Pro-Derm

THE PRO-DERM CONCEPT

BASED ON THE LATEST CLINICAL AND SCIENTIFIC RESEARCH, the Pro-Derm scientific team has developed a line of high-quality dermaceutical products containing active ingredients that enhance facial rejuvenation and alleviate certain common skin problems.

The use of Pro-Derm products is also ideal when used in **conjunction with anti-aging medical treatments such as facial peels, laser treatments, injections for lines and wrinkles, and aesthetic surgery.**

A COMPLETE LINE OF COSMECEUTICAL PRODUCTS OFFERING HIGH LEVELS OF CLINICALLY PROVEN EFFECTIVE INGREDIENTS, COMBINING THE BENEFITS OF BOTH COSMETIC AND PHARMACEUTICAL PRODUCTS

ACTIVE INGREDIENTS AND SYNERGY

Rich in high-quality active ingredients, the Pro-Derm line combines innovative agents, natural botanical extracts and pure essential oils. Their additive effects and complementarity, combined with the presence of transdermals, improve the formula's efficiency and uptake.

Pro-Derm products and product categories have been designed to be used jointly, maximizing the results.

A UNIQUE BASE

The unique and natural vegetal base of Pro-Derm products preserves the integrity of the skin's natural protective layer and hydrates the various skin types appropriately.

QUALITY/ETHICS OF FORMULATIONS

The Pro-Derm line of products is free from perfumes, mineral oils, alcohols, parabens and petroleum products, and is not tested on animals. It contains as little preservatives as possible, replacing them with botanical ingredients that have natural bactericidal properties. Many of our products are therefore sold in airless containers to ensure that their stability is preserved throughout their use.

CONSTANT OPTIMIZATION

Pro-Derm products are produced in small quantities so the formulations can be constantly optimized.

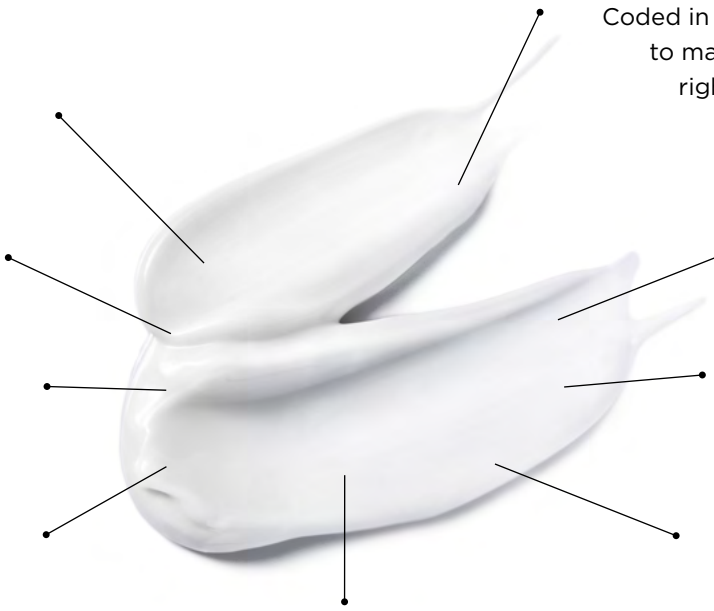

EXCLUSIVITY

Our products are available exclusively in specialized medical clinics. They are also available in drugstores on medical recommendation (province of Québec only).

PRO-DERM FORMULATION

PRO-DERM IS A CANADIAN COMPANY FOUNDED IN MONTREAL IN 1996. EVERY PRO-DERM PRODUCT WAS DEVELOPED BY A CHEMIST IN CLOSE COLLABORATION WITH A DERMATOLOGIST. SINCE THEN, THE LINE HAS CONTINUED TO EVOLVE IN THE SAME SCIENTIFIC SPIRIT AND WITH THE SAME CARE FOR THE BEST RESULTS.

PRO-DERM PRODUCTS ARE:

Made of highest quality active ingredients in maximum concentrations

Effective and safe

Available only from physicians or on medical recommendation

The best quality/price choice in the high-quality market

Coded in a unique 6-colour system to make it easier to choose the right product for your needs

Fragrance-free and paraben-free

Packaged in airless containers to prevent contamination

Free of mineral oil and petroleum derivatives

Not tested on animals

IN ADDITION:

+ They are designed and thoroughly tested to complement and maximize medical aesthetic procedures such as laser epilation, IPL, facial peels, radiofrequency treatments, Fraxel laser treatments, CO_2 treatments, etc., as well as immunomodulator and filler substance injections.

+ The products improve skin and reduce signs of skin aging without causing redness or irritation.

+ The line includes products for all skin types, broad spectrum sunscreens and facial peel solutions for professional use.

+ Certain products are available in professional sizes.

TABLE OF CONTENTS

Anti-aging system by skin type 8

PROTECT

Daytime Fluid Broad Spectrum Sun Protection SPF 30 10

Post-treatment products for all skin types:
Hydrogel, TerreusMasque and Regenerating Cream

Pro-Derm

CATEGORY
SOLAR PROTECTION

Daytime Fluid SPF 30 with anti-aging properties, for the face. Broad spectrum UVA-UVB protection. A sunscreen protection that is 100% mineral and combines lightness and incomparable effectiveness.

+ 100% mineral sun protection: micronized zinc oxide (Zinclear) and micronized titanium dioxide
+ Powerful anti-oxidant: Venuceane

DAYTIME FLUID

BROAD SPECTRUM SUN PROTECTION SPF 30

NPN 80040553

INSTRUCTIONS

Use daily in the morning or whenever you plan to be be outdoors.

Apply to well-dried skin previously cleansed with Pro-Derm Gentle Cleanser on face, neck and chest. Daytime Fluid SPF 30 can also be used as a base cream under make-up.

BENEFITS

Daily exposure to ultraviolet rays causes what is called photo-aging. A sun protection product is essential to fight against photo-aging and ensure healthy skin in the long term. Daytime Fluid SPF 30, a non-greasy, non-comedogenic and mattifying cream, contains 100% natural sunscreens for effective protection against UVA and UVB rays. Its exclusive formulation with Venuceane inhibits free radicals and stimulates the skin's natural defence mechanisms for optimal photoprotection.

ACTIVE INGREDIENTS

MICRONIZED ZINC OXIDE Zinc oxide (ZnO) is a natural sunblock of mineral origin, and therefore of natural origin, in the form of an inert white powder capable of reflecting and scattering ultraviolet radiation, visible radiation and, to a certain extent, infrared radiation. It is a broad spectrum physical sunblock recognized by International Expert Committees as being safe and effective. The grade of zinc oxide used in Daytime Fluid SPF 30 is called ZinClear®. It is the newest and best performing zinc oxide technology on the market. It allows the product to achieve a high SPF while maintaining a completely transparent effect on the skin. Therefore, ZinClear® technology allows for the formulation of a high SPF sunscreen that does not whiten the skin. In addition, ZinClear® zinc oxide is a micron-sized powder that provides protection across the entire UVA and UVB spectrum, including short and long UVA. This is why it is called broad spectrum UVA-UVB protection. Finally, zinc oxide is known for its protective and soothing properties for irritated skin.

MICRONIZED TITANIUM DIOXIDE Titanium dioxide (TiO_2) is a natural sunblock of mineral origin, and therefore of natural origin, in the form of an inert white powder capable of reflecting and scattering ultraviolet radiation, visible radiation and, to a certain extent, infrared radiation. Titanium dioxide is a broad spectrum physical sunblock recognized by International Expert Committees as safe and effective. Used in a micronized form, i.e. an ultra-fine powder, it maintains all its protecting virtues while gaining a major aesthetic quality: it does not whiten the skin. The formulation of Daytime Fluid SPF 30 integrates an optimal dispersion of Titanium Dioxide exclusive

to Pro-Derm. The creation of a homogeneous and continuous film on the skin makes it possible to maximize the protecting power of TiO_2 for unmatched protection UVA and UVB rays.

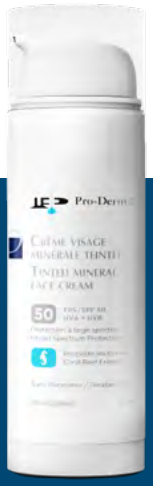

VENUCEANE™ Anti-UVA and anti-IR (DNA, cell and tissue) biological protector – Anti-premature aging. This powerful antioxidant is extracted from a microorganism called Thermus thermophilus, which lives deep in the ocean in extreme conditions, near hot springs where the water temperature is very high (approximately 75°C).

It has the capacity to inhibit free radicals, powerful toxins that promote skin aging, created by UV and IR activity. It activates and stimulates the skin's own natural defence and repair mechanisms, at the DNA, cellular (keratinocytes) and tissular (fibroblasts) levels, thus offering comprehensive protection from the harmful effects of UV and IR rays.

Venuceane™ was the subject of an objective clinical study conducted for 6 months in Mauritius on 50 volunteers who were an average of 39 years old. The parameters for the major skin aging characteristics, such as tone and elasticity, blotches, wrinkles, complexion brightness, dehydration, hyperkeratinization and age spots were measured before and after 6 months of exposure to the sun. For the first time, this study showed that:

+ Daily exposure to the sun for 6 months accelerates aging by 3 years.
+ Application of Venuceane™ protected the volunteers from the effects of premature aging caused by exposure to UV rays. In fact, not only did daily application of Venuceane compensate for the 3 years of premature aging, but it also made the volunteers look 2 years younger. They actually "gained" 5 years compared with the volunteers who did not apply Venuceane™.

This shows the immense advantage of daytime care products that include an active ingredient for bioprotection such as Venuceane™. ■

CATEGORY
SOLAR PROTECTION

A reliable, high-quality, high-performance formula that provides broad spectrum UVA/UVB protection, as well as anti-ageing suncare, designed for all sensitive skin, regardless of skin type.

+ 100% mineral sun protection: micronized zinc oxide, micronized titanium dioxide, ectoin and vitamin E
+ Benefiting from our science team's dual suncare and anti-ageing expertise, it is specifically designed for daily use for people with demanding skin — light-coloured skin, vaso-reactive skin, skin prone to brown spots, sun-sensitive skin
+ Also designed for more specific use — recent scarring, post-peeling, post-laser, etc.
+ Paraben-, alcohol- and gluten-free formulation

TINTED MINERAL FACE CREAM

BROAD SPECTRUM SUN PROTECTION SPF 50

NPN 80109967

INSTRUCTIONS

In the morning or before sun exposure, after thoroughly cleansing the skin with Pro-Derm Gentle Cleanser, apply over your serum or usual day cream. Massage in gently.

To increase the skin's resistance to pollutants and UV rays, use in combination with C 10% Vitamin Serum with M²PE. Reapply every two hours or use your choice of SPF 50 Mineral Loose Powder every two hours to ensure a high level of protection.

BENEFITS

Daily exposure to ultraviolet rays causes what is called photoaging. A sun protection product is essential to fight against premature signs of aging and ensure healthy skin in the long term. The Tinted Mineral Face Cream SPF 50 fights premature ageing daily and neutralizes damage caused by UV rays, stress, pollution, and the environment.

This reliable, high-quality, high-performance formula provides broad-spectrum UVA and UVB sun protection, but is also an anti-aging sun care product designed for all sensitive skin types.

Upon application, the Tinted Mineral Face Cream SPF 50:

+ Protects against sunburn, the harmful effects of UVA and UVB rays, and blue light.
+ Fights premature ageing and the appearance of wrinkles and other photo-induced signs of ageing.
+ Prevents the appearance or aggravation of pigmentation spots.
+ Prevents the progression of clinical signs of rosacea.
+ Protects sensitive or weakened skin against external aggressions.
+ Regenerates the protective skin barrier and reduces the risk of skin reactions.

ACTIVE INGREDIENTS

MICRONIZED ZINC OXIDE Zinc oxide (ZnO) is a natural sunblock of mineral origin, and therefore of natural origin, in the form of an inert white powder capable of reflecting and scattering ultraviolet radiation, visible radiation and, to a certain extent, infrared radiation. It is a broad spectrum physical sunblock recognized by International Expert Committees as being safe and effective. The grade of zinc oxide used in Daytime Fluid SPF 30 is called ZinClear®. It is the newest and best performing zinc oxide technology on the market. It allows the product to achieve a high SPF while maintaining a completely transparent effect on the skin. Therefore, ZinClear® technology allows for the formulation of a high SPF sunscreen that does not whiten the skin. In addition, ZinClear® zinc oxide is a micron-sized powder that provides protection across the entire UVA and UVB spectrum, including short and long UVA. This is why it is called broad spectrum UVA-UVB protection. Finally, zinc oxide is known for its protective and soothing properties for irritated skin.

MICRONIZED TITANIUM DIOXIDE Titanium dioxide (TiO_2) is a natural sunblock of mineral origin, and therefore of natural origin, in the form of an inert white powder capable of reflecting and scattering ultraviolet radiation, visible radiation and, to a certain extent, infrared radiation. Titanium dioxide is a broad spectrum physical sunblock recognized by International Expert Committees as safe and effective. Used in a micronized form, i.e. an ultra-fine powder, it maintains all its protecting virtues while gaining a major aesthetic quality: it does not whiten the skin. The formulation of Daytime Fluid SPF 30 integrates an optimal dispersion of Titanium Dioxide exclusive to Pro-Derm. The creation of a homogeneous and continuous film on the skin makes it possible to maximize the protecting power of TiO_2 for unmatched protection UVA and UVB rays.

ECTOIN Of biotechnological origin — extracted from a halophile bacterium, Halomonas elongata, that lives in salt deserts, this cyclic amino acid allows the microorganisms that it supports to survive in hostile environments (dehydration, high temperatures and extreme UV doses) by stabilizing the natural structure of biopolymers such as DNA, cell proteins and membranes.

Ectoin reduces the skin's cell stress and protects Langerhans cells, which guard the cutaneous immune system, DNA and other skin cells from damage caused by UVA and IR radiation and visible light, including blue light. It is a protective active ingredient with powerful anti-ageing properties.

Its properties help maintain the skin's hydration by acting as a water magnet, reduce inflammation and decrease the effect of pollutants and allergens on the skin.

NATURAL VITAMIN E (TOCOPHEROL) Slows skin aging and protects the skin from agents that generate free radicals (antioxidant and antiradical). Vitamin E also enhances the effect of moisturizing ingredients. ■

CATEGORY
SOLAR PROTECTION

100% mineral loose powder with 100% UVA-UVB broad spectrum protection. Instant protection.

+ Anti-UVA-UVB broad spectrum 100% mineral sun filters:
  - Zinc oxide
  - Titanium dioxide
+ Antioxidant cell protector: jasmine flower extract
+ Practical and easy-to-use brush applicator – handy size can be brought everywhere
+ Without preservatives or essential oils, fragrance-free
+ Formulated without talc

MINERAL LOOSE POWDER

WITH BROAD SPECTRUM SPF 50

Light or Dark – NPN 80050113

INSTRUCTIONS

Before sun exposure, **apply liberally and evenly** to the face, neck and décolleté. Reapply every 2 hours. Use a water resistant sunscreen if swimming or perspiring heavily.

BENEFITS

Sun protection is one of the essential steps in maintaining a youthful and beautiful skin. However, traditional sunscreens are not always easy to apply and reapply in daily life, for example, over make-up or when it's impossible to wash your hands. Formulated with 2 physical sunscreens and a biovegetal photoprotecting antioxidant complex, Loose Powder SPF 50 provides high UVA-UVB broad spectrum protection. Available in 2 shades, it is easy to apply and reapply throughout the day, even over make-up; it does not whiten the skin and provides an all-natural finish. It combines ultra-performance with easy application and aesthetic features.

ANTI-AGING PROPERTIES

Jasmine flower antioxidant extract rich in flavonols

ACTIVE INGREDIENTS

100% MINERAL SUN PROTECTION

MICRONIZED TITANIUM DIOXIDE Titanium dioxide (TiO_2) is a natural sunblock of mineral origin, thus of natural origin, presented in the form of an inert white powder capable of reflecting and scattering ultraviolet radiation, visible radiation and, to a certain extent, infrared radiation. Titanium dioxide is a broad spectrum physical sunblock recognized as safe and effective by International Expert Committees. Used in a micronized form, i.e. in an ultra-fine powder, it maintains all its protecting virtues while gaining a major aesthetic quality: it does not whiten the skin.

The formulation of Loose Powder SPF 50 integrates an optimal dispersion of titanium dioxide: the size, form and dispersion of TiO_2 particles are optimized so as to obtain a homogeneous and continuous film on the skin, thus maximizing the protecting power of TiO_2 for unmatched protection. The TiO_2 used in the formulation of Loose Powder SPF 50 is considered organic and is Ecocert approved.

ZINC OXIDE Zinc oxide (ZnO) is a natural sunblock of mineral origin, thus of natural origin, in the form of an inert white powder capable of reflecting and scattering ultraviolet radiation, visible radiation and, to a certain extent, infrared radiation. It is a broad spectrum physical sunblock recognized as safe and effective by International Expert Committees.

The quality of the zinc oxide used in Loose Powder SPF 50 is specifically recommended in the formulation of loose powders, since it does not absorb moisture over time, which could make the powder lumpy or affect its proper application using the brush. Lastly, zinc oxide is also known for its protecting and soothing properties for irritated skin. Its use in the formulation of Loose Powder SPF 50 makes the powder extremely gentle.

ANTIOXIDANT PHOTOPROTECTING BIOVEGETAL COMPLEX

JASMINE FLOWER ANTIOXIDANT EXTRACT Biovegetal antioxidant protector. Jasmine is an ornamental plant that grows in warm and very sunny climates, namely in North Africa. Its flowers give off an intoxicating, heady perfume.

