)
  Prevents skin ageing
  with InnovHyal^{HA} technology
- Plumps skin with high-molecular-weight hyaluronic acid
- Immediate filling effect with encapsulated high-molecular-weight hyaluronic acid
- Deep hydration with low molecular weight hyaluronic acid and wild pansy extract
- Improves skin's elasticity, smooths, hydrates, and protects
  tamarind Seed Extract
  ceramides
- Corrects signs of ageing
  niacinamide

Tips from the pros

- **InnovHyal^{HA} Volumising HydraCream** is used daily as a cure, morning and evening
- Apply in combination with Innovhyal HydraSerum for best results

Retail size: 50 ml jar

10% Vitamin C Serum
L-Ascorbic Acid with M²PE™ Technology

For all skin types, even the most sensitive

For all stages of ageing: Prevention - Correction- Regeneration

- Reduces signs of skin ageing
- Prevents and corrects photoaging
- Stimulates collagen production
- Brightens and evens skin tone
  with L-ascorbic acid (pure Vitamin C)
- Amplification of the absorption of key ingredients in the skin to their sites of action for optimized efficiency.
  with M²PE™ technology

The **10% Vitamin C Serum** is used as a daytime and nighttime treatment on perfectly cleansed skin.

Tips from the pros

Once the skin is thoroughly clean, put 5 drops of **10% Vitamin C Serum** to the palm of your hand. Apply on the face and neck. To cover the décolleté area, apply 5 more drops. Make the product penetrate the skin with light effleurage. Next, apply your usual day or night cream. For daytime, follow with a sunscreen with a minimum protection of SPF 30.

Note: Some people might feel some slight tingling when they apply the **10% Vitamin C Serum.** This sensation decreases with continuous use of the product.

Laboratoire Dr Renaud's 10% Vitamin C (L-ascorbic acid) is formulated at a natural pH of 3.1. This allows the vitamin C to remain active and be easily absorbed through the skin. This product is presented in a colored glass container to maximize the protection of the molecule. Once it is opened, the container should be placed away from light and any source of heat. Use within 6 months after opening.

M²PE™ technology (multiplexed molecular penetration enhancers) consists of a combination of FDA-approved excipients that allow active ingredients to better penetrate the skin. It's required four years of medical research and seven million dollars in investment. It is the unique patented technology of Crescita Therapeutics, owner and manufacturer of Laboratoire Dr Renaud skin (patent no. US8343962B2: topical formulation, expiring in March 2027).

Concentrated solution with optimal biocompatibility and stability
Retail size: tinted 30 ml glass bottle with a dropper top

ExCellience
CellClock Cellular Youth Serum

For all skin types

Intensively repairs skin: wrinkles are reduced,
firmness and elasticity are increased,
the complexion is luminous, and features are restored

- Fills wrinkles by promoting cellular repair
  with apple and argan PhytoCellTec®
- Improves elasticity and firmness by replenishing the vitality of fibroblasts
  with skullcap extract (Scutellaria, a flowering plant of the mint family)
- Maintains the elasticity and firmness of skin by protecting collagen and elastin
  with an amino acid derived from rye
- Prolongs skin's youthful appearance
  with rice extract
- Teaches skin to resume its protective role during the day and regenerate at night
- Improves fatigued-looking skin
  Compensates for diminished radiance
  with Persian silk tree extract

Aqueous solution with orange fragrance
Retail size: 30 ml bottle with pump

Omega-3 Lipid Replenishing Serum

For alipic, dry or very dry skin
For sensitive or irritated skin

Replenishing, nourishing, repairing and calming serum
Can be mixed with any other product

- Nourishes and repairs
  Hydrates
  Protects
  Increases skin's elasticity
  with Inca Inchi, pomegranate and argan oils
- Soothes and calms
  with caper bud extract

Tips from the pros

Omega-3 Lipid Replenishing Serum is best used as a four-to eight-week treatment. Morning and evening, after cleansing skin thoroughly, use your fingertips to mix the serum (one or two pumps) in the palm of your hand with the Laboratoire Dr Renaud day or night cream recommended by your esthetician. Omega-3 Lipid Replenishing Serum can also be used as needed.

Oil-based solution with orange fragrance
Retail size: 30 ml bottle with pump / Professional size: 12-vial box

AHA Refining & Renewing Serum

For hyperkeratinized, xerotic, ageing or hyperpigmented skin. For oily, comedonal and acne-prone skin. For keratosis pilaris.

Safe formulation with a progressive refining action
8% AHAs – pH 3.5 for maximum effectiveness
Non-irritating – Hydrating

Restores and refines skin
Restores radiance to dull complexions

- Smooths wrinkles and fine lines
- Reinforces skin's radiance
- Reduces brown spots
- Refines skin's texture
- Restores suppleness, softness and elasticity with a blend of five AHAs (glycolic, lactic, citric, malic and tartaric acids)
- Instantly hydrates with Pentavitin® and Fucogel 1000® for lasting results

AHA Refining & Renewing Serum is recommended as a twice-daily treatment, either alone or with your usual skin care products, until the bottle is empty.

AHA Refining & Renewing Serum recommended dosage table

Recommended dosage

	First 4 weeks	Next 2-4 weeks
Thinly textured skin		
Morning	1 application	1 application
Evening	1 application	1 application
Normal-textured skin		
Morning	1 application	1 application
Evening	2 applications*	1 application
Thick-textured skin		
Morning	2 applications*	1 application
Evening	2 applications*	1 application

*If 2 applications are required, let the product dry for 2 to 3 minutes between applications.

Avoid sun exposure during an AHAs treatment. If your skin is exposed to the sun during the treatment, keep your skin protected with UV-Science SPF 30 Daily High Protection, UV-Science SPF 30 Fluid Lotion, Moisturizing Anti-Wrinkle Suncare SPF 30 or Loose Powder SPF 50 Broad Spectrum.

Aqueous solution
Retail size: 30 ml bottle with pump

Céleste Smoothing, Perfecting Elixir

  with Chromocare™ technology
- Decreases the intensity of brown spots
  with saxifrage and oughon extracts
- Brightens and boots the complexion's radiance
  with grape extract
- Provides intense, lasting hydration
  with hyaluronic acid

Céleste serum is used as a treatment, preferably several times a year

Emulgel
Ultra-light, velvety and creamy texture
Retail size: 30 ml measured-dose bottle

ESSENTIAL GESTURES

Universal Skin Care

Products for every beauty bag

Laboratoire Dr Renaud offers a selection of must-have products for every customer's beauty bag. Keep **SeboBalance Spot Control Gel** on you at all times: you never know when a pimple might pop up! **Double Action** cream is ideal for protecting your whole family's skin when the temperature drops to 40°C below. Look like you've just come from the beach in the middle of February with **Liquid Sunshine**, and freshen up a fatigued complexion with **Colour Glow Complexion Creator.**

SeboBalance Spot Control Gel

Oily skin with pimples, acne-prone skin
And all other skin types with occasional pimples

Makes pimples disappear

- Reduces blackheads and whiteheads
  with salicylic acid (1%)
  with AHA-Arginine Complexe (2% glycolic acid)
- Reduces imperfections and irritation
  with Bioecocomplexe
- Purifies the skin
  with a vegetal complex
- Eliminates P. acnes and limits inflammation
  with boldo extract
- Limits inflammation
  with polysaccharides from algae extracts
- Hydrate
  with arginine

Tips from the pros

Apply under and over make-up. Use on pimples as often as necessary. For women and men.

Clear aqueous solution with a light gel-like texture
Packaged in a small roll-on bottle for hygienic, precise application on each blemish
Retail size: 8 ml roll-on bottle

Colour Glow Complexion Creator

For all skin types, including oily and sensitive skin

Mineral pigment concentrate that transforms any cream into a custom-tinted moisturizer

- Provides a healthy look
- Instantly evens the complexion
- Boosts radiance
  with concentrated mineral pigments
- Blends into any product

Tips from the pros

Add a small amount of Colour Glow, about the size of a grain of rice, to your usual skincare product. The amount will depend on your type of complexion. Mix the two components thoroughly. Apply like a cream. The best place to mix Colour Glow is on the back of your hand between your thumb and index finger. The colour will blend more easily if you add it to the cream rather than the other way around. For a uniform application, apply the Colour Glow cream mixture from the centre of the face outward. For a lifting effect, apply in an upward motion. To illuminate the eyes, avoid applying too much to the eye contour. Universal foundation colour modulator.

Tinted mineral paste
Retail size: 10 ml nozzle tube

Double Action Outdoor Extreme Hydration

For all skin types, except acne-prone skin
Ideal for sensitive skin and skin with couperose

Protective cream for exposure to wind, cold and other outdoor elements

Ideal protection for those who love sports and the outdoors

- Provides effective skin protection
  with perhydrosqualene and beeswax
- Provides advanced hydration
  with a hydrating complex that includes sodium PCA, amino acids, lactic acid, lactates and urea
  with Panthenol (Provitamin B5) that also contributes to skin healing and regeneration
- Protects against UVB and UVA rays
  with methoxycinnamate and menthyl anthranilate filters

Tips from the pros

Always keep your skin protected with **UV-Science SPF 30 Daily High Protection, UV-Science SPF 30 Fluid Lotion, Moisturizing Anti-Wrinkle Suncare SPF 30**or **Loose Powder SPF 50 Broad Spectrum.**

Rich rose-coloured cream
Retail size: 50 ml airless tube with pump

Douceur Extrême Treatment Hand Cream

Protects and repairs damaged, sensitive dry hands

- Protects against extreme cold
  with an insulating formulation
- Provides advanced hydration
  with glycerine
- Softens
  with plant-based wax

Oil-in-water emulsion with a natural lemon fragrance
Retail size: 60 ml tube

BioNutrition Intense Hydration Body Milk

For people suffering from dehydrated and-or dry skin

Hydrating body milk that provides instant comfort and protection

- Provides intense hydration
  - Urea, a natural moisturizing factor that absorbs and maintains humidity
  - Hydroxyethyl Urea, a powerful moisturizer derived from Urea
- Anti-dehydrating emollients
  - Synthetic purcellin oil
  - Grapeseed oil
  - Shea butter
- Rebalancing of microbiota with Ecobiotys™, a prebiotic from vegetal origin
- Anti-aging care with niacinamide

Tips from the pros

- Use BioNutrition twice a day for optimal results
- Apply it evenly on the whole body every day or several times a day, and make it penetrate the skin by massaging gently.
- Do not apply on wounds or mucous membranes
- Apply directly after showering on a damp skin to enhance immediate hydrating effect

Lightweight, non-greasy and quick-absorption lotion with citrus mango fragrance
Retail size: 225 ml airless pump

UV Science SPF 30
Daily High Protection Rich Emulsion

For all skin types
Face

Must-have everyday sun protection

- Protects against UVB and UVA rays
  with micronized titanium dioxide
- Protects against infrared rays
- Prevents photo-ageing
- Improves skin's appearance
  with Venuceane™ anti-ageing bioprotector

Tips from the pros

Specially designed to prevent the aggravation of clinical signs in skin with rosacea and vaso-reactive skin; to prevent aggravation in skin with brown spots; and for sensitive skin intolerant to the sun or chemical filters: during pregnancy and before and/or after surgery, laser treatment or dermabrasion.

Doesn't irritate eyes – doesn't bleach skin – facilitates make-up application and hold

Oil-in-water emulsion with a universal texture and natural apricot fragrance
Retail size: 50 ml airless tube with pump

UV Science SPF 30
Daily High Protection Fluid Lotion

For all skin types
Ideal for combination and oily skin

Must-have everyday sun protection

- Protects against UVB and UVA rays
  with micronized titanium dioxide and zinc oxide
- Protects against infrared rays
- Prevents photo-ageing
- Improves skin's appearance
  with Venuceane™ anti-ageing bioprotector

Shake well before use

Doesn't irritate eyes – doesn't bleach skin – naked skin sensation – facilitates make-up application and hold

Fluid, ultra-light oil-in-water emulsion
Retail size: 50 ml bottle

UV Science +

For all skin types, including the most sensitive skin or temporarily weakened skin

SPF 50 High Mineral Protection

Tinted Fluid Emulsion for the face. Broad spectrum UVA\UVB daily protection with 100% mineral filters

- Provides sunburn protection
  with micronized zinc oxide and micronized titanium dioxide
- Renews the skin's protective barrier and reduces the risk of skin reactions
- Protects sensitive or weakened skin from outdoor stresses
  prevents the exacerbation of clinical signs of rosacea
  prevents the appearance and exacerbation of brown spots
- Fight premature ageing
  with ectoin, a protective active ingredient with powerful anti-ageing properties, protects against damage caused by UVA and IR radiation and visible light, including blue light
  vitamin E, antioxidant that protects the skin from irreversible damage caused by free radicals
- The cream has a slight universal tint and evens out the complexion

Tips from the pros

In the morning or before sun exposure, after cleansing the skin, apply over your serum or usual day cream. Reapply every two hours or use your choice of SPF 50 Mineral Loose Powder every two hours to ensure a high level of protection.

Formulated without any parabens, alcohol. Gluten-free formulation. The product is an ocean and coral reef-safe formula
Retail size: 50 ml airless pump bottle

ESSENTIAL GESTURES
Cell'Defense Suncare

Sun is essential for life—but can also be dangerous for skin. Even in very small doses, UV rays provoke irreversible phenomena and cause multiple types of skin damage by increasing the release of free radicals, which are damaging to our cells. Overexposure to these rays leads to sunburn. They also damage molecules in your DNA, the communication centre of each cell. What's more, they accelerate premature ageing, causing wrinkle formation, loss of firmness and brown spots. They also aggravate clinical signs of rosacea and vaso-reactive skin, and increase the risk of skin cancer.

Remember: **UVB – B as in burn.** UVB rays are the primary cause of sunburn.
UVA – A as in age. UVA rays are responsible for photo-ageing. UVA and UVB rays cause skin cancer.
Cutting-edge scientific research has proven that infrared rays play a determining role in accentuating skin ageing. They provoke a rise in tissue temperature, leading to the acceleration of several ageing processes. They also destroy healthy collagen and other molecules in the dermis, causing even more wrinkles and greatly accelerating the premature ageing process.

Clinical study on Venuceane™

Venuceane™ was the subject of an in-vivo objective clinical study carried out for 6 months on Mauritius Island on 50 volunteers of 39 years old on average.

The major ageing parameters such as Tonicity and Elasticity, Diffused Redness, Wrinkles, Complexion, Dehydration, Hyperkeratinization and Brown Spots were measured before and after 6 months' exposure to the sun.

For the first time, this study reveals that: daily sun exposure for 6 months accelerates ageing by 3 years.

Venuceane™:
Compensates for ageing and allows to you "save" almost 5 years in 6 months

50 people, average age: 39 years old, application twice a day, 6 months, Karl Linter, 2006

Directions for use

At home

Apply a generous, even layer 15 minutes before sun exposure. Reapply every two hours and after swimming or heavy sweating. Always limit the time you spend in the sun, no matter the season. Avoid exposure between 11 a.m. and 3 p.m. Apply sunscreen even when you're under an umbrella or in fog or cloud conditions.

Optimal advice for your customer

At home

Sun protection is a must. Recommended for everyone, UV-Science and Cell'Defense sun protection products are the best defense for:

- vaso-reactive skin or skin with rosacea, to prevent the aggravation of clinical signs
- skin with brown spots, to prevent aggravation
- sensitive skin that's intolerant to the sun or to chemical filters: during pregnancy and before or after surgery, laser treatment or dermabrasion

Persuade

Most people don't apply sun protection because they don't like the white streaks, thick film and odour it leaves on skin. Try Laboratoire Dr Renaud's UV and infrared photo-protectors: their enjoyable, light and non-sticky textures will make you look forward to wearing them! Show how Loose Powder SPF 50 Broad Spectrum Light/Dark can be easily applied over make-up and how Anti-Ageing Sunscreen Lotion Broad Spectrum SPF 20 can be applied to wet skin.

Loose Powder Light/Dark SPF 50

For all skin types
Face

Must-have sun protection for face

- Protects against UVB and UVA rays
  with micronized titanium dioxide and zinc oxide
- Prevents photo-ageing
  with jasmine flower extract

Shake well before use

NOTE: Our SPF 50 loose powders have NPNs(natural product numbers) and are formulated without talc.

Ideal for reapplying over make-up – ideal for applying when unable to wash hands – doesn't bleach skin – portable size

Ultra-light, silky powder with high-tolerance formulation
6-g brush applicator

Moisturizing Anti-Wrinkle Suncare Emulsion Broad Spectrum SPF 30 Face

For all skin types, including oily and sensitive skin

Must-have sun protection for face

- Protects against UVB and UVA rays
  with homosalate, avobenzone and octocrylene
- Protects against infrared rays
- Prevents photo-ageing
  with Venuceane™ anti-ageing bioprotector, jasmine flower extract and ectoin
- Stimulates skin's self-protection mechanisms by boosting the tanning process
  and ectoin with tyrosine and loofa oil

"Oil-free" formulation – anti-sand and anti-sweat – allows for tanning with less exposure

Light, non-oily cream with jasmine fragrance; non-photosensitizing; non-photoallergizing
Retail size: 50 ml tube

Sunblock Lotion Broad Spectrum SPF 30 Face & Body

For all skin types

Must-have sun protection for face and body

- Protects against UVB and UVA rays
  with micronized titanium dioxide and zinc oxide
- Protects against infrared rays
- Prevents photo-ageing
  with Venuceane™ anti-ageing bioprotector and jasmine flower extract

Tips from the pros

Ideal for skin with rosacea and vaso-reactive skin; skin with brown spots; sensitive skin intolerant to the sun or chemical filters: during pregnancy and before and/or after surgery, laser treatment or dermabrasion. Infants from 6 months, children and adults.
Face and body

Ultra-gentle – water-resistant – doesn't bleach skin – doesn't irritate eyes – easy to apply – anti-sand – anti-sweat – effective upon application

Light, silky, high-tolerance oil-in-water emulsion with jasmine fragrance; non-photosensitizing; non-photoallergizing
Retail size: 200 ml tube

Moisturizing Anti-Ageing Suncare Broad Spectrum SPF 30 Body

For all skin types, even the most sensitive
Body

Must-have sun protection for face and body

- Protects against UVB and UVA rays
  with bisoctrizole, homosalate,avobenzone and octocrylene
- Protects against infrared rays
- Prevents photo-ageing
  with Venuceane™ anti-ageing bioprotector, jasmine flower extract and ectoin
- Stimulates skin's self-protection mechanism by boosting the tanning process
  and ectoin with tyrosine and loofa oil

Can be applied on damp or wet skin – anti-sand – anti-sweat – water-resistant – allows for tanning with less exposure

Light, non-oily texture with jasmine fragrance; non-photosensitizing; non-photoallergizing
Retail size: 200 ml tube

Tan Enhancing Veil

All skin types, including sensitive and/or fragilized skin
Face and body

Stimulates and enhances tanning before and after sun exposure

- Prepares skin for tanning
- Promotes a deep, even glow
- Reinforces the skin's natural sun protection mechanism
- Allows wearer to reduce exposure frequency and time
- Helps tan last longer
  with acetyl hexapeptide-1
- Reduces signs of photo-ageing
  with Fucogel 1000®
- Calms, moisturizes and softens
  with Tasmanian pepper and colloidal oatmeal extract

Tan faster with less time in the sun – For a more even and radiant tan – Repairs skin after sun exposure

Directions for use

Pre-tanner: Use daily for two weeks before the period of sun exposure. Apply a generous amount to the entire face and body twice a day. **As after-sun repair:** Apply daily as often as desired after sun exposure. Can also be used for sunburn. Apply a generous amount to the sensitive area and repeat application as often as necessary. **As tan prolonger:** Use daily for as long as desired, beginning immediately after the period of sun exposure. Apply a generous amount to the entire face and body once or twice a day.

Light, non-oily texture with jasmine fragrance; non-photosensitizing; non-photoallergizing
Retail size: 200 ml tube

Exfoliants

Vegetal Peeling
Exclusively professional product

Effectively exfoliates skin

For all skin types
- Exfoliates
  with lactic acid and salicylic acid
- Soothes
  with witch hazel
- Smooths fine lines

Tips from the pros

- Thoroughly cleanse the face and neck.
- Pulverize (Lucas) product and dry skin thoroughly, if desired.
- Cover the eyes with cotton pads soaked in Blue Water.
- Tear top of pouch to open and pour entire contents into a saucer.
- Apply to entire face and neck in a circular motion with fingertips, focusing on the hyperkeratinized areas of the epidermis.
- Uncover eyes.
- Rinse abundantly and carefully, first with lukewarm water, then with cold water.
- Apply the appropriate Phyto-Effervescent and proceed with comedone extraction (if needed).

Paraben-free – colorant-free

THE FUNDAMENTAL *professional* TREATMENTS
Circulation Activators

Formulation
The plant extracts in the formulation of each **Phyto-effervescent** have been carefully selected to meet the needs of each type of skin. The diffusion capacity of the **Phyto-effervescents** considerably increases cellular oxygenation, thereby ensuring the absorption of active ingredients. These microcirculation activators facilitate comedone extraction thanks to their softening action on keratin.