Our scientists identified the presence of powerful antioxidant molecules in jasmine flowers. The jasmine flower extract we developed specifically targets the following 2 cell defence mechanisms against free radicals induced by sun radiation:

+ the enzymatic pathway represented by catalase, an enzyme that neutralizes superoxide anion (O_2-), a highly destructive free radical;
+ and the chemical pathway represented by glutathione, which deactivates the hydroxyl radical (-OH) and eliminates the molecules produced by the deactivation of free radicals, i.e. singlet oxygen ($_1O^2$) and hydrogen peroxide (H_2O_2).

Flavonols derived from jasmine flowers protect and preserve the 2 main endogenous defence mechanisms, whose efficacy is diminished under the influence of sun radiation. Thanks to this highly performing vegetal extract, the skin's natural defence mechanisms against free radicals maintain their optimal efficacy at all times.

Our jasmine flower extract:

+ protects catalase, a key enzyme in the anti-free radical cascade;
+ allows for the recovery of glutathione, a pivot component in the chemical fight against free radicals.

Jasmine flavonols also limit inflammatory phenomena by inhibiting the release of IL-1α and IL-8 inflammatory mediators.

PRESENTATION A highly practical and economic brush applicator: 6 g ■

REGENERATING CREAM

CATEGORY
HYDRATE

Anti-aging, moisturizing and soothing cream. Suitable for all skin types and particularly for sensitive or couperose-prone skin.

+ Anti-aging properties: Matrixyl® 3000, glycosaminoglycans, hyaluronic acid
+ Vitamin complex: vitamins B5 and C (MAP), and natural vitamin E
+ Moisturizing & soothing agents

INSTRUCTIONS

Apply daily in the morning or when you expect to spend time outdoors. Apply to thoroughly dry skin previously cleansed with Pro-Derm Gentle Cleanser on the face, neck and décolleté. Can also be used as a foundation cream under make-up.

BENEFITS

Anti-wrinkle, antioxidant and antiradical, Pro-Derm Regenerating Cream has been formulated to moisturize and regenerate sensitive and couperose-prone skin. It helps diminish and relieve redness caused by couperose, as well as by exposure to the elements, AHAs or retinoids, facial peels and laser treatments. A formulation that is continually optimized contributes to this cream's reputation for excellence. Anti-aging and moisturizing properties as a result of its high concentration in natural vitamins C (MAP) and E. The addition of Matrixyl® 3000 5%, amino acids, glycosaminoglycans, mucopolysaccharides and hyaluronic acid provides this cream with many well-targeted and beneficial effects.

ACTIVE INGREDIENTS

MATRIXYL® 3000 Pentapeptide and oligopeptide. Stimulates collagen synthesis and improves photoaged skin (caused by UVA-UVB rays, sun and tanning salons). Clinical studies have shown positive changes in skin elastin and collagen concentrations, resulting in a decrease in depth, volume and length of wrinkles; all these benefits come without any negative effects such as irritation and dryness.

GLYCOSAMINOGLYCANS Natural active ingredient of marine origin, producing an instant lift effect. Water retention properties, playing an essential role in hydration.

HYALURONIC ACID Contrary to popular belief, because of the size of this molecule, hyaluronic acid is not absorbed by the skin. Instead, it forms a light, totally invisible, visco-elastic surface film, allowing the active ingredients in the Regenerating Cream to penetrate the skin. This molecule helps to retain the skin's moisture, and thus increase hydration. Hyaluronic acid is a water reservoir that has no side effects, and increases skin softness and hydration.

VITAMIN B5 Promotes the healing process, accelerates the cellular renewal process and reacts in synergy with allantoin. Vitamin B5 helps to prevent premature aging of the skin and is a firming agent. Particularly recommended for the prevention and treatment of blemishes and blotchy skin.

VITAMIN C (MAP) This form of vitamin C, particularly active and easily absorbed by the skin, lightens the skin and helps to slow skin aging by inducing the synthesis of new collagen fibres that help to improve skin tone, making it appear younger and more resistant to environmental stress. MAP also regenerates oxidized vitamin E to its original active form.

NATURAL VITAMIN E (TOCOPHEROL) Slows skin aging and protects the skin from agents that generate free radicals (antioxidant and antiradical). Vitamin E also enhances the effect of moisturizing ingredients.

ALLANTOIN This vegetal active ingredient stimulates cellular renewal, giving it healing properties. Effective against irritated or dry skin.

ALOE VERA Known for its moisturizing, softening and healing properties, and recommended for couperose-prone, dry or delicate skin.

BISABOLOL This vegetal active ingredient has anti-inflammatory, calming and soothing properties.

CHOLESTEROL An excellent hydrating ingredient, cholesterol restores the natural human lipid barrier.

GLYCERIN Moisturizing vegetal active ingredient.

SHEA BUTTER This active ingredient is particularly rich in unsaponifiable matter (anti-wrinkle factor protecting the skin's elasticity), vitamins (A, D, E and F) and essential fatty acids. It has healing, regenerating, softening, stimulating and moisturizing properties. Skin is softened and toned.

SQUALANE Squalene is one of the main components of the hydrolipidic film. Squalane is a derivative of squalene that is resistant to oxidation. Squalane from vegetal origin is easily absorbed by the skin, and thus helps to restore the skin's moisture and softness.

CAPRYLIC-CAPRIC TRIGLYCERIDE This vegetal emollient moisturizes and reduces the tensor effect on dry and delicate skin.

LAVENDER ESSENTIAL OIL Known for its healing, antiseptic and anti-inflammatory properties, lavender is effective against skin dryness and irritations and is recommended for delicate or couperose-prone skin. ■

BARRIER REPAIR CREAM

CATEGORY
HYDRATE

Lipid correction, anti-aging, moisturizing, soothing, protective, and healing cream suitable for all skin types. Specially formulated for normal to dry skin types, including the most sensitive ones. Compensates for the drying and/or irritating effects of drug treatments or procedures.

+ Contains a precise ratio (1:2:1) of the three essential skin lipids (ceramides, cholesterol, and fatty acids)
+ Also contains Niacinamide and Galactaric Acid for protective and anti-aging properties
+ Excellent choice after a chemical peel or retinol treatment
+ For all skin types, even the most sensitive skin
+ Non-irritating, non-comedogenic
+ Paraben free

INSTRUCTIONS

In the morning and evening, after thoroughly cleansing the skin, apply a small amount to the face, neck and décolleté. Spread evenly and massage in with light strokes. Proceed with make-up if desired.

Ideal for normal to dry skin types, including the most sensitive ones. Can also be used daily after a chemical peel, with a retinol treatment or any facial treatment that causes dryness or irritation.

BENEFITS

Pro-Derm Barrier Repair Cream is a non-greasy quickly absorbed barrier booster cream, formulated with a maximized concentration of lipids. The precise ratio (1:2:1) of Ceramides, Cholesterol and Fatty acids mimics the skin's natural moisture barrier and helps heal and restore skin's integrity after a treatment. The Barrier Repair Cream provides intense hydration, soothe irritated skin, improves elasticity and is an excellent choice to counteract the drying effects of certain facial treatments or procedures.

ACTIVE INGREDIENTS

CERAMIDES Ceramides play a central role in maintaining the integrity of skin functions. Naturally present in the skin, ceramides are essential for maintaining a healthy and effective skin barrier. They contribute to maintaining the hydration the epidermis needs to remain supple, smooth, and hydrated. They are also involved in anti-aging processes.

CHOLESTEROL An excellent anti dehydrating ingredient, cholesterol restores the natural skin lipid barrier.

FATTY ACIDS Naturally present in the skin, they contribute to the structural integrity of lipids to optimize the overall lipid balance of the skin. Fatty acids are capable of increasing moisture levels while enhancing the protective function of the skin against environmental stress.

NIACINAMIDE Niacinamide repairs the skin barrier by increasing the self-regeneration of ceramides and fatty acids, stimulates microcirculation in the dermis and limits transepidermal water loss. It also increases protein synthesis (eg keratin) and accelerates keratinocyte differentiation. Niacinamide decreases hyperpigmentation by inhibiting the transfer of melanin from melanocytes to keratinocytes. It also reduces fine lines and significantly improves skin elasticity.

GALACTARIC ACID Also known as mucic acid, is an anti-pollution and protective agent. This ingredient prevents premature aging by protecting the skin from environmental aggressions.

LAVENDER ESSENTIAL OIL Lavender has numerous properties: soothing, healing, antiseptic and anti-inflammatory. Effective against skin dryness and irritations. Recommended for delicate or sensitive skin.

GERANIUM BOURBON ESSENTIAL OIL Toning, healing and antiseptic, geranium essential oil soothes and revitalizes dry skin.

ROSEWOOD ESSENTIAL OIL Powerful ability to regenerate, stimulate and tone tissue. Anti-wrinkle effect. Restores the skin's elasticity. ■

EYE CONTOUR CREAM

CATEGORY
HYDRATE

Moisturizing, toning, antiradical and non-irritating for the contour of the eyes. Suitable for all skin types.

+ Anti-aging properties: Matrixyl® 3000
+ Vitamin complex: vitamins B5 and C (MAP), and natural vitamin E
+ Moisturizing & soothing agents

INSTRUCTIONS

After thoroughly cleansing your face with Pro-Derm Gentle Cleanser, make sure your skin is dry and apply on upper & lower eyelids before bed and/or in the morning.

BENEFITS

Daily application of Pro-Derm Eye Contour Cream helps to improve skin tone, reduce fine lines and dark circles under the eyes and regulate pigmentation. It is enriched with active ingredients that have anti-aging properties: Matrixyl®3000 3%, glucosaminoglycans, vitamin C (MAP) and natural vitamin E.

ACTIVE INGREDIENTS

MATRIXYL® 3000 Pentapeptide and oligopeptide. Stimulates collagen synthesis and improves photoaged skin (caused by UVA-UVB rays, sun and tanning salons). Clinical studies have shown positive changes in skin elastin and collagen concentrations, resulting in a decrease in depth, volume and length of wrinkles; all these benefits come without any negative effects such as irritation and dryness.

CAFFEINE In very concentrated form, pure caffeine has toning properties.

VITAMIN B5 Promotes the healing process, accelerates the cellular renewal process and reacts in synergy with allantoin. Vitamin B5 helps to prevent premature aging of the skin and is a firming agent. Particularly recommended for the prevention and treatment of blemishes and blotchy skin.

VITAMIN C (MAP) This form of vitamin C, particularly active and easily absorbed by the skin, lightens the skin and helps to slow skin aging by inducing the synthesis of new collagen fibres that help to improve skin tone, making it appear younger and more resistant to environmental stress. MAP also regenerates oxidized vitamin E to its original active form.

NATURAL VITAMIN E (TOCOPHEROL) Slows skin aging and protects the skin from agents that generate free radicals (antioxidant and antiradical). Vitamin E also enhances the effect of moisturizing ingredients.

ALLANTOIN This vegetal active ingredient stimulates cellular renewal, giving it healing properties. Effective against irritated or dry skin.

ALOE VERA Aloe has moisturizing, softening and healing properties and is recommended for couperose-prone, dry or delicate skin.

SHEA BUTTER This active ingredient is particularly rich in unsaponifiable matter (anti-wrinkle factor protecting the skin's elasticity), vitamins (A, D, E and F) and essential fatty acids. It has healing, regenerating, softening, stimulating and moisturizing properties. Skin is softened and toned.

SQUALANE Squalene is one of the main components of the hydrolipidic film. Squalane is a derivative of squalene that is resistant to oxidation. Squalane from vegetal origin is easily absorbed by the skin, and thus helps to restore the skin's moisture and softness.

ZINC GLUCONATE Essential for skin cells to work properly, this trace element fosters, among other things, the skin's natural healing process. It is also one of the components of SOD (superoxide dismutase), an enzyme that protects cells from the adverse effects of free radicals. ■

DERMAFILINE

BODY CREAM

CATEGORY
HYDRATE

Toning and anti-cellulite body cream. Suitable for all skin types.

+ Firming agents: Regestril, pure caffeine, cypress and geranium essential oils
+ Vitamin complex
+ Moisturizing & soothing agents

INSTRUCTIONS

For maximum effectiveness, apply a small amount on clean and dry skin in the morning. Apply in a gentle, circular motion until completely absorbed. Do not massage vigorously. Do not apply immediately after bathing or shaving, or on irritated skin. Dermafiline Cream helps to enhance and maintain results of VelaShape, Accent, Thermage and Endermology treatments, as well as the results of liposuction and therapeutic massages.

BENEFITS

An anti-cellulite body cream designed to firm (anti-sponginess), moisturize and exfoliate. Regular use of Dermafiline Cream restores and maintains smooth skin. Its firming effect appears quickly all over the body, even in delicate areas such as the neck and under the chin. Its active ingredients are: Regestril, pure caffeine, rosa mosqueta oil and vitamins B5 and E. This cream is enriched with geranium, rosewood and lavender essential oils.

ACTIVE INGREDIENTS

CAFFEINE Very concentrated pure caffeine has slimming and firming properties. It accelerates the natural elimination of excess fats to fight cellulite.

GERANIUM ESSENTIAL OIL Toning, healing, antiseptic and slimming, geranium essential oil fosters the reduction of cellulite fatty tissue. Revitalizes dry skin.

LAVENDER ESSENTIAL OIL Known for its healing, antiseptic, and anti-inflammatory properties, lavender is effective against skin dryness and irritations and is recommended for delicate or couperose-prone skin.

REGESTRIL A combination of Phaseolus lunatus extract, rutin and 2 peptides (matrikines), Regestril™ inhibits the factors involved in the degradation of the skin and helps restore the fibre network of the extracellular matrix.

VITAMIN B5 Promotes the healing process, accelerates the cellular renewal process and reacts in synergy with allantoin. Vitamin B5 helps to prevent premature aging of the skin and is a firming agent. Particularly recommended for the prevention and treatment of blemishes and blotchy skin.

NATURAL VITAMIN E (TOCOPHEROL) Slows skin aging and protects the skin from agents that generate free radicals (antioxidant and antiradical). Vitamin E also enhances the effect of moisturizing ingredients.

ALLANTOIN Allantoin has moisturizing, softening and healing properties and is recommended for couperose-prone, dry or delicate skin.

GLYCERIN Moisturizing vegetal active ingredient.

ROSA MOSQUETA OIL Rich in essential fatty acids and retinoic acid (tretinoin). Tretinoin, a derivative of retinol (vitamin A), produces well-known and rapid therapeutic effects in the treatment of photoaged skin. The tretinoin contained in rosa mosqueta oil does not, however, produce the side effects usually associated with it; its action is naturally controlled and slowly released, thus eliminating the risk of overdosing. Easily absorbed by the skin, rosa mosqueta oil produces a remarkable regenerative effect on the skin; it also prevents and repairs the effects of photoaging. It reduces fine lines, wrinkles, scars, hyper or hypopigmentation, and then restores skin hydration, elasticity and tone.

SHEA BUTTER This active ingredient is particularly rich in unsaponifiable matter (anti-wrinkle factor protecting the skin's elasticity), vitamins (A, D, E and F) and essential fatty acids. It has healing, regenerating, softening, stimulating and moisturizing properties. Skin is softened and toned.

CAPRYLIC-CAPRIC TRIGLYCERIDE This vegetal emollient moisturizes and reduces the tensor effect on dry and delicate skin. ■

HYDROGEL

CATEGORY
HYDRATE

Dermo-calming and lightly moisturizing gel for body and face. Suitable for all skin types.

+ Dermo-calming gel
+ Recommended to promote healing
+ Apply immediately after laser treatments, sunburns, hair removal or other skin irritations
+ Available in professional size

INSTRUCTIONS

Especially recommended to promote healing. Apply immediately after laser treatments, sunburns, hair removal or other skin irritations. Repeat as needed. Restores the skin's protective film after bathing, showering or shaving.

BENEFITS

Hydrogel rapidly soothes skin that has been irritated or reddened by the sun, hair removal or laser treatments. It relieves stretched or itchy skin. A synergy of vegetal and marine active ingredients with antioxidant, anti-inflammatory, antiviral, antifungal and antibacterial properties to ensure exceptional efficiency, Pro-Derm Hydrogel is enriched with sea fennel, aloe, and everlasting and geranium essential oils, among others.

ACTIVE INGREDIENTS

EVERLASTING (HELICHRYSUM) ESSENTIAL OIL With three types of flavonoids, this oil has antioxidant properties. Antiseptic, anti-inflammatory, antimicrobial, antifungal, anti-infectious, antiviral and mild anticoagulant properties.

SEA FENNEL Rich in flavonoids, zinc, iron, magnesium, manganese and copper, and very rich in vitamins C and E, sea fennel has antioxidant, antiseptic, anti-inflammatory and antimicrobial properties. Slightly toning, it stimulates peripheral circulation.

GERANIUM ESSENTIAL OIL Toning, healing and antiseptic, geranium essential oil soothes wounds and sunburns and revitalizes dry skin.

VITAMIN B5 Promotes the healing process, accelerates the cellular renewal process and reacts in synergy with allantoin. Vitamin B5 helps to prevent premature aging of the skin and is a firming agent. Particularly recommended for the prevention and treatment of blemishes and blotchy skin.

ALOE VERA Aloe has moisturizing, softening and healing properties and is recommended for couperose-prone, dry or delicate skin.

BISABOLOL This vegetal active ingredient has anti-inflammatory, calming and soothing properties.

ALLANTOIN This vegetal active ingredient stimulates cellular renewal, giving it healing properties. Effective against irritated or dry skin. ■

OIL-FREE HYDRATING LOTION

CATEGORY
HYDRATE

Our Oil Free Hydrating Lotion significantly increases skin hydration, reinforces skin's barrier function, and absorbs excess oil providing soft, comfortable and supple skin.

+ 1% Aquarize IS™, 2% AQUAPHYLINE®, 0.5% Amazonian White Clay and 3% Mala Kîte
+ For oily skin
+ Non-irritating, non-comedogenic
+ Silicone free, paraben free

INSTRUCTIONS

This product can be applied underneath make-up. During the day, apply sunscreen as a last step. Apply a pea-sized amount on the tip of your finger, dab onto the five points of the face (forehead, each cheek, nose and chin). Massage into skin in an upward motion. Ensure to avoid contact with eyes and eye contour area.

Apply once or twice daily. Use sunscreen during the day. For external use only. Avoid contact with eyes and mucous membranes. If irritation develops, discontinue use. Keep out of reach of children.

BENEFITS

Oil Free Hydrating Lotion is formulated with Aquarize IS™, Aquaphyline®, Amazonian white clay and Mala'Kîte to significantly increase skin hydration, reinforce skin barrier function and absorb excess oil. Regular use on the face will provide soft, comfortable, and supple skin.

ACTIVE INGREDIENTS

AQUARIZE IS™ is an innovative rice extract that reinforces skin's barrier which prevents water loss and significantly increases skin hydration; therefore, maintaining better skin moisturization.

AQUAPHYLINE® a powerful ingredient derived from wild pansy, it increases skin's epidermal water binding capacity by augmenting hyaluronic acid in the epidermis which increases skin's moisture retention.

AMAZONIAN WHITE CLAY white clay is a natural product that is rich in minerals and absorbs excess oil from the surface of the skin without drying it.

MALA'KÎTE is a protective copper complex that boosts cellular defense for an anti-aging and detoxifying effect. It also has an action on fibroblasts and increases collagen and elastin production. ■

HA PLUMPING SERUM

CATEGORY
HYDRATE

Corrective serum that helps increase hyaluronic acid in the skin. It moisturizes the skin while improving its firmness. It smoothes out the epidermis and plumps up the features.

+ Combination of three forms of hyaluronic acid
+ Hyaluronic Acid Precursor (NAG6P)
+ High and low molecular weight hyaluronic acids
+ Contains: Niacinamide, Rosmarinyl Glucoside, Extract of wild pansy rich in polysaccharides
+ Formulated without parabens, alcohol, colorants, silicones, mineral oils, or perfume
+ Vegan formula
+ As a pleasant smell of orange essential oil

INSTRUCTIONS

Morning and evening, after thoroughly cleansing the skin, apply 1 to 2 pump strokes of Serum to the face and neck and massage in with light effleurages. This serum can be used as part of a home care regimen after a dermal filler procedure.

BENEFITS

Young skin is a “full” skin. The terms used to describe it are: volume, rebound, elasticity. These characteristics are due to the presence of an essential molecule: hyaluronic acid. Hyaluronic acid is a component found naturally in connective tissues (skin, cartilage, cornea, etc.). This sugar from the Glycosaminoglycan (GAGs) family plays a fundamental role in the skin since, like an ultra-absorbent sponge, it captures large quantities of water in the dermis and retains it deep in the skin. This property contributes to giving volume and part of its elasticity to young skin. With age, the amount of hyaluronic acid in the dermis decreases - its amount in the skin drops by half between the ages of 20 and 50. The skin is then no longer deeply hydrated and loses its “rebound”. Its brightness also decreases.

The HA Plumping Serum formula:

+ Instantly smoothes the appearance of fine lines and wrinkles
+ Hydrates immediately
+ Improves the appearance of skin texture and roughness

It also promotes repair of the skin barrier and helps correct the appearance of signs of aging. The complexion regains its homogeneity and radiance.

ACTIVE INGREDIENTS

HYALURONIC ACID PRECURSOR Sugars are the source of life and energy in cells. Cells synthesize the structural polymers of the skin from sugars, and more particularly Glycosaminoglycans (GAGs) and Hyaluronic Acid from N-acetyl-glucosamine-6-phosphate (NAG6P). This serum contains NAG6P, a molecule essential for the synthesis of Hyaluronic Acid in the skin, obtained by green chemistry. NAG6P stimulates the regeneration of skin cells and supports the production of GAGs, including Hyaluronic Acid, at the epidermal and dermal level. The skin is replenished for an immediate volumizing and plumping effect.

HIGH MOLECULAR WEIGHT HYALURONIC ACID (HMW HA) The high molecular weight Hyaluronic Acid used in this serum is of very high purity. This biomimetic polymer forms a non-occlusive film on the surface of the epidermis. Its water-holding capacity comes from its network structure in which water is captured and retained mechanically. Hyaluronic Acid retains 1,000 times its weight in water.

+ **The water balance is preserved** - The strong hygroscopic properties of high molecular weight Hyaluronic Acid allow the retention of water on the surface of the skin, thus creating a humid microclimate on the surface of the skin.
+ **TEWL (Transepidermal Water Loss) is reduced** - High molecular weight Hyaluronic Acid is a film-forming agent that protects the skin from external aggressions that can alter the skin barrier and limits the evaporation of moisture.

LOW MOLECULAR WEIGHT HYALURONIC ACID (LMW HA) Low molecular weight Hyaluronic Acid (20-50 KDa) provides deep hydration thanks to a patented activity based on the stimulation of tight junctions leading to improved skin firmness. The structure of the skin is strengthened leading to a more youthful appearance. The low molecular weight Hyaluronic Acid in the HA Plumping Serum formula is obtained by biotechnology.

NIACINAMIDE Niacinamide, also known as vitamin B3, vitamin PP or nicotinamide, is part of the group of B-complex vitamins. In the human body, niacinamide is an important precursor of the cofactors NAD and NADP. These cofactors participate in many cellular biochemical reactions. They promote the production of energy within the cells.

In topical application, in addition to its anti-inflammatory properties, the benefits of niacinamide are numerous:

+ **Improved barrier function and hydration** - Niacinamide increases the natural regeneration of ceramides and fatty acids involved in the structure of the skin barrier, stimulates microcirculation in the dermis and limits transepidermal water loss. It also increases protein synthesis (eg. keratin) and accelerates keratinocyte differentiation.
+ **Correction of signs of aging** - Niacinamide reduces fine lines and significantly improves skin elasticity.
+ **Reduction of pigment spots** - Niacinamide decreases hyperpigmentation by inhibiting the transfer of melanin from melanocytes to keratinocytes.

ROSMARINYL™ GLUCOSIDE – ANTIOXIDANT FROM ROSEMARY Rosmarinyl™ Glucoside is a scientific breakthrough that makes the use of rosmarinic acid possible in skin care. Rosmarinic acid is a very powerful polyphenol. A green biotechnological process allowing the vectorization of rosmarinic acid ▸

CONT.

HA PLUMPING SERUM

CATEGORY
HYDRATE

Corrective serum that helps increase hyaluronic acid in the skin. It moisturizes the skin while improving its firmness. It smoothes out the epidermis and plumps up the features.

+ Combination of three forms of hyaluronic acid
+ Hyaluronic Acid Precursor (NAG6P)
+ High and low molecular weight hyaluronic acids
+ Contains: Niacinamide, Rosmarinyl Glucoside, Extract of wild pansy rich in polysaccharides
+ Formulated without parabens, alcohol, colorants, silicones, mineral oils, or perfume
+ Vegan formula
+ As a pleasant smell of orange essential oil

▸ by glycosylation, makes it bioavailable, water-soluble and stable in formulation. It exhibits both excellent soothing and anti-aging properties.

+ Collagen protection: inhibits 40% of the release of MMP-9, gelatinase which degrades type IV collagen.
+ Protection of hyaluronic acid: inhibition of the activity of hyaluronidases by 35%.

WILD PANSY EXTRACT RICH IN POLYSACCHARIDES Rich in wild pansy oligosaccharides, this vegetal extract regulates the hydration process of the epidermis. It stimulates the synthesis of Aquaporins 3 - irrigation channels of the skin favoring the water movements necessary for intense and long-lasting hydration - and increases the water retention capacity of the epidermis thanks to its action on the synthesis endogenous hyaluronic acid. ■

LIFTENSE

CATEGORY
REJUVENATE

Anti-wrinkle, antioxidant, moisturizing, “lift effect” cream for the face, contour of the eyes and neck.
For normal to dry skin.

+ Polypeptides 18%: Matrixyl® 3000, Rigin®, Argireline®
+ Firming agents: Hyaluronic acid
+ Antioxidants: SOD (superoxide dismutase), pure vitamin E
+ Natural moisturizers: Shea butter, rosa mosqueta oil, aloe, glycosaminoglycans
+ Essential oil: Rosewood

INSTRUCTIONS

After cleansing with Pro-Derm Gentle Cleanser, apply Liftense morning and night, until absorbed. If a protective cream with SPF factor is needed, Pro-Derm sunscreens are compatible.

BENEFITS

A luxurious and unique formulation with one of the highest peptide concentrations available. The peptide complex is enriched with highest quality ingredients especially selected for their anti-wrinkle, protective, healing, moisturizing and “lifting” effects. Liftense is invisible, leaving your skin comfortably smooth, and contains no perfumes, alcohol, mineral oils, petroleum derivatives or parabens. It optimizes the results of medical rejuvenation treatments (laser treatments, injections, etc.).

ACTIVE INGREDIENTS

MATRIXYL® 3000 Stimulates collagen synthesis and improves photoaged skin (caused by UVA-UVB rays, sun and tanning salons). Clinical studies have shown positive changes in skin elastin and collagen concentrations, resulting in a decrease in depth, volume and length of wrinkles; all these benefits come without any negative effects such as irritation and dryness.

RIGIN® A fragment of immunoglobulin G, Rigin® controls the secretion of cytokines (interleukin 6) in keratinocyte and fibroblast cultures. Rigin® helps re-establish the cytokine balance. This unrivaled lipopeptide mimics the body’s natural DHEA (dehydroepiandrosterone) growth hormone, also called the “youth hormone”. Results from clinical studies indicate that Rigin® delays the aging process. Rigin® improves elasticity, tones, moisturizes and smooths the skin.

ARGIRELINE® According to studies available to date, Argireline® is a unique peptide (hexapeptide-3) with the ability to reduce fine lines up to 27%. Its main characteristics are: A) reduction in the depth of wrinkles caused by repetitive contractions of muscles around the eyes, mouth and forehead, B) prevention of the formation of fine lines caused by repeated movements of facial expressions, C) complements the effect of injectables to their full extent. Although the expression “Botox®-like” is mentioned when talking about Argireline®, Argireline® will never replace Botox® injections.

HYALURONIC ACID Contrary to popular belief, because of the size of this molecule, hyaluronic acid is not absorbed by the skin. Instead, it forms a light, totally invisible, visco-elastic surface film, letting the active ingredients in Liftense penetrate the skin. This molecule helps to retain the skin's moisture, and thus increase hydration. Hyaluronic acid is a water reservoir that has no side effects, and increases skin softness and hydration.

VITAMIN B5 Promotes the healing process, accelerates the cellular renewal process. Vitamin B5 helps to prevent premature aging of the skin and is a firming agent. Particularly recommended for the prevention and treatment of blemishes and blotchy skin.

CAPRYLIC-CAPRIC TRIGLYCERIDE This vegetal emollient moisturizes and reduces the tensor effect on dry and delicate skin.

SUPEROXIDE DISMUTASE SOD is a powerful enzyme produced by our body. SOD is present in the dermis and epidermis. It regulates the metabolism and certain functions of the cells, especially fibroblasts (collagen-producing cells). SOD is a powerful antioxidant and antiradical. Free radicals are responsible for cell damage. This damage reduces the ability of the cell to reproduce, and is therefore responsible for what we commonly refer to as aging. SOD restores cells' ability to reproduce.

NATURAL VITAMIN E (TOCOPHEROL) Slows skin aging and protects the skin from agents that generate free radicals (antioxidant and antiradical). Vitamin E also enhances the effect of moisturizing ingredients.

SHEA BUTTER This active ingredient is particularly rich in unsaponifiable matter (anti-wrinkle factor protecting the skin's elasticity), vitamins (A, D, E and F) and essential fatty acids. It has healing, regenerating, softening, stimulating and moisturizing properties. Skin is softened and toned.

ROSA MOSQUETA OIL Rich in essential fatty acids and retinoic acid (tretinoin). Tretinoin, a derivative of retinol (vitamin A), produces well-known and rapid therapeutic effects in the treatment of photoaged skin. The tretinoin contained in rosa mosqueta oil does not, however, produce the side effects usually associated with it; its action is naturally controlled and slowly released, thus eliminating the risk of overdosing. Easily absorbed by the skin, rosa mosqueta oil produces a remarkable regenerative effect on the skin; it also prevents and repairs the effects of photoaging. It reduces fine lines, wrinkles, scars, hyper or hypopigmentation, and then restores skin hydration, elasticity and tone.

ROSEWOOD ESSENTIAL OIL Powerful ability to regenerate, stimulate and tone tissue. Has an anti-wrinkle effect and restores the skin's elasticity.

SQUALANE Squalene is one of the main components of the hydrolipidic film. Squalane is a derivative of squalene that is resistant to oxidation. Squalane from vegetal origin is easily absorbed by the skin, and thus helps to restore the skin's moisture and softness. ■

LIFTENSE LTL

CATEGORY
REJUVENATE

Anti-wrinkle, antioxidant, moisturizing, “lift effect” cream for the face, contour of the eyes and neck. Light texture suitable for normal to oily skin.

+ Peptide complex: Octapeptide-3, Matrixyl® 3000
+ Firming agents: Hyaluronic acid
+ Antioxidant: Pure vitamin E
+ Natural moisturizers: Aquaxyl™, squalane, shea butter, aloe vera, glycosaminoglycans, rosa mosqueta oil
+ Essential oils: Geranium bourbon, rosewood, lavender

INSTRUCTIONS

After cleansing with Pro-Derm Gentle Cleanser, apply Liftense LTL morning and night, until absorbed. If a protective cream with SPF factor is needed, Pro-Derm sunscreens are compatible.

BENEFITS

A luxurious and unique formulation with one of the highest peptide concentrations available. The peptide complex is enriched with highest quality ingredients especially selected for their anti-wrinkle, protective, healing, moisturizing and “lifting” effects. This innovative formula contains no perfumes, alcohol, mineral oils, petroleum derivatives, PEG, parabens or preservatives. It optimizes the results of medical rejuvenation treatments (laser treatments, injections, etc.).

ACTIVE INGREDIENTS

MATRIXYL® 3000 Pentapeptide and oligopeptide. Stimulates collagen synthesis and improves photoaged skin (caused by UVA-UVB rays, sun and tanning salons). Clinical studies have shown positive changes in skin elastin and collagen concentrations, resulting in a decrease in depth, volume and length of wrinkles; all these benefits come without any negative effects such as irritation and dryness.

OCTAPEPTIDE-3 This octapeptide, anti-wrinkle active ingredient is an elongation of the famous hexapeptide Argireline®. It acts by mitigating muscle contractions caused by facial expressions, especially in the forehead and around the eyes, thereby reducing the depth of lines and wrinkles and preventing their formation.

HYALURONIC ACID Contrary to popular belief, because of the size of this molecule, hyaluronic acid is not absorbed by the skin. It forms a light, totally invisible, visco-elastic surface film, letting the active ingredients in Liftense LTL penetrate the skin. This molecule helps to retain the skin’s moisture, and thus increase hydration. Hyaluronic acid is a water reservoir that has no side effects, and increases skin softness and hydration.

NATURAL VITAMIN E (TOCOPHEROL) The most important function of vitamin E is to prevent lipid peroxidation (formation of free radicals). Several studies have shown that vitamin E (α-tocopherol) has a photoprotective effect when applied topically to skin.

AQUAXYL™ Of natural vegetal origin, Aquaxyl™ has strong moisturizing and restructuring properties; it increases epidermal water content as well as dermal water reservoirs (increase in glycosaminoglycans). Acting as a barrier, it also decreases water loss. Through its action, the skin is moisturized and restructured, smoothing its microrelief.

SHEA BUTTER This active ingredient is particularly rich in unsaponifiable matter (anti-wrinkle factor protecting the skin's elasticity), vitamins (A, D, E and F) and essential fatty acids. It has healing, regenerating, softening, stimulating and moisturizing properties. Skin is softened and toned.

SQUALANE Squalene is one of the main components of the hydrolipidic film. Squalane is a derivative of squalene that is resistant to oxidation. Squalane of vegetal origin is easily absorbed by the skin, and thus helps to restore the skin's moisture and softness.

ALOE VERA Aloe has moisturizing, softening and healing properties and is recommended for couperose-prone, dry or delicate skin.

ROSA MOSQUETA OIL Rich in essential fatty acids and retinoic acid (tretinoin). Tretinoin, a derivative of retinol (vitamin A), produces well-known and rapid therapeutic effects in the treatment of Photoaged skin. The tretinoin contained in rosa mosqueta oil does not, however, produce the side effects usually associated with it; its action is naturally controlled and slowly released, thus eliminating the risk of overdosing. Easily absorbed by the skin, rosa mosqueta oil produces a remarkable regenerative effect on the skin; it also prevents and repairs the effects of photoaging. It reduces fine lines, wrinkles, scars, hyper or hypopigmentation, and then restores skin hydration, elasticity and tones.

GLYCOSAMINOGLYCANS Active ingredient producing an instant lift effect. Water retention properties, playing an essential role in hydration.

GERANIUM BOURBON ESSENTIAL OIL Toning, healing and antiseptic, geranium essential oil soothes and revitalizes dry skin.

LAVENDER ESSENTIAL OIL Known for its healing, antiseptic and anti-inflammatory properties, lavender is effective against skin dryness and irritations and is recommended for delicate or couperose-prone skin.

ROSEWOOD ESSENTIAL OIL Powerful ability to regenerate, stimulate and tone tissue. Has an anti-wrinkle effect and restores the skin's elasticity. ■

LIFTENSE CONTOUR

CATEGORY
REJUVENATE

Anti-wrinkle, antioxidant, moisturizing, “lifting effect” formula for eye and lip contour. Suitable for all skin types.