Normal and Combination Skin: Phyto-effervescent no. 1

Characteristics	Components	Effects	Results
• Even grain • Slightly visible pores • Soft, smooth to the touch (if normally hydrated) • Normal sensibility • Appearance: fleshy and full • Nice texture • T-zone (forehead, nose and chin) may be slightly oilier than the lateral part of the face Anatomical and physiological conditions: • Good hydrolipidic balance • All biological processes are in perfect equilibrium with one another • Constant cellular regeneration	• ARNICA	Astringent Decongestive Vasoconstrictor	Stimulates cutaneous circulation Favours healing
	• CUCUMBER	Astringent Clearing Action Softening Refreshing	Supplies amino acids Clears the complexion Softens the epidermis Leaves a fresh sensation
	• ELDER	Soothing Emollient Moisturizing	Supplies amino acids and mineral salts Helps maintain the natural moisturizing factor (NMF)
	• IVY	Soothing Decongestive Vasoconstrictor Penetrating Agent	Stimulates cutaneous circulation Accelerates cellular exchanges
	• WOOD MALLOW	Emollient Soothing Refreshing Softening	Supplies vitamin C Clears the complexion Softens the epidermis

Phyto-effervescent no. 1 helps maintain the skin in a normal, healthy state

Oily and Seborrheic Skin: Phyto-effervescent no. 2

Characteristics	Components	Effects	Results
• Fluid secretion • Slightly visible, dilated pores • Oily to the touch • Generally thick texture • Appearance: shiny Anatomical and physiological conditions: • Hypersecretion is usually related to hormonal factors and is mostly encountered during adolescence • Hypersecretion often leads to complications such as comedones (open or closed), hyperkeratinization and asphyxia, which are the first stages of acne	• BURDOCK	Antiseptic Astringent Penetrating Agent	Helps normalize sebaceous secretion Supplies mineral salts
	• IVY	Soothing Decongestive Vasoconstrictor Penetrating Agent	Stimulates cutaneous circulation Accelerates cellular exchanges
	• LEMON	Antiseptic Astringent Clearing Action Toning Action Penetrating Agent	Supplies amino acids, vitamin C and vitamin P, which increases the resistance and normalizes the permeability of the capillaries Clears the complexion Favours healing
	• SAGE	Astringent Antiseptic Toning Action Penetrating Agent	Helps to constrict dilated pores Purifies the skin Favours healing
	• SOAPWORT	Soothing Antiseptic Vasodilator Penetrating Agent	Supplies vitamin C Purifies the skin
	• WATERCRESS	Cleansing Toning Action Penetrating Agent	Helps normalize sebaceous secretion Supplies mineral salts, vitamin c and vitamin P, which increases the resistance and normalizes the permeability of the capillaries

Phyto-effervescent no. 2
purifies the skin and helps normalize sebaceous secretion

Circulation Activators

Alipic and dehydrated skin: Phyto-effervescent no. 3

Characteristics	Components	Effects	Results
ALIPIC SKIN • Invisible pores • Harsh • Lack of suppleness • Tugging sensation • Fine lines • Strong tendency toward superficial dehydration • Appearance: shrivelled DEHYDRATED SKIN • Desquamation, dartre, itching, redness, fine lines • Harsh, rough, lack of suppleness • Tugging sensation • Sensitive • Appearance: taut, dry, brittle	• CORNFLOWER	Antiseptic Emollient Softening Decongestive Penetrating Agent	Softens the epidermis
	• LIMETREE	Soothing Antiseptic Vasodilator Softening	Stimulates cutaneous circulation Supplies vitamin C Softens the epidermis
	• MARIGOLD	Soothing Antiseptic Vasodilator Softening	Soothes redness Helps reduce sensitivity Favours healing Softens the epidermis
	• ROMAN CHAMOMILE	Soothing Softening Emollient Penetrating Agent	Soothes redness Softens the epidermis
Anatomical and physiological conditions: • Hypersecretion is usually related to hormonal factors • Superficial dehydration is due to insufficient humidity in the corneal layer • Internal factors can influence the NMF, but the main factors are external (sun, wind, cold, use of soaps, detergents, astringents, inadequate protection, etc.)	• ST-JOHN'S WORT	Antiseptic Astringent Softening Vasodilator Penetrating Agent	Helps normalize cutaneous circulation Softens the epidermis Soothes redness

Phyto-effervescent no. 3 restores softness and suppleness to the skin, thus reducing sensitivity

Sensitive and Blotchy Skin: Phyto-effervescent no. 4

Characteristics	Components	Effects	Results
• Presence of teleangiectasia mostly on the cheeks and nose, along with diffuse redness • Extremely sensitive • Reacts to sudden temperature changes • Requires delicate care • Found most often on fine-textured skin • Appearance: congested, shrivelled Anatomical and physiological conditions: • Rosacea is due to permanent dilation of the capillaries and may result from repeated congestive rises • Rosacea can be due to fragile and insufficiently elastic capillary walls	• ARNICA	Astringent Decongestive Vasoconstrictor	Stimulates cutaneous circulation Favours healing Soothes redness
	• HORSE CHESTNUT	Astringent Decongestive Vasoconstrictor	Stimulates cutaneous circulation Favours healing Supplies vitamin P, which increases the resistance and normalizes the permeability of the capillaries
	• IVY	Soothing Decongestive Vasoconstrictor Penetrating Agent	Stimulates cutaneous circulation Accelerates cellular exchanges
	• RED VINE	Astringent Vasoconstrictor Decongestive	Helps normalize cutaneous circulation Supplies vitamin C Favours healing
	• ST-JOHN'S WORT	Antiseptic Astringent Softening Vasodilator Penetrating Agent	Helps normalize cutaneous circulation Softens the epidermis Soothes redness
	• WITCH HAZEL	Astringent Decongestive Vasoconstrictor	Stimulates cutaneous circulation Favours healing

Phyto-effervescent no. 4 is characterized by its decongestive action and soothing properties

Circulation Activators

Hypotonic Skin: Phyto-effervescent no. 5

Characteristics	Components	Effects	Results
• Wrinkles • Flabbiness • Loss of tonicity • Sagging • Feels soft, like it is separating appearance: devitalized Anatomical and physiological conditions: As the skin ages: • Collagen toughens, becomes insoluble and loses the ability to retain water (deep hydration) • Elastic fibres gradually lose their elasticity • Wrinkles appear • With age, the size of the dermis decreases while that of the corneal layer usually thickens due to hyperkeratinization	• LEMON	Antiseptic Astringent Clearing Action Toning Action Penetrating Agent	Supplies amino acids, vitamin C and vitamin P, which increases the resistance and normalizes the permeability of the capillaries Clears the complexion Favours healing
	• HOP	Antiseptic Astringent Toning Action Penetrating Agent	Supplies amino acids Helps to stimulate and tone the skin
	• PINE TREE	Antiseptic Astringent Toning Action	Stimulates the cutaneous circulation
	• HORSETAIL	Decongestive Penetrating Agent Astringent	Supplies vitamin C and silicon Accelerates cellular exchanges
	• ROSEMARY	Antiseptic Astringent Clearing Action Decongestive Penetrating Agent	Helps to stimulate and tone the skin Clears the complexion Favours healing
			Phyto-effervescent no. 5 helps to stimulate the cutaneous metabolism. The skin looks firmer, and wrinkles become less apparent.

Professional Serums

Omega 3
Lipid
Replenishing Serum

Professional size: 12-vial box
See section on Expert Serums

Hydracomplex
Intensive Care
Concentrate

Reinforces the action of other products thanks to its high concentration of active ingredients

- Makes skin softer and more supple with a moisturizing complex
- Provides instant moisture that lasts with Pentavitin®
- Smooths fine lines

Tips from the pros

Use during a facial, after activating microcirculation with the appropriate phyto-effervescent and extracting comedones

- Apply the entire vial to the face and neck.
- Massage in with light effleurage.
- Prepares the skin for other care measures.

Translucent aqueous solution
Box of twelve 3 ml vials

Professional Masks

HydraCalm
Moisturizing
Soothing Mask

Professional size: 200 g tube

Elastin-Collagen
Nutri-Firm
Cream Mask

Toning and hydrating anti-wrinkle mask

- For superficially and deeply dehydrated skin
- Helps skin stay youthful, firm and smooth with elastin and native soluble collagen
- Smooths features and instantly calms skin with soy sterols
- Quenches and softens the epidermis with glycerine

Rich, creamy texture
Professional size: 200 ml jare

Re-educating Mask

Calms and decongests

For alipic, fragilized and sensitive skin

- Reduces surface redness associated with capillary dilatation
  with calamine
- Protects skin
  with titanium dioxide

Tips from the pros

For easier removal, always apply a thin layer of Sensiderm Gel before applying the Re-educating Mask. The ideal mask for skin with erythrosis or rosacea due to its calming, decongestive properties. Recommended after comedone extraction.

Creamy paste with citrus, mint and camphor fragrance
Professional size: 200 ml tube

Sensiderm Gel

Reduces surface redness

For all skin types
For sensitive and/or fragilized skin

- Decongests and reduces redness
  with witch hazel extract
- Soothes
  with a unique plant-based complex with licorice, caffeine and horse chestnut
- Helps achieve an even complexion
  with natural cucumber extract

Tips from the pros

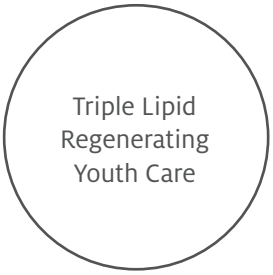

Apply a layer of Sensiderm Gel before applying the Re-Educating Mask for easier removal. If using as a mask, apply a generous layer to face and neck. Leave on for 15 to 20 minutes. Rinse first with lukewarm water, then with cold water.

Non-oily medium-consistency gel with a distinctive fragrance of vitamin B and lemon
Professional size: 200 ml tube

Specific Products

NutriMassage Cream

Cream specially formulated for in-institute massage
Face – body – hands – feet

For all skin types, except comedonal acne-prone skin

- Reinforces the cutaneous barrier
  with plum oil
- Makes skin supple and comfortable
  with shea butter and crambe abyssinica oil
- Restructures and regenerates
  with grapeseed oil
- Hydrates
  with vitamin E

Paraben-free – perfume-free – colorant-free

Tips from the pros

For facial massage:
Use one dab of NutriMassage Gel.
Heat product in the palm of your hand until it acquires a creamy texture.
On slightly damp skin, apply a little gel to different areas of the face, neck and neckline.
Spread the gel as evenly as possible with light effleurage.
Proceed with massage.

Using warm towels, remove the excess product.It is also possible to remove the product with lukewarm water.
The gel immediately turns into milk on contact with water.

Lightly translucent gel with a silky touch.
Professional size: 200 ml tube

SKINRECOVERY
Post-procedure Balm

For post procedure use

Intense, ultra-repairing formula that induces and accelerates healing after dermo-aesthetic treatments

- Supports the skin's natural recovery process, minimizes risk of infection and helps prevent the appearance of scars.
- Designed for post-procedure use after the following treatments like microneedling, laser hair removal, permanent makeup.
  1st cellular activator - Centella asiatica extract rich in Asiatic and Madecassic Acids and Asiaticoside.
  Clinically tested, it allows to reduce the healing period of lesions by 40%.
  2nd cellar activator - Panthenol, repairing and soothing properties
  Aloe Vera, moisturizing and soothing
  Allantoin and bisabolol with anti-inflammatory properties
  Shea butter, squalene and calendula extract to provide a protective film on the epidermis

Tips from the pros

- In clinic: Apply SkinRecovery Post-Procedure balm as the last step procedure requiring soothing and healing action. Penetrate with light strokes.
- At Home: During the week following the session, apply daily to the affected areas as often as necessary.
- IMPORTANT: The use of an SPF 50 on the treated area is essential to protect the skin between two sessions.

Retail size: 75 ml tube

THE OPTIMAL *professional* TREATMENTS

61

Laboratoire
Dr Renaud

*“With a beauty product,
it’s 50% about quality and 50%
about the aesthetician’s work.”* – Dr Renaud

OPTIMAL TREATMENTS

The Clear Up Program for Acne-Prone Skin

Clear Up is an ultra-effective three-step program. 1. Cleanse. 2. Treat. 3. Protect.
Reduces lesions and shine instantly and lastingly in acne-prone skin.

The primary cause of acne is hyperseborrhea, or excessive sebum production. Excess sebum can oxidize, which has two consequences. First, it becomes irritating, provoking hyperkeratinization. Pores become blocked, and open comedones (blackheads) and closed comedones (whiteheads) appear. This environment promotes the proliferation of P. acnes bacteria, which causes inflammation. Pimples appear. To treat acne, it is important to deal with the four biological causes of acne pathogenesis.

Directions for use

At home

Step 1: Cleanse with **Clear Up Cleansing Gel Step 1**

Step 2: Treat with **Clear Up Control Solution – Anti-Blemishes Step 2**
Morning and/or evening:
Apply a small quantity of **Clear Up Control Solution** – Anti-Blemishes to the forehead, cheeks and chin and massage in lightly.

Step 3: Treat with **Clear Up Anti-Shine Moisturizer.**

SeboBalance Spot Control Gel, formulated with antiseptic properties and specially designed to dry out pimples, can also be used locally before **Clear Up Anti-Shine Moisturizer.**

Optimal advice for your customer

At the institute

To get rid of pimples fast, use **Clear Up Acne Management professional treatment**. Results are visible after the first treatment. For optimal results, a series of five to eight consecutive treatments at the rate of one treatment per week is recommended. It should be complemented by the use of Clear Up at-home care products. Afterwards, **Clear Up Acne Management professional treatment** may be used periodically, such as once a month, as a maintenance measure. In all cases, treatment compliance is essential for optimal results.

Before

After

Tips from the pros

Be sure to cleanse your face after exercising. Always remove make-up before going to bed. Instead of "playing" with pimples, apply **SeboBalance Spot Control Gel** as needed. Avoid touching your face. Use sun protection. Use **SeboBalance Purifying Sebo-Absorbing Mask** once or twice a week.

Three-step Clear Up program

Clear Up Cleansing Gel - Step 1

Acne-prone and problematic oily skin

Step 1

Cleanses and treats acne

- Cleanses
- Reduces blackheads and whiteheads
  Reduces pimples
  Reduces inflammation
  Improves the penetration of active treatment ingredients for faster results with 2% salicylic acid and 2% glycolic acid
- Purifies skin with orange, rosemary and sage essential oils
- Non-drying

See section on Cleansers
Orange, rosemary and sage fragrance
Retail size: 60 ml tube

Clear Up Control Solution – Anti-Blemishes - Step 2

For acne-prone, comedonal and oily skin

Step 2

Treats light to moderate acne

- Treats the four acne development mechanisms to:
  - Reduce shine
  - Reduce the number of lesions
  - Reduce redness
  - Prevent scars

  with AC.NET multifunctional active ingredient (oleanolic acid and nordihydro-guaiaretic acid)
- Eliminates blackheads and whiteheads
  with salicylic acid (2%) and non-irritating AHAs arginine complex (4% glycolic acid and 1% lactic acid)
- Non-drying
  thanks to lactic acid and arginine

Tips from the pros

Treatment adherence is extremely important for obtaining optimal results. For good results, cleanse and treat skin morning and night.

Transparent fluid gel with a distinctive orange, rosemary and sage fragrance
Retail size: 50 ml bottle with pump

Clear Up Anti-Shine Moisturizer - Step 3

For acne-prone, comedonal and oily skin

Step 3

Reduces blemishes and controls shine

- Absorbs shine upon application
  with ultra-fine sepimat powder
- Provides lasting mattification
  with an amino acid derivative rich in sarcosine
  (Mat XS Clinical, largely superior in power to zinc derivatives)
- Reduces papules and pustules in just 28 days
  with sophorolipids and a bioecocomplex
- Soothes inflammation
  with olive leaf extract, white water lily extract and proline extract
- Hydrates
  with Pentavitin®, plant-based Fucogel 1000® and liquid crystal emulgel

Tips from the pros

Clear Up Anti-Shine Moisturizer is a 24-hour product.
During the day, apply over Loose Powder SPF 50 Broad Spectrum.

Ultra-light emulgel with a distinctive mandarin and rosemary fragrance
Retail size: 50 ml airless tub with pump

Maximize

Maximize results by using **SeboBalance Purifying Sebo-Absorbing Mask** twice a week

THE OPTIMAL TREATMENTS

Clear Up Acne Management – Protocol

A global professional treatment specially developed for the treatment of acne skin and oily skin. This **Acne Management Professional Treatment** stands out for its exclusive active ingredients combining the efficiency of a topical medication with exceptional cosmetic qualities.

Indications

- Recommended for the care of acne skin, oily, comedonal and asphyxiated skin.
- For all, men and women.

Complementary Home Care Products

For intense, long-term benefits, the treatment must be completed by the use of the complementary home care Clear Up products: **Clear Up Cleansing Gel, Clear Up Anti-Shine Moisturizer** and **Clear Up Control Solution Anti-Blemishes.**

DURATION OF THE TREATMENT: 1 hour

Cleansing / Make-Up Removal – Required Time: 5'

Thoroughly and gently cleanse the face and neck with **SeboBalance Cleansing Fluid Milk** followed by **SeboBalance Clarifying Lotion.** Dry the skin gently with a facial tissue.

Frequency of Use

- As a cure of 5 to 8 treatments at the rate of 1 treatment per week.
- The aesthetician may space out treatments to every two weeks if she deems it necessary or only do a few treatments in minor cases.
- In all cases, compliance with the treatment is essential for obtaining maximum results.

Preparation of Material

- Remove from the **Clear Up** box all the necessary material for a professional treatment from the Clear Up box.
- Using the measured Shaker, fill it with 60 ml / 2 FL. OZ. of tap water and let stand at room temperature.

	Steps	Time	Major Ingredients	Actions
1	**Prep Lotion** Cover the eyes with cotton pads soaked in **Blue Water.** With the fingertips, apply Clear Up Prep Lotion evenly to the face and neck as with a mask, making sure to avoid the lips. **Application: 2 minutes – Pause: 8 minutes** Uncover the eyes. Rinse abundantly with lukewarm water, then with cold water.	10	Salicylic Acid 2% – AHAs 10% (Glycolic and Lactic Acids), Cocktail of Purifying Vegetal Extracts (Burdock, Sage, Lemon, Ivy, Soapwort)	• Eliminates dead cells and impurities • Reveals skin's glow • Prepares skin for subsequent steps, improves absorption
2	**Neutralizing Gel** Cover the eyes with cotton pads soaked in **Blue Water.** With the fingertips, apply evenly to the face and neck as with a mask. **Application: 2 minutes – Pause: 5 minutes** Remove excess with a dry facial tissue. Make sure to leave a thin film of product to facilitate extraction.	7	Anasensyl®, Soothing Vegetal Complex (Calendula, Chamomile and Matricaria, Linden, Cornflower, St-John's-Wort), Allantoin, Aloe vera, Synergy of 100% Pure Essential Oils*(Lavender, Lavandin, Black Spruce, Thyme and Eucalyptus) * Organic	• Normalizes cutaneous pH** • Facilitates mechanical extraction of comedones • Hydrates and softens **Surface of the epidermis
3	**Extraction** Make sure to gradually eliminate the remaining film of N**eutralizing Gel** from areas to be treated (chin, forehead, cheeks) then proceed to the digital extraction of comedones. **Duration: 15-20 minutes** Soak a cotton pad with the **SeboBalance Clarifying Lotion** and apply gently over all areas where extraction was done.	20	P-Refinyl, Bioecocomplex, Ethyl Lactate	• Facilitates removal of sebum • Tightens dilated pores • Improves skin texture
4	**Control Solution Anti-Blemishes – NPN 80023889** Apply to the entire face and neck using light effleurage. Do not massage.	2	Salicylic Acid 2%, Keratoregulating AHA-Arginine Complex, Oleanolic and Nordihydroguaiaretic Acids (NDGA), Allantoin, Natural Aroma of Orange, Rosemary and Sage	• Reduces the number of acne pimples, blackheads and whiteheads and allows skin to heal

5	**Powder Mask** Empty the entire contents of a pouch of **Clear Up Mask** into a shaker containing 60 ml / 2 FL. OZ. of water. Screw the cover of the shaker and shake vigorously for 10 seconds until the preparation converts into a creamy foam. Then apply over the entire face and neck with a spatula. Cover the eyes with cotton pads soaked in **Blue Water.** **ATTENTION:** Do not apply the **Clear Up Mask** over the lips or the eyes. **Application: 5 minutes – Pause: 15 minutes** Remove the mask with a spatula. Rinse the excess product properly with lukewarm water, then with cold water.	20	Salicylic Acid 0.3%, Lemon Extract	• Reveals a fresher looking skin • Hydrates the epidermis • Clarifies the complexion
6	**Final Touch** End treatment by applying a small quantity of **Clear Up Anti-Shine Moisturizer** to the face and neck. Massage in gently.	2	Sepimat – Highly absorbing Polymer, Mat XS Clinical – Sarcosine, Sopholiance S, Bioecocomplex – White Water-lilly Flower Extract and Palmitoylproline – Oleoeuropein – Pentavitin® – Fucogel 1000®	• Mattifies the skin • Soothes and hydrates

THE OPTIMAL TREATMENTS

Radiance White Anti-Brown Spot Program

Brown spots and uneven complexion

Brown spots are a major esthetic concern. They affect one in two women and men and become worse with age.

Pigmentation spot types

Senile lentigines, also known as brown spots

Appear on the back, hands, forearms and face

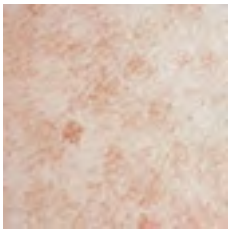

Melanocyte hyperfunction

Melasma or chloasma, also known as the pregnancy mask

Associated with women undergoing hormonal changes due to pregnancy, oral contraceptives or hormonal replacement therapy

May become permanent after excessive sun exposure during pregnancy

Ephelides, also known as freckles

Genetic

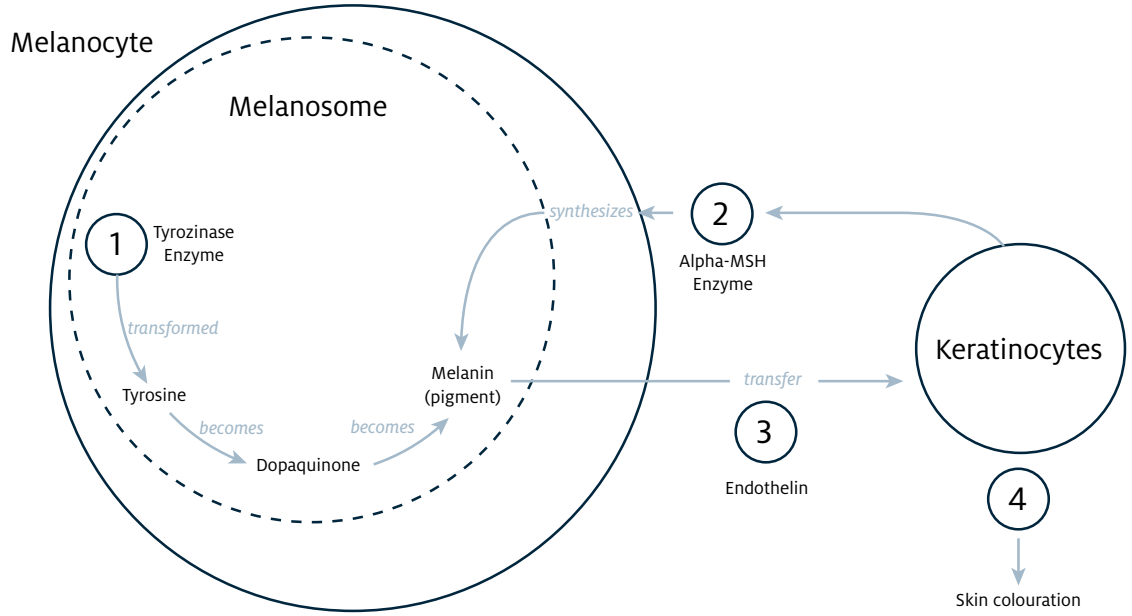

Perfume application spots

Post-inflammatory cutaneous hyperpigmentation

The melanogenesis (pigmentation) process

Hyperpigmentation is caused by anomalies in the normal pigmentation process that cause melanin to be produced in excess or in an irregular way.