+ Peptides: Matrixyl® 3000
+ Firming agents: Hyaluronic acid, caffeine
+ Natural moisturizers: Glycosaminoglycans
+ Soothing agents: Chamomile flower water, helichrysum flower water, aloe vera, manganese gluconate

INSTRUCTIONS

Press on the pump at the base of the tube and apply to eye contour and/or lip contour area. Use as needed.

BENEFITS

Liftense Contour is a unique anti-aging product formulated exclusively for eye and lip contours. Its highly concentrated peptide complex acts quickly for an instant radiance boost that lasts all day. When used regularly, Liftense Contour reduces the appearance of wrinkles and fine lines and optimizes the results of medical rejuvenation treatments. This innovative formula contains no perfumes, alcohol, mineral oils, petroleum derivatives, PEG, parabens or preservatives. It can be applied as often as desired.

ACTIVE INGREDIENTS

MATRIXYL® 3000 Pentapeptide and oligopeptide. Stimulates collagen synthesis and improves photoaged skin (caused by UVA-UVB rays, sun and tanning salons). Clinical studies have shown positive changes in skin elastin and collagen concentrations, resulting in a decrease in depth, volume and length of wrinkles; all these benefits come without any negative effects such as irritation and dryness.

HYALURONIC ACID Contrary to popular belief, because of the size of this molecule, hyaluronic acid is not absorbed by the skin. Instead, it forms a light, totally invisible, visco-elastic surface film, letting the active ingredients in Liftense Contour penetrate the skin. This molecule helps to retain the skin’s moisture, and thus increase hydration. Hyaluronic acid is a water reservoir that has no side effects, and increases skin softness and hydration.

GLYCOSAMINOGLYCANS Active ingredient producing an instant lift effect. Water retention properties, playing an essential role in hydration.

CAFFEINE For its firming properties.

CHAMOMILE FLOWER WATER Calming and anti-irritating effect.

HELICHRYSUM FLOWER WATER With three types of flavonoids, helichrysum has antioxidant, antiseptic, anti-inflammatory, antimicrobial, antifungal and anti-infectious properties.

ALOE VERA Vegetal extract with moisturizing, softening and healing properties. This natural anti-stress agent for the epidermis is recommended for couperose-prone, dry or delicate skin.

MANGANESE GLUCONATE A novel combination of manganese and gluconate, both of which are actively involved in skin health. Magnesium acts mainly on enzymes as a cofactor of SOD (superoxide dismutase) to fight against free radicals, and is involved in the collagen synthesis process. Gluconate fosters the assimilation of manganese by the skin and is important in cellular regeneration. ■

DAY CREAM STEMYOUTH
LIGHT TEXTURE

CATEGORY
REJUVENATE

Anti-aging Day Cream with plant stem cell based technology that provides antioxidant protection against UVA and infrared rays.

+ Reduces visible signs of aging (wrinkles, skin sagging)
+ Delays their appearance
+ Men and women 35 years old and over
+ For normal to combination skin types including even the most sensitive skin.
+ Excellent supplementary care to any basic care with AHAs, fruit acids, salicylic acid, retinol or any other preparation that accelerates the natural desquamation process

INSTRUCTIONS

In the morning, after skin has been carefully cleaned, apply a small quantity of StemYouth Day Cream on face and neck. Massage very lightly until completely absorbed. Apply make-up if desired.

BENEFITS

Stem cells are the origin of life. StemYouth Anti-aging Care is based on the incredible, almost unlimited renewal power of these cells.

Based on a revolutionary ingredient, **PHYTOCELL® Malus domestica**, this cutting-edge line of care products combines the best of biotechnology and the plant kingdom to attack the aging phenomenon at its source by targeting the tissues at the heart of the wrinkle.

It recreates an optimal environment to preserve the skin stem cells' regeneration and repair potential, thus enhancing cell repopulation under the wrinkle. The production of essential dermis and epidermis components is guaranteed.

Results: Skin is smoothed out, and wrinkles are filled in considerably day after day. Skin becomes elastic and toned once again!

ACTIVE INGREDIENTS

PHYTOCELL® ARGAN Argan root stem cell-based liposomal preparation; the argan tree is a very resistant tree found only in southwestern Morocco. It is the first cosmetic active ingredient that targets dermal stem cells. A result of advanced scientific and technological research, this exceptional active ingredient has shown its ability to protect the activity of dermal stem cells by maintaining a favourable nutritional microenvironment for them.

PhytoCellTec™ Argan, ultra-concentrated extract of Argan stem cells:

+ Vitalizes and protects the stem cells in the dermis.
+ Optimizes the natural dermal stem cell regeneration process.
+ Reactivates all the functions of young cells.
+ Reconstitutes collagen and elastin.
+ Fights wrinkles and the loss of firmness right at the origin.

Objective clinical studies show that **PHYTOCELL® Argan**:

+ **Reduces the depth of wrinkles.**
+ **Increases the density of dermal tissue.**
+ **Strengthens the cohesion of the dermo-epidermal. junction for toned and firmed skin.**

PHYTOCELL® MALUS DOMESTICA Liposomal preparation based on the stem cells of a rare Swiss apple, recognized for its longevity potential. A result of advanced scientific and technological research, this active ingredient has shown its ability to protect the activity of epidermal stem cells by maintaining a favourable nutritional microenvironment for them, and by protecting them from UV rays, even at low concentrations.

PHYTOCELL® MALUS DOMESTICA is also recognized for its anti-aging and anti-wrinkle effects proven by scientific tests on cell cultures and by objective clinical studies. Wrinkles are smoothed, the skin is better structured from the inside and firmer, giving it a more beautiful appearance. A revolutionary ingredient, **PHYTOCELL® Malus domestica** performs several actions that help maintain the skin's youthfulness. By keeping adult epidermal stem cells in their microenvironment, far from any stress stimulating their differentiation, it preserves their youthful capital.

MATRIXYL® 3000 Anti-wrinkle and restructuring agent.

+ Matrikines, small peptides resembling fragments of the major dermal proteins (mostly collagen) act as cell messengers capable of regulating the events needed to repair the skin and renew the skin matrix.
+ Fills in deep wrinkles.
+ Its smoothing, firming effect improves the skin's texture, elasticity and tone.

VENUCEANE™ Anti-UVA and anti-IR (DNA, cell and tissue) biological protector – Anti-premature aging. This powerful antioxidant is extracted from a microorganism called Thermus thermophilus, which lives deep in the ocean in extreme conditions, near hot springs where the water temperature is very high (approximately 75°C). It has the ability to inhibit free radicals, which are powerful toxins that promote skin aging, created by UV and IR activity. It activates and stimulates the skin's own natural defence and repair mechanisms, at the DNA, cellular (keratinocytes) and tissular (fibroblasts) levels, thus offering comprehensive protection from the harmful effects of UV and IR rays.

Venuceane™ was the subject of an objective clinical study conducted for 6 months in Mauritius on 50 volunteers who were an average of 39 years old. The parameters for the major skin aging characteristics, such as tone and elasticity, blotches, wrinkles, complexion brightness, dehydration, hyperkeratinization and age spots were measured before and after 6 months of exposure to the sun. For the first time, this study showed that:

+ Daily exposure to the sun for 6 months accelerates aging by 3 years.
+ Application of Venuceane™ protected the volunteers from the effects of premature aging caused by exposure to UV rays. In fact, not only did daily application of Venuceane compensate for the 3 years of premature aging, but it also made the volunteers look 2 years younger. They actually "gained" 5 years compared with the volunteers who did not apply Venuceane™.

This shows the immense advantage of daytime care products that include an active ingredient for bioprotection such as Venuceane™. ▶

Pro-Derm

DAY CREAM STEMYOUTH

+ Men and women 35 years old and over
+ For normal to combination skin types including even the most sensitive skin.
+ Excellent supplementary care to any basic care with AHAs, fruity acids, salicylic acid, retinol or any other preparation that accelerates the natural desquamation process

▸ **EUROL® BT** Vegetal-origin free radical trap. The olive tree is the secular and traditional tree of all Mediterranean civilizations. Its leaves contain oleuropein, oleuropeoside and flavonoids, which are powerful free radical traps.

MICROPATCH® VEGETAL MOISTURIZER Water reservoirs. Miniscule water reservoirs (acacia gum, alginate, serine) that continuously hydrate the skin and guarantee an **optimal water balance at all times**.

PENTAVITIN® Moisture receptor. Just like a magnet, this mixture of polysaccharides that are vegetal in origin **trap water and retain it** longer than traditional moisturizers.

POMEGRANATE OIL Anti-inflammatory and free radical trap. **Pomegranate** *(Punica granatum)*, from the Lythraceae family, is the edible fruit of the pomegranate tree. It probably originated in Iran and has achieved a proven reputation for its therapeutic virtues. The oil used is obtained from pomegranate seeds. Its high content – over 60% – of punicic acid, a molecule from the polyphenol family, gives it exceptional anti-inflammatory and antioxidant properties. It is therefore being used increasingly to slow the effects of skin aging. It is also moisturizing and nourishing.

OLIVEM® 1000 – LIQUID CRYSTAL EMULSIFYING AGENT Emulsifying agent of vegetal origin, promoter of liquid crystals, made from **olive oil**, hypoallergenic and ultra-moisturizing. The **liquid crystals**, like a highly hydrophilic gel, retain significant amounts of water, and **considerably increase the moisturizing power of StemYouth Day Cream.**

LAVENDER ESSENTIAL OIL Known for its healing, antiseptic and anti-inflammatory properties, lavender is effective against skin dryness and irritations and is recommended for delicate or couperose-prone skin.

GERANIUM BOURBON ESSENTIAL OIL Toning, healing and antiseptic, geranium essential oil soothes and revitalizes dry skin.

ROSEWOOD ESSENTIAL OIL Powerful ability to regenerate, stimulate and tone tissue. Anti-wrinkle effect. Restores the skin's elasticity. ■

DAY CREAM STEMYOUTH
RICH TEXTURE

CATEGORY
REJUVENATE

Anti-aging Day Cream with plant stem cell based technology that provides antioxidant protection against UVA and infrared rays.

+ Reduces visible signs of aging (wrinkles, skin sagging)
+ Delays their appearance
+ Men and women 35 years old and over
+ For normal to dry skin types including even the most sensitive skin
+ Excellent supplementary care to any basic care with AHAs, fruity acids, salicylic acid, retinol or any other preparation that accelerates the natural desquamation process

INSTRUCTIONS

In the morning, after skin has been carefully cleaned, apply a small quantity of StemYouth Day Cream on face and neck. Massage very lightly until completely absorbed. Apply make-up if desired.

BENEFITS

Stem cells are the origin of life. StemYouth anti-aging care is based on the incredible, almost unlimited renewal power of these cells.

Based on a revolutionary ingredient, **PHYTOCELL® Malus domestica**, this cutting-edge line of care products combines the best of biotechnology and the plant kingdom to attack the aging phenomenon at its source by targeting the tissues at the heart of the wrinkle.

It recreates an optimal environment to preserve the skin stem cells' regeneration and repair potential, thus enhancing cell repopulation under the wrinkle. The production of essential dermis and epidermis components is guaranteed.

Results: Skin is smoothed out, and wrinkles are filled in considerably day after day. Skin becomes elastic and toned once again!

ACTIVE INGREDIENTS

PHYTOCELL® ARGAN Argan root stem cell-based liposomal preparation; the argan tree is a very resistant tree found only in southwestern Morocco. **It is the first cosmetic active ingredient that targets dermal stem cells**. A result of advanced scientific and technological research, this exceptional active ingredient has shown its ability to protect the activity of dermal stem cells by maintaining a favourable nutritional microenvironment for them.

PhytoCellTec™ Argan, ultra-concentrated extract of Argan stem cells:

+ Vitalizes and protects the stem cells in the dermis.
+ Optimizes the natural dermal stem cell regeneration process.
+ Reactivates all the functions of young cells.
+ Reconstitutes collagen and elastin.
+ Fights wrinkles and the loss of firmness right at the origin.

Objective clinical studies show that **PHYTOCELL® Argan**:

+ **Reduces the depth of wrinkles.**
+ **Increases the density of dermal tissue.**
+ **Strengthens the cohesion of the dermo-epidermal junction for toned and firmed skin.**

PHYTOCELL® MALUS DOMESTICA Liposomal preparation, based on the stem cells of a rare Swiss apple, recognized for its longevity potential. A result of advanced scientific and technological research, this active ingredient has shown its ability to protect the activity of epidermal stem cells by maintaining a favourable nutritional microenvironment for them and by protecting them from UV rays, even at low concentrations.

PHYTOCELL® Malus domestica is also recognized for its anti-aging and anti-wrinkle effects proven by scientific tests on cell cultures and by objective clinical studies. Wrinkles are smoothed, the skin is better structured from the inside and firmer, giving it a more beautiful appearance. A revolutionary ingredient, **PHYTOCELL® Malus domestica** performs several actions that help maintain the skin's youthfulness. By keeping adult epidermal stem cells in their microenvironment, far from any stress stimulating their differentiation, it preserves their youthful capital.

MATRIXYL® 3000 Anti-wrinkle and restructuring agent.

+ Matrikines, small peptides resembling fragments of the major dermal proteins (mostly collagen) act as cell messengers capable of regulating the events needed to repair the skin and renew the skin matrix.
+ Fills in deep wrinkles.
+ Its smoothing, firming effect improves the skin's texture, elasticity and tone.

VENUCEANE™ Anti-UVA and anti-IR (DNA, cell and tissue) biological protector – Anti-premature aging. This powerful antioxidant is extracted from a microorganism called Thermus thermophilus, which lives deep in the ocean in extreme conditions, near hot springs where the water temperature is very high (approximately 75°C). It has the ability to inhibit free radicals, which are powerful toxins that promote skin aging, created by UV and IR activity. It activates and stimulates the skin's own natural defence and repair mechanisms, at the DNA, cellular (keratinocytes) and tissular (fibroblasts) levels, thus offering comprehensive protection from the harmful effects of UV and IR rays.

Venuceane™ was the subject of an objective clinical study conducted for 6 months in Mauritius on 50 volunteers who were an average of 39 years old. The parameters for the major skin aging characteristics, such as tone and elasticity, blotches, wrinkles, complexion brightness, dehydration, hyperkeratinization and age spots were measured before and after 6 months of exposure to the sun. For the first time, this study showed that:

+ Daily exposure to the sun for 6 months accelerates aging by 3 years.
+ Application of Venuceane™ protected the volunteers from the effects of premature aging caused by exposure to UV rays. In fact, not only did daily application of Venuceane compensate for the 3 years of premature aging, but it also made the volunteers look 2 years younger. They actually "gained" 5 years compared with the volunteers who did not apply Venuceane™.

This shows the immense advantage of daytime care products that include an active ingredient for bioprotection such as Venuceane™. ▶

Pro-Derm

DAY CREAM STEMYOUTH
RICH TEXTURE

CATEGORY
REJUVENATE

Anti-aging Day Cream with plant stem cell based technology that provides antioxidant protection against UVA and infrared rays.

+ Reduces visible signs of aging (wrinkles, skin sagging)
+ Delays their appearance
+ Men and women 35 years old and over
+ For normal to dry skin types including even the most sensitive skin
+ Excellent supplementary care to any basic care with AHAs, fruity acids, salicylic acid, retinol or any other preparation that accelerates the natural desquamation process

▸ **EUROL® BT** Vegetal-origin free radical trap. The olive tree is the secular and traditional tree of all Mediterranean civilizations. Its leaves contain oleuropein, oleuropeoside and flavonoids, which are powerful free radical traps.

MICROPATCH® VEGETAL MOISTURIZER Water reservoirs. Miniscule water reservoirs (acacia gum, alginate, serine) that continuously hydrate the skin and guarantee an **optimal water balance at all times**.

PENTAVITIN® Moisture receptor. Just like a magnet, this mixture of polysaccharides that are vegetal in origin **trap water and retain it** longer than traditional moisturizers.

GRAPE SEED OIL Regenerating and restructuring. Because it is rich in vitamin E and linoleic acid, an essential fatty acid, grape seed oil has skin regenerating and restructuring properties. It is a light oil that is easy to apply. Its feel is widely appreciated by all skin types.

POMEGRANATE OIL Anti-inflammatory and free radical trap. **Pomegranate** *(Punica granatum)*, from the Lythraceae family, is the edible fruit of the pomegranate tree. It probably originated in Iran and has achieved a proven reputation for its therapeutic virtues. The oil used is obtained from pomegranate seeds. Its high content – over 60% – of punicic acid, a molecule from the polyphenol family, gives it exceptional anti-inflammatory and antioxidant properties. It is therefore being used increasingly to slow the effects of skin aging. It is also moisturizing and nourishing.

ARGAN OIL Revitalizing and nourishing – certified organic. Fine and precious, it is extracted from nuts contained in the fruit of the argan tree *(Argania spinosa)*, a rare tree species found in southwest Morocco. It contains mainly essential fatty acids, phytosterols, and vitamin E. Known and used for centuries for its medicinal virtues, argan oil is not only appreciated for its nutritional properties, but also for cosmetic care. In fact, it has always been used by south Moroccan women for their body and hair care. It counteracts skin sagging, a major sign of premature aging, and delays the appearance of wrinkles. In addition, it prevents skin from drying out, helping to preserve its softness thanks to its smoothing, softening and revitalizing action. Its protective properties make it an oil that is particularly useful in the local treatment of skin problems as well as in the preparation of dermatological creams. It helps heal injuries, calms irritated skin and reduces redness.

PHYTOSQUALANE This superior emollient is of vegetal origin, derived from **olive oil**, and is part of the **composition of the hydrolipidic** film found on the epidermal surface. It contributes to maintaining healthy and well-moisturized skin.

SHEA BUTTER Nourishing and protective. Originating from shea nuts or *Butyrospermum parkii*, a large tree that grows in the grasslands in numerous Central and Western African countries, this vegetal butter is **very high in unsaponifiable matter** in comparison with classic shea butter. In fact, it contains 13%, compared with the 5% to 8% normally found, giving it unique properties. Much more than a simple emollient, it protects the skin from environmental stresses, pollution and, above all, ultraviolet radiation (UV rays). It also has excellent anti-inflammatory and healing properties.

WILD MANGO BUTTER Softening and restoring. As its name indicates, this active ingredient is extracted from a wild mango called *Irvingia gabonensis*, and more specifically the nut located in its stone. This specific butter, made up of triglycerides and unsaponifiable matter, is characterized by **excellent lipid-restoring and emollient properties** which provide moisturizing, smoothing and softening effects. Rich in Vitamin E and phytosterols, it protects, **nourishes and repairs skin deep down**.

OLIVEM® 1000 – LIQUID CRYSTAL EMULSIFYING AGENT Emulsifying agent of vegetal origin, promoter of **liquid crystals**, made from olive oil, hypoallergenic and ultra-moisturizing. The liquid crystals, like a highly hydrophilic gel, retain significant amounts of water, and **considerably increase the moisturizing power** of StemYouth Day Cream.

LAVENDER ESSENTIAL OIL Known for its healing, antiseptic and anti-inflammatory properties, lavender is effective against skin dryness and irritations and is recommended for delicate or couperose-prone skin.

GERANIUM BOURBON ESSENTIAL OIL Toning, healing and antiseptic, geranium essential oil soothes and revitalizes dry skin.

ROSEWOOD ESSENTIAL OIL Powerful ability to regenerate, stimulate and tone tissue. Anti-wrinkle effect. Restores the skin's elasticity. ■

NIGHT CREAM STEMYOUTH

CATEGORY
REJUVENATE

Anti-aging night cream featuring technology based on vegetal stem cells with antioxidant protection against UVA and infrared rays.

+ Reduces visible signs of aging (wrinkles, skin sagging)
+ Delays their appearance
+ Men and women 35 years old and over
+ For all skin types, even the most sensitive skin
+ Excellent supplementary care to any basic care with AHAs, fruity acids, salicylic acid, retinol or any other preparation that accelerates the natural desquamation process

INSTRUCTIONS

Apply a small quantity of StemYouth Night Cream on cleansed face and neck. Massage very lightly until completely absorbed.

BENEFITS

From the beginning of time, centenarians have intrigued researchers. It was the discovery of specific enzymes – known as sirtuins – found in individuals with exceptional longevity that inspired our team of researchers who developed StemYouth Night Cream. Sirtuins are capable of regulating cellular longevity and are at the origin of cell survival.

Pro-sirtuin rice extract and vegetal stem cells from the argan tree, along with 5 other major ingredients, either vegetal or biotechnological in origin, fight visible signs of aging.

The appearance of visible signs of aging is delayed. Skin is smoothed, and the epidermis is plumped. The appearance of wrinkles is considerably reduced. Skin's elasticity and tone are restored.

ACTIVE INGREDIENTS

ORSIRTINE® Orsirtine® is a vegetal-origin active ingredient extracted from rice that activates the expression and production of longevity proteins within skin cells. By activating the production of sirtuins, Orsirtine® increases the skin's "youth capital" and helps fight signs of aging:

+ by preserving the cells' optimal function;
+ by fostering DNA protection;
+ by protecting the skin from external stresses.

In other words, Orsirtine® helps the skin stay young longer.

DERMICAN™ Restorer of the dermal architecture. Located in the dermis, the extracellular matrix is a gel that forms a network around the fibroblasts. It is made up of water, various polysaccharides and structural proteins that transfer its remarkable properties to your skin.

Part of the small glycosaminoglycan (GAG) family, lumican is the "strong link" in the collagen network. It is found in the extracellular matrix of the dermis, where it sticks to the collagen fibrils to bind them together in a cluster to form functional fibres. This goes to show that this little molecule plays a crucial role in the fight against aging. Just reactivating collagen synthesis is not enough; optimal organization also has to be ensured to

enable it to fulfill its support role. However, lumican diminishes over time, leading to weakening of the extracellular matrix and a decrease in firmness. Dermican is a pure peptide that reactivates collagen and lumican synthesis to ensure optimal mechanical properties for the skin. This cutting edge technology results in firmer skin that appears plumper.

CHRONOLINE™ Restorer of the DEJ. At a cellular level, skin aging leads to a thinning of the epidermis combined with a flattening of the dermo-epidermal junction (DEJ). Thus, the number of nutrients available diminishes and causes the natural skin healing process to slow. The DEJ maintains cellular cohesion and meets metabolic needs for younger, healthier-looking skin. Chronoline™ is a biomimetic tetrapeptide that reactivates the production of major DEJ components for optimum structural support:

+ **Laminin-5**: Anchors the epidermis to the dermis for structural support.
+ **Collagen VII**: Anchors the dermis to the DEJ to ensure its mechanical stability.
+ **Fibronectin**: Anchors the cells to the extracellular matrix for optimal cellular adhesion.

In summary, Chronoline™ strengthens collagen anchoring. Just like tens of thousands of micro-velcro fasteners, this active ingredient inspired by surgical lifting methods stretches the skin and repositions its volume to redefine face contours and visibly smooth features.

An objective clinical study proves this peptide's effectiveness:

+ By the 28th day, the appearance of wrinkles and fine lines is reduced by 16%, and the skin is visibly firmer.
+ After 56 days, the anti-wrinkle effect reaches 27%. The skin appears tighter and more rested.

ARGANYL™ Vegetal-origin collagen and elastin protector. Extracted from natural polyphenols from argan tree leaves, fights against the skin's loss of firmness and elasticity by significantly protecting the macromolecules of the dermis, and specifically collagen, using two distinct processes:

+ First, by limiting the damage caused by free radicals on the fibroblasts.
+ Second, by inhibiting MMPs – dermal matrix enzymes responsible for the degradation of collagen and elastin – and collagenase responsible for the degradation of elastic fibres.

Arganyl™ strengthens the skin structure for a smooth, firm skin.

EUROL® BT Vegetal-origin free radical trap. The olive tree is the secular and traditional tree of all Mediterranean civilizations. Its leaves contain oleuropein, oleuropeoside and flavonoids, which are powerful free radical traps.

FILAGGRYL® NMF precursor of vegetal origin. It is a vegetal protein, extracted from *Voandzeia subterranea*, which is capable of reactivating the synthesis of Profilaggrin, a precursor molecule of the skin's natural moisturizing factor. By increasing the water reservoirs in the epidermis, Filaggryl® optimizes the epidermal water reservoirs because it activates the moisture receptors on the surface of the epidermis, as well as the production of extracelluar and intracellular moisture receptors. ▶

In fact, it has always been used by south Moroccan women for their body and hair care. It counteracts skin sagging, a major sign of premature aging, and delays the appearance of wrinkles. In addition, it prevents skin from drying out, helping to preserve its softness because of its smoothing, softening and revitalizing action. Its protective properties make it an oil that is particularly useful in the local treatment of skin problems, as well as in the preparation of dermatological creams. It helps heal injuries, calms irritated skin and reduces redness.

SHEA BUTTER Nourishing and protecting – vegetal origin. Originating from shea nuts, or *Butyrospermum parkii*, a large tree that grows in the grasslands in numerous Central and Western African countries, this vegetal butter is **very high in unsaponifiable matter,** as compared with classic shea butter. In fact, it contains 13%, compared with the 5% to 8% normally found, giving it unique properties. Much more than a simple emollient, it protects the skin from environmental stresses, pollution and, above all, ultraviolet radiation (UV rays). It also has excellent anti-inflammatory and healing properties.

WILD MANGO BUTTER Softening and healing – vegetal origin. As its name indicates, this active ingredient is extracted from a wild mango called *Irvingia gabonensis*, and more specifically the nut located in its stone. This specific butter, made up of triglycerides and unsaponifiable matter, is characterized by **excellent lipid-restoring and emollient properties** which provide moisturizing, smoothing and softening effects. Rich in vitamin E and phytosterols, it protects, nourishes and repairs skin deep down.

PHYTOSQUALANE This superior emollient is of vegetal origin, **derived from olive oil**, and is part of the composition of the hydrolipidic film found on the epidermal surface. It contributes to maintaining healthy and well-moisturized skin.

OLIVEM® 1000 – LIQUID CRYSTAL EMULSIFYING AGENT Emulsifying agent that is of vegetal origin, promoter of liquid crystals, made from **olive oil**, hypoallergenic and ultra-moisturizing. The **liquid crystals**, like a highly hydrophilic gel, retain significant amounts of water, and **considerably increase the moisturizing power of StemYouth Night Cream**.

LAVENDER ESSENTIAL OIL Known for its healing, antiseptic, and anti-inflammatory properties, lavender is effective against skin dryness and irritations and is recommended for delicate or couperose-prone skin.

GERANIUM BOURBON ESSENTIAL OIL Toning, healing, and antiseptic, geranium essential oil soothes and revitalizes dry skin.

ROSEWOOD ESSENTIAL OIL Powerful ability to regenerate, stimulate and tone tissue. Anti-wrinkle effect. Restores the skin's elasticity. ■

STEMYOUTH SERUM

CATEGORY
REJUVENATE

Anti-aging Serum (ultra-concentrated anti-aging care) featuring technology based on vegetal stem cells with antioxidant protection against UVA and infrared rays.

+ Reduces visible signs of aging (wrinkles, skin sagging)
+ Delays their appearance
+ Men and women 35 years old and over
+ For all skin types including even the most sensitive skin
+ Excellent supplementary care to any basic care with AHAs, fruity acids, salicylic acid, retinol or any other preparation that accelerates the natural desquamation process

INSTRUCTIONS

Morning and night, after skin has been thoroughly cleansed, apply 1 to 2 pumps of StemYouth Serum on face and neck and massage in lightly until completely absorbed. Then apply StemYouth Day Cream or Night Cream.

BENEFITS

Vegetal stem cells combined with no fewer than 4 anti-aging discoveries for an exceptionally powerful serum. It is a well-known fact that skin protects itself during the day and heals itself at night. The skin's "clock genes" orchestrate these alternating protective and healing cycles, at least while it's young. With age, the expression of these genes is reduced, and the cells seem to be out of sync. They no longer differentiate between day and night and no longer play a regenerative role.

Hence the idea of reactivating these pro-youth genes and reactivating each cell's natural synchronization process to optimize protection during the day and regeneration at night. More than ever, the cells function with maximum effectiveness to repair, regenerate, protect, firm and visibly rejuvenate the skin.

Day after day, StemYouth Serum releases its power:

+ Skin is instantly smoothed, plumped.
+ The appearance of wrinkles is reduced.
+ The skin's firmness and elasticity increase.
+ The complexion is exceptionally radiant.
+ The skin shines and the rejuvenating effect intensifies.

ACTIVE INGREDIENTS

PHYTOCELL® ARGAN Argan root stem cell-based liposomal preparation; the argan tree is a very resistant tree found only in southwestern Morocco. **It is the first cosmetic active ingredient that targets dermal stem cells.** A result of advanced scientific and technological research, this exceptional active ingredient has shown its ability to protect the activity of dermal stem cells by maintaining a favourable nutritional microenvironment for them.

PhytoCellTec™ argan, ultra-concentrated extract of argan stem cells:

+ Vitalizes and protects the stem cells in the dermis.
+ Optimizes the natural dermal stem cell regeneration process.
+ Reactivates all the functions of young cells.
+ Reconstitutes collagen and elastin.
+ Fights wrinkles and the loss of firmness right at the origin.

Objective clinical studies show that PHYTOCELL® argan:

+ **Reduces the depth of wrinkles.**
+ **Increases the density of dermal tissue.**
+ **Strengthens the cohesion of the dermo-epidermal junction for toned and firmed skin.**

PHYTOCELL® MALUS DOMESTICA Liposomal preparation based on the stem cells of a rare Swiss apple, recognized for its longevity potential. A result of advanced scientific and technological research, this active ingredient has shown its ability to protect the activity of epidermal stem cells by maintaining a favourable nutritional microenvironment for them, and by protecting them from UV rays, even at low concentrations.

PHYTOCELL® Malus domestica is also recognized for its anti-aging and anti-wrinkle effects proven by scientific tests on cell cultures and by objective clinical studies. Wrinkles are smoothed, the skin is better structured from the inside and firmer, giving it a more beautiful appearance. A revolutionary ingredient, **PHYTOCELL® Malus domestica** performs several actions that help maintain the skin's youthfulness. By keeping adult epidermal stem cells in their microenvironment, far from any stress stimulating their differentiation, it preserves their youthful capital.

ORSIRTINE® Orsirtine® is a vegetal-origin active ingredient extracted from rice that activates the expression and production of longevity proteins within skin cells. By activating the production of sirtuins, Orsirtine® increases the skin's "youth capital" and helps fight signs of aging:

+ by preserving the cells' optimal function;
+ by fostering DNA protection;
+ by protecting the skin from external stresses.

In other words, Orsirtine® helps the skin stay young longer.

VITASOURCE Each time a fibroblast divides, telomers – located at the ends of the chromosomes – shorten, thus reducing subsequent division capacity. When telomers reach a certain length, the cell's ability to replicate stops, and cell senescence begins. Sensescent fibroblasts are cells that undergo significant modifications, on both the morphological and metabolic levels. The main results are a reduction in the quality and quantity of extracellular matrix components – mainly collagen, elastin, fibronectin and GAGs – and an increase in proinflammatory cytokines. These changes have clearly negative effects on the skin's architecture and function, which accentuates its aging. ▶

CONT.

STEMYOUTH SERUM

CATEGORY
REJUVENATE

Anti-aging Serum (ultra-concentrated anti-aging care) featuring technology based on vegetal stem cells with antioxidant protection against UVA and infrared rays.

+ Reduces visible signs of aging (wrinkles, skin sagging)
+ Delays their appearance
+ Men and women 35 years old and over
+ For all skin types including even the most sensitive skin
+ Excellent supplementary care to any basic care with AHAs, fruity acids, salicylic acid, retinol or any other preparation that accelerates the natural desquamation process

▸ Telomerase is an enzyme capable of maintaining telomers at full length through cellular division.

Vitasource is a purified extract of the *Scutellaria baicalensis* Georgi root, standardized into **Baicalin**. This molecule induces **telomerase** expression in human fibroblasts. Thus it **increases the active life of these essential cells by approximately 10%**, delaying their aging. Skin stays young longer!

Work on telomers and telomerase was the subject of the **Nobel Prize for Physiology and Medicine in 2009**. ***In vitro* tests** carried out on purified Baicalin extract have shown that this active ingredient:

+ Induces telomerase cellular expression in human fibroblasts.
+ Delays the onset of fibroblast senescence by increasing their active life by 10%. Cultured cells recover their vitality from 10 years prior.

***In vivo* tests** show significant:

+ Restructuring of skin relief resulting in a substantial reduction in wrinkles.
+ Increase in firmness and elasticity – extendibility is improved and healing is much faster. This results in greater resilience and maintenance of the characteristics of younger skin longer.

CHRONOGEN™ Factors such as UV rays, even at low doses, can reduce the expression of "clock" genes, resulting in the desynchronization of cells' circadian rhythms (alternating day/night). Cells can no longer adapt their behaviour to their environment; they protect themselves poorly and don't heal as well. Thus, they age more quickly.

Chronogen™ is a tetrapeptide that reactivates the expression of "clock" genes in order to preserve biological rhythms and optimize the cell protection and healing processes. It acts as a metronome to allow cells to regain their full healing capabilities. Chronogen™ stimulates each cell's natural synchronization process to **optimize protection during the day and regeneration at night. It also helps prepare the skin for environmental stresses before they damage it.**

SILK TREE VEGETAL EXTRACT Daily stress, a hectic lifestyle, lack of sleep, bad eating habits, tobacco, etc.; all these factors cause signs of fatigue that progressively and insidiously affect your face and, more generally, your skin. With age, the **7 billion toxins produced each day by all levels of the skin are no longer eliminated naturally** and literally suffocate the cells. Their regenerative ability, and **more specifically that of the stem cells,** which are more vulnerable to toxins, is slowed significantly. The skin no

longer regenerates properly. It ages more quickly. Warning signs, sometimes accompanied by bouts of fatigue, become visible: bags and dark circles under the eyes, a dull and drawn facial complexion, more pronounced wrinkles, less reactive skin, tiredness.

Albizia julibrissin, also called **"silk tree"** or "Constantinople mimosa" originated in Asia, but, because of the ornamental quality of its flowers, is now found on all continents, from the foothills of the Himalayas to the gardens of New York.

This vegetal extract corrects drawn features and lack of radiance **with triple action**:

+ **By eliminating glycotoxins (27% reduction)** – toxins produced through natural glycation that prevent proper healing of the skin during sleep.
+ **By eliminating lipofuscin (81% reduction)**: This brownish-yellow pigment is made up of cell residue that accumulates in the skin as a result of age, stress and fatigue. Lipofuscin gives skin a dull and parchment-like appearance.
+ **By stimulating the production of melatonin (38% increase)** – secreted naturally in the body at night, it acts as a powerful antioxidant and universal cell healer. If you don't get enough sleep, or if it is of poor quality, the quantity of melatonin is reduced.

Results of an in vivo study conducted over a two-month period on 20 female volunteers with stressed skin, aged 31 to 50 years old:

+ After only 10 days of use, they saw a significant decrease in their tired appearance, with a 44% improvement by the end of the study.
+ **Progressive improvement in the intensity of dark circles (-40%) and bags (-37%), drawn features (-51%) and dull complexion (-27%).**

ERGOTHIONEINE Ergothioneine, also called EGT, is a **very active antioxidant** that is found naturally in rye. It recharges the skin's cellular energy by stimulating cellular oxygenation. A study[1] that appeared in 2007 found that it had **antioxidant properties that were greater than those of Co-Q10 and idebenone**. This anti-aging compound eliminates the expression of certain MMPs (matrix metalloproteinases). In other words, **it protects the collagen and elastin** from degradation, **protects the cell components and DNA** from attacks by free radicals and **reduces inflammation**.