Achieving an even complexion

Melanin is responsible for skin colour, along with hemoglobin and dermal collagen. In younger skin, these three substances are distributed very evenly. The complexion is even and radiant. But, over time, brown spots appear, redness is more visible and dermal collagen has a negative impact on skin tone. For a brighter, more even complexion, it's crucial to regulate melanin, hemoglobin and collagen levels.

Optimal advice for your customer

At home

Fall is the ideal time to start the **Brown Spot** or **Clarity & Glow** program. You can repeat the program multiple times a year, preferably not during the summer. To maximize results, combine at-home treatment with the **Radiance White™ Integral Brightening Treatment** at an institute at the rate of one treatment per week for 4 or 5 consecutive weeks, with the first professional treatment coinciding with the beginning of the at-home treatment.

Radiance White Program – Brown Spots (for face and hands)
For optimal results, follow the program scrupulously for eight weeks, without pausing.

Morning:
1. Cleanse skin thoroughly and apply Radiance White Serum
2. Then, then apply your daily moisturizer
3. Protect the entire face and neck with sun protection.

Evening:
Follow the same procedure as in the morning.
Do not apply sun protection.
At night, Radiance White Serum may be followed by the appropriate night cream if needed.

Radiance White Program – Clarity & Glow
For optimal results, follow the program scrupulously for six weeks, without pausing.

Morning:
1. Cleanse skin thoroughly, then pump one to two pumps of Vit.C 10% with M²PE into the palm of your hand. Apply to the face and neck and massage in with light effleurage
2. Apply two pumps of Radiance White Serum to the entire face and neck like a cream
3. Protect the entire face and neck with sun protection.

Evening:
Follow the same procedure as in the morning.
Do not apply sun protection.
At night, Radiance White Serum may be followed by the appropriate night cream if needed.

Radiance Brightening and Brown Spots Program

Cleanse

Cleanse face and neck thoroughly with the hygiene products recommended by your aesthetician

See section on Cleansers

Serum

Radiance White Sérum Correcteur de Pigment

For all skin types, even the most sensitive

A powerful serum that targets brown spots due to ageing, sun exposure and inflammation

- Reduces the appearance of brown spots
  - Tranexamic acid helps reduce hyperpigmentation, diminishes appearance of post-acne marks, visibility reduces melasma and decreases redness through its anti-inflammatory properties
  - Kojic acid is widely used in skin-brightening treatments. It acts by inhibiting tyrosinase, the enzyme that catalyzes the production of melanin
- Corrects signs of aging
  - Niacinamide offers numerous benefits including, reduces fine lines, improves skin elasticity, reduces hyperpigmentation, and improves barrier et hydrating function
- Gently exfoliates
  - Citric acid is an AHA that offers the additional benefit of diminishing the appearance of brown spots by accelerating the exfoliation of the stratum corneum containing melanin
- Maintains hydration
  - Hyaluronic acid has exceptional water retention capacity. Our High molecular weight molecule forms a non-occlusive film that helps maintain hydration and limit water loss

Tips from the pros

- Morning and evening, for 8 to 12 weeks, after thoroughly cleansing the skin, apply to the whole face. Then, apply your usual day or night cream
- During the day, systematically use sun protection
- For enhanced brightening treatment: Overlay C 10% Vitamin Serum with M²PE and Radiance White Pigment Corrector Serum

Retail size: tinted 30 ml glass bottle with a dropper top

Exfoliate

For more effective, faster results, exfoliate with the product recommended by your aesthetician

See section on Exfoliants

Mask

Use the mask recommended by your aesthetician for complementary treatment

Notes

Notes

THE OPTIMAL TREATMENTS

Radiance^{White} Integral Brightening Treatment – Face & Hands – Protocol

Indications

- To attenuate brown spots related to phenomena such as skin ageing.
- To even out the complexion and brighten dull, lifeless, heterogeneous skin types.
- For Asian skin types.
- In all cases, the client will also benefit from the anti-ageing properties of the Radiance White Professional Treatment.
- Radiance White may be used by all skin types, even the most sensitive.

Complementary Home Care Products

Brown spots: For intense, long-lasting results, the cure must be completed by the twice-a-day use (morning and evening) of Radiance White Brightening Essence – Brown Spots and Overall Brightening Emulgel for 8 weeks.

Clarity & Glow: twice-a-day use (morning and evening) of Vit.C 10% with M²PE and of Radiance White Overall Brightening Emulgel for 6 weeks.

NOTE: It is also essential to follow with the application of a high protection sunscreen such as UV-Science SPF 30 Fluid lotion or Rich Emulsion.

DURATION OF TREATMENT: 1 hour

Cleansing / Make-Up Removal – Required
Time: 5 min

Remove eye make-up with the appropriate Eye Make-Up Remover. Thoroughly cleanse skin with the Milk and Lotion adapted to the client's skin type. Dry skin gently.

Frequency of Use

- As a cure of 4 or 5 treatments at the rate of 1 treatment per week.
- The aesthetician will determine the duration of the cure (4 or 5 weeks) according to the nature of the problem and the skin type.
- Radiance White may then be used as needed to maintain a radiant, youthful complexion.

Preparation of Material

- Remove from the Radiance White box 1 tray containing the necessary material for one professional treatment from the Radiance White box.
- Using the measured recipient, fill it with 20 ml / 0.68 FL. OZ. of tap water and let stand at room temperature.

	Steps	Time	Major Ingredients	Actions
1	**DUOFOLIANT 1 (Exfoliating Phase)** Onto dry skin, apply evenly the entire content of a monodose of the Duofoliant 1 to cover the face, neck and décolleté. Let dry for 2 minutes. Rub the product gently with fingertips performing light effleurage. Gently remove particles with a dry gauze. Emulsify the skin and rinse thoroughly first with lukewarm water, then with cold water. **Application: 3 minutes | Pause: 5 minutes | Removal: 5 minutes**	10	Bamboo exfoliating microbeads	• Exfoliates, eliminates dead cells and impurities • Reveals complexion's glow • Prepares skin to receive other ingredients, improves absorption
2	**DUOFOLIANT 2 (Peeling Phase)** Cover the eyes with cotton pads soaked in Blue Water. With fingertips, apply evenly the entire content of a monodose of the Duofoliant 2 to the face, neck and décolleté as well as the back of hands, like a mask, making sure to avoid the lips. **Application: 3 minutes | Pause: 5 minutes** NOTE: It is normal to feel a tingling sensation during and after the application of this product and pause. TIP: Take advantage of this pause to prepare the mixture of the 3 in 1 Treatment Mask + the Brightening Solution. To do so: • Empty in a bowl, the entire content of a pouch of the 3 in 1 Treatment Mask in a clean bowl. Shake the tube of the Brightening Solution before use and add the content of the tube gradually into the powder while mixing with a spatula. • Then add gradually the 20 ml/0.68 FL. OZ. of water prepared before hand while mixing briskly until obtaining a creamy gel. **Set aside for Step 4.** Uncover the eyes. Then rinse the face well, the neck, the décolleté and the back of hands, first with lukewarm water, then with cold water.	8	Salicylic Acid 0.4% – antiseptic and exfoliant, AHAs (Glycolic and Lactic Acids) 10% – superficial peeling effect and hydrating effect, Brightening and detoxifying vegetal extracts (Burdock, Sage, Grapefruit, Ivy, Soapwort)	• Eliminates dead skin cells and impurities • Deep-cleanses the epidermis • Helps improve absorption of other ingredients • Helps soothe the epidermis • Reveals next layer of skin • Prepares the skin for other steps
3	**Brightening Essence – Brown Spots** Apply three quarters of the tube of Brightening Essence – Brown Spots evenly to the face, neck and décolleté (keep the remaining quarter for the backs of the hands). Massage into brown spots. **Massage: 5 minutes**	5	Laser C Complex (Vitamin C, Tetrapeptide-30, Delentigo™, Niacinamide, AHA-Arginin Complex)	

4	**3 In 1 Treatment Mask + Brightening Solution** Add approximately a tea spoon of the 3 in 1 Treatment Mask mixture to the palm of the hand. Keep the remaining quantity to massage hands and forearms. Apply the product to the face, the neck and décolleté. Proceed to a massage insisting on brown spots. Remove excess product with a damp gauze. Do not rinse. **Massage: 5 minutes**	5	Glucose, Tetrapeptide-30, Niacinamide, Fucogel®	• Reduces the appearance of brown spots • Evens skin tone • Rehydrates the epidermis • Refreshes and cools the skin • Improves general appearance of skin, adds comfort and well-being sensation
5	**White Mask** Using a spatula, apply the mask evenly to the face, neck and décolleté. Leave on for 15 minutes. **Application: 5 minutes | Pause: 15 minutes** NOTE: During the pause of the White Mask, apply evenly the remaining quantity of the Brightening Essence – Brown Spots on hands and forearms. Proceed to the massage insisting on brown spots. Then apply the remaining mixture of the 3 in 1 Treatment Mask + Brightening Solution and proceed to a massage of the hands and the forearms insisting on brown spots. Rinse hands and forearms thoroughly. End with the application of a Sunblock Lotion SPF 30. Massage: 10 minutes (5 minutes each hand and forearm) Remove excess mask with the help of a spatula. Rinse thoroughly first with lukewarm water, then with cold water.	25	Titanium Dioxide, Hyaluronic Acid, Acacia, Jojoba and Sunflower Vegetal Waxes	• Brightens skin and enhances radiance • Hydrates the epidermis
6	**Final Touch with Overall Brightening Emulgel** End the treatment by applying Overall Brightening Emulgel to the face, the neck and décolleté. Massage in with light effleurage. Follow with UV-Science SPF 30 Fluid Lotion or Rich Emulsion.	2	CHROMOCARE™ (combination of Rabdosia rubescens and Siegesbeckia orientalis), 4-Butyl resorcinol, Ergothioneine, Micronized Titanium Dioxide Venuceane™, Aquaxyl™, Light reflecting agent, Vitamin E	• Enhances radiance and evens skin tone • Antioxidant action, diminishes signs of ageing • Sun protecting, age-defying formula • Remarkable sun protection • Helps prevent the appearance of brown spots • Fights the look of wrinkles and signs of premature ageing

THE OPTIMAL TREATMENTS

The Rosa-C³ Program for Sensitive Skin with Redness

Rosacea: a chronic but controllable skin condition

Rosacea is a chronic and progressive dermatosis that causes facial inflammation and redness. Characteristic clinical signs on the face may include:

- Flush or temporary redness
- Erythrosis or permanent redness
- Rosacea or visible telangiectasia (microvessels) over a background of erythrosis
- Amicrobial papular or papulopustular eruptions (breakout of small pimples)

Rosacea cannot be cured, but its symptoms can be controlled and its progression limited.

Rosa-C³ skin care products visibly reduce the intensity and extent of facial redness. The size and number of visible microvessels are reduced. Skin is decongested. The complexion is much more even. The sensation of burning disappears. Skin is soothed and the progression of clinical signs is controlled.

Major active ingredients

ROSA-C³ Cell Control Complex

Melissa extract, green coffee extract, oak tree extract, olive leaf extract, palmitoyl tripeptide-, acetyl tetrapeptide-33*

The ROSA-C³ Cell Control Complex is a calming, anti-inflammatory and vasoprotective concentrate

- Reduces the intensity and extent of redness
- Reduces the number and size of visible microcapillaries
- Controls the progression of clinical signs
- Reduces the sensation of burning
- Instantly soothes

Dormant narcissus bulb extract

Dormant narcissus bulb extract

- Increases skin's natural defenses

Boldo extract

Boldo extract

- Reinforces the cutaneous barrier

Optimal advice for your customer

At home

- Limit sun exposure
- Protect the skin from extreme climate conditions and wind
- Minimize the consumption of hot drinks and alcohol
- Eat spicy food with moderation
- Avoid intense physical exercise
- Control emotions and manage stress
- Avoid irritating products

For truly effective treatment, combine professional treatments at an institute with the use of at-home skin care products. At home:

At the institute

- Apply Rosa-C³ SOS Serum and Rosa-C³ 24H Emulsion Control morning and night for a two-month period.
- At the same time, recommend one ROSA-C³ a week for four weeks.
- For rosacea:
  4 series of ROSA-C³ cures per year
- For couperose, erythrosis and diffuse redness:
  2 series of ROSA-C³ cures per year

Cleanse

HydraCalm Cleansing Milk or **Antipollution Cleansing Mousse**
HydraCalm Lotion

See section on Cleansers

Serum

Rosa-C³ SOS Serum

For people with occasional redness, erythrosis or rosacea

Instant soother – Reduces and prevents redness

- Instant anti-redness care
  with Cell Control Complex
- Instant soother, restores comfort and well-being
  with Dormant Narcissus bulb extract
  with Fucogel®
- Decreases skin reactivity
- Reduces the permeability of capillaries and improves their resistance
- Reduces the signs of ageing
- Rosa-C³ SOS Serum should be applied before Rosa-C³ 24H Emulsion Control

Fresh, moisturizing emulgel with a high concentration of active ingredients and a calming white lotus fragrance
Retail size: 50 ml airless tube with pump

Target

Rosa-C³ 24H Emulsion Control

For people with occasional redness, erythrosis or rosacea

Reduces and prevents redness; calms burning

- Decrease redness and its progression
  with Cell Control Complex
- Provides comfort and well-being, reduces the appearance of capillaries
  with Dorman narcissus bulb extract
  with Boldo extract
  with Fucogel®
- Increases the natural defense of skin
- Reduces signs of ageing
- For optimal results, apply Rosa-C³ SOS Serum before Rosa-C³ 24H Emulsion Control

Light, creamy emulsion with a calming red fruit fragrance and a green tint to neutralize redness
Retail size: 50 ml airless tube with pump

Calm

Calm skin with the **HydraCalm Mask**

See section on Masks

Eye Contour

Care for your eye area with the Eye Contour Cream adapted to your needs

See section on Eye Contour Care

Sun awareness

Always keep your skin protected with **UV-Science SPF 30 Daily High Protection, UV-Science SPF 30 Fluid Lotion, Moisturizing Anti-Wrinkle Suncare SPF 30** or **Loose Powder SPF 50 Broad Spectrum**

See section on Cell'Defense Sun Care

THE OPTIMAL TREATMENTS
Rosa-C³ Professional Treatment - Protocol

Indications

For all, men and women, with sensitive skin, prone to irritation.

Frequency of Use

- As a cure, 2 to 4 times a year, depending on the degree of sensitivity.

1 cure = 4 optimal treatments at the rate of 1 treatment per week during 4 consecutive weeks

Complementary Home Care Products

The twice-a-day use at home of SOS Serum followed by the 24H Emulsion Control is essential for obtaining results. In the morning, also apply UV-Science SPF 30 Fluid Lotion OR Rich Emulsion.

DURATION OF TREATMENT: 1 HOUR

Preparation of the Material

- Remove from the Rosa-C3 box all the necessary material for a professional treatment from the Rosa C3 box.
- Using a measured recipient, fill it with 120 ml / 4.0 FL. OZ. of tap water and let stand at room temperature.

Cleansing / Make-Up Removal – Required Time: 5'

Remove eye make-up with the Eye Make-Up Removal. Thoroughly cleanse the face and the neck with the HydraCalm Cleansing Milk and Lotion.

	Steps	Time	Major Ingredients	Actions
1	**Exfomousse – Exfoliation Phase** Cover the eyes with cotton pads soaked in Blue Water. With the fingertips, apply evenly to the face and neck the entire content of one ExfoMousse monodose as with a mask, making sure to avoid the lips. **Application: 2-3 minutes | Pause: 8-10 minutes** The application time with the pause should not exceed 10 minutes. Uncover the eyes. Rinse abundantly with lukewarm water, then with cold water. NOTE: It is normal to feel a light tingling sensation during the application of this product.	10	Exfoliating enzyme	• Gently eliminates dead cells and impurities • Deep-cleanses the epidermis • Promotes the absorption of the key ingredients of the formula
2	**Gel Mask – Soothing Phase** Gently proceed to light effleurages and apply the Gel Mask in a thin layer to the face and neck. Pause for 5 minutes. Do not rinse. **Application: 1 minute | Pause : 5 minutes**	6	Symsitive 1609®, ß-glucan, Hyaluronic Acid	• Instant and powerful action • Helps soothe immediately • Actively fights the effects of cutaneous stress
3	**SOS Serum – Restoring Phase** Apply the SOS Serum in a thin layer, by performing light effleurage on the entire face and neck. Do not massage.	2	Cell Control Complex (Rosmarinyl Glucoside, Caffeyl Glucoside, Gallyl Glucoside, Palmitoyl Tripeptide-8, Acetyl Tetrapeptide-33, Oleoeuropeine – Antioxidant Olive Leaf Extract), Narcissus Dormant Bulb Extract, Fucogel®	• Immediate soothing action • Helps decrease redness significantly in intensity and size, thanks to its hydrating formula • Restores comfort and well-being • Helps reduce sensations of skin discomfort • Helps increase resistance of skin
4	**Repair Phase – Microemulsion** Using the pipette, draw out 2 ml / 0.06 fl. oz. of the MicroEmulsion. Apply to the entire face and neck with light effleurage. Cover the eyes with cotton pads soaked in Blue Water.	10	Caper Floral Bud Extract	• Soothes • Helps decrease cutaneous hypersensitivity via moisturisation

5	**Relaxing Phase – Powder Mask** Empty the entire contents of a pouch of the Powder Mask into a bowl high enough to avoid spilling when stirred. Add the 120 ml / 4.0 FL. OZ. of water all at once and stir energetically with a spatula to obtain a homogeneous and creamy mixture. • Both the powder and the water must be at room temperature before using. • The preparation time of the mask must not exceed 2 to 3 minutes. Using a spatula, apply the mask immediately, starting at the bottom of the face and moving up toward the cheeks and the nose, ending at the forehead. To facilitate removal of the mask, apply it evenly with a regular contour and avoid the hairline. Let stand for approximately 20 minutes. Remove the mask as if it were a film, starting at the neck and moving up slowly toward the forehead. Remove the excess product with a damp gauze.	20	Alginates, Bilberry Extract, Vitamin C	• Optimizes the absorption of the formula's key ingredients • Helps reinforce the skin • Reduces the appearance of wrinkles • Hydrates and smooths the epidermis
6	**Active Protection Phase – 24h Emulsion Control Cream** End the treatment by applying a small quantity of 24H Emulsion Control Cream to the face and neck. Massage in with light effleurage. The aesthetician may also add UV-Science SPF 30 – Rich Emulsion depending on climatic conditions.	2	Cell Control Complex (Rosmarinyl Glucoside, Caffeyl Glucoside, Gallyl Glucoside, Palmitoyl Tripeptide-8, Oleoeuropeine – Antioxidant Olive Leaf Extract), Narcissus Dormant Bulb Extract, Peumus boldus Extract, Squalane, Titanium Dioxide (TiO2)	• Reduces redness and its progression • Provides comfort and well-being • Decreases the appearance of capillaries • Reinforces and protects the microcirculation • Increases the skin's natural defences • Helps reinforce and protect skin • Enhances skin's texture

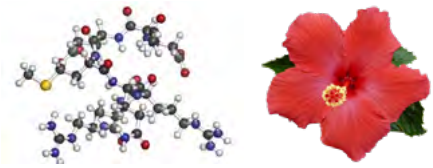

THE OPTIMAL TREATMENTS

Specialized Anti-Ageing Pure Kronoxyl-⑨ Treatments

Never has a treatment done so much to correct wrinkles and prevent ageing. A combination of Kronoxyl-⑨ and complementary active ingredients, Pure Kronoxyl-⑨ Complete Youth has a dramatic effect on the 3 types of facial wrinkles: expression lines, deep wrinkles and superficial wrinkles. Its deep-acting dermo-relaxing effect relaxes facial features and prevents expression lines. Its restructuring action fills deep wrinkles from within. On the surface, Pure Kronoxyl-⑨ Complete Youth fills fine lines and superficial wrinkles. It also improves major esthetic parameters such as luminosity and rosy complexion. Pure Kronoxyl-⑨ Complete Youth is also an excellent anti-ageing treatment.

Major active ingredient: Kronoxyl-⑨, Laboratoire Dr Renaud's exclusive anti-ageing complex

Dermo-relaxing phase

3 "Botox-effect" peptides

- Corrects expression lines
  with a blend of three "Botox-effect" peptides
  - Peptides derived from hibiscus esculentus seeds
  - Acetyl hexapeptide-8
  - Tripeptide action similar to that of Waglerin-1

Restructuring phase

Five smoothing and restructuring active ingredients

- Fills wrinkles, fine lines and permanent wrinkles
  with five smoothing, restructuring active ingredients
  - Matrikines
  - Tripeptide-10 citrulline
  - Tripeptide-1
  - Wheat and soy peptides
  - Marine ferment extract

Lifting phase

Kombucha

- Lifts
  with kombucha extract

Pure Kronoxyl-⑨
Complete Anti-ageing Skin Care

For all skin types, even the most sensitive

Pure corrects the 3 types of wrinkles: superficial wrinkles, deep wrinkles and expression lines. Improves the major esthetic parameters and prevents cutaneous ageing.

PURE Expression – Wrinkle Corrector
- dermo-relaxing
- corrective and preventive effect on expression lines

PURE Lifting
- filling effect on deep wrinkles
- "Lifting" effect on fine lines and superficial wrinkles
- increase of the complexion's luminosity
- restructuring effect on skin framework

Whitout parabens – without parfume – without coulouring agents

Each box contains 2 serums
- PURE Expression - 1 bottle with 15 ml dropper
- PURE Lifting - one 30 ml bottle with pump

Advice for your customer

At home

Morning and night, after a thorough cleansing of the skin:
- Apply a few drops of **PURE Expression** on those areas of the face showing expression lines. Massage in gently.
- Then, apply 4 pumps of **PURE Lifting** to the entire face and neck. Massage in gently.
- If necessary, follow with the day or night cream recommended by your aesthetician.