HYALURONIC ACID The amount of hyaluronic acid present in the skin decreases by half between the ages of 20 and 50. Very popular in cosmetic medicine, this natural skin component is the ideal anti-aging active ingredient. Since it is found in this formula, it multiplies the amount of water contained in the skin by up to 1,000. Thus, it has intense **hydrating and plumping properties**. In addition, it helps the skin maximize its **self-healing capacities**.

BIOLOGICAL ORANGE ESSENTIAL OIL Tones and firms. **WARNING: Orange essential oil presents a risk of photosensitization. Always apply an SPF of at least 20 before exposure to the sun.** ■

[1] Dong KK, Damaghi N, Kibitel J, Canning MT, Smiles KA, Yarosh DB (2007). "A comparison of the relative antioxidant potency of L-ergothioneine and idebenone," J Cosmet Dermatol. 2007 Sep; 6(3):183-8.

SCULPT'EXPERT

ANTI-AGING BODY CONTOURING

CATEGORY
REJUVENATE

An anti-aging body contouring cream for all skin types that helps tone the skin around the abdomen, the thighs, the knees and the arms, making the silhouette look younger.

+ Toning, sculpting: plankton extract from Bermuda
+ Firming: Sea fennel
+ Moisturizing and soothing: Shea butter, squalane
+ Natural vitamin E

Heredity, weight gain after pregnancy, hormonal imbalance, physical inactivity: fat deposits around the abdomen, the thighs, the hips, the knees and the arms **can quickly accumulate and easily reappear**. Endurance training exercise provides a nicer body shape by decreasing subcutaneous fat accumulation and improving muscle tone. However, we are often faced with a lack of time to exercise, and physical inactivity becomes a lifestyle.

BENEFITS

Sculpt'Expert is an innovative formula that provides exceptional results, even without physical activity. Sculpt'Expert promotes the reduction of resistant localized fat deposits and helps fight against their reappearance. It visibly improves skin tonicity in areas that are particularly sensitive to skin sagging induced by age, pregnancy or a lack of physical exercise. The body is resculpted, and the silhouette is reshaped.

INSTRUCTIONS

+ Apply Sculpt'Expert to the most critical areas of the body (abdomen, hips, thighs, knees, arms) **twice a day for 8 weeks.**
+ Massage in lightly with circular motions until complete absorption of the product. Its extended use after 8 weeks of treatment helps maintain the body shape obtained.
+ The regular practice of endurance training exercise increases results.
+ For maximum results, apply Sculpt'Expert to critical areas, **morning and evening AND before and after a training session.**

ACTIVE INGREDIENTS

PLANKTON EXTRACT FROM BERMUDA This extract, obtained through biotechnology, is produced by a **marine microorganism** called Bacillus sp., which lives on heavenly sponges *(Dysidea etheria)* off coral reefs in Bermuda. The extract contains **glucidic and peptidic elements of low molecular weight. It mimics the effects of endurance exercise training by increasing the release of adiponectin by adipocytes, which results in:**

+ **boosting the metabolism of mitochondria** at the muscle cell level;
+ **favouring the development of type 1 muscle** fibres.

In vivo clinical studies performed on this extract revealed the following exceptional results:

+ **Decreased skin fold and reduced abdominal perimeter.**
+ **Reduced contour of thighs and perimeter of arms.**
+ **Reduction in body weight.**

Skin tonicity and firmness are improved. These results are significantly increased when the application of the extract is combined with physical exercise.

DID YOU KNOW?

Adipocytes produce and secrete **adipokins** in their vicinity, **true messenger molecules that impact the other tissues**. Some adipokins are produced with age or when a person is not getting enough exercise, while **others are induced by physical exercise and contribute to improving the energy balance of the body**. These include **adiponectin**, secreted by adipocytes after training, **which signals muscle cells to increase their mitochondrial content, thus increasing the aerobic metabolism and the combustion of fatty acids**, leading to a higher number of tonic type 1 muscle fibres.

Adiponectin also has **many beneficial effects** on other cell types:

+ In adipose tissue, it **diminishes oxidative stress** and **contributes to reducing fat volume by strengthening the immune system.**
+ In keratinocytes, adiponectin **boosts cell proliferation and healing,** which improves the barrier function.
+ Additionally, it **increases the synthesis of hyaluronic acid and collagen in fibroblasts.**

SEA FENNEL Rich in flavonoids, zinc, iron, magnesium, manganese, copper and vitamins C and E, sea fennel is lightly firming and is known for stimulating the peripheral circulation. It also has antioxidant, antiseptic, anti-inflammatory and antimicrobial properties.

SHEA BUTTER Shea butter comes from the nut of the shea tree, or ***Butyrospermum parkii***, a tall tree that grows in grasslands in many countries in Central or Western Africa. Shea nuts contain from 50 to 55% of fat substances and about 10% of proteins. The shea butter used in the formulation of Sculpt'Expert contains a **very high unsaponifiable fraction** compared with traditional shea butter. In fact, it amounts to 13% compared with the normal 5% to 8%, thus giving it unique properties. It is also **rich in vitamins** (A, D, E, F) and essential fatty acids (EFA). It has healing, regenerating, softening, stimulating and moisturizing effects, thus allowing the skin to recover suppleness and tone.

SQUALANE Squalene is one of the main components of the hydrolipidic film. Squalane is a derivative of squalene that is resistant to oxidation. Squalane of vegetal origin is easily absorbed by the skin, and thus helps to restore the skin's moisture and softness.

NATURAL VITAMIN E (TOCOPHEROL) Tocopherol **slows cutaneous aging and protects the skin against free radicals** (antioxidant, anti-free radical). Vitamin E improves the effect of moisturizing agents. ■

Pro-Derm

STEMYOUTH TENSOR ANTI-FATIGUE TISSUE MASK

CATEGORY
REJUVENATE

Anti-aging tissue mask featuring technology based on vegetal stem cells.

+ Reduces visible signs of aging (wrinkles, skin sagging)
+ Delays their appearance
+ Men and women 35 years old and over
+ For all skin types, even the most sensitive skin
+ Used on a regular basis, in combination with the other StemYouth care products, for a corrective and preventive effect on the signs of aging and occasionally for a radiance boost before going out, for a special occasion or simply to indulge yourself!

BENEFITS

Tissue mask impregnated with a highly concentrated anti-aging serum. It hugs the contours of the face and chin perfectly for optimal interaction of the active ingredients with the skin. Its specific shape strengthens its adhesion and fosters an immediate toning effect.

+ Tightens features.
+ Reduces signs of fatigue.
+ Smooths wrinkles and fine lines.

Results: Features are rejuvenated. Skin is plumped, energized, refreshed and radiant.

INSTRUCTIONS

+ Carefully clean face and neck.
+ Open the aluminum pouch and unfold the tissue mask.
+ Apply the largest surface to the entire face and secure it behind the ears. Adjust the lower part to the chin and secure it behind the ears as well.
+ Leave on for 15 to 20 minutes. Remove the mask and massage gently so that the excess serum penetrates the skin. Do not rinse.

ACTIVE INGREDIENTS

PHYTOCELL® MALUS DOMESTICA Liposomal preparation based on the stem cells of a rare Swiss apple recognized for its longevity potential. A result of advanced scientific and technological research, this active ingredient has shown its ability to protect the activity of epidermal stem cells by maintaining a favourable nutritional microenvironment for them and by protecting them from UV rays, even at low concentrations.

PHYTOCELL® Malus domestica is also recognized for its anti-aging and anti-wrinkle effects proven by scientific tests on cell cultures and by objective clinical studies. Wrinkles are smoothed, the skin is better structured from the inside and firmer, giving it a more beautiful appearance. A revolutionary ingredient, **PHYTOCELL® Malus domestica** performs several actions that help maintain the skin's youthfulness. By keeping adult epidermal stem cells in their microenvironment, far from any stress stimulating their differentiation, it preserves their youthful capital. In addition to the unique power of apple stem cells, the StemYouth Tissue Mask contains the following active ingredients with exceptional rejuvenating and hydrating properties.

HYALURONIC ACID This powerful cell regenerator is essential for preserving the youthfulness of tissues and fighting skin aging. Low molecular weight hyaluronic acid penetrates deep into the skin to deliver its properties. Like a moisture receptor, it acts on the skin tissue, retaining up to 1,000 times its weight in water in order to deliver optimal hydration. The stimulating function of procollagen-1 improves the skin's firmness and tone.

OSILIFT® A tensor composed of 100% natural sugars, Osilift is a purified fraction of polysaccharides derived from oats. This high molecular weight network made of sugars adheres to the skin to form a continuous and cohesive lifting film. It is composed of a liposomal preparation of vegetal stem cells that combats all signs of aging, low molecular weight hyaluronic acid for its regenerative properties and a tensor of 100% natural sugars derived from oats. Its subtle fragrance is a blend of sage, black currant, white rose and white grape. ■

GROWTH FACTOR PLUMPING CREAM

CATEGORY
REJUVENATE

Targets aging skin concerns including loss of facial volume and plumping, fine lines and wrinkles, loss of hydration and uneven skin tone.

+ Contains antioxidants, epidermal growth factor and Matrixyl 3000
+ Improves the appearance of mature skin
+ For all skin types including the most sensitive
+ Non-irritating and non-comedogenic
+ Paraben-free

INSTRUCTIONS

Morning and evening, on a thoroughly cleansed skin, apply to the entire face. Apply a pea-sized amount on the tip of your finger, dab into the five points of the face (forehead, each cheek, nose and chin). Massage into skin. This product can be used under make-up. For optimal results, use after applying a Pro-Derm serum. Use a Pro-Derm sunscreen during the day. For external use only. If irritation develops, discontinue use. Keep out of reach of children.

BENEFITS

Growth Factor Plumping Cream is formulated to improve the appearance of aging skin. The powerful combination of antioxidants, epidermal growth factor and anti-ageing peptides will help improve different aging concerns including loss of facial volume and plumping, fine lines and wrinkles, loss of hydration and uneven skin tone.

ACTIVE INGREDIENTS

NATURAL VITAMIN E (TOCOPHEROL) Slows skin aging and protects the skin from agents that generate free radicals (antioxidant and antiradical). Vitamin E also enhances the effect of moisturizing ingredients

EPIDERMAL GROWTH FACTOR Stimulates natural growth factors to trigger collagen and elastin synthesis. Strengthens skin elasticity, helps with skin healing, and prevents and reduces fine lines and wrinkles

MATRIXYL® 3000 Pentapeptide and oligopeptide. Stimulates collagen synthesis and improves photoaged skin (caused by UVA-UVB rays, sun, and tanning salons). Clinical studies have shown positive changes in skin elastin and collagen concentrations, resulting in a decrease in depth, volume, and length of wrinkles; all these benefits come without any negative effects such as irritation and dryness.

REVIDRATE™ Myristyl Phosphomalate, recreates skin's natural moisture by acting on the active layer of the epidermis of the skin to promote the skin's natural moisturizing components. This powerful moisturizing ingredient stimulates the production of Natural Moisturising Factor (NMF)

VIT-A-LIKE™ Alternative to retinol with a higher level of tolerance used to reduce the signs of aging by stimulating cell renewal and increasing collagen production.

PAEONIA ALBIFLORA ROOT EXTRACT Significantly improves skin elasticity and tone. ■

NIGHT CREAM 5% AND 10%

CATEGORY
EXFOLIATE

Exfoliating and softening creams with 5% or 10% glycolic acid for the face. Suitable for normal, dry or rough skin.

+ Glycolic acid: Exfoliant, anti-aging, brightening
+ Vitamin B5
+ Moisturizing and soothing agents: Shea butter, squalane, aloe, glycerin

INSTRUCTIONS

Apply these creams at night on skin that has been thoroughly cleaned with Pro-Derm Gentle Cleanser and completely dried. Apply to face (avoiding the eyelid region), neck and décolleté if desired. A mild tingling sensation when applying the cream is a sign of AHA activity. The use of AHA 10% Cream is reserved for those who have already benefited from the effects of the AHA 5% Cream and whose skin has adapted to the exfoliating properties of glycolic acid.

BENEFITS

AHA Pro-Derm Creams contain glycolic acid (AHA 5% or 10%) to reduce and prevent skin changes caused by photoaging (roughness, spots, wrinkles, fine lines, or thinner, dry or yellowed skin) as well as comedones and dilated pores, while fostering permeability to the other active ingredients. The exfoliating, anti-wrinkle and brightening actions of this exclusive AHA formula is enhanced by a vitamin complex. AHA Creams contain moisturizers without being oily (non-comedogenic); they also contain soothing agents and do not cause irritation.

ACTIVE INGREDIENTS

GLYCOLIC ACID With its exfoliating properties, glycolic acid frees the skin of dead and damaged cells, softening it, tightening pores, reducing and preventing the formation of comedones and controlling acne breakouts. This natural-origin AHA stimulates renewal of the epidermis. After a few days of use, the complexion is already more radiant. This is only the beginning of sustained action against wrinkles and fine lines: non-neutralized and natural pH glycolic acid acts deep down in the skin, fostering the production of collagen and young elastic fibres. Glycolic acid also fosters the permeability of the other active ingredients contained in Pro-Derm products.

VITAMIN B5 Promotes the healing process, accelerates the cellular renewal process and reacts in synergy with allantoin. Vitamin B5 helps to prevent premature aging of the skin and is a firming agent. Particularly recommended for the prevention and treatment of blemishes and blotchy skin.

ALOE VERA Aloe has moisturizing, softening and healing properties and is recommended for couperose-prone, dry or delicate skin.

ALLANTOIN This vegetal active ingredient stimulates cellular renewal, giving it healing properties. Effective against irritated or dry skin.

GLYCERIN Moisturizing vegetal active ingredient.

SHEA BUTTER This vegetal extract is particularly rich in unsaponifiable matter (anti-wrinkle factors protecting the skin's natural elastin), vitamins (A, D, E and F) and essential fatty acids. It has healing, stimulating, softening and regenerating properties. Suitable for dry and dehydrated skin, it fights skin aging.

SQUALANE Squalene is one of the main components of the hydrolipidic film. Squalane is a derivative of squalene that is resistant to oxidation. Squalane of vegetal origin is easily absorbed by the skin, and thus helps to restore the skin's moisture and softness.

CAPRYLIC-CAPRIC TRIGLYCERIDE A vegetal emollient that moisturizes and reduces the tensor effect on dry and delicate skin.

LAVENDER ESSENTIAL OIL Known for its healing, antiseptic, and anti-inflammatory properties, lavender is effective against skin dryness and irritations and is recommended for delicate or couperose-prone skin.

GERANIUM ESSENTIAL OIL Toning, healing and antiseptic, geranium essential oil soothes and revitalizes dry skin.

AHA-BHA LOTIONS

CATEGORY
EXFOLIATE

Light lotions, suitable for normal, oily or partly oily skin, skin prone to mild acne, comedones, dilated pores or ingrown hairs (8-2)

+ Glycolic acid
+ Salicylic acid
+ Moisturizing and soothing agents

INSTRUCTIONS

Apply these lotions at night on skin that has been thoroughly cleaned with Pro-Derm Gentle Cleanser and completely dried. The 8-2 Lotion is more exfoliating than the 5-2, and it is therefore recommended that you start with the 5-2 Lotion (if applying to face). The 8-2 Lotion is particularly effective at reducing ingrown hairs and keratosis pilaris (in this case, it is not necessary to start with the 5-2 Lotion).

BENEFITS

AHA-BHA Lotions contain glycolic acid (5% or 8%) and salicylic acid (2%). Their texture is lighter than AHA Creams, mattifying and enriched with essential oils. They brighten the complexion and reduce acne breakouts and comedones, without causing irritation.

ACTIVE INGREDIENTS

AHA AND BHA With its exfoliating properties, glycolic acid (AHA) frees the skin of dead and damaged cells, softening it, tightening pores, preventing the formation of comedones and controlling acne breakouts. This natural-origin AHA stimulates renewal of the epidermis. After a few days of use, the complexion is already more radiant. Also known for its anti-wrinkle properties, non-neutralized and natural pH glycolic acid acts deep down on the skin, fostering the production of collagen and young elastic fibres. Salicylic acid (BHA), like AHA, is recognized for its exfoliating and keratolytic properties. This acid has the unique ability to penetrate the sebaceous environment, removing impurities and exfoliating oily areas on the face. For this reason, salicylic acid is particularly effective in the treatment of acne comedonica. In combination, glycolic acid and salicylic acid exfoliate the skin in an optimal manner, preventing and reducing acne breakouts and comedones.

ZINC PCA Antiseptic effective in the treatment of mild and medium acne.

VITAMIN B5 Promotes the healing process, accelerates the cellular renewal process and reacts in synergy with allantoin. Vitamin B5 helps to prevent premature aging of the skin and is a firming agent. Particularly recommended for the prevention and treatment of blemishes and blotchy skin.

ALLANTOIN This vegetal active ingredient stimulates cellular renewal, giving it healing properties. Effective against irritated or dry skin.

ALOE VERA Aloe has moisturizing, softening and healing properties and is recommended for couperose-prone, dry or delicate skin.

GLYCERIN Moisturizing vegetal active ingredient.

CAPRYLIC-CAPRIC TRIGLYCERIDE A vegetal emollient that moisturizes and reduces the tensor effect on dry and delicate skin.

LAVENDER ESSENTIAL OIL Known for its healing, antiseptic, and anti-inflammatory properties, lavender is effective against skin dryness and irritations and is recommended for dry, delicate and couperose-prone skin.

ROSEWOOD ESSENTIAL OIL Powerful ability to regenerate, stimulate and tone tissue. Has an anti-wrinkle effect and restores the skin's elasticity.

Pro-Derm

MICRO-PEEL MASQUE FORMULA

CATEGORY
EXFOLIATE

Mask for face, neck and décolleté if desired. Suitable for normal to oily skin prone to comedones or dilated pores. Not recommended for very sensitive skin.

+ Glycolic acid: Exfoliant, anti-aging, brightening, improvement of skin texture

INSTRUCTIONS

After your face has been thoroughly cleansed with Pro-Derm Gentle Cleanser, apply a uniform layer approximately 3 mm thick. A mild tingling sensation when applying the cream is a sign of AHA activity. After 20-30 minutes, take off the mask with a warm face cloth and rinse with clear water. This mask does not dry on the skin. May be repeated once a week.

BENEFITS

The Micro-Peel Masque Formula is designed to deeply exfoliate the skin. It tightens the pores, prevents comedones, improves skin texture and accelerates skin cell renewal. The Micro-Peel also makes the skin more receptive to the properties of the active ingredients in other Pro-Derm products. Glycolic acid (AHA), an active element, is stabilized by two clays to foster maximum action during the entire application of the mask.

ACTIVE INGREDIENTS

GLYCOLIC ACID (5%) With its exfoliating properties, glycolic acid frees the skin of dead and damaged cells, softening it, tightening pores, reducing and preventing the formation of comedones and controlling acne breakouts. This natural-origin AHA stimulates renewal of the epidermis. After a few days of use, the complexion is already more radiant. This is only the beginning of sustained action against wrinkles and fine lines: non-neutralized and natural pH glycolic acid acts on the skin, fostering the production of collagen and youthful elastic fibres. Glycolic acid also fosters the permeability of the other active ingredients contained in Pro-Derm products.

CHINA CLAY, BENTONITE These two clays stabilize the glycolic acid (AHA), fostering maximum action during the entire application of the mask.

VITAMIN B5 Promotes the healing process, accelerates the cellular renewal process and reacts in synergy with allantoin. Vitamin B5 helps to prevent premature aging of the skin and is a firming agent. Particularly recommended for the prevention and treatment of blemishes and blotchy skin.

PEPPERMINT ESSENTIAL OIL Refreshing essential oil used as bactericide.

CHLOROPHYLL (VEGETAL EXTRACT) Antioxidant and anti-infectious (antibacterial and antifungal) properties.

ALLANTOIN This vegetal active ingredient stimulates cellular renewal, giving it healing properties. Effective against irritated or dry skin.

ALOE VERA Aloe has moisturizing, softening and healing properties and is recommended for couperose-prone, dry or delicate skin.

LAVENDER ESSENTIAL OIL Known for its healing, antiseptic and anti-inflammatory properties, lavender is effective against skin dryness and irritations and is recommended for delicate or couperose-prone skin.

PALMAROSA OIL Stimulates cell regeneration. Healing and revitalizing, it soothes the most demanding skin and has a beneficial effect on skin hydration. It is known for its effects on dry skin and skin and prone to irritation (eczema, acne, wounds), and repairs in depth. This essential oil also acts as a regulator of sebum secretion, bringing freshness and softness to the skin.

GINSENG EXTRACT Used for its anti-inflammatory, detoxifying and healing properties.

OLIVE LEAF EXTRACT Known for its antibacterial and anti-inflammatory properties, olive leaf extract is also a powerful antioxidant. recommended for dry and stressed skin.

CATEGORY
EXFOLIATE

An ultra-soft, melting cream. The originality of Microdermabrasion Cream lies in its mechanism of action: its "triple-sphere" technology. It acts like a polish, instantly revealing a smooth, silky and retexturized skin and a refreshed and glowing complexion.

+ "Triple-sphere" exfoliating technology - Bamboo spheres, jojoba spheres and diatomaceous earth
+ Soothing agent - Caper floral buds
+ Emollients - Shea butter and vitamin E
+ Fragrance-free, paraben-free

MICRODERMABRASION

EXFOLIATING CREAM TRIPLE EFFECTIVENESS

INSTRUCTIONS

1-2 times a week, after make-up removal, apply a small quantity of Microdermabrasion Cream to the forehead, the cheeks, the chin, the neck and the décolleté. Moisten fingertips and massage in gently using circular movements for a few minutes. Avoid the eye area. Rinse abundantly, first with lukewarm water, then with cold. Apply your usual night cream. Microdermabrasion Cream is recommended for all skin types, with the exception of fragile skin: thin, sensitive or alipic, including oily and acne-prone skin.

BENEFITS

Microdermabrasion Cream is an ultra-soft, melting cream containing a special mixture of three types of abrasive spheres, "triple-sphere" technology, for optimal efficacy. Each of the three types of spheres has been carefully selected for its size, shape and specific hardness. The smallest ones perfect the work done by the larger ones. The product smooths the skin. It removes dead skin cells, increases cell renewal, improves microcirculation and skin texture and promotes a more even-toned complexion. Microdermabrasion Cream visibly:

+ leaves the skin incredibly silky and retexturized;
+ smooths the epidermis;
+ attenuates wrinkles and fine lines, acne marks and discolourations;
+ tightens pores;
+ purifies the skin without altering the hydrolipidic film;
+ reveals the complexion's glow.

SPECIFIC PRECAUTIONS

+ Never use a brush with Microdermabrasion Cream for the face and neck.
+ Never apply Microdermabrasion Cream on cuts or scrapes, or on sunburned skin.
+ Never massage roughly or for a long time. The maximum total duration for the face and the neck is 3 minutes. Ideally, you should not exceed 1 or 2 minutes.
+ Never use Microdermabrasion Cream before or after a peel.
+ Always make sure to avoid the eye area and the mucous membranes.

GENERAL PRECAUTIONS

+ For external use only.
+ Avoid direct contact with the eyes.
+ Keep out of reach of children.

ACTIVE INGREDIENTS

"TRIPLE-SPHERE" TECHNOLOGY

+ **BAMBOO SPHERES** Obtained from a particular exudate gathered from Tabashir bamboo stems, these spheres are the largest and softest in our exclusive mixture. **They eliminate dead cells and impurities** in the epidermis, **revealing the complexion's glow**.
+ **JOJOBA SPHERES** Of average size and hardness, these spheres have the ability to deeply cleanse **the epidermis, tightening pores** and **refining skin texture**. Obtained from jojoba wax of natural origin and biodegradable, these perfect spherical and regular particles provide **gentle and controlled exfoliation** compared with classical exfoliating particles that can cause irritation and excessive exfoliation of the cutaneous barrier.
+ **DIATOMACEOUS SPHERES** Obtained by crushing the shells of single-cell algae called diatoms, these spheres are the smallest and hardest. Their activity is more precise and more intensive than the other two types of spheres. The result is a **polishing effect of the epidermis to enhance the overall appearance and texture of the skin.**

CAPPARIS SPINOSA FRUIT EXTRACT This extract is an **embryonic plant tissue** containing all the biological power of the future plant. These embryonic plant extracts are more pharmacologically active than substances taken from adult plants. Thermal shock, UV rays, mechanical or chemical stress: skin tissue is almost permanently attacked. This extract is a soothing active ingredient that effectively combats the clinical symptoms of skin hypersensitivity. This extract modulates the production of IL-8 and TNF, two cytokines which are among the major mediators of inflammation secreted by keratinocytes. Inhibiting their production **helps to reduce the inflammatory response**, especially when it becomes uncontrollable.

SHEA BUTTER Nourishing and protecting - much more than a simple emollient, shea butter protects the skin against climatic stresses, pollution and, most of all, UV rays. It also has remarkable anti-inflammatory and healing properties.

NATURAL VITAMIN E (TOCOPHEROL) Slows **cutaneous aging and protects the skin against free radicals** (antioxidant, anti-free radical). Vitamin E improves the effect of moisturizing agents.

KAFFIRLIME NATURALLY SCENTED BOTANICAL EXTRACT A natural plant extract, precisely extracted by macerating the fruit of the plant. This gentle, traditional European method doesn't damage the plant constituents, resulting in an ideal extract for cosmetic use. Source of bioflavonoids, calcium, phosphorus, potassium and vitamins A and C. ■

OIL-FREE CLARIFYING CLEANSER

CATEGORY
EXFOLIATE

The Clarifying Cleanser is formulated with glycolic acid (the AHA of choice).

+ 4% Glycolic Acid
+ Cleanses the skin and refines its pores, leaving skin clean and soft.
+ For oily skin, non-comedogenic, fragrance free, parabens free and silicone free

INSTRUCTIONS

Squeeze a quarter size amount onto the palm of your hand and apply on damp skin in a circular motion until foaming action develops. Pay particular attention to areas that are more problematic such as the T-zone. Ensure to avoid contact with eyes and eye contour area.

Rinse thoroughly, by either splashing water onto face, using a face cloth or facial sponge.

Cleanse twice daily or as directed by your physician. Use sunscreen during the day. For external use only, avoid contact with eyes and mucous membranes. If irritation develops, discontinue use. Keep out of reach of children.

BENEFITS

The Clarifying Cleanser Oil Free will help keep pores free of impurities. Its pH level enhances the activity of the other glycolic acid products. Regular use will help refine pores and even out complexion, leaving skin clean and soft.

ACTIVE INGREDIENTS

GLYCOLIC ACID Glycolic acid, the smallest molecule of the AHA's, accelerates the skin's own natural shedding process. Known as the exfoliant of choice, glycolic acid helps to smooth the surface of dry, sun-damaged or aging skin improving roughness and minimizing fine lines by removing the build-up of dead skin cells on the surface of the skin.

CUCUMBER EXTRACT Rich in vitamins B and C, cucumber extract provides anti-inflammatory and skin tightening benefits.

CHAMOMILE FLOWER EXTRACT Chamomile has anti-inflammatory properties and can help with unclogging and decongesting of pores.

CLARIFYING EXFOLIATING SOLUTION

CATEGORY
EXFOLIATE

Clarifying exfoliating solution Sloughs off dead cells on the surface of the skin, unclogs pores and provides an anti-inflammatory effect to soothe inflammation associated with acne.

+ 10% Glycolic Acid and 2% Salicylic Acid
+ For all skin types
+ Non-irritating, non-comedogenic

INSTRUCTIONS

This product should be applied on cleansed skin once to twice daily. Pour a small amount on a cotton ball and dab onto skin (pay particular attention to problematic areas). Should extra moisture be required, apply the Oil Free Hydrating Lotion. This product can be applied all over face or locally on problematic areas. Ensure to avoid contact with eyes and eye contour area.

Apply once to twice daily. Use sunscreen during the day. First time users should build skin tolerance gradually. For external use only, avoid contact with eyes and mucous membranes. If irritation develops, discontinue use. Keep out of reach of children.

BENEFITS

Clarifying Exfoliating Solution is formulated with glycolic acid, the AHA of choice, and salicylic acid. It will slough off dead cells on the surface of the skin and act as an antibacterial cleanser to unclog pores. Regular use will provide a clearer and healthier-looking complexion.

ACTIVE INGREDIENTS

GLYCOLIC ACID Glycolic acid, the smallest molecule of the AHA's, accelerates the skin's own natural shedding process. Known as the exfoliant of choice, glycolic acid helps to remove the build-up of dead skin cells on the surface of the skin to allow for the normal surfacing of sebum and the refining of pores.

SALICYLIC ACID Salicylic acid, a beta hydroxy acid, is a key ingredient in the treatment of acne. It works on the surface of the skin by sloughing off dead cells and has lipophilic properties which breaks down oil and lipids to unclog pores. It also provides an anti-inflammatory effect to soothe inflammation associated with acne.

ULTRA-C ßW

CATEGORY
CORRECT

Facial brightening cream suitable for all skin types.

+ Brightening agents: Vitamin C (MAP), oligopeptide-68
+ Antioxidant and anti-wrinkle agents: Natural vitamin E, vitamin B
+ Soothing and moisturizing agents

INSTRUCTIONS

After thorough cleansing with Pro-Derm Gentle Cleanser, apply at night on face, neck and décolleté. On cloudy days, apply the cream in the morning to benefit from its mattifying effect. Brightening is gradual and progressive over a period of 1 to 6 months. For serious hyperpigmentation problems requiring maximum performance, apply Pro-Derm Ultra-C ßw at night alternating with a Pro-Derm AHA-BHA Lotion and apply Pro-Derm Serum-C 10% every morning before sunscreen lotion.

BENEFITS

Ultra-C ßw is enriched with oligopeptide-68, which helps to reduce the appearance of pigmentation irregularities such as age spots, melasma, etc. Oligopeptide-68 is encapsulated in a liposome to preserve its integrity. Its role is not only to modulate melanin (pigment) synthesis, but also to reduce pigmentation colour, increasing its brightening effect. Oligopeptide-68 has proven inhibiting effects for MITF, TRP-1 and TRP-2*. In synergy, vitamin C (MAP) and oligopeptide-68 maximize skin brightening.

**MITF: Microphthalmia-associated transcription factor is a factor that regularizes pigmentation, as well as the proliferation and longevity of melanocytes. TRP-1: protein 1 associated with tyrosinase. TRP-2: protein 2 associated with tyrosinase.*

ACTIVE INGREDIENTS

VITAMIN C (MAP) This form of vitamin C, particularly active and easily absorbed by the skin, is a brightening agent that prevents the overproduction of melanin, which is responsible for pigmentation irregularities caused by heredity, hormonal factors or repeated exposure to UV rays (brown spots, melasma, dyschromia, lentigo). It helps to slow skin aging by stimulating the synthesis of collagen, improving skin tone, making it appear younger and helping it to resist environmental stress. This type of vitamin C also regenerates oxidized vitamin E to its original active form.

VITAMIN B5 Promotes the healing process, accelerates the cellular renewal process. Vitamin B5 helps to prevent premature aging of the skin and is a firming agent. Particularly recommended for the prevention and treatment of blemishes and blotchy skin.

NATURAL VITAMIN E (TOCOPHEROL) Slows skin aging and protects the skin from agents that generate free radicals (antioxidant and antiradical). Vitamin E also enhances the effect of moisturizing ingredients.

OLIGOPEPTIDE-68 Oligopeptide-68's role is not only to modulate melanin (pigment) synthesis, but also to reduce pigmentation colour, increasing its brightening effect. It has proven inhibiting effects for MITF, TRP-1 and TRP-2.

GLYCERIN Moisturizing vegetal active ingredient.

CAPRYLIC-CAPRIC TRIGLYCERIDE A vegetal emollient that moisturizes and reduces the tensor effect on dry and delicate skin.

SQUALANE Squalene is one of the main components of the hydrolipidic film. Squalane is a derivative of squalene that is resistant to oxidation. Squalane of vegetal origin is easily absorbed by the skin, and thus helps to restore the skin's moisture and softness.

LAVENDER ESSENTIAL OIL Known for its healing, antiseptic, and anti-inflammatory properties, lavender is effective against skin dryness and irritations and is recommended for delicate or couperose-prone skin.

SHEA BUTTER This vegetal extract is particularly rich in unsaponifiable matter (anti-wrinkle factors protecting the skin's natural elastin), vitamins (A, D, E and F) and essential fatty acids. It has healing, stimulating, softening, and regenerating properties. Suitable for dry and dehydrated skin, it fights skin aging.

CHOLESTEROL An excellent hydrating ingredient, cholesterol restores the natural human lipid barrier. ■

CATEGORY
CORRECT

Brightening and anti-wrinkle cream for the contour of the eyes (dark circles). Suitable for all skin types.

+ Brightening agents: Vitamin C (MAP)
+ Antioxidant and anti-wrinkle agents: Natural vitamin E, vitamins A and B5
+ Soothing and moisturizing agents

ULTRA-C EYE CONTOUR CREAM

INSTRUCTIONS

This cream works in a physiological manner, so it must be used daily. After your face has been thoroughly cleansed with Pro-Derm Gentle Cleanser, make sure your skin is dry and apply once a day before bed. Brightening will occur gradually and progressively over a period of one to six months.

BENEFITS

A brightening cream adapted for the sensitive area around the eyes, used to reduce or prevent hyperpigmentation (dark circles and brown spots). It combines antioxidant and antiradical properties and stimulates collagen synthesis. It contains moisturizers without being oily, vitamin C (MAP), and vitamins E, A and B5.

ACTIVE INGREDIENTS

VITAMIN C (MAP) Ultra-C Eye Contour Cream contains MAP. MAP, a particularly active form of vitamin C that is easily absorbed by the skin, is a brightening agent that prevents the overproduction of melanin responsible for pigmentation irregularities caused by heredity, hormonal factors or repeated exposure to UV rays (brown spots, melasma, dyschromia, lentigo). It helps to slow skin aging by stimulating the synthesis of collagen, improving skin tone, making it appear younger and helping it to resist environmental stress. This type of vitamin C also regenerates oxidized vitamin E to its original active form.

VITAMIN A Anti-wrinkle and restructuring effect: stimulates collagen synthesis. The synergism of vitamin B5 and vitamin A gives a toning effect. With its moisturizing properties, it contributes to maintaining moisture within the epidermis and in forming the hydrolipidic film.

VITAMIN B5 Promotes the healing process, accelerates the cellular renewal process and reacts in synergy with allantoin. Vitamin B5 helps to prevent premature aging of the skin and is a firming agent. Particularly recommended for the prevention and treatment of blemishes and blotchy skin.

NATURAL VITAMIN E (TOCOPHEROL) Slows skin aging and protects the skin from agents that generate free radicals (antioxidant and antiradical). Vitamin E also enhances the effect of moisturizing ingredients.

ALLANTOIN This vegetal active ingredient stimulates cellular renewal, giving it healing properties. Effective against irritated or dry skin.

ALOE VERA Aloe has moisturizing, softening and healing properties and is recommended for couperose-prone, dry or delicate skin.