Notes

Pure Re[Gene] – Sumptuous Rejuvenating Cream

For all skin types, even the most sensitive ones, except for oily and acne-prone skin.

Target 24H

A luxurious sumptuous rejuvenating cream to restore firmness, elasticity, and density

- Restores skin density and firmness
  Our powerful and exclusive Cell2Cell Complex combines a mix of over 5 proprietary synthetic and plant-based biomimetic cytokines, true youthfulness messengers which regulate cellular communication. This complex can activate skin repair and essential rejuvenation mechanisms in dermis and epidermis. Collagen, elastin and hyaluronic acid production are improved, and wrinkles are visibly plumped.
- Intense plumping effect
  Oligosaccharide-Rich Peony Extract remodels facial contours and restores contour of the face. The face's volume and features are harmonized, making skin appear younger.
- Restores hydration
  Our natural hydration complex restores natural hydration by regulating the skin's hydric and lipid balance, for an optimal circulation of youthfulness messengers within the skin.
- Protective and anti-aging properties
  Avocado oil and vitamin E

Tips from the pros

- To preserve cream's purity, use the spatula to deposit a small amount onto fingertips
- Use morning and night over your serum
- Apply a small quantity on face, neck and décolleté and massage in with light effleurages until absorbed
- Follow with sunscreen

Formulated without any parabens, formaldehyde, MIT, triclosan, BHA-BHT, dyes, alcohol, PEG, sulfates, phthalates, mineral oils, or 1,4-dioxane. Gluten-free and vegan formula.
Retail size: 50 ml jar

Pure Re[Gene] – Rejuvenating Eye Elixir

Suitable for all skin types, even the most sensitive, with the exception of oily, acne-prone skin.

Target 24H

A luxurious eye cream to decrease wrinkles around the eye, smooth the lower eyelid and lift the upper eyelid and to correct dark circle and puffiness

- Restores skin density and firmness
  Our powerful and exclusive Cell2Cell Complex combines a mix of over 5 proprietary synthetic and plant-based biomimetic cytokines, true youthfulness messengers which regulate cellular communication. This complex can activate skin repair and essential rejuvenation mechanisms in dermis and epidermis. Collagen, elastin, and hyaluronic acid production are improved, and wrinkles are visibly plumped.
- Restore the youthful appearance of the eye contour and upper lid
  The combination of Silk tree extract and St-John's wort targets the upper eyelid and helps support the dermal structure. It also reduces crow's feet and reduce puffiness
  Acetyl Octapeptide-3, minimizes the appearance of expression lines
  Vegetal instant tensor, produces an immediate lifting and smoothing effect
  Vegetal Polysaccharide complex, improves elasticity and diminishes the appearance of wrinkles
- Corrects dark circles
  Biologically active Algae Polysaccharides, reduces the appearance of dark circles and under eye bags
- Deeply hydrates
  Low molecular weight hyaluronic acid
  Natural Hydration complex that includes jojoba esters, avocado oil, and a humectant

Tips from the pros

The perfect PURE ReGene experience : Morning and evening, after cleansing the skin, apply PURE Re[Gene] Multiperfection Serum to the face, neck and décolleté. Apply PURE Re[Gene] Rejuvenating Eye Elixir to the eye contour including the outer edge of the upper lid and gently pat in. Then apply PURE Re[Gene] Sumptuous Rejuvenating Cream on the face, neck and décolleté. Proceed with the application of sun protection.

Formulated without any parabens, formaldehyde, MIT, triclosan, BHA-BHT, dyes, alcohol, PEG, sulfates, phthalates, mineral oils, or 1,4-dioxane. Gluten-free and vegan formula.
Retail size: 15 ml airless bottle with pump

Pure Re[Gene] – Multiperfection Serum

For all skin types, even the most sensitive ones, except for oily and acne-prone skins

Target Night

A luxurious and refined serum for signs of set-in wrinkles, skin sagging, and loss of volume and density

- Restores skin density and firmness
  Our powerful and exclusive Cell2Cell Complex combines a mix of over 5 proprietary synthetic and plant-based biomimetic cytokines, true youthfulness messengers which regulate cellular communication. This complex can activate skin repair and essential rejuvenation mechanisms in dermis and epidermis. Collagen, elastin, and hyaluronic acid production are improved, and wrinkles are visibly plumped.
- Intense plumping effect
  Oligosaccharide-Rich Peony Extract remodels facial contours and restores contour of the face. The face's volume and features are harmonized, making skin appear younger.
- Correct signs of ageing
  Niacinamide, also known as vitamin B3 improves barrier and hydration function, diminishes pigments spots and reduces fun lines and improves skin elasticity
- Deeply hydrates
  Low molecular weight hyaluronic acid
  Natural Hydration complex that includes jojoba esters, avocado oil, and a humectant

Tips from the pros

The perfect PURE ReGene experience : Morning and evening, after cleansing the skin, apply 2 pumps of PURE Re[Gene] Multiperfection Serum to the face, neck and décolleté. Penetrate with light effleurages. Apply PURE Re[Gene] Rejuvenating Eye Elixir to the eye contour and then apply a small amount of PURE Re[Gene] Sumptuous Rejuvenating Cream on the face, neck and décolleté. Proceed with the application of at least SPF 30 sunscreen and make-up application if desired.

Formulated without any parabens, formaldehyde, MIT, triclosan, BHA-BHT, dyes, alcohol, PEG, sulfates, phthalates, mineral oils, or 1,4-dioxane. Gluten-free and vegan formula.
Retail size: 30 ml airless bottle with pump

PURE Overnight Youth Concentrate

For all skin types

Target Night

Restores facial features and provides advanced plumping action

- Corrects the three types of wrinkles
  Erases signs of fatigue
  with Kronoxyl-⑨
- Plumps skin
  with high-molecular-weight hyaluronic acid
- Calms and soothes
  with Tasmanian pepper extract

Tips from the pros

At night, thoroughly cleanse the face and neck and apply a generous amount of **PURE Overnight Youth Concentrate.**

For advanced plumping action:
Leave on for 15 minutes and massage in with light effleurage. Remove excess product with a tissue if needed. Do not rinse. Allow to work all night. In the morning, rinse with water.

For a reparative cure:
Renew application for seven consecutive evenings. Then use three times a week.

For an instant radiance boost:
Leave on for 10-15 minutes, then rinse with water

Fresh, smooth oil-in-water emulsion
Retail size: 60 ml tube

PURE youth eye contour with PURE Kronoxyl-⑨

For eye contour area

A "lifting" effect and instant glow

- Hydrates the eye area and gives an instant glow
  - Aloe Vera
  - Vitamin K3
  - Natto Gum
- Reduces the appearance of fine lines and wrinkles
  - Pro-retinol
- Plump up the facial features
- Erases signs of fatigue

Tips from the pros

PURE eye patches have an occlusive effect! When you apply a skin care product under the patches, you help the other active ingredients to penetrate the skin

PURE Kronoxyl-⑨ Anti-Ageing Lips and Contour

For all skin types

Specific Areas

Complete lip care: restores volume, smooths contours, repairs and protects

- Corrects and prevents the three types of lip contour wrinkles
  with Kronoxyl-⑨
- Restores volume
  with palmitoyl tripeptide-1, dipalmitoyl hydroproline (a lipoamino acid) and hyaluronic acid
- Repairs and protects
  with prickly pear extract, wild mango butter and shea butter

- Improvement in appearance of lips: 100%
- Increase in lip volume: 40%
- Reduction in wrinkles: 29%
- Reduction in depth and length of nasolabial furrows: -37%

Gentle, smooth and moisturizing oil-in-water emulsion with rose and grapefruit fragrance
Retail size: 10 ml pump

PURE Anti-Ageing Neck & Décolleté For all skin types

Smooths neck and neckline and reduces the double chin effect

- Firms, plumps and adds density to neck and neckline skin
  with a blend of centella asiatica and Dermican®
- Restores skin's texture
  with calcium and essential nutrients
- Reduces the double chin effect
  with yellow glaucine extract

Oil-in-water emulsion
Retail size: 50 ml

THE OPTIMAL TREATMENTS

Pure Kronoxyl-⑨ Complete Youth Professional Treatment – Protocol

Indications

Vertical wrinkles, cutaneous sagging, lack of tonicity.

- All skin types, including the most sensitive, at the first sign of wrinkles.
- As a cosmetic alternative to surgical anti-ageing procedures.
- Also indicated for those who resort to these surgical techniques, to reduce their frequency or simply as an enhancing treatment.

Complementary Home Care Products

The PURE Kronoxyl-⑨ Complete Youth Skin Care morning and evening for approximately 1 month, as a complement to the usual regimen or the ExCellience Volusculpt Concentrated Lifting- 3D Cure morning and evening for approximately 1 month.

DURATION OF TREATMENT: 1 HOUR

Relaxing Massage – Time Required: 3'

1. Breathing
2. Relaxing shoulders
3. Kneading arms and nape of neck
4. Relaxing the scalp

Frequency of Use

5 treatments, at the rate of 1 treatment per week for 5 consecutive weeks.

Preparation of Material

- Remove from the PURE box 1 tray containing the necessary material for one professional treatment.
- Prepare a recipient filled with hot water and soak the tissue mask for later use.

Cleansing / Make-Up Removal - Time Required: 5'

Remove eye make-up with the appropriate Eye Make-Up Remover. Thoroughly cleanse skin with the Milk and Lotion adapted to the client's skin type. Dry skin gently.

	Steps	Time	Major Ingredients	Actions
1	**Duofoliant 1** On dry skin, apply evenly the content of one monodose of the Duofoliant 1 to cover the face, neck and décolleté. Let dry for 2 minutes. Rub the product gently with fingertips performing light effleurage. Gently remove particles with a dry gauze. Emulsify the skin and rinse thoroughly first with lukewarm water, then with cold water. **Application: 1 minute | Pause: 2 minutes | Removal: 5 minutes**	8	Bamboo exfoliating microbeads and apricot extract	• Exfoliates, eliminates dead cells and impurities • Reveals radiance • Prepares the skin to receive the other ingredients of the treatment, improves absorption
2	**Duofoliant 2** Cover the eyes with cotton pads soaked in Blue Water. Dry the skin and, with fingertips, apply evenly the entire content of one monodose of the Duofoliant 2 to the face, the neck and the décolleté, making sure to avoid the lips. Pause for 5 minutes. Uncover the eyes. Rinse thoroughly and liberally the face, neck and décolleté, first with lukewarm water, then with cold water. Note: It is normal to feel a light tingling sensation during the application and pause of the product. TIP: Take advantage of the pause to prepare the Diffusion Active patches. Dry your hands and lift off the patches. Put away the detached patches in the pouch to make sure they don't get wet. WARNING: Follow instructions for use. Avoid contact with eyes. If irritation persists, discontinue use and consult a physician. Prior to sun exposure, it is recommended that sunscreen be applied to areas where the product containing AHAs was applied. Contact of the product with the skin must be of limited frequency and duration. **Application: 1 minute | Pause: 5 minutes | Removal: 1 minute**	7	Salicylic Acid 0.4% – exfoliating, AHAs (glycolic and lactic acids) 10% – superficial peeling effect and moisturizing effect, brightening and revitalizing Vegetal Extracts (Burdock, Sage, Grapefruit, Ivy, Soapwort) and Apricot extract	• Exfoliates, eliminates dead cells and impurities • Deep-cleanses the epidermis • Helps improve absorption of other ingredients • Soothes the epidermis thanks to its hydrating properties • Reveals a new skin layer • Prepares for other treatment steps
3	**Lift & Fill Concentrate** Apply with light effleurages 2 ml of the content of the Lift & Fill Concentrate tube to the face, the neck and the décolleté. Reserve 13 ml of the content of the tube of the Lift & Fill Concentrate for the Fusion Mask phase. Do not rinse. **Effleurage: 1 minute**	1	Swertiamarin extracted from Indian Gentiana leaves, Palmitoyl Isoleucine, Extract from Apple Stem Cells , Extract from Argan Stem Cells, Acetyl Tetrapeptide-2, Hyaluronic Acid, Tensor extracted from Oats and Apricot extract	• Provides intense epidermal hydration • Repulps* sags • Smooths the appearance of fine lines and wrinkles • Tonifies the epidermis through hydration

4	**Volumizing Emulsion** Apply the entire content of the tube to the face, neck and décolleté. Perform the anti-ageing massage. DO NOT RINSE. Massage: 10 minutes Movements: 1. Effleurages 2. Pointed pressures 3. Kneading 4. Anti-wrinkle pinching 5. Vacuum 6. Eye massages: effleurages (simple, superciliary arch, pyramidal, 8), malaxation, percussions, smoothing	10	Highly concentrated Sorbitol and Citrus and mango extract	• Hydrates • Minimizes the appearance of skin texture
5	**Diffusion Active Patches + Expression Pro** Cover the eyes with cotton pads soaked in Blue Water. Using the syringe, draw out 1 ml of Expression Pro. Apply the product on expression lines and perform a light massage, smoothing the deepest lines. Proceed by section.** Position the patches on the appropriate area of the face, applying light pressure to keep them in place. Using the syringe, draw out the Expression Pro and soak each Diffusion Active Patch by section. Repeat the steps for each section. **See diagram on the label of pouch	7	Diffusion Active Patches: Lyophilized Native Collagen (>95 %), Cellulose Expression Pro: Dermo-relaxing phase of Kronoxyl-⑨ – Extract from Hibiscus esculentus seeds, Waglerine 1-type Tripeptide, Acetyl Hexapeptide-8	• Boosts the action of the Expression Pro • Hydrates • Attenuates and helps prevent the appearance of expression and dehydration wrinkles
6	**Fusion Mask + Lift & Fill Concentrate** Remove mask from water and lightly squeeze out excess water. Place the Fusion Mask on the face. Apply the remaining quantity of the Lift & Fill Concentrate over the Fusion Mask. (12 ml reserved at step 3). Remove the tissue mask. DO NOT RINSE. **Application: 1 minute – Pause: 15 minutes – Removal: 1 minute**	17	See ingredients at step 3	• Hydrates • Repulps* lines • Attenuates and helps prevent the appearance of vertical wrinkles • Redefines facial contours thanks to its hydrating properties
7	**Concentrated Lifting-3D Serum** End the treatment with the application of the **Concentrated Lifting-3D Serum** to the face, the neck and décolleté. Massage in with light effleurages. The aesthetician will decide if a protection cream is needed according to the climatic conditions of the moment.	1	Swertiamarine extracted from Indian Gentiana leaves, Palmitoyl Isoleucine, Extract from Apple Stem Cells , Extract from Argan Stem Cells , Acetyl Tetrapeptide-2, Hyaluronic Acid, Tensor extracted from Oats and Citrus and Mango extract	• Attenuates and helps prevent the appearance of vertical wrinkles • Repulps* sags • Coats the skin's surface for a smoothing effect • Redefines facial contours thanks to its hydrating formula • Minimizes the appearance of signs of fatigue • Increases the skin's radiance • Provides an immediate tightening effect

*Through hydration of the upper epidermal layers

THE OPTIMAL TREATMENTS

Specialized Retinol Activ 0.5 Anti-Ageing Treatments - Protocol

Indications

Premature ageing, skin sagging, loss of firmness

- All skin types, even the most sensitive, at the first sign of chronological and/or premature ageing
- It is also recommended that it be used alternately with **PURE** at the first sign of wrinkles or skin sagging.

WARNING: Note that it is not recommended that retinol be used if you are or plan to become pregnant, or if you are breastfeeding. If you are pregnant or breastfeeding, consult your doctor before using any product containing retinol. Although no studies have shown any adverse effects of topical retinol on the development of the fetus, problems have been observed with the ingestion of retinoic acid.

Frequency of use

Five treatments, 1 treatment a week for 5 consecutive weeks.

Complementary at-home treatment

InnovHyal in the morning and **Retinol 0.22** in the evening for approximately 1 month, as part of the usual treatment plan.

DURATION OF TREATMENT: 1 HOUR

Preparation of material

- Remove the material needed to administer 1 professional treatment from the **Retinol Activ 0.5** kit. Prepare a container for measuring 160 mL of water, which will be used to create an **Enfolding Mask**.

Relaxing massage – required time: 3'

1. Breathing
2. Shoulder relaxation
3. Kneading of the arms and neck
4. Scalp relaxation

Cleansing/makeup removal – time required: 5'

Remove eye makeup using the **Eye Make-Up Remover**. Carefully cleanse the face using the Milk and Lotion suited to the skin type. Gently dry the skin.

	Steps	Time	Major Ingredients	Actions
1	**Duofoliant 1** Dry the skin. Evenly apply the entire single-dose container of **Duofoliant 1** to the face, neck and chest, in a thin layer. Let dry 2 minutes. Lightly roll the product under your fingers. Gently remove the particles with dry gauze. Emulsify and rinse thoroughly with warm and then cold water. **Application: 1 minute | Pause: 2 minutes | Removal: 5 minutes**	8	Exfoliating bamboo microbeads	• Exfoliates, eliminates dead cells and impurities • Restores a radiant complexion • Prepares the skin to receive the other active ingredients, improves absorption
2	**Duofoliant 2** Cover the eyes using cotton pads soaked with **Blue Water**. Dry the skin and, using your fingertips, evenly apply the entire single-dose container of **Duofoliant 2** to the face, neck and chest, being careful to avoid the lips. Take a 5-minute pause. Thoroughly rinse the face, neck and chest with warm and then cold water. **Application: 1 minute | Pause: 5 minutes | Removal: 1 minute** Note: It is normal to feel mild tingling while the product is being applied and during the pause. Tip: Take advantage of the pause to prepare the collagen glasses. Gently remove the collagen glasses from its envelope and put on a clean and dry surface.	7	0.4% exfoliating salicylic acid — 9% AHAs (glycolic and lactic acids) — surface peeling and moisturizing effect Brightening and revitalizing plant extracts (burdock, sage, grapefruit, ivy, soapwort)	• Eliminates dead cells and impurities • Thoroughly cleanses the epidermis • Helps the skin absorb subsequent ingredients • Soothes the epidermis thanks to its hydrating properties • Exposes a new skin layer • Prepares the skin for other treatment steps
3	**Volumizing emulsion** Apply with light effleurages the entire content of the tube to the face, neck and décolleté. Do not rinse.	1	Highly concentrated sorbitol, citrus and mango extract	• Powerful natural humectant • Provides long-lasting hydration • Improves the appearance of skin texture through moisturization • Repulps features thanks to its hydrating properties

4	**Massage Emulsion** Apply the entire container to the face, neck and chest. Perform anti-ageing massage. Do not rinse. Massage: 10 minutes. **Techniques:** 1. Effleurage 2. Pressure points 3. Kneading 4. Anti-wrinkle pinching 5. Vacuum 6. Eye massages: light effleurage (simple, superciliary arch, pyramidal, 8), malaxation, percussion, smoothing	10	Spilanthes acmella flower bud extract, apple stem cells, olive leaf polyphenols, argan leaf polyphenols, Metabiotics® Resveratrol, grape seed oil	• Immediate firming effect • Redensifies skin's appearance • Improves skin's overall appearance
5	**Retinol 0.5** Apply the entire single-dose sachet to the face, neck and chest. Perform light effleurage to allow product to penetrate.	1	Retinol encapsulated in Poly-Pore™ technology for extended release, M189 retinopeptide, antioxidant rosemary extract, alpha-bisabolol, allantoin	• Improves the appearance of fine lines and wrinkles • Visibly reduces the size of pores • Improves the appearance of skin tone & texture • Reverses the appearance of other signs of ageing
6	**Collagen Glasses + Activating fluid** Lightly moisten the eye contour with a small amount of **Activating Fluid** and completely cover the area with the **Collagen Glasses**. Using the remainder of the single-dose bottle of **Activating Fluid**, soak the mask completely.	5	Lyophilized insoluble native collagen, extracts of butcher's-broom, sophora japonica flowers, red vine leaf, St. John's wort, chestnut, ivy, arnica and witch hazel	• Improves the appearance of circles under the eyes • Reduces the appearance of fatty bags and prevents them from forming
7	**Enfolding Mask** In a bowl containing 160 mL of hot water (45°C), slowly sprinkle the entire contents of the single-dose jar of **Enfolding Mask** over the surface of the water and mix with a spatula to obtain a homogeneous gel. Use the spatula to apply the mask to the face and neck. Take a 15-minute pause. Use the spatula to remove the **Enfolding Mask**. Carefully remove the **collagen glasses**. Rinse the excess product properly with lukewarm water, then with cold water. **Application: 3 minutes | Pause: 15 minutes | Removal: 1 minute**	19	Extracts of bull kelp and sargassum algae, sea buckthorn oil	• Promotes the absorption of treatment ingredients • Tightens the skin and smooths skin texture • Restores a radiant complexion • Moisturizes the epidermis • Intensely comforting
8	**Triple Lipid** End treatment by applying **Triple Lipid** to the entire face, neck and décolleté. Use light touch to allow the product to penetrate. Then apply **UV-Science SPF 30** sun protection cream. Offer the **Triple Lipid** tube to the customer and suggest that she use the remaining contents at home.	1	Ceramides, cholesterol, essential fatty acids, niacinamide, probiotics	• Restores the skin's essential lipids: ceramides, cholesterol and fatty acids • Replenishes skin's bounce, improves texture, diminishes appearance of pores • Diminishes appearance of discoloration, evens skin tone, restores radiance

THE OPTIMAL TREATMENT

The HydraScience AHD³ Program for Dehydrated Skin

Optimal daily hydration: the key to youthful, healthy skin

Skin is made up of 70% water. it is the basis for all biochemical processes in the skin. The better the skin's hydration, the smoother, healthier, more radiant and more resistant to exterior aggression it becomes. To maintain or restore optimal hydration, three actions are necessary:

1. Maintain or restore a healthy cutaneous barrier
2. Moisturize superficially and deeply
3. Irrigate skin evenly with aquaporins

HydraScience takes control of all the skin's hydration mechanisms for 100% superficially and deeply hydrated skin. Thanks to Laboratoire Dr Renaud's exclusive complex, HydraScience AHD³, the skin is plumped, features are smoothed and skin appears more youthful.

Major active ingredients

AHD³ complex

Peptides, wild pansy extract and plant-based complex sugars

- Optimizes epidermal and dermal water reserves
- Optimizes skin's barrier function
- Reboots aquaporin production to promote water circulation between skin cells

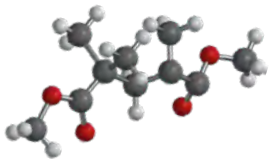

P.A. complex Reviviscence

Flower of stone, tamarind and trehalose extracts

- Guarantees optimal hydration for 24 hours, regardless of external conditions

Rhamnosoft® HP

Rhamnose

- Prevents inflammation
- Provides fragilized skin with immediate and lasting relief

Biomimetic lipids

Biomimetic lipids

- Repair the cutaneous barrier
- Increase skin's resistance

Optimal advicefor your customer

At the institute

For visibly younger skin after the first treatment, your aesthetician recommends **HydraScience AHD³ Optimal Professional Treatment.** This is recommended as an most intensive treatment, and for maintenance:

- At the change of seasons
- Before the summer or when travelling to the South to minimize the drying effects of swimming and sun
- Before any anti-ageing surgery to promote scar healing and recovery
- For anti-ageing prevention, as often as desired
- As needed for extreme dehydration
- After air travel, prolonged exposure to wind or cold, swimming in chlorinated water, fever, etc.

It is also an excellent preparation for all other professional treatments in the Laboratoire Dr Renaud Optimal Program.
The Ultra-Moisturizing Collagen Veil with hyaluronic acid is recommended for a quick boost. It is especially suited to ageing skin with surface and/or deep dehydration.

Cleanse	**HydraCalm Cleansing Milk** **HydraCalm Lotion**	See section on Cleansers
Exfoliate	For more effective, faster results, exfoliate with the product recommended by your aesthetician	See section on Exfoliants
Serum	**InnovHyalHA Volumizing HydraSerum**	See section on Serums
Target	**HydraScience AHD³** **– Light Emulsion – Rich Emulsion**	See The Essential gestures, section on HydraScience
Mask	**HydraCalm**	See section on Masks
Eye Contour	Care for your eye area with the Eye Contour Cream adapted to your needs	See section on Eye Contour Care
Sun awareness	Always keep your skin protected with **UV-Science SPF 30 Daily High Protection, UV-Science SPF 30 Fluid Lotion, Moisturizing Anti-Wrinkle Suncare SPF 30** or **Loose Powder SPF 50 Broad Spectrum**	See section on Cell'Defense Sun Care

THE OPTIMAL TREATMENT
HydraScience AHD³ – Protocol

Indications

For all dehydrated skin, including oily skin and sensitive skin. For all, men and women, at the first sign of dehydration.

In a cure, as an intensive treatment then as a maintenance treatment, particularly:

- at the change of seasons;
- before the summer or vacation in the South so as to minimize the drying effects of swimming and of the sun;
- before any anti-ageing surgery;
- as a preventive measure, as often as desired.

Frequency of Use

4 treatments at the rate of 1 treatment per week during 4 consecutive weeks

Complementary Products to be Used at Home

The twice-a-day use at home of HydraScience AHD³ Rich Emulsion or HydraScience AHD³ Light Emulsion is essential for obtaining the long-term benefits of the treatment.

DURATION OF THE TREATMENT: 1 hour

Preparation of the Material

- Remove from the HydraScience AHD³ box all the necessary material for a professional treatment.
- Prepare a container for measuring 100 ml / 3.38 fl. oz. of water, which will be used for the Aquapowder Mask.

Pre-Relaxation Phase

Wet 2 compresses with warm water then soak them in HydraCalm Lotion. Unfold the compresses so as to cover the entire face.

Pause: 2 minutes

Cleansing / Make-Up Removal – Required Time: 5'

Thoroughly cleanse the face with the HydraCalm cleansing milk and lotion. Dry the skin gently.

	Steps	Time	Major Ingredients	Actions
1	Prep Lotion Cover the eyes with cotton pads soaked in Blue Water. With the fingertips, apply evenly to the face and neck the Prep Lotion as with a mask, making sure to avoid the lips. **Application: 2-3 minutes** **Pause: 7-8 minutes** Note: It is normal to feel a light tingling sensation and/or a sensation of warmth during the application of this product and the pause. Tip: Take advantage of this pause to open completely the sterile packaging protecting the pre-cut gauze. Open the small jar of the Melting Balm. Uncover the eyes. Rinse abundantly with lukewarm water, then with cold water.	10	Keratolytic Enzyme, Synergy of pro-hydrating E.O. (Rosewood, Lavandin, Petit Grain, Bergamot, Litsea, Cedar, Fennel), Sorbitol	• Eliminates dead cells and impurities • Deep-cleanses the epidermis • Tones the epidermis by moisturizing
2	Liposerum – Massage Using the pipette, draw out 2 ml / 0.06 fl. oz. of the dry oil. Apply to the entire face and neck. Proceed to the facial massage in the usual manner using mostly effleurage (stroking), kneading and smoothing movements. IMPORTANT: The contents of the bottle of "LIPOSERUM" Step 2 must serve for the 5 treatments (2 ml / 0.06 fl. oz. per treatment). After the 1st treatment, make sure that the bottle is put away in the following tray.	10	Crambe Abyssinica, Shea Butter, Vitamin E	• Helps to warm up the skin progressively • Emollient and suppling properties • Promotes elasticity
3	Aquagel – "Digito" Effleurages Apply to the entire face and neck – proceed to light effleurages. DO NOT LET THE PRODUCT DRY ON THE SKIN.	1	Vegetal Moisturizing Micropatch®, Urea, Pentavitin®, Fucogel 1000®, Hyaluronic Acid	• Instantly reconstitutes the water reserves • Helps preserve skin's hydro-balance • Quenches the skin • Relaxes features by moisturizing
4	Hydrating Mask Apply to the entire face and neck – proceed to light effleurages.	4	Aquaphyline®, Pentavitin®, Hyaluronic Acid, Ceramides and Phytosterols, Vitamin E	• Helps improve water circulation • Increases the capacity to retain water • Contributes to maintaining the N.M.F. • Protects the skin's moisture barrier

5	**Melting Balm – Effleurages** Apply to the entire face and neck – proceed to light effleurages. DO NOT MASSAGE	1	Ceramides and Phytosterols, Olive, Mango and Shea Butters	• Restructures the skin's moisture barrier • Increases the water level
6	**Aquapowder Mask + Pre-Cut Gauze** Cover the eyes with cotton pads soaked in Blue Water. Gently lay out the pre-cut gauze over the face. Empty the entire content of a pouch into a bowl high enough to avoid pilling when stirred. Add 100 ml / 3.38 fl. oz. of hot water at once and stir energetically with a spatula to obtain a homogeneous and creamy mixture. The preparation of the mask must not exceed from 2 to 3 minutes. Using a spatula, apply the mask immediately, starting at the bottom of the face moving up toward the cheeks and the nose, ending at the forehead. **Pause: 15-20 minutes** Tip: To facilitate removal of the mask, it is recommended to lift the contour and gently remove it in one shot. Rinse the excess product properly with lukewarm water, then with cold water.	25	Oligosource (Extract of Red Algae – Chondrus crispus), Talcum, Natural Gypsum	• Optimizes the absorption of major ingredients • Reinforces hydration while providing a soothing sensation • Hydrates and smooths the skin
7	**End of treatment** **HydraScience AHD³ Rich Emulsion & Light Emulsion** – 3 ml / 0.1 fl. oz. (5 sample tubes of each) Apply a small quantity of the appropriate HydraScience AHD³ Cream (according to your customer's skin type) to the face and neck. Massage in with light effleurages.	2	AHD³ Complex, P.A. Reviviscence, Rhamnosoft® HP, HSC Complex, Concentrate of biomimetic lipids (Ceramides 1, Ceramides 3, Ceramides 6-II, Phytosphingosine and Cholesterol)	• Favours a long-lasting hydration • Plumps up skin's appearance by moisturization • Enhances skin's texture • Smooths the appearance of wrinkles

THE OPTIMAL TREATMENTS

Ultra-Moisturizing Collagen Veil with Hyaluronic Acid – Protocol

Indications

- For superficially dehydrated skin
- For deeply dehydrated, so-called "ageing" skin
- For xerotic, so-called "dry and rough" skin
- May be used by all skin types, even the most sensitive

DURATION OF TREATMENT: 1 hour

Cleansing / Make-Up Removal – Required Time: 5'

Thoroughly cleanse skin with the Milk and Lotion adapted to the client's skin type. Dry skin gently.

Frequency of Use

- As a cure of 4 treatments, at the rate of 1 treatment per week
- Occasionally, alternating with another Laboratoire Dr Renaud professional treatment, according to the client's skin condition

Preparation of Material

- Remove a tray of the Ultra-Moisturizing Collagen Veil containing the necessary material for a professional treatment from the kit.
- Using a measured recipient, fill it with 90 ml / 3 FL. OZ. of tap water and let stand at room temperature.
- Empty into a bowl, high enough so it won't overflow when mixing, the entire contents of the pouch containing the Powder Mask. Lay aside for later use.

	Steps	Time	Major Ingredients	Actions
1	**Vegetal Peeling** Cover the eyes with cotton pads soaked in Blue Water. Empty into a saucer the entire content of a pouch of the Vegetal Peeling and apply with fingertips by circular motions to the entire face and neck, insisting on hyperkeratinized areas of the epidermis. **Application: 2-3 minutes | Pause : 5 minutes** Uncover the eyes. Rinse abundantly first with lukewarm water, then with cold water. **Preparation of The Collagen Veil** After having rinsed off the Vegetal Peeling, remove the Collagen Veil from its sterile envelope. Fold the Veil lengthwise, take the reference points on the client's face (see Figure 1) and cut out the film (see Figure 2). Keep all cut-outs for later use.	8	Pepsin (keratolytic enzyme), Lactic Acid – superficial peeling and hydrating effects, Witch-Hazel Extract – vasoconstrictive, decongestive and soothing properties, Zinc Oxide – softening	• Eliminates dead cells and impurities • Exposes new skin • Brightens complexion and reduces the appearance of superficial brown spots • Improves cutaneous respiration • Improves absorption of other ingredients • Prepares skin for other treatment steps
2	**Hydralift** Using the pipette, apply the entire content of HydraLift to the face and neck. Massage in with light effleurage.	5	Oat Polyoses – lifting-like effect, Pentavitin® – water magnet, Allantoin, Urea and components of the NMF – ultra moisturizing agents	• Hydrates the epidermis • Smooths skin texture, attenuates fatigue signs • Enhances the complexion's glow
3	**Natigène Collagen Gel** Apply evenly to the face and the neck the content of the Natigene Gel tube. DO NOT MASSAGE. Proceed immediately with the application of the Collagen Veil.	2	Native Acidosoluble Collagen and Hydrating Complex consisting of: Amino-Acids, Urea, Lactate and Lactic Acid – hydrating, regenerating	• Hydrates superficial and deep layers of the skin • Helps delay signs of cutaneous ageing • Soothes and softens the skin
4	**Ultra-Moisturizing Collagen Veil and Hydra-Active Solution** Lay out properly the Collagen Veil over the face and the neck, previously moistened with the Natigene Gel. Then saturate the Veil with the Hydra-Active Solution by directly using the bottle provided for that purpose beginning by the middle of the face towards the hairline, so as to minimize air bubbles. Note: Make sure to smooth and remove air bubbles with the use of a plastic spatula. **Application : 8-10 minutes**	10	Collagen Veil: More than 95 % of pure fibres of Lyophilized Native Insoluble Collagen and Hyaluronic Acid Hydra-active Solution: Pentavitin® and components of the NMF	• Increases hydration level • Helps improve the cutaneous metabolism • Revitalizes the skin • Brightens the complexion • Improves skin tonicity and firmness • Smooths out wrinkles and fine lines

5	**Powder Mask** Add 90 ml / 3 FL. OZ. of water at once and stir energetically with a spatula to obtain a homogeneous and creamy mixture. • Both the powder and the water must be at room temperature before being used. • The preparation time of the mask MUST NOT EXCEED 2 OR 3 MINUTES. Apply the mask immediately over the Collagen Veil using a spatula and beginning at the forehead, then moving down progressively to the base of the neck. **Application: 5 minutes | Pause: 20 minutes** Remove the mask and the Veil as with a film, by starting at the neck and slowly moving up towards the forehead.	25	Sodium Alginates, Extracts of Laminaria digitata alga, Calcium Salts	• Significant occlusive capacity • Favours absorption of ingredients contained in the Collagen Veil and its Hydra-Active Solution
6	**End of Treatment** End the treatment by applying the HydraScience Rich or Light Emulsion to the face and the neck with light effleurage.	2	P.A. Reviviscence, Rhamnosoft® HP, HSC Complex, Concentrate of Biomimetic Lipids (Ceramides, Phytosphingosine and Cholesterol)	• Helps reactivate functioning of water captors at the surface of the epidermis • Restores moisture • Favours water movements necessary for intensive and long-lasting hydration • Optimizes the skin's moisture barrier function

THE OPTIMAL TREATMENTS
Glycolac Plus Cosmetic Treatment with AHA – Protocol

Glycolac Plus, a professional treatment with Alpha-Hydroxy-Acids (AHAs), represents for the aesthetician an incomparable asset in the cosmetic treatment of hyperkeratinization, hyperpigmentation, dehydration and cutaneous ageing. The AHAs content, the pH and the nature of the complementary ingredients entering the formulation of the treatment have been determined with precision to guarantee maximum efficacy and complete safety.

Indications

Glycolac Plus is particularly recommended for:
- treating hyperkeratinization related to age, to environmental aggressions or to hypersecretion
- treating hyperpigmentation (ex.: chloasma, brown spots),
- treating dehydratation, xerosis (so-called “dry”, rough skin),
- treating the signs of ageing
- treating comedonal acne

Frequency of Use

- in a cure of 4 treatments at the rate of 1 treatment per week
- occasionally by people with sensitive and delicate skin as a “coup d’éclat” treatment

Complementary Home Care Products

- For ageing, thick, dehydrated skin:
  HydraCalm Cleansing Milk and Lotion; ExCellience Enhancer Day and Night; ExCellience CellClock Cellular Youth Serum
- For a more intense result:
  One month prior to the first treatment, recommend using AHA Refining and Renewing Serum morning and evening
  After the first treatment, , recommend using the Peel Pads morning and evening
- For oily, comedonal, acne-prone skin:
  SeboBalance Cleansing Fluid Milk and SeboBalance Clarifying Lotion; Clear Up Anti-Shine Moisturizing Lotion or SeboBalance 24H Anti-Ageing Fluid

DURATION OF THE TREATMENT: 45 minutes

Preparation of the Material

Remove from the Glycolac Plus box all the necessary material for a professional treatment
Cleansing / Make-Up Removal
Gently remove eye make-up
Thoroughly and gently cleanse the face and neck with the appropriate cleansing milk and the appropriate toning lotion. Dry the skin gently with a facial tissue

Cleansing / Make-Up Removal – Required Time: 5’

Remove eye make-up with the appropriate Eye Make-Up Remover. Thoroughly cleanse skin with the Milk and Lotion adapted to the client’s skin type. Dry skin gently.

	Steps	Time	Major Ingredients	Actions
1	**Vegetal Peeling** Cover the eyes with cotton pads soaked in Blue Water. Empty into a saucer the entire content of a pouch of the Vegetal peeling and apply with fingertips by circular motions to the entire face and neck, insisting on hyperkeratinized areas of the epidermis **Application : 2-3 minutes | Pause : 5 minutes** Uncover the eyes. Rinse abundantly with lukewarm water, then with cold water.	8	Pepsin (keratolytic enzyme), Lactic Acid – superficial peeling effect and hydrating effects – Witch Hazel Extract - vasoconstrictive, decongestive and soothing properties Zinc Oxyde - softening	• Eliminates dead cells and impurities • Exposes new skin • Brightens complexion and reduces the appearance of superficial brown spots • Improves cutaneous respiration • Improves absorption of other ingredients • Prepares skin for other treatment steps
2	**Phase 1 Refine** Remove the cap and cut the tip. Apply the entire content of the bottle to the face (avoiding the eye contour area), neck and décolleté. Massage in lightly. Let dry. Do not rinse **Application : 2 minutes | Pause : 7 to 8 minutes**	10	Glycolic Acid, Tartaric Acid, Citric Acid, Allantoin	• Exfoliates • Normalizes keratinization • Favours cutaneous absorption
3	**Phase 2 Hydrate** Remove the cap and cut the tip. Apply the entire content of the bottle to the face (avoiding the eye contour area), neck and décolleté. Massage in lightly. Do not rinse **Application : 2 minutes | Pause : 7 to 8 minutes**	10	Lactic Acid, Sodium PCA, Allantoin	Hydrates intensively

4	**Phase 3 Revive** With fingertips, apply an average coat of mask to the face (including the undereye area), the neck and the décolleté. Leave for approximately 15 minutes. Remove mask with cotton pads soaked first in lukewarm and then cold water. **Application: 1 minute | Pause: 15 minutes**	16	Pea albumin, Anti-Aging Phyto Complex, Witch Hazel, Vitamin E, Oat Extract, Bisabolol, Allantoin, PhytoSqualane, Safflower Oil	• Tensor effect, smooth features, gives an immediate glow • Stimulate the vital function of the cells • Protects from the action of the free radicals • Minimizes the risk of irritation that could result from the use of AHAs • Softens the skin
5	**4 Final touch** Complete the treatment with the appropriate protection cream	1	See appropriate section	See appropriate section

Light reddening of the skin is a normal phenomenon and should not be considered irritation

Like any other AHAs product, Glycolac Plus should not be used either as a treatment or occasionally during the summer. If used during the summer, use a high-protection filter or sunscreen, such as UV Science FPS 30 and the SPF 50 Loose Powder Light / Dark.

THE OPTIMAL TREATMENTS

Beautifying Eye Care Beauty Flash Express Professional Facial – Protocol

Activating Eye Contour Treatment - anti-ageing, anti-circles, anti-puffiness

Especially developed to prevent and reduce signs of premature ageing, Beautifying Eye Care should ideally be used at the first sign of wrinkles.

Indications

- It is particularly recommended for people with deeply dehydrated, so-called "ageing" skin.
- It is also recommended for anyone showing circles and/or bags under the eyes.
- It is indicated for all skin types, even the most sensitive.

Complementary Home Care Products

For intensive and long-lasting results, the cure should be complemented by the daily use, at home, of the Eye Contour Cream and Multi-Active Eye Contour Tensor.

DURATION OF THE TREATMENT: 25 minutes

Cleansing / Make-Up Removal – Required Time: 2'

After eye make-up removal and thorough cleansing of face, proceed as follows:

Ask the client to close her eyes tightly during the entire time of the treatment.

Frequency of Use

- Intensive treatment for so-called "ageing" skin.
- A cure of 4 treatments at the rate of 1 treatment per week. It can then be used when needed, for example once a month as a maintenance measure.
- Preventive treatment
- 1 treatment, 4 times a year.

	Steps	Time	Major Ingredients	Actions
1	**Contour Massage*** Apply 4 pumps (each eye) of Contour Massage to the eye contour area and massage in for about 10 minutes. Do not rinse off. **Application: 1 minute | Duration of massage: 8-10 minutes**	10	Retinyl palmitate, vitamin E, purcellin oil	• Energizes skin • Helps diminish the signs of ageing • Restores the hydrolipidic film • Supples and softens
2	**Activating Fluid + Collagen Glasses** Pour 7,5 ml / 0.26 OZ. of the Activating Fluid into the small measuring cup. With this solution, lightly moisten the eye contour with fingertips, then cover entirely the area with the Collagen Glasses. Using a brush, make sure the glasses are completely soaked. Pause for approximately 10 minutes. Then remove the glasses. **Application: 2 minutes | Pause: 10 minutes** Note: To maximize your client's relaxation, you may perform a massage of the hands and forearms with the Nutri Massage Cream during the pause of the Collagen Glasses.	12	Vegetal complex: Butcher's Broom, Sophora japonica, Red Vine, St-John's Wort, Horse Chestnut, Ivy, Arnica, Witch-Hazel Lipo-reducing complex: caffeine + silanols Mask : Lyophilized native unsoluble collagen	• Reduces the appearance of dark circles and puffiness • Moisturizes • Improves the skin surface – Smooths out wrinkles and fine lines
3	**The Final Touch – Anti-Wrinkle Tensor** Apply 2 pumps (each eye) of the Anti-wrinkle Tensor to the eye contour area and massage in gently until completely absorbed. **Application: 1 minute**	1	Liposomes containing Vitamin E: lecithin, soluble collagen, chondroitin-4-sulfate, dermatan sulfate Hyaluronic Acid, Polysaccharide Fucose, N.M.F. Components, Elastin, Allantoin, Bisabolol	• Soothes wrinkles and fine lines • Moisturizes • Firms and tones • Restores the hydrolipidic film • Helps diminish and prevent signs of ageing

LABORATOIRE DR RENAUD

Chemical Peels

According to IMCAS (International Master Course on aging skin at IMCAS), it seems that the time is no longer for the facelift, for fear of modifying the natural harmony of the features, but rather to improve the quality of the skin and counter the loss of material.

What is a chemical peel?

- "Peel" literally means "removing the outer layer“, in other words "refining". It is a process of exfoliation of the horny cells to improve the visual appearance and the general condition of the skin.
- A chemical peel is basically a way to remove damaged cell layers on the surface of the skin.
- It exposes a new layer of healthier skin, resulting in a brighter, more even complexion.
- In addition, a chemical peel stimulates the growth of new cells, plumping the skin, helping to improve texture and tightening the grain.

OUR PHILOSOPHY

- State-of-the-art formulations that take into account the following factors: risks, side effects, client's social life, customer experience and external factors (mainly UV, pollution).
- High quality products.
- Unlike other brands involved in peels and skin resurfacing, we made the decision to take a more gradual, safe and effective approach over the medium term.
- We have developed a new concept that delivers immediate and lasting results with no downtime or discomfort.
- The result: a combination of a personalized home-based skin care regimen in synergy with a series of super-efficient and safe superficial peels in cabin for deep skin rejuvenation.
- Different steps with skin care specifically adapted.

Our strong points - A safe approach

- Safe cumulative process for deep skin rejuvenation
- Combining specific at-home skin care with powerful in-office peelings
- Based on Polyhydroxyacids (PHA): lactobionic acid & gluconolactone
- The peptides are infused into the skin together with the acids to reduce wrinkles, ageing and pigmentation
- Compliant with Health Canada (pH, concentration, safety, warning on the container)
- Can be used throughout the year - The acids we use are non-photosensitizing
- Very limited risk of hyperpigmentation

Our strong points - Outstanding formulas

- ✓ As soon as it is applied, the peeling solution establishes an **excellent contact with the skin**, thus guaranteeing uniform penetration and action. Low surface tension compared to conventional peels.

- ✓ Optimization of the penetration and conductivity thanks to a **particular combination of the excipients** of the formula. Guaranteed the best efficiency and maximum tolerance of the peel. No irritation or burning sensation.
- ✓ State-of-the-art formulations, **without any preservative and are free of harmful chemical buffers** (NaOH, ammonium hydroxide, tromethamine, etc.).

The pH is stabilized with Sodium Lactate, NMF component, moisturizer and keratolytic.

Our strong points - A complete system (a complete program?)

- Comprehensive and sustainable results achieved by combining state-of-the-art procedures and advanced home care regimen.
- Improving skin health requires internal procedures that address concerns such as wrinkles, sagging skin, age spots.
- By combining a personalized home care regimen with a powerful in-spa treatment, the result is a healthier, younger, longer skin.
- LDR home care regimen prepares, complements, and protects these outcomes by helping to prevent future damage, protect healthy skin, and further correct the visible signs of aging.

Our strong points - An optimized customer experience!

- ✓ High performance acids but less irritating than conventional acids
- ✓ Optimized pH
- ✓ Increased conductivity
- ✓ Higher penetration into the skin
- ✓ Longer contact with the skin
- ✓ Pre-treatment phase based on exfoliation
- ✓ Additional exfoliation just before the peel, included in the protocol
- Microscopic effects of the LDR Peels

RESULTS WITHOUT IRRITATION OR BURN SENSATION, WITHOUT RISK OF SKIN DAMAGE!

LABORATOIRE DR RENAUD PEEL EFFICACY

Microscopic effects of the LDR Peels

<u>Mixed effect, both on the dermis and the epidermis</u>
EPIDERMIS

- Acceleration of cell renewal
- Increase in the thickness of the epidermis
- Elimination of pigment deposits
- Increase in the amount of epidermal hyaluronic acid

DERMIS

- Restoration of the natural undulations of the basement membrane
- Increased dermal thickness
- Reorganization of collagen fibers and increased expression of GAGs

Macroscopic effects of the LDR Peels

- The superficial peel lightens complexion, increases radiance, refines skin texture and helps to fade brown spots.
- Decrease in skin roughness, appearance of wrinkles and dilated pores
- Decreased superficial scars
- Improvement of Keratosis pilaris
- Decreased seborrhea and acne
- Decreased pigmentary disorders (freckles, brown spots, epidermal superficial pregnancy mask, dull complexion ...)

BEYOND A SIMPLE EXFOLIATION

- Our peels are not limited to exfoliation ... they go much further.
- Many acids are not keratolytic (producing exfoliation) but true active ingredients.
- **A peel that does not produce exfoliation or crust is also effective.**
- Regularly exfoliated skin will not peel.
- In addition, in some cases, such as rosacea, rosacea, we do not seek exfoliation.
- Various acids regulate and act on cellular functions rather than exfoliate (melanocytes, fibroblasts).

KEY INGREDIENTS OF LABORATOIRE DR RENAUD PEELS

Mandelic Acid (AHA)

- Found in almond
- Large AHA so that will penetrate more slowly = less irritation
- Bacteriostatic, anti-inflammatory - similar to macrolide antibiotics
- Lightening of the skin by keratolytic action
- Lifting effect - stimulates the synthesis of collagen and elastin
- Cytoprotective (antioxidant)
- Comedolytic

For which types of skin?

- Ideal for aging skin including sensitive ones

Salicylic Acid (BHA)

- A single BHA: Salicylic Acid
- Found in its natural state in two plants: white willow and queen-meadow - but the one used in cosmetics is generally synthetic
- Liposoluble molecule = dissolves in a fatty substance. Concretely, it means that it can penetrate inside the pores to the sebaceous gland and help eliminate comedones
- It also works on the surface and has the same exfoliating effect as AHAs, but it also has an action inside the pores

For which types of skin?

- Ideal for combination to oily skin and acne prone skin
- Also has calming and anti-inflammatory properties, so it works very well on skin with redness or rosacea

Poly Hydroxy Acids (PHA)

- New generation of acids, family discovered more recently
- As effective as AHAs and BHAs but much better tolerated than AHAs
- Molecular weight rather important therefore exfoliate more gradually
- Act mainly on the surface and on hyperpigmentation
- Are also very good humectants, anti-inflammatories and antioxidants

For which types of skin?

- All skin types including sensitive skin and those that respond to AHA

The different PHA:

- **Lactobionic acid**
- **Gluconic acid or gluconolactone**

Lactobionic Acid (PHA)

- Formed by oxidation of Lactose – consists in Gluconic Acid and Galactose

- Penetrates gradually into the skin, layer by layer
- Minimal irritative effect – suitable for all skin types including sensitive
- Moisturizing, antioxidant and soothing

Main Indications

- Skin aging
- Photoaging
- Hyperpigmentation
- Skin sagging
- Scars
- Ingrown hair

Gluconolactone (PHA)

- Occurs naturally in honey and royal jelly as gluconic acid
- Present naturally in skin cells
- Effect very similar to that of AHAs but more beneficial
    - More hydrating than AHAs because of the 5 hydroxyl groups on its molecule
    - Less irritation and burning sensation as it is a bigger molecule

Main Indications

- Dehydration (dry, flaky skin)
- Photoaging
- decreased barrier function
- Acne (comedones, blachead, whitehead), post-acne
- Epidermal hyperpigmentation
- Hyperkeratosis
- Seborrhea
- Enlarged pores
- Sagging skin
- Dull, uneven skin tone

Phytic Acid

- Organic acid
- Naturally present in the seeds of many cereals and legumes
- Originally from oats, wheat and barley
- Mild keratolytic
- Promotes dispersal of pigment spots, stimulates collagen production
- Anti-inflammatory

Tranexamic Acid

- Organic Acid
- Derived from lysine (lysine = essential amino acid)
- Depigmenting agent par excellence
- Inhibitor of tyrosinase
- Anti-inflammatory properties
- Has little risk of irritation
- Used to treat melasma, pigment spots and UV damage
- Also used in surgery for its anti-hemorrhagic action

Soothing & Repairing Plant Complex: Glycyrrhiza glabra (Licorice), Artemisia montana, Gingko biloba, Centella asiatica, Vaccinium corymbosum (Blueberry), and Rosa canina oil

- Antioxidant, anti-inflammatory, antimicrobial, soothing
- Strengthens the skin barrier, softens rough skin
- Shield of protection against environmental aggressions

Acetyl Hexapeptide-51 amide

- Mimics activity of foxo3a, involved in cell repair, renewal and longevity
- Protects DNA from damage, stimulates its own repair pathways, reverts senescence in fibroblasts
- In-vivo: repair of UV-induced DNA damage

Nonapeptide-1

- α-MSH antagonist mechanism of action
- Decreases α-MSH induced melanin synthesis
- Reverses pigmentation without toxicity

Palmitoyl Tripeptide-1

- Collagen booster peptide
- Increases proliferation of stem cells
- In vitro: stimulates collagen synthesis
- In vivo: anti-wrinkle effect

Palmitoyl Hexapeptide-12

- Repeated amino acids sequence in elastin produced by fibroblast
- in-vitro: wound healing effect & fibroblast proliferation effect
- In-vivo: firming effect

LABORATOIRE DR RENAUD CHEMICAL PEELS

TIMELESS PEEL WITH PEPTIDES

USER INDICATIONS

- Skin ageing
- Photo-aging (skin aging caused by excessive UV-radiation)
- Skin sagging and deep wrinkles
- Intense skin moisture
- Designed to restore the natural skin pH gradient
- Activate exfoliating enzymes to renew the skin gradually
- Increase the overall skin radiance

KEY INGREDIENTS – total acid content: 14.2% - pH 3

- Lactic Acid
- Gluconolactone
- Lactobionic Acid
- Mandelic Acid
- 3 Peptides (Palmitoyl tripeptide-1, Palmitoyl hexapeptide-12, Acetyl hexapeptide-51 amide)

TEXTURE

Aqueous solution

FORMAT

Amber bottle 55 ml

RADIANCE PEEL WITH PEPTIDES

USER INDICATIONS

- Increase the overall skin radiance
- Reduces skin pigmentation
- Loose, sagging skin
- Photo-aging (skin aging caused by excessive UV-radiation)
- Intense skin moisture
- Designed to restore the natural skin pH gradient
- Activate exfoliating enzymes to renew the skin gradually

ACTIVE INGREDIENTS – total acid content: 15,6% - pH 3

- Phytic Acid

- Mandelic Acid
- Gluconolactone
- Lactobionic Acid
- Sodium Lactate
- Tranexamic Acid
- Nonapeptide-1

TEXTURE
Alcoholic solution

FORMAT
Amber bottle 55 ml

CLEAR UP PEEL WITH VEGETAL EXTRACTS

USER INDICATIONS
- Impurities
- Acne, blackheads, open pores and oily skin
- Folliculitis
- Seborrheic dermatitis

ACTIVE INGREDIENTS – total acid content: 14.5% - pH 3
- Salicylic Acid
- Mandelic Acid
- Gluconolactone
- Sodium Lactate
- Soothing, repair Herbal extracts: Glycyrrhiza glabra (Licorice), Artemisia montana, Gingko biloba, Centella asiatica, Vaccinium corymbosum (Blueberry), and Rosa canina oil

COMPLEMENTARY PROFESSIONAL PRODUCTS

CLEANZYME ENZYMATIC CLEANSING POWDER

- 100% natural origin
- Without sulphates (neither SLS nor SLES)
- Without preservative agent
- Anionic cleaning agents derived from amino acids
    - Very soft
    - Hypoallergenic
    - pH identical to that of the skin
    - Biodegradable
- Papain
    - Keratolytic plant enzyme
    - Activates on contact with water

DEGREASING SOLUTION

- Alcohol
- Polysorbate 80
- Lactic Acid
- Eliminates excess sebum on the skin before peels
- Increases the water content of the epidermis to facilitate the penetration of acids
- Eliminates dead cells and impurities

CARBOXY NEUTRALIZING SOLUTION

- Sodium bicarbonate
- Neutralizes the action of acids in the peeling solution
- Improves microcirculation and subcutaneous metabolism
- Stimulates fibroblasts, promotes collagen synthesis
- Bohr effect (carboxytherapy): When it comes into contact with the peeling solution on the skin, baking soda will react with the different acids of the peel to produce their sodium salts and will generate a strong release of carbon dioxide CO2; It creates a foam and a massive release of CO2 which results in stimulation and increased oxygen production in the tissues.
- Note: the diffusion of CO2 can temporarily cause a tingling sensation.

LABORATOIRE DR RENAUD PEEL PROGRAM

A complete program combining personalized home-based skin care regimen in synergy with a series of super-efficient and safe superficial peels in cabin leading to optimized results.

THE DIFFERENT STAGES OF THE PROGRAM

1. **PREPARATORY OR ACTIVATION PHASE (2 to 3 weeks before the first peeling)**

Essential preparatory step that must begin at least 2 weeks before the peel and must be observed between each peel to achieve the best results and avoid side effects:

- Detect intolerance, or even an exceptional allergy to acids
- To potentiate the effect of peeling by gradually lowering the pH of the skin
- Promote easier and more homogenous penetration into the skin
- Slow down the activity of melanocytes to prevent post-peeling pigmentation
- Begin to activate the skin renewal process, the removal of dead cells accumulated on the surface of the skin and the repair process
- Protect skin from UV rays and free radicals

Note: we recommend testing the tolerance of the peel on a small area of skin (inside of the forearm) of the client before starting the program

2. **PEEL SERIES** – 30 minutes each

Recommendations

- Do not touch or scratch the treated area
- Do not use makeup on the facial skin for the next 24 hours
- Avoid epidermal cleaners containing aggressive surfactants for the next 24 hours
- Ban waxing treated surfaces
- Do not apply peels as long as there are crusts of the previous peeling
- Do not expose yourself directly to the sun

3. **REPAIR PHASE** – 7 days (in between two peels)

- Stabilizes the pH of the skin
- Decreases the activity of melanocytes to avoid post-peeling pigmentation
- Protects skin from UV rays and free radicals
- Controls the skin renewal process and the elimination of dead cells accumulated on the surface

4. **REMODELING MAINTENANCE PHASE** – 6 weeks

   Refer to the document '' Protocols Grid ''

SOME USEFUL TIPS

- A test on the forearm of the patient can be done before starting the program in order to check the tolerance of the peeling solution.
- The first peel must be conservative and proceed as follows:
  - Exposure time: 5 minutes
  - Number of layers: 2
- For subsequent peels, the professional adapts the number of layers according to the results obtained in previous procedures. It is important to keep in mind that consecutive peels will be stronger with the same number of layers because the epidermis becomes more and more permeable.
- At all times, the professional controls the reaction of the product on the skin and must neutralize and rinse the peeling solution at the onset of excessive erythema (intense redness with or without white papules).

OTHER USEFUL TIPS

The exposure time of each layer may vary depending on the reactivity of the skin, the sensitivity of the individual or the specific skin problem. Here's how to adjust the exposure time between each layer and the number of layers:

- Sensation evaluation test:
  - Ask the client '' How does your skin feel on a scale of 1 to 10? ''. If the answer is 6 or more, DO NOT apply additional layer.
  - If the client evaluates the sensation between 1 and 5, apply another layer of peel and allow it to penetrate.
  - Wait about 5 to 7 minutes between each coat before applying the next one or going to the next step.
- In addition, you can also evaluate your client by observing their body language. Is he comfortable? Does he show signs of discomfort? Your experience and your instinct are two important tools too.

MANAGE CLIENT'S EXPECTATIONS

A peel is an additional tool that adds to our range of solutions to be used in combination with others in order to amplify the results obtained.
There are transient effects to the use of peels:

- The desquamation more or less important dead cells. It is very common for well-maintained skin not to peel.

- The rise to the surface of imperfections that remained under the skin. It is a phenomenon of elimination that could last 1 to 2 weeks and is very often located where the outbreaks of pimples occur.
- The increase of the temporary shine of the skin due to a stimulation of the sebaceous glands which disappear after a few days.

Customer Education

The Importance of Sun Protection

- Following a chemical peel, the skin is more vulnerable to UV.
- It only takes a few minutes without protection to trigger the inflammation mechanisms of the skin.
- A mineral sunscreen with a minimum SPF of 30 must be part of the pre- and post-treatment care when making recommendations to clients.

Risks related to sun exposure

- Sunburn - burning, blisters, edema (swelling)
- Redness, inflammation
- Sensitivity to heat and touch
- Pigment spots
- Premature aging
- Skin cancers

Mineral or chemical protection?

- Compared to a chemical filter that absorbs UV, a mineral sunscreen consists of mineral particles - often Zinc Oxide and Titanium Dioxide. Like a mirror, it reflects sunlight and acts as a barrier against UV.
- A mineral sunscreen therefore offers physical protection between the sun and the skin and its effect is instantaneous, at the time of application.
- Moreover, having no chemical filter, a mineral sun protection offers a better biocompatibility with the skin and considerably reduces the risks of cutaneous reactions related to sun protection.

When and how to apply sunscreen?

- In the morning, as the last step of the skin care routine.
- Apply sun protection from the inside of the face to the outside, so as to cover the entire surface of the skin.
- The sunscreen must be reapplied during the day if there is prolonged exposure to the sun.
- For touch-ups, Sun Powder SPF 50 is a choice product because it can be carried everywhere and applied on top of makeup.

Treatment Protocol

Laboratoire Dr Renaud

Prepare the necessary equipment to carry out the procedure including a timer.
Before starting the procedure, the operator must wear protective gloves.

STEP 1. CLEANSING WITH CLEANZYME ENZYME POWDER

- In a small glass cup, pour 3-4 ml of water and add 2-3 ml of powder. Using a fan brush, dissolve the powder and lather the mixture.
- Always using the brush, apply a thick layer on the entire face and leave for 1-2 minutes.
- If the patient wears makeup, emulsify by lightly massaging for about 20 to 30 seconds.
- Rinse two to three times, using wet compresses (until the compresses are perfectly clean after passing on the skin). The skin must be perfectly cleansed.
- Dry the skin gently with tissue paper.

STEP 2. DEGREASING SOLUTION

- Using a 2'' x 2'' (5 cmx 5 cm) gauze pad, apply the degreasing solution to the entire face (avoid the upper eyelid), applying pressure slightly above your usual pressure.
- To check the quality of the degreasing, perform the following resistance test: Touch the skin with your finger and slide it towards you. When the finger pulls on the skin, we must feel a resistance that confirms that the degreasing is well performed. If there is no resistance, the application of the degreasing solution can be renewed a second time.

STEP 3. PEEL SOLUTION

- Apply Petrolatum to areas of potential peel pooling (commissure of the lips, alar-facial junction).
- Cover the eyes with cotton pad that have been moistened and folded in half beforehand (or better still, install protective eyewear / black eye shields used for laser treatments).
- In a small glass cup, pour 5 ml of the Peel solution. Fold a 2''x2'' gauze pad in 2 or 4 and saturate the gauze pad with the peel solution before starting the application. Apply the solution over the entire face (avoid the upper eyelid), starting with the forehead, left side of the face, followed by the right side and ending with the bottom of the face.
- Observe a break time of 3-5 minutes. *IMPORTANT: The face shouldn't dry, it should remain moist (it should not be sticky) for the duration of the break time. Check this parameter frequently for the duration of the pause time.*
- Apply a second layer in the same way as the first, respecting the same sequence of application (start with the forehead, then the left side of the face, followed by the right side and ending with the bottom of the face).
- Observe a break time of 3-5 minutes. *IMPORTANT: The face shouldn't dry, it should remain moist (it should not be sticky) for the duration of the break time. Check this parameter frequently for the duration of the pause time.*
- It is important to note that up to 4 layers of the Peel solution can be applied to optimize the effectiveness of the Peel solution depending on the type of skin. The total quantity of Peel solution needed for 4 layers is 10 ml.
- Subsequent peels can be made after an interval of 7 days. We recommend 5 sessions

  IMPORTANT TIPS The exposure time of each layer may vary depending on the reactivity of the skin, the sensitivity of the individual or the specific skin problem. Here's how to adjust the exposure time between each layer and the number of layers:

  1. Assess the sensations felt by your client: Ask the client "How does your skin feel on a scale of 1 to 10?". If the answer is 6 or more, DO NOT apply additional layer. If the client evaluates the sensation between 1 and 5, apply another layer of peel and allow it to penetrate. Wait about 3-5 minutes between each coat before applying the next one or going to the next step.

  2. Use your experience and instinct: You can also evaluate your clients by observing their body language. Are they comfortable? Do they show signs of discomfort? Your experience and your instinct are two important tools.

STEP 4. CARBOXY NEUTRALIZING SOLUTION

- Using the fingertips, apply 3 ml of the **Carboxy Neutralizing Solution** to the face and neck (avoid the upper eyelid), following the same sequence of application (start with the forehead, then the left side of the face, followed by the right side and ending with the bottom of the face). The neutralization reaction creates foam on the surface of the face and the patient can experience a normal tingling sensation.
- Once the reaction is complete, rinse thoroughly with moist gauze pads. Do not forget the areas of potential peel pooling (commissure of the lips, alar-facial junction).
- Dry the skin gently with a tissue.

STEP 5. PROTECTION WITH A SPF

- Complete the treatment by applying **Natigène** and/or **Triple Lipid.** Then, for daytime, follow with U**V-Science SPF 30 Sunscreen Lotion** (rich or light texture) to the entire face and neck.

POST-PEELING HOME CARE

FROM THE 5TH DAY ON, *the client can reintroduce the products of the skin preparation program until the next treatment.*

PROFESSIONAL CHEMICAL PEELS
Questionnaire

Laboratoire Dr Renaud

☐ MR. ☐ MRS. ☐ MS. ☐ OTHER _____

FIRST AND LAST NAME | AGE | DATE

HEALTH OF YOUR SKIN

How would you describe your skin?	☐ Dry ☐ Oily ☐ Mixed ☐ Sensitive
How does your skin react to the sun?	☐ It always burns ☐ It turns red and then tans ☐ It tans easily
Do you go to tanning salons? ☐ Yes ☐ No	☐ If yes, how often? _____
Do you suffer from any of the following conditions?	☐ Psoriasis ☐ Eczema ☐ Dermatitis ☐ Herpes (cold sores) ☐ Skin rash or hives ☐ Lupus ☐ Vitiligo ☐ Other: _____
Do you take medications or use topical products ☐ Yes ☐ No	☐ Retin A _____ % ☐ Renova ☐ Differin ☐ Glycolic acid 5 % and + ☐ Accutane ☐ Antibiotics ☐ Tazorac ☐ High concentration AHA If yes, how long ago? _____

Are you pregnant?	☐ Yes ☐ No	Do you receive any of the following aesthetic treatments?
Are you breastfeeding?	☐ Yes ☐ No	☐ Laser treatments ☐ IPL
Are you menopausal?	☐ Yes ☐ No	☐ Microdermabrasion ☐ Facial hair removal
Do you have regular periods?	☐ Yes ☐ No	☐ Injections
Do you suffer from a hormone imbalance?	☐ Yes ☐ No	Date of last treatment: _____

WHAT ARE YOUR SKIN PROBLEMS AND CONCERNS?

☐ Wrinkles and skin sagging	☐ Prevention of ageing	☐ Brown spots
☐ Dull complexion	☐ Redness/rosacea	☐ Skin sensitivity and/or dryness
☐ Dehydration	☐ Acne	☐ Skin shininess, open pores
☐ Eye contour area	☐ Sun damage	☐ Neck and décolleté
☐ Hands and lips	Comments: _____	

AT-HOME CARE ROUTINE

For makeup removal and skin cleansing	Morning Evening
For skin protection	Morning Evening
More specific products	Exfoliant Mask Serum Other

Instructions to customer

Laboratoire Dr Renaud

PRE-TREATMENT INSTRUCTIONS

IN THE 14 DAYS PRIOR TO YOUR APPOINTMENT, AVOID RECEIVING:

- a chemical peel
- injectable medical aesthetic treatments
- microdermabrasion treatments
- facial hair removal treatments

IN THE 14 DAYS PRIOR TO YOUR APPOINTMENT, AVOID:

- exposure to the sun or visiting a tanning salon, which could result in burns

POST-TREATMENT INSTRUCTIONS

- These superficial peels require little or no recovery time.
- Makeup can be applied the day after the peel.
- Use post-peel products recommended by your aesthetician.
- If your skin is exposed to the sun, regularly apply sunscreen with a minimum SPF of 30.

RECOMMENDED CARE

1 DAILY CARE

To thoroughly cleanse your skin and protect it from damage caused by the sun, use the following products daily throughout the treatment.

CLEANSE _____ TONE _____

PROTECT FROM THE SUN _____

2 PREPARING THE SKIN

For optimal results, it is recommended that you prepare your skin over a two-week period. Use the following products, as recommended by your aesthetician.

MORNING _____

EVENING _____

3 DAY OF TREATMENT TO DAY 4

Following the procedure, you may experience mild redness, a feeling of tightness, peeling, flaking or temporary dryness. To help your skin recovery, apply:

MORNING _____

EVENING _____

**Natigène Collagen Gel can be used as needed.*

4 AS OF DAY 5

Between procedures, in the evening, you can reintroduce the products from Step 2 “PREPARING THE SKIN.” This will allow you to smooth and quickly improve your skin’s texture, and optimize the benefits of the peels.

5 MAINTAINING RESULTS

Following a series of treatments, once the skin has healed, use the customized product selection recommended to you in your **Laboratoire Dr Renaud** UNIQUE PROGRAM ACTION PLAN.

Informed consent form

Laboratoire Dr Renaud

I acknowledge having informed _____ of my health problems, especially those that could interfere with the peels: pregnancy, surgery or other recent facial procedures, infections, tendency to develop cold sores (herpes), and use of a product containing vitamin A acid (tretinoin), such as Retin-A or Tazorac, or a medication for treating acne (e.g., Accutane).

I have been informed that peels can cause some degree of discomfort, such as tingling or burning.

I understand that there are no guarantees regarding the results, which vary from person to person. I understand that some people show visible signs of peeling, but that the signs are not always visible.

I understand that this is a cosmetic treatment that does not involve any medical professional liability.

I understand that several sessions will be required to obtain optimal results.

I understand that complications, although rare, can occur. Possible complications include the appearance of small blisters, scabs and changes in pigmentation. These complications are often temporary and must be treated promptly to avoid any after-effects. If I experience a complication, it is my responsibility to notify _____ as soon as possible.

I agree to avoid suntanning or visiting a tanning salon throughout the duration of the treatment and for a minimum of 14 days following the last session.

I understand that a scheduled session will be automatically cancelled if I expose myself to the sun without protection.

I acknowledge that I have not received a peel within the past two weeks and that I must not receive any other peel or facial treatment for the next two weeks.

I have read and clearly understood this document and I accept all the terms. I will follow all the post-peel recommendations that have been explained to me or specified in the document provided.

INITIAL TREATMENT

DATE	CUSTOMER'S SIGNATURE	AESTHETICIAN'S SIGNATURE

ADDITIONAL TREATMENTS

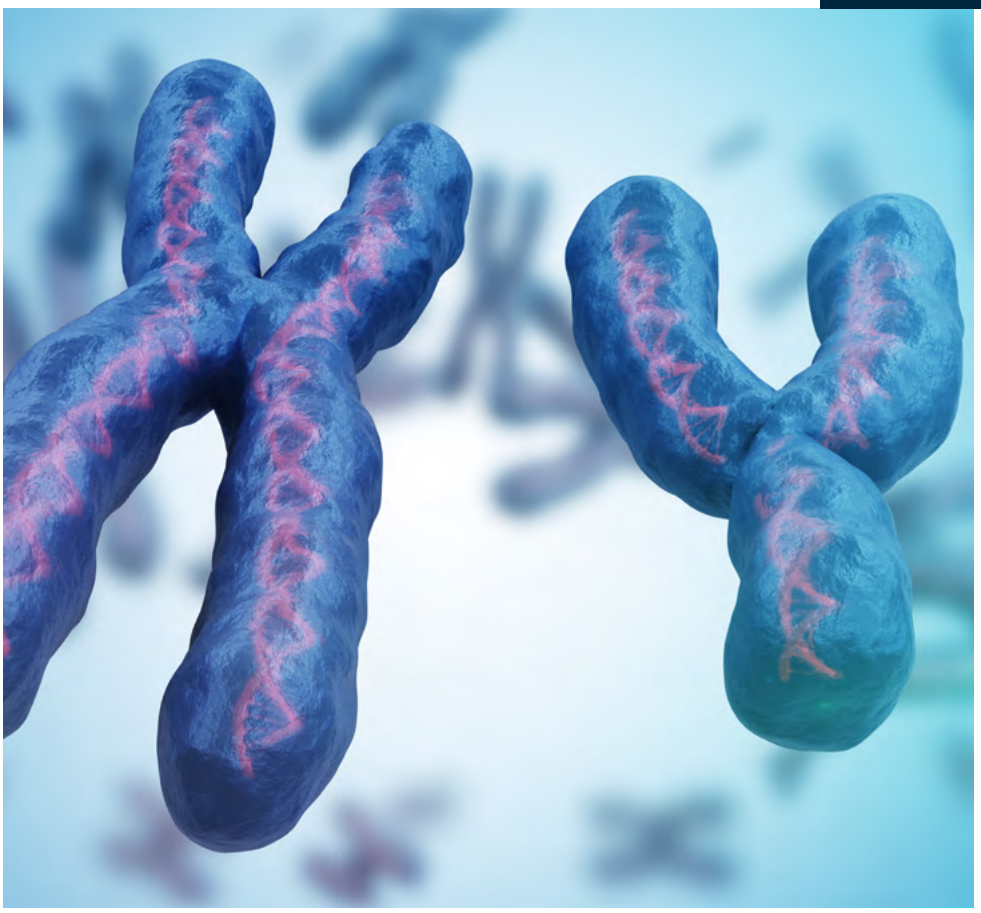

DATE	CUSTOMER'S SIGNATURE *	AESTHETICIAN'S SIGNATURE**

* Customer's signature: I have reread the consent form and I certify that there have been no changes to my condition since the last treatment.
** Aesthetician's signature: I have reviewed the data to date and confirm the stability of the customer's condition. I can therefore proceed with today's peel.

Notes

GLOSSARY

Laboratoire
Dr Renaud

*“With a beauty product,
it’s 50% about quality and 50%
about the aesthetician’s work.”* – *Dr Renaud*

MAIN INGREDIENTS AT THE ORIGIN OF LABORATOIRE DR RENAUD FORMULAS

A

Acacia Polysaccharides & Alginate
Like a filmogenic and protecting meshwork at the surface of the skin, Acacia Polysaccharides and Alginate release Serine progressively, main amino-acid of the N.M.F. Throughout the day, the Serine slowly spreads into the skin and binds water molecules to the cells. The result is a double action: anti-dehydration owing to the association of Acacia Polysaccharides and Alginate, and long-lasting moisturization owing to the slow spreading of Serine at the heart of the skin.

Ac.net
Ac.net, an osmotic gel containing Oleanolic and Nordihydroguaiaretic (NDGA) Acids: This multi-functional active ingredient was selected by Laboratoire Dr Renaud for its complete action on the 4 steps of the pathogenesis of acne:
- Sebaceous hypersecretion
- Abnormal proliferation of keratinocytes: hyperkeratinization
- Proliferation of pathogenic bacteria, mainly P. acnes
- Inflammation

AHD^3 Complex
Dynamic Hydration Activator COMPLEX (Peptides, Polysaccharides and Complex Sugars of vegetal origin). Optimizes the water circulation. Activates the synthesis of Aquaporines-3, irrigation channels of the skin. Optimizes the epidermal and dermal water reserves. Activates the synthesis of Ceramides, responsible for the skin's water retaining capacity.

Alpha-Hydroxy-Acids or AHAs
AHAs or alpha-hydroxy-acids are natural compounds found in some fruits, in milk and even in the skin. They are keratin modulators meaning that they normalize keratinization by promoting desquamation (exfoliation) and accelerating the formation of new cells. Thus, they attenuate the appearance of wrinkles and fine lines, favour the skin's hydration, brighten the complexion and reduce the intensity of brown spots. The following five AHAs are used in our products: glycolic acid, lactic acid, citric acid, malic acid, tartaric acid.

Allantoin
A derivative of uric acid, this softening agent promotes healing and also favours a better cutaneous absorption of the active ingredients it is associated with.

Aloe vera
Extracted from the leaves of the Aloe vera Linné plant, it hydrates, relieves itching (pruritus), soothes superficial redness and favours cell regeneration, thus accounting for its mild healing effect.

Anasensyl®
A unique vegetal compound carefully selected for its regulating capacity on inflammatory mediators (licorice, horse chestnut, caffeine, zinc salt).

Anti-ageing Phyto-complex
A mixture of extracts from hops, rosemary, horse tail, pine and lemon, rich in antioxidants, Vitamin C and organic silicon, it helps to reduce the appearance of wrinkles and fine lines, fight the skin's flaccidity and stimulate the cutatenous microcirculation.

Anti-elastase Complex
Of vegetal origin, it protects elastic fibers from the degradation phenomenon by specific enzymes called elastase.

Aquaphyline®
An extract from Wild Pansy (Viola tricolor) rich in small sugars – a new generation of active principles that act on two major moisturizing factors: it improves water circulation in the skin by stimulating the synthesis of group 3 Aquaporins belonging to the family of the famous "water channels" discovered in 2003, and increases the capacity to retain water by regulating the levels of hyaluronic acid at the heart of epidermis.

Aquaxyl™*
Osmoregulating sugars of vegetal origin that allow harmonization of hydrous flow. Optimizes hydration and restructures the epidermis. This original active ingredient favours the synthesis of the skin's natural water reservoirs (hyaluronic acid and chondroitin sulphate) and reduces the decrease of excessive water loss through reactivation of the synthesis of ceramides.

Argan Oil
Argan Oil contains up to 80% unsaturated fatty acids, mainly Oleic Acid (45%) and Linoleic Acid (35%). It regulates the permeability and barrier function of the cell membrane. Nourishing and regenerating, it prevents premature ageing of the skin. Compared to Olive Oil, Argan Oil has more than double the concentration of tocopherols which are, next to carotene, the most important antioxidants in the human cell and which provide protection from the cell destroying free radicals.

Arganyl™*
Extract from natural polyphenols derived from the leaves of the Argan tree - fights against the loss of firmness and elasticity of the skin while significantly protecting the macromolecules of the dermis, in particular the collagen, in two different ways:
- First by limiting the damage induced by free radicals on the fibroblasts;
- Then, by inhibiting the MMP (or Matrix Metallo-Proteinases) and the collagenase responsible for the degradation of elastic fibers. Arganyl™* reinforces the cutaneous structure for a smooth and firm skin.

Argireline® - Acetyl Hexapeptide-8
Peptide derived from combinatorial chemistry. By promoting muscular relaxation, it helps to reduce the depth of expression lines induced by the contraction of muscles of facial expression, especially on the forehead and around the eyes.

Astraforce
AstraForce is a skin-friendly extract of Astragalus membranaceus root contained in a capsule of naturally occurring lipids (liposome), which facilitates the penetration of the active ingredient in the pilosebaceous duct. Its antibacterial, anti-inflammatory and toning properties stimulate and protect the immune system. AstraForce also inhibits the activity of lipases, enzymes produced by P.acnes bacteria that break sebum down into irritating FFAs.

Avobenzone
Protective chemical filter against skin aging. Avobenzone, also known as butyl ethoxy dibenzoylmethane, is primarily used as a UVA chemical filter.

Avocado Oil
Avocado Oil, mainly rich in Vitamins A, B, D and E, is known for its moisturizing and regenerating properties. It is particularly indicated for dry skin and devitalized skin which it softens, protects and strengthens. It is an excellent anti-wrinkle and it also has healing properties.

Azulene
Extract of German Chamomile used for its softening, soothing and anti-inflammatory properties.

B

Bamboo Spheres
Obtained through a particular exudate gathered from the Tabashir Bamboo stems, they are the largest and softest spheres of our exclusive mixture. They eliminate the upper layers of dead cells and impurities of the epidermis, revealing the complexion's glow.

Bearberry Extract
Contains flavonoids which are powerful antioxidants that inhibit glycation and oxidation phenomena of collagen, elastin, fibronectin and hyaluronic acid. Therefore, it reinforces antioxidant defences of cells.

Beech bud extract *
Particularly rich in phytostimulines, flavonoids and peptides, it significantly improves hydration and has a significant smoothing effect on the cutaneous microrelief.
* ECOCERT certified

Bioecocomplex
An original molecule able to restore and maintain the cutaneous ecosystem through purely ecological mechanism. Obtained through biotechnology, this sugar is assimilated, in a selective way, by the bacteria constituting the resident beneficial cutaneous flora, thus promoting a healthy skin, clear of blemishes.

Bisabolol
A softening and anti-inflammatory agent extracted from German Chamomile, known to minimize risks of irritation.

Butylresorcinol
Inhibits tyrosinase significantly: diminishes the synthesis of melanin induced by UV.

C

Camphor
Ingredient known for its purifying and soothing properties.

Cell Control Complex
The Cell Control Complex - true "heart" of concentrated soothing, anti-inflammatory and vaso-protecting active ingredients – consists of an exclusive Laboratoire Dr Renaud cocktail born of the complementary and synergistic combination of the following ingredients:
- Rosmarinyl Glucoside (natural antioxidant extracted from melissa)
- Caffeyl Glucoside (natural antioxidant extracted from green coffee)
- Gallyl Glucoside (natural antioxidant extracted from the oak tree)
- Oleoeuropeine (antioxidant extracted from olive tree leaves)
- Palmitoyl Tripeptide-8
- Acetyl Tetrapeptide-33

Thanks to its unique anti-inflammatory properties, the Rosa-C3 Cell Control Complex inhibits the synthesis of the mediators involved in the inflammatory reaction. It acts both on inflammatory processes of immunological origin and on the neurogenous inflammatory reaction. In addition, it favours a decrease in the permeability of capillaries, reinforces the structure of vessels, improves the microcirculation but most important, it reduces the number of visible micro-capillaries. Owing to its complete, anti-inflammatory and vaso-protecting action, the Rosa-C3 Cell Control Complex actively controls skin redness:
- It soothes instantly
- It reduces redness, pruritus, burning sensations and discomfort
- And balances the cutaneous reactivity of vaso-reactive skin.

Therefore, the Rosa-C3 Cell Control Complex allows to reduce the intensity and size of redness – a characteristic of vaso-reactive skin.

Centella asiatica Extract
Plant from the Umbelliferae family, it stimulates the collagen synthesis in quantity as well as in quality, allowing the skin to recover firmness and elasticity.

Ceramides
Essential lipidic components of the epidermis, they constitute practically 50% of all lipids present in the different layers of the epidermis. The primary role of ceramides as intercellular lipids, is to BIND cells together, thus ensuring the hydro-regulation and resistance to external aggression.

Chamomile
Vegetal substance mainly used for its anti-inflammatory, softening and decongestive properties.

Concentrate of biomimetic lipids
(Ceramides 1, Ceramides 3, Ceramides 6-II, Phytosphingosine and Cholesterol)
This concentrate of epidermal lipids recreates the structure of a multilamellar membrane, thus resembling the lipidic barrier present in the *Stratum corneum*. Once on the skin, it quickly integrates into the existing structure and repairs it. It therefore increases the hydration and protection level, leading to more resistant and less sensitive skin.

Chromocare™
Chromocare is a state-of-the-art technology that associates two plant extracts:
- Siegesbeckia orientalis, rich in darutoside;
- Rabdosia rubescens rich in oridonine.

This active substance specifcially targets the 3 main skin chromophores to correct the visible effects of ageing. By significantly improving skin evenness and luminosity to recreate a younger-looking, fresher and brighter skin.

Chronogen™
Tetrapeptide designed to boost the expression of "Clock" genes so as to maintain the biological circadian rhythms, thus optimizing the cell's protection and repair processes for a longer-lasting young skin.

Chronoline™ Repairs The DEJ
Biomemitic tetrapeptide that boosts the production of key components at the DEJ for an optimal structural support:
- Laminin-5: anchors the epidermis to the dermis for a structural support;
- Collagen VII: anchors the dermis to the DEJ to ensure mechanical stability of the DEJ;
- Fibronectin: anchors cells to the extra-cellular matrix for optimal cell adhesion.

The contour is re-defined and the skin is smoother.

D

Darutoside
A vegetal molecule of the terpene family extracted from Siegesbeckia orientalis, a plant also called "ColleColle" or "StickStick", native of Ethiopia but also found in Madagascar, Mauritius and Reunion Islands, in Japan and in Australia. Objective in-vivo studies demonstrated that Darutoside is characterized by a powerful regenerating, healing and anti-inflammatory activity. It stimulates the collagen synthesis and allows a significant and quick reduction (length and depth) of stretch marks (4 weeks of treatment).

Decongestive Vegetal Complex
Contains Knee-holly, flowers of Sophora japonica, Red Vine, St-John's Wort, Horse-Chestnut, Ivy, Arnica and Witch-Hazel. This complex has decongestive and astringent properties. It also stimulates and regulates the cutaneous microcirculation and reinforces the resistance of capillaries.

Defensil®
Protection of stem cells and repair of skin barrier. Defensil® is an optimized system for the physical and biochemical protection of each skin cell. It normalizes sensitive skin thanks to its excellent inflammation inhibitory effectiveness. This soothing vegetal complex not only preserves the vitality and longevity of epidermal stem cells – powerful skin regeneration resource – from environmental aggressions, but it also strengthens the skin barrier against stressinduced climatic conditions. The skin's barrier function then recovers its full protecting capacity against the harmful environmental effects. Consisting of 100% vegetal substances.

Diatomaceous Spheres
Obtained from the crushing of shells of unicellular algae called diatoms, they are the smallest and hardest spheres. Their activity is more precise and more intensive than with the 2 previous types. The result is a polishing effect of the epidermis to enhance the general appearance and texture of the skin.

Dermican™
Repairs the dermal architecture. Belonging to the family of small GAG's, Lumican is the "strong link" in the collagen structure. We find it in the extra-cellular matrix of the dermis where it clings to collagen fibrils to group them together like a bundle and form functional fibers. Thus, the importance of this small molecule in the fight against ageing, since boosting the collagen synthesis is not sufficient, we must also ensure its optimal organization so that it can exert its supporting role properly. Over time, Lumican shows a decrease leading to a weakened extra-cellular matrix and a loss of skin firmness. Dermican, a pure synthetic peptide allows to boost collagen and lumican synthesis so as to optimize the skin's mechanical properties. This highly-effective weapon leads to a firmer, plumped skin.

Dihydroxyacétone (DHA)
A melanoid that reacts with the amino-acids of keratin to produce a gradual darkening of the Stratum corneum, which we call an artificial tan.

Dragocalm®
Dragocalm® is a natural anti-irritant with anti-histaminic properties. It is effective against histamine related skin disorders like redness, itch and wheal. Derived from oats, the Avenanthramides it contains neutralize the inflammatory responses triggered by external stress factors. They reduce the irritant potential of AHAs in the Peel Pads formula. These molecules also exhibit excellent anti-oxidant activity. Furthermore, Dragocalm® contains other natural anti-oxidant compounds from oats, like flavonoids and polyphenols. Dragocalm® is issued from organic agriculture and is Ecocert certified.

E

Ecobiotys™
ECOBIOTYS®, an active ingredient that is biologically inspired by the regulatory power of the flower nectar microbiota, Nectarobiote®, allows mature skin and its microbiota to find a perfect symbiosis. Derived from the yeast Metschnikowia reukaufii, isolated from the nectar of the porcelain flower Hoya carnosa, ECOBIOTYS® specifically rebalances the microbiota of mature skin.

Elastin
A protein essential for maintaining the elasticity and hydration of the skin. It stimulates its own biosynthesis at the dermis level.

Ergothioneine
Antioxidant that inhibits the synthesis of melanin.

Erythrulose
Erythrulose, a substance obtained through a biotechnological process. Like DHA, Erythrulose is a melanoid. The chemical structure of Erythrulose is similar to that of the DHA but it reacts much more slowly and evenly with the amino-acids of keratin, compared to the DHA. In addition, Erythrulose compensates for the drying effect on the skin caused by the DHA.

Essential Fatty Acids (E.F.A.)
Known to be just as valuable to the organism as are vitamins, trace-elements or proteins, E.F.A are necessary for the skin's health. They cannot be synthesized by the human body so, they must by supplied to the organism through nourishment, and to the skin through cosmetic products. They maintain cells' integrity and the skin's permeability. A deficiency in E.F.A. leads to: dry, rough skin, loss of elasticity, dehydration and inflammation. The most important E.F.A. is gamma-linolenic acid (GLA) which is
found in high concentration in Borage Oil.

Eurol® BT
The olive tree is one of the most ancient, traditional plants of the Mediterranean region. Its leaves contain Oleuropein, Oleuropeosid and Flavonoids - powerful free radical captors.

Everlasting (Helichrysum)
With three types of flavonoids, it has antioxidant properties. Antiseptic, anti-inflammatory, antimicrobial, antifungal, anti-infectious, antiviral and slightly anticoagulant properties.

Extract of Persian Silk Tree (Albizia julibrissin)
A vegetal extract from Albizia julibrissin was specifically developed to fight against fatigue signs that affect the eye contour. This exceptional vegetal extract acts according to a triple mode of action: eliminate glycotoxins, lipofuscin and stimulate the production of melatonin.

F

Filaggryl
A vegetal protein extracted from Voandzeia subterranea, able to boost the synthesis of Profilaggrine, a molecule precursor of the Natural Moisturizing Factor of the skin. By increasing the water reservoirs at the epidermal level, Filaggryl® allows to optimize the reserves of epidermal water since it activates the functioning of the water captors at the surface of the epidermis, as well as the production of the extracellular and intracellular water captors.

Fruit Enzymes Complex
A unique complex of proteolytic enzymes extracted from the following fruits: Star Fruit, Passion Fruit, Kiwi, Mangosteen, Pineapple, Pomegranate, Lychee, Guava. Proteases are able to degrade desmosomes (proteins responsible for binding cells together) located in intercellular spaces of the epidermis, thus favouring the elimination of dead cells accumulated in the outer layer of the epidermis, while promoting its renewal. Their immediate action reinforces the medium-term action of AHAs for an increased performance.

Fucogel 1000®
Produced by biotechnology with raw materials of vegetal origin, it makes the skin remarkably soft and silky to the touch. It has an immediate hydrating, filmogenic capacity associated with a prolonged moisturizing effect.

G

Gamma-Oryzanol
An antioxidant naturally present in rice germ and rice bran. It is also considered to be a natural UVB-UVA sunscreen.

Grape Seed Oil
Owing to its rich content of Linoleic Acid, an essential fatty acid, and of Vitamin E, Grape Seed Oil offers the skin regenerating and restructuring benefits. Being a light oil, its application is pleasant and feels nice on the skin - It is greatly appreciated by all skin types.

H

Horse Chestnut Extract (Aesculus hippocastanum)
Source of vitamin P, which improves the permeability of the capillaries.

HSC Complex
Essential elements of the cutaneous structure, they help to rebuild and reinforce the cutaneous barrier, weakened by age, environment factors or overexposure to U.V. rays. They also play a major part in preserving an optimal hydration level of the skin.

Hyaluronic Acid
A mucopolysaccharide known as one of the main constituents of the dermis. Also present at the epidermis level, it plays a major role in the hydration of the top and deep layers of the skin.

J

Jasmine Flower Antioxidant Extract
Jasmine is an ornamental plant that grows in warm and very sunny climates, namely in North Africa. When in full sun, its flowers give off an intoxicating, heady perfume. Flavonols derived from Jasmine flowers protect and preserve the 2 main endogenous defense mechanisms whose efficacy is diminished under the influence of sun radiation. Thanks to this highly performing vegetal extract, the skin's natural defense mechanisms against free radicals maintain theiroptimal efficacy at all times. Our Jasmine Flower Extract:
- Protects catalase, key-enzyme in the anti-free radical cascade
- Allows recovery of glutathione, a pivot component in the chemical fight against free radicals

Jojoba spheres
Obtained from jojoba wax of natural origin and biodegradable, these perfect spherical and regular particles allow a gentle and controlled exfoliation compared to classical exfoliating particles that may cause irritation and excessive exfoliation of the cutaneous barrier.

K

Kronoxyl-⑨
It is Laboratoire Dr Renaud's exclusive anti-ageing complex, born of the complementary and synergistic association of the following ten active ingredients:
3 targeted, complementary and synergistic peptides for an increased "Botox®"-like effect: A mixture of oligopeptides obtained through biotechnology based on the seeds of Hibiscus esculentus, a plant growing in Africa and southern Asia, that produces a fruit called Okra. Owing to their small sizes, these oligopeptides are characterized by an excellent bioavailability.
- Acetyl Hexapeptide-8 acts at the level of the pre-synaptic zone by inhibiting the release of a mediator of muscle contractions called catecholamine.
- A Tripeptide that mimics the activity of Waglerin 1, a polypeptide found in the venom of the temple viper. This peptide has the particularity of acting at the post-synaptic membrane of the neuromuscular junction. It therefore prevents binding of a second mediator of muscle contractions called acetylcholine to its receptor. 1 unique cocktail of 7 corrective ingredients for a lifting effect without surgery:
- Matrikines, small peptides similar to certain fragments of major proteins of the dermis (mostly collagen) act like cellular messengers capable of regulating cell activities necessary for cutaneous restructuration and repair.
- A Kombuchka Extract, also called "long-life elixir" is obtained through the fermentation of black tea and is known to be a traditional beverage in Russia, Manchuria and Bohemia.
- This high-tech anti-wrinkle cocktail composed of Tripeptide-10 Citrulline, Tripeptide-1, Wheat and Soy Peptides and the Pseudoalteromonas Extract, a marine bacteria, favours the production of new collagen, true pillar of the skin's framework, optimizes its organization and protects it from glycation phenomena and the degradation by MMPs. Thus, the quality of the collagen is considerably improved – the dermis recovers an optimal 3D structure – deep wrinkles are filled from within.

L

Laser C Complex™
A Laboratoire Dr Renaud exclusive brightening complex born of the complementary and synergistic association of performing active ingredients of vegetal origin with biomimetic peptides. Its originality lies in its "multi-performing" mode of action.
What are its characteristics and effects?
- Unlike traditional solutions, the Laser C Complex™ offers a safe and non-cytotoxic activity.
- The Laser C Complex™ offers a complete action on melanogenesis since it mainly acts at 3 levels in the epidermis:
- By stopping the production of new melanin in melanosomes;
- By preventing the transfer of melanin to keratinocytes, thus its migration towards the surface of the epidermis;
- By eliminating the melanin already produced and accumulated in the layers of the epidermis.

Licorice Extract
Known for its anti-inflammatory and anti-oedematous properties, its use is particularly indicated for the care of fragilized skin.

Linden
Ingredient known for its emollient and softening properties.

Lotus Extract
The use of this extract goes back several centuries – it softens the skin and soothes tissues.

M

M²PE™
Consists of a combination of FDA-approved excipients that allow active ingredients to better penetrate the skin. It has required four years of medical research and seven million dollars in investment. It is Crescita's Therapeutics, owner and manufacturer of Laboratoire Dr Renaud skin care. By temporarily altering the skin without using abrasive or invasive means, M²PE™ technology increases the skin's absorption of active ingredients and provides optimal effectiveness by targeting the sites of action, without damaging the skin. Once the product is applied, thousands of small channels quickly form on the skin's surface and the active ingredients go through them to penetrate into the skin. These channels close up on their own within four hours of the product's application, leaving ample time for the concentrated active ingredients to penetrate and reach their sites of action.

Matrixyl™ 3000
Anti-wrinkle and restructuring
- Matrikines, small peptides similar to certain fragments of major proteins of the dermis (mostly collagen) act like cellular messengers capable of regulating cell activities necessary for cutaneous restructuration and repair.
- Filling effect on deep wrinkles
- Smoothing / anti-sagging effect – improvement of the skin's texture, elasticity and Tonicity

MAXI LIP™
A natural peptide that stimulates the synthesis of collagen and of glycosaminoglycans like hyaluronic acid. A true corrective element, it acts through re-densification of the connective tissue. It has exceptional restructuring and moisturizing properties, thus improving the appearance of the lips.

Mat XS
Issued from the latest technology in cosmetology, this active contains sarcosine, a molecule derived from glycin which is involved in various physiological processes. It is naturally found in foods such as egg yolk and legumes.The Mat XS Clinical neutralizes sebaceous hypersecretion at its source by targeting and specifically inhibiting the activity of the enzyme called 5 a-reductase. Present in the sebaceous glands, this enzyme ensures the transformation of testosterone into dehydrotestosterone (DHT), of which the excess has a stimulating effect on sebaceous glands.

Meadowfoam Seed Oil
Known for its exceptional hydrating properties, it regulates the Transepidermic Water Loss, favours the regeneration of the hydrolipidic film and normalizes the barrier function.

Metabiotics Resveratrol
Resveratrol is a powerful anti-oxidant in the flavonoid group. This polyphenol is found in several vegetals, namely in the grapevine. In recent years, it has been known for its preventive properties against cardiovascular diseases. Scientists are also interested in its protecting role against certain cancers and neurological ailments. The Resveratrol selected by our scientific team is a Resveratrol with an improved bioavailability. In fact, it is Resveratrol metabolized by a yeast so as to increase its efficacy. We call it Metabiotics™ Resveratrol. Apart from its exceptional anti-wrinkle and anti-ageing properties, the Metabiotics™ Resveratrol also holds excellent anti-inflammatory virtues.

Menthyl Anthranilate
Sunscreen effective against UVA radiation.

Micro-sponges
Tiny, porous particles able to absorb quickly as much as 4 times their weight in sebum, thus ensuring the skin maintains a matte aspect and long-wear make-up.

Mineral Salts
Calcium, Magnesium, Potassium and Silicon are among the most important ones to boost cellular functions, to recover and maintain an optimal hydration level, and to regenerate the connective tissue.

Moisturizing Complex
Consists mainly of elements of the N.M.F. which are essential for maintaining optimal hydration of the skin.

Moisturizing Vegetal and Softening Complex
Made up of Cucumber, Elderberry, Ivy and Mallow Extracts, this complex moisturizes the skin, brightens the complexion and supples the epidermis.

Moringa oleifera
Also called Pterygosperma or "the tree that never dies", is an exotic tree native to India that grows in tropical and sub-tropical areas in Africa and Asia. The extract is a peptide that has exceptional antipollution properties and characterized by its dual activity that combines: the efficacy of purifying the skin by facilitating the elimination of all micro-particles and the capacity of protecting skin cells against aggression by pollutants.

N

Narcissus Dormant Bulb Extract
Dormins are natural plant extracts or plant organs in their dormant stage which are able to slow cell proliferation, thus allowing cells to stay young. Longer cell maturation due to slower proliferation leads to more mature cells and skin that is better protected against environmental stress factors.

Native Acidosoluble Collagen
The most natural and complete collagen used in cosmetology. It smooths out wrinkles, hydrates the skin and promotes cellular development, thus helping to fight signs of premature ageing of the skin.

Natural Exfoliating Complex
Of marine and biotechnological origin, it contains urea and sugar derivative agents. This exfoliating complex re-programmes the natural desquamation process of the skin.

O

Oat Extract
A vegetal extract distinguished for its soothing, softening and anti-dehydrating properties.

Octyl Methoxycinnamate
Octyl Salicylate
Sunscreens effective against UVB radiation.

Oily Extract of Calendula
Rich in ß-carrotene or Pro-Vitamin A, it restores the equilibrium of fragilized epidermis, reduces redness, soothes irritation and softens the skin.

Optimized Vitamin C
A stable form of Vitamin C that acts at the heart of cells to promote a clear complexion and improve the skin's firmness and tonicity.

Orange Extract
Contains flavanoids, numerous vitamins and amino-acids, known for their anti-inflammatory action. It also improves the microcirculation.

Orsirtine®*
A rice extract that boosts the expression and production of longevity proteins in skin cells, allowing us to save them, thus ensuring our skin longevity.

Osilift®
A 100% natural sugar tensor, Osilift® is a purified fraction of polysaccharides obtained from oats. Thanks to its high molecular weight, this network of sugars bonds perfectly to the skin for an immediate lifting, smoothing effect.

P

P.A. Reviviscence
An osmoregulating and protecting complex constituted of 2 vegetal extracts -Myrothamnus flabellifolia and Tamarindus indica combined with a particular sugar called Trehalose. It regulates and protects the hydro-balance of cutaneous cells.

PCA Na
A major hygroscopic ingredient of the NMF: the perfect moisturizing agent.

Pomegranate Oil
Pomegranate (Punica granatum), from the Lythraceae family is the edible fruit of the Pomegranate tree. it is probably from Iran and its therapeutic virtues are very well known. The oil used is obtained through the extraction of the pomegranate seeds. Its high content (more than 60%) of Punicic Acid, a molecule from the polyphenol group, gives it exceptional anti-inflammatory and antioxidant properties. It is therefore becoming more and more popular for delaying the effects of cutaneous ageing. It is also hydrating and nourishing.

Pentavitin®
Like a magnet, this mixture of carbon hydrates of natural origin captures water and retains it, thus preventing dehydration. Its "capturing" capacity increases with time, locking moisture into the skin for a much longer time than with traditional moisturizers.

Peumus boldus Extract
The Boldo Extract used is obtained from the leaves of a plant called Peumus boldus originating from Chile. This extract regulates the synthesis of healthy ß-defensins. It therefore reactivates the natural defence system of skin affected by rosacea, against pathogenic micro-organisms and neutralizes a significant source of inflammation.

PhytoCellTec® Argan
It is a liposomal preparation based on the stem cells of the Argan tree, a rare species found only in South-Western Morocco. It is the first cosmetic active able to target dermal stem cells. Based on a high-tech plant cell culture technology, this active ingredient showed through various experiments the ability to protect dermal stem cells by maintaining them in a favourable nutritive microenvironment. Objective in-vivo clinical studies showed that PhytoCellTec® Argan is able to:
- Decrease wrinkle depth.
- Increase skin density.
- Reinforce the dermis-hypodermis junction for a tighter, firmer skin.

PhytoCellTec® Argan, an ultra-concentrated extract of Argan stem cells:
- Activates and protects dermal stem cells for the first time.
- Accelerates the skin's natural repair process.
- Reactivates all of the skin's youthful functions.
- Restores collagen and elastin.
- Fights wrinkles and loss of firmness exactly where they develop.

PytoCellTec® Argan, the very first active able to protect and vitalize human dermal stem cells, corrects and prevents skin ageing where it originates.

PhytoCellTec® Malus Domestica
It is a liposomal preparation based on the stem cells of a rare Swiss apple, well-known for its excellent longevity potential. Based on a high-tech plant cell culture technology, this active ingredient showed through various experiments the ability to protect skin stem cells by maintaining them in a favourable nutrient microenvironment and by protecting them from UV damage, even at low concentrations.

Phytosqualane
A superior emollient from vegetable origin, derived from olive oil, enters the composition of the hydrolipidic film on the surface of the epidermis. It helps maintain a healthy skin and well hydrated.

P-Refinyl
Lens extract rich in oligosaccharides. This biological multi-action active ingredient tightens pores that are dilated and help refine the skin texture and reduce skin shinning.

Pur Retinol with POLY-PORE® technology
Retinol, vitamin A in its purest form and a precursor to retinoic acid, is essential for the maintenance of normal and healthy skin. It quickly revitalizes the appearance of aging skin that has been damaged by the sun by increasing cell renewal and stimulating collagen synthesis. A number of studies strongly suggest that it effectively corrects signs of chronological aging and photoaging. RETINOL 0.22 by Laboratoire Dr Renaud is formulated with pure retinol in a protective time-release form. The encapsulated retinol is gradually released, refining and smoothing the appearance of the skin's heterogeneous texture and tone, revealing a younger-looking skin, with minimal irritation.

R

Rhamnosoft® HP
Of a biotechnological origin, this polysaccharide, particularly rich in rhamnose, attenuates the inflammatory reactions of the skin and the associated symptoms such as –redness, pruritus, oedema. It also stimulates the release of ß-endorphins, called "pleasure molecules", thus instantly restoring long-lasting well-being and comfort of fragilized skin.

S

Sea Clay
It contains precious trace elements that are necessary for enzymatic reactions during cellular metabolism. Clay is used for its remineralizing, detoxifying and healing properties.

Sepicalm®
An innovative "anti-stress", soothing and calming complex composed of essential amino-acids and of two minerals that are essential for the metabolism of fragilized skin, Potassium and Magnesium. Sepicalm® may be considered as a nutritive supplement allowing fragilized skin to actively fight the effects of cutaneous stress.

Sepimat
A high absorbing polymer, Sepimat is a soft, ultra-fine powder able to capture 70% of its weight in sebum. In addition, it has a soft-focus effect which also favours the decrease of shininess, a characteristic of oily skin. Sepimat provides the skin with an ultra-soft, silky touch along with a long-lasting mat effect and an even complexion throughout the day.

Shea Butter
Extracted from Shea nuts, it protects the skin against climatic aggression, pollution and most of all U.V. rays. Also has exceptional anti-inflammatory and healing properties.

Smoothing, Tonic, Vegetal Complex
Made up of Coltsfoot, Yarrow and Pansy, this vegetal complex stimulates the cutaneous metabolism of tired, deeply dehydrated, so-called "ageing" skin.

Superoxide Dismutase (S.O.D.)
A biological antioxidant present in the organism and located in the mitochondria and cytoplasm of cells. SOD is obviously the first line of defence against free radicals and protects us from photosensitivity damage.

T

Tasmanian Pepper
This Tasmanian pepper berry extract has extraordinary antioxidant and anti-inflammatory properties. It decreases pro-inflammatory cytokines and acts immediately to reduce burning and itching sensations.

Thermal Mud
100% pure, European source, naturally rich in organic matter, providing mainly humic acid (48%), amino acids, minerals, vitamins and trace elements. The properties attributed to this thermal mud are numerous: when applied externally, it soothes, tones and improves the surface of the skin, making it more even and refining pores. It hydrates the skin, exfoliates it slightly and stimulates the cellular regeneration process. Highly concentrated, it is also a sebum reducer (up to 12%). Also helps stimulate blood circulation, eliminate toxins and soothe certain skin problems: acne, psoriasis and eczema.

Titanium Dioxide
A natural sunblock of mineral origin capable of scattering ultraviolet radiation, visible radiation and to some extent, infrareds.

Trihydroxypalmitic Acid (THPA)
A complex lipid of which the structure is similar to that of fatty acids found in the cutaneous structure. It helps to preserve the lipidic barrier of the epidermis and reduces substantially the transepidermic water loss.

U

Urea
One of the main constituents of the the N.M.F. known for its hydrating power and its antiseptic properties.

V

Vegetal Hydrating Micropatch®
Very small water reservoirs (Acacia Gum, Alginate, Serine) hydrate the skin continuously and ensure an optimal hydro-balance at all times.

Venuceane™
Biological Protector (DNA, cells and tissues) –Anti-Ageing. This powerful antioxidant is extracted from a micro-organism called Thermus thermophilus living in deep-sea water near heat sources in extreme conditions (approximately 75° C).

Vitaminized Complex (ADEF)
Normalizes keratinization phenomena. Promotes a softer and more supple skin able to maintain a normal level of hydration.

Vitamin E
As a free radical captor, it is highly-effective in the fight against cutaneous ageing. It also helps to maintain the skin's suppleness, softness and youthfulness.

Vulcanic Clay
Issued from the Mediterranean region, gives a greyish/purple colour to the SeboBalance Purifying Sebo-absorbing Mask. Rich in minerals such as Zinc, Magnesium and especially Sulphur, it soothes and detoxifies the skin.

W

Wild Mango Butter
Composed of triglycerides and of an unsaponifiable fraction, it is known for its excellent re-fatting and emollient properties with moisturizing, suppling and softening effects. Rich in Vitamin E and Phytosterols, it also has nourishing, repairing and strong protecting properties.

Witch-Hazel Extract
A natural stimulant with tonic, astringent and decongestive properties. It also helps to normalize the cutaneous microcirculation.

X

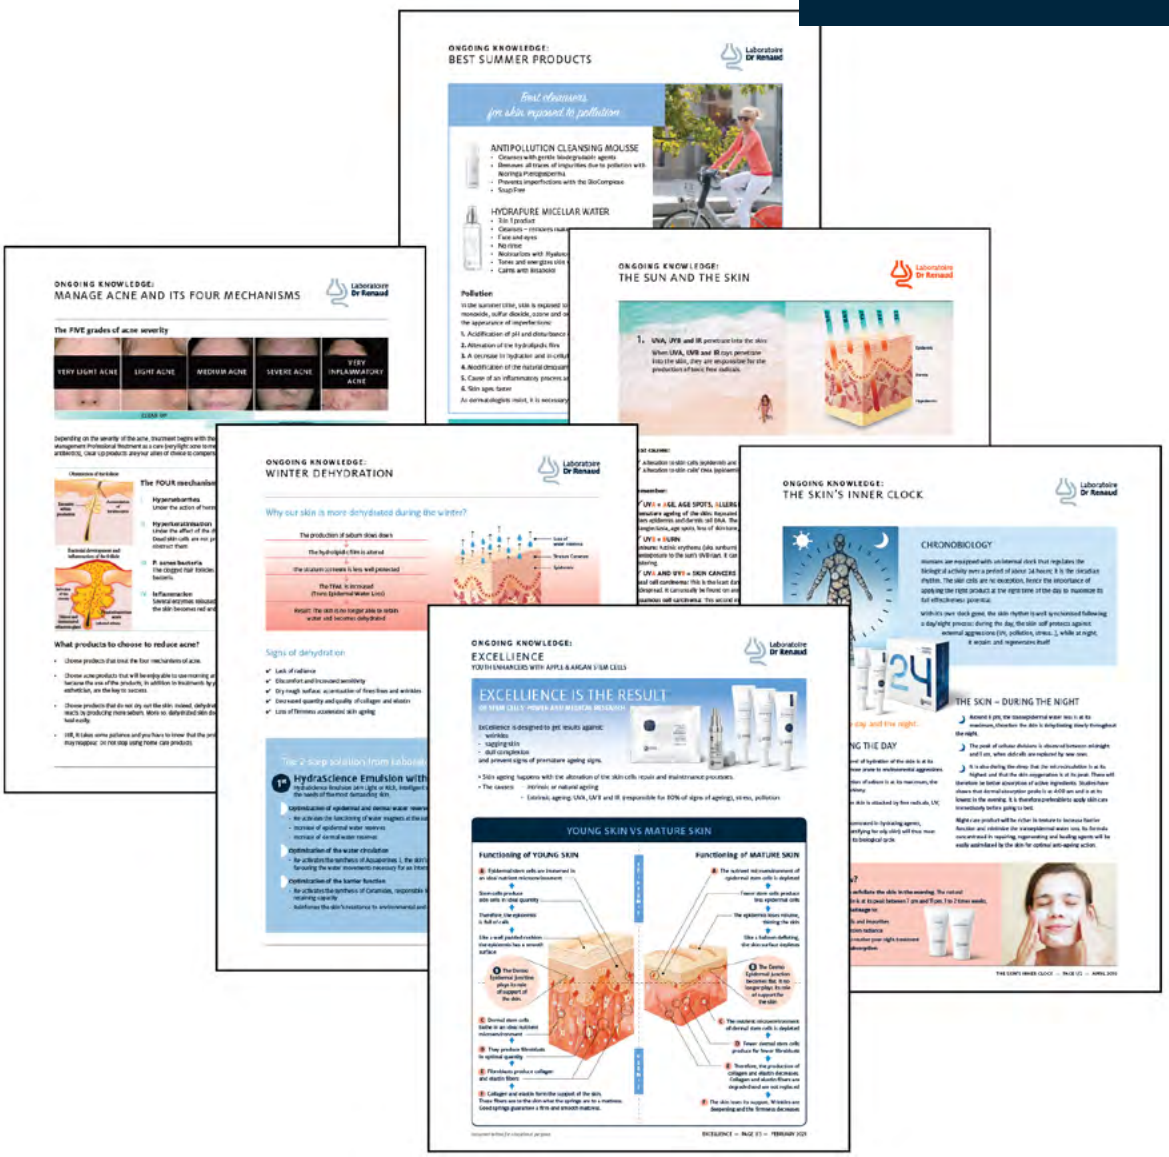

Xpertmoist
An ingredient obtained through biotechnology, Xpertmoist combines a micro-organism extract called Pseudoalteromonas antartica with the main amino-acids that constitute the Natural Moisturizing Factor (NMF) of the skin: Serine, Proline and Alanine. Therefore, Xpertmoist reinforces the NMF, thus ensuring optimal skin hydration.

Z

Zinc Oxide
A powder of mineral origin with antiseptic, astringent, softening and soothing properties.