CHOLESTEROL An excellent hydrating ingredient, cholesterol restores the natural human lipid barrier. Pro-Derm uses cholesterol from marine sources only.

GLYCERIN Moisturizing vegetal active ingredient.

SHEA BUTTER This active ingredient is particularly rich in unsaponifiable matter (anti-wrinkle factor protecting the skin's elasticity), vitamins (A, D, E and F) and essential fatty acids. It has healing, regenerating, softening, stimulating and moisturizing properties. Skin is softened and toned.

SQUALANE Squalene is one of the main components of the hydrolipidic film. Squalane is a derivative of squalene that is resistant to oxidation. Squalane of vegetal origin is easily absorbed by the skin, and thus helps to restore the skin's moisture and softness.

CAPRYLIC-CAPRIC TRIGLYCERIDE A vegetal emollient that moisturizes and reduces the tensor effect on dry and delicate skin. ■

CATEGORY
CORRECT

Antioxidant and antiradical serum, suitable for all skin types.

+ L-ascorbic acid 10%: Antioxidant, stimulates collagen synthesis
+ Optimal pH (3.1)
+ M²PE: Amplifies the absorption of L-ascorbic acid in the skin to its site of action for optimal efficiency

SERUM-C 10% POWERED BY M²PE™

L-ASORBIC ACID USP 10%

INSTRUCTIONS

After thoroughly cleansing with Pro-Derm Gentle Cleanser, make sure your skin is dry and apply on the face, neck and décolleté or around the eyes. Apply before your day cream or any other Pro-Derm product or make-up once a day, in the morning.

BENEFITS

The high content of non-neutralized L-ascorbic acid (pure vitamin C, antioxidant) in Pro-Derm Serum-C 10% powered by M²PE prevents and reduces the harmful effects of free radicals responsible for skin aging and stimulates collagen synthesis. Its daily use prevents wrinkles and produces an immediate toning effect while reducing the appearance of redness and brightening the complexion. Application of Serum-C 10% powered by M²PE before applying a sunscreen increases the skin's resistance to pollutants and ultraviolet rays.

ACTIVE INGREDIENTS

VITAMIN C (L-ASCORBIC ACID) Antioxidant and antiradical, vitamin C (L-ascorbic acid) neutralizes the free radicals responsible for skin aging and stimulates collagen synthesis. The formation of new collagen fibres helps to tone the skin and increase its resistance to stress caused by pollutants, UV rays and climate variations. L-ascorbic acid also helps to brighten the complexion and reduce redness.

M²PE (MULTIPLEXED MOLECULAR PENETRATION ENHANCERS) M²PE consists of a combination of Food and Drug Administration (FDA)-approved excipients that allows better penetration of the formula's key ingredients into the skin. It is a unique patented technology (Patent US8343962B2: Topical Formulation expiring March 2027) owned by Crescita Therapeutics, owner and manufacturer of Pro-Derm products.

Creating a temporary modification of the skin's structure without any invasive or abrasive character, M²PE amplifies the absorption of active ingredients in the skin to their sites of action for optimal efficiency, without any damage to the skin. Thousands of small channels are rapidly formed on the skin's surface upon application of the product, which the product's active ingredients follow. These channels close on their own within four hours after application of the product.

SPECIAL PRECAUTIONS

+ Store in a dry place away from direct sunlight. ■

RADIANCE SERUM

CATEGORY
CORRECT

Radiance Serum by Pro-Derm, enriched with tranexamic acid, kojic acid and niacinamide, helps to reduce the intensity and appearance of non-pathological pigmentation caused by skin aging, sun exposure or hormonal disorders.

+ Powerful combinaison of three melanin correcting ingredients: niacinamide, tranexamic acid and kojic acid
+ It also helps to lighten and even out the complexion
+ Formulated without parabens, alcohol, colorants, silicones, mineral oils, perfume, or essential oil
+ Vegan formula

INSTRUCTIONS

Morning and evening, after cleansing the skin with Gentle Cleanser by Pro-Derm, apply 5 drops to the whole face, neck and décolleté. Massage in gently. Then, apply your usual day or night cream. During the day, use SPF 30 sun protection.

For enhanced brightening treatment: Overlay C 10% Vitamin Serum with M²PE and Radiance Serum. Always apply the C 10% Vitamin Serum first, followed by Radiance Serum.

BENEFITS

Brown spots appear over time and are caused by an overproduction or an irregular production of melanin, resulting in a localized proliferation and/or clustering of melanocytes. Brown spots commonly develop in areas exposed to sunlight, such as the face, neck and hands, and the heads of bald people.

The combination of tranexamic acid, kojic acid and niacinamide reduces the intensity and appearance of hyperpigmentation by acting on the different mechanisms involved in melanin production. This powerful serum is designed to treat irregular pigmentation resulting from sun exposure or post inflammatory hyperpigmentation such as acne marks or post-surgical treatments including laser or pulsed light treatments. Regular use of Radiance Serum by Pro-Derm will lighten and even out skin tone in addition to reduce the size of brown spots.

Hyaluronic acid and niacinamide add important anti-inflammatory, anti-aging and moisturizing properties to the formulation for a powerful and complete pigment correcting serum.

ACTIVE INGREDIENTS

TRANEXAMIC ACID A synthetic lysine derivative, tranexamic acid has long been used in the field of surgery as an antihaemorrhagic agent but has emerged only recently in cosmetic preparations. Studies have shown that this ingredient's effectiveness rivals that of hydroquinone, even with pigmentation problems as persistent as melasma. In general, tranexamic acid helps visibly reduce hyperpigmentation resulting from sun exposure, but can also:

+ Diminish the appearance of post-acne marks (post-inflammatory hyperpigmentation), regardless of the colour, even on dark skin.
+ Visibly reduce melasma, also called pregnancy mask, which is a type of hormonal hyperpigmentation.
+ Decrease redness through its anti-inflammatory properties.

KOJIC ACID Kojic acid is produced through biotechnology using a fermentation process involving the aspergillus oryzae strain. This active ingredient is widely used in skin-brightening treatments. It acts by inhibiting tyrosinase, the enzyme that catalyzes the production of melanin. By blocking the production of melanin, kojic acid effectively reduces brown spots and melasma.

NIACINAMIDE Amide form of niacin vitamin B3, niacinamide favours lightening of brown spots by inhibiting the transfer of melanosomes from melanocytes to neighbouring keratinocytes. As a cosmetic active ingredient, it also shows multiple benefits in delaying the appearance of ageing signs and in the treatment of premature ageing of the skin. It plays an extremely important role in the integrity of tissues since it takes part in forty or so biochemical reactions of the human body. Involved in cellular respiration, lipid synthesis, it improves epidermal barrier function, inhibits skin pigmentation, smoothing fine lines/wrinkles. It is also known as an antioxidant and an anti-inflammatory.

HYALURONIC ACID Contrary to popular belief, because of the size of this molecule, hyaluronic acid is not absorbed by the skin. Instead, it forms a light, totally invisible, visco-elastic surface film, letting the active ingredients penetrate into the skin. This molecule helps to retain the skin's moisture, and thus increase hydration. Hyaluronic acid is a water reservoir that has no side effects and increases skin softness and hydration.

CITRIC ACID Citric acid, which is found naturally in citrus fruit, is a powerful AHA with antioxidant effects and anti-ageing corrective properties that helps reduce the visible signs of photoageing. Here, AHA offers the additional benefit of diminishing the appearance of brown spots by accelerating the exfoliation of the stratum corneum containing melanin. ■

ANTIOXIDANT SERUM

CATEGORY
CORRECT

Pro-Derm antioxidant serum is designed to neutralize the damaging effects of free radicals on the skin's structures.

+ Combination of two powerful antioxidants: ferulic acid and resveratrol
+ For prevention and correction of signs of aging
+ Formulated without parabens, alcohol, colorants, silicones, mineral oils, perfume, or essential oil
+ Vegan formula

INSTRUCTIONS

Morning and evening, after cleansing the skin with Gentle Cleanser by Pro-Derm, apply 5 drops on the face, neck and décolleté. In the morning, layer with an SPF 30 sun protection. In the evening apply the treatment recommended by your doctor.

For enhanced brightening treatment: Overlay C 10% Vitamin Serum with M²PE and Antioxidant Serum. Always apply the C 10% Vitamin Serum first, followed by Antioxidant Serum.

BENEFITS

The skin is on the front line of the battle against free radicals. It must fight against free radicals generated by its own metabolism, but as it is also in direct contact with the outside world, it must fight with those generated by the environment: UV rays, pollution, industrial or domestic fumes, tobacco, stress, fatigue, ozone, etc. This is when the famous oxidative stress is born, which is formidable for our body and a major source of aging.

Within the skin, the main targets of free radicals are the lipids of the cell membrane, proteins (collagen and elastin) and DNA. Free radicals also lead to changes in the dermis fundamental substance, particularly hyaluronic acid.

Formulated with two of the most powerful free radical neutralizers, the Pro-Derm Antioxidant Serum helps neutralize free radicals, repair skin damage, stimulate the production of antioxidants already present in the skin and protect the cell membrane. When applied daily, morning and night, to thoroughly cleansed skin and in combination with a SPF 30 sun protection, this anti-aging serum protects the skin from environmental aggressions, reduces the appearance of fine lines and wrinkles, and evens out and brightens complexion.

ACTIVE INGREDIENTS

FERULIC ACID Found naturally in many cereals such as oats, rye and corn, in the bark of certain trees such as pine and fir, or in fruits, nuts and coffee, ferulic acid takes its name from “ferula”: a group of more than 170 species of plants in the Apiaceae family.

It is used in cosmetics for its powerful antioxidant properties. It helps reduce the signs of premature aging caused by oxidative stress related to multiple factors (diet, sun, tobacco, pollution, etc.). It is also highly appreciated because it optimizes the antioxidant and photo-protective effects of vitamin C and helps stabilize pure vitamin C. Ferulic acid also optimizes skin repair.

RESVERATROL Found in the skin of grapes, blueberries, raspberries and various other plants such as japanese knotweed, resveratrol is a natural polyphenol known for its extraordinary antioxidant and anti-aging properties. It effectively neutralizes free radicals thus contributing to strengthening the skin’s natural defense capabilities. It also stimulates the production of sirtuins, called “longevity proteins”, found in abundance in the cells of centenarians. ■

RETINOL

CATEGORY
CORRECT

Night cream with anti-wrinkle and antioxidant properties. Improves the appearance of the skin imperfections.

+ Available in 0.22%, 0.5% and 1.0 %
+ Retinol in the POLY-PORE® Delivery System
+ Targets aging skin concerns, fights the look of lines and wrinkles
+ Reduces intensity of brown spots
+ Smooths skin texture

INSTRUCTIONS

After cleansing, apply the Retinol cream at night to face, neck and décolleté. These products should be applied as a first layer underneath a night cream if needed. Ensure to avoid contact with eye and eye contour area.

Retinol can increase your sensitivity to the sun. Always use a sunscreen of minimum SFP 30 during the day and avoid using this product before sun exposure. Avoid the use of exfoliants throughout the duration of the retinol treatment.

Start with 0.22%. Once tolerated move to 0.5% and then use 1.0% if tolerated.

BENEFITS

Retinol (Vitamin A) is essential for maintaining a healthy skin. It will quickly revitalize the appearance of aging skin that has been damaged by the sun by increasing cell turnover and stimulating collagen synthesis. Retinol can also reduce the intensity of brown spots, help with skin texture and fight against signs of ageing with its antioxidant effect. It will also visibly reduce pore size and improve the appearance of skin imperfections. Regular use of Retinol 0.22 on acne-prone skin will provide a clearer and healthier-looking complexion.

Pro-Derm retinols are formulated with retinol in a time release POLY-PORE Delivery system. The encapsulated retinol is protected and is gradually released into the skin, reducing irritation.

ACTIVE INGREDIENTS

RETINOL (0.22% / 0.5% / 1.0%) Vitamin A in its purest form in a sustained release technology. Improves the appearance of skin tone and texture and reverse sign of ageing.

ALPHA-BISABOLOL Alpha-bisabolol is a plant derived ingredient which reduces irritation and soothes the skin. It possesses an antibacterial activity to counter the bacteria that causes acne, and its anti-irritation and anti-inflammatory effect reduces swelling and redness associated with acne inflammation.

ALLANTOIN (0.5% / 1.0%) This vegetal active ingredient stimulates cellular renewal, giving it healing properties. Effective against irritated or dry skin.

RETINOPEPTIDE M189 (0.5% / 1.0%) Lipo-oligopeptide that stimulates the skin's natural ability to produce retinoic acid.

ROSEMARY EXTRACT (0.5% / 1.0%) Antioxidant and anti-inflammatory properties.

SPECIAL PRECAUTIONS

+ Do not use if pregnant or nursing.
+ To be used in the evening only.
+ Use sun protection during the day. ■

GENTLE CLEANSER

CATEGORY
SPECIALIZED

Gentle cleanser, suitable for all skin types

+ Optimal acid pH (4.5): prepares the skin for Pro-Derm product care
+ Aloe vera
+ Lavender and palmarosa essential oils
+ Also available in professional size

INSTRUCTIONS

Because of its concentrated formula, only a small quantity is needed. Can also be used as a make-up remover. Leave it on for a few seconds and then rinse with clean water.

BENEFITS

Soaps and most cleansers are alkaline and irritate the skin. Because of their alkalinity, soaps partially neutralize the action of glycolic acid (AHA). Pro-Derm Gentle Cleanser with an optimal acid pH (pH 4.5) is specially formulated to maximize the results of all Pro-Derm products. In addition to protecting skin integrity, it is soothing because of the presence of 40% aloe vera. It is enriched with allantoin and lavender essential oil. It gently cleans the skin and completely rinses off with water, leaving no residue behind.

ACTIVE INGREDIENTS

VITAMIN B5 Promotes the healing process, accelerates the cellular renewal process and reacts in synergy with allantoin. Vitamin B5 helps to prevent premature aging of the skin and is a firming agent. Particularly recommended for the prevention and treatment of blemishes and blotchy skin.

ALLANTOIN Vegetal active ingredient fostering cellular proliferation, resulting in its healing properties. Used for skin dryness and irritations.

ALOE VERA Vegetal extract with moisturizing, softening and healing properties. This natural anti-stress agent for the epidermis is recommended for couperose-prone, dry or delicate skin.

LAVENDER ESSENTIAL OIL Lavender has numerous properties: soothing, healing, antiseptic and anti-inflammatory. Effective against skin dryness and irritations. Recommended for delicate or couperose-prone skin.

PALMAROSA ESSENTIAL OIL Stimulates cell regeneration. Healing and revitalizing, it soothes the most demanding skin and has a beneficial effect on skin hydration. It is known for its effect on dry skin and skin and prone to irritations (eczema, acne, wounds), which it helps prepare in depth. This essential oil also acts as a regulator of sebum secretion, bringing freshness and softness to the skin.

GLYCOLIC ACID Fosters the exfoliation of dead skin cells and stimulates cellular rejuvenation, giving your skin a youthful and healthy appearance. ■

TERREUSMASQUE™

CATEGORY
SPECIALIZED

Soothing mask for face, neck and décolleté. Suitable for all skin types.

+ Thermal mud (20%)
+ Sea clay (3%)
+ Lavender and rosewood essential oils
+ Soothing and moisturizing agents
+ Also available in professional size

INSTRUCTIONS

After your face has been thoroughly cleansed with Pro-Derm Gentle Cleanser, apply a uniform layer approximately 3 mm thick. Leave on for 10-15 minutes for a soothing effect or 15-30 minutes for a mattifying effect, then take off the mask using a face cloth.

BENEFITS

The properties attributed to this mask are numerous. TerreusMasque™ tones and soothes the skin. At a 20% concentration, thermal mud is a sebum reducer (up to 12%) with a mattifying effect. Thermal mud and sea clay are important active ingredients with high concentrations of amino acids and humic acid. After a medical aesthetic treatment, TerreusMasque™ soothes and provides an exceptional sensation of well-being while reducing redness and the feeling of heat. Weekly application of the mask maintains a luminous and glowing complexion.

ACTIVE INGREDIENTS

THERMAL MUD (20%) 100% pure, European source, naturally rich in organic matter, providing mainly humic acid (48%), amino acids, minerals, vitamins and trace elements. The properties attributed to this thermal mud are numerous: when applied externally, it soothes, tones and improves the surface of the skin, making it more even and refining pores. It hydrates the skin, exfoliates it slightly and stimulates the cellular regeneration process. Highly concentrated, it is also a sebum reducer (up to 12%). Also helps stimulate blood circulation, eliminate toxins and soothe certain skin problems: acne, psoriasis and eczema.

SEA CLAY (3%) Contains precious trace elements that are necessary for enzymatic reactions during cellular metabolism. Clay is used for its remineralizing, detoxifying and healing properties.

ALOE VERA Aloe has moisturizing, softening and healing properties and is recommended for couperose-prone, dry or delicate skin.

SHEA BUTTER This active ingredient is particularly rich in unsaponifiable matter (anti-wrinkle factor protecting the skin's elasticity), vitamins (A, D, E and F) and essential fatty acids. It has healing, regenerating, softening, stimulating and moisturizing properties. Skin is softened and toned.

ROSEWOOD ESSENTIAL OIL Powerful tissue regenerator and toner. Softening and antiseptic effect. This essential oil revitalizes skin and restores its elasticity.

LAVENDER ESSENTIAL OIL Known for its healing, antiseptic and anti-inflammatory properties, lavender is effective against skin dryness and irritations and is recommended for dry, delicate and couperose-prone skin. ■

POST TX•1

CATEGORY
SPECIALIZED

Hydrating and soothing healing cream. Suitable for all skin types.

+ Paraben-free
+ PEG-free
+ Fragrance-free
+ Main ingredients: Ceramide-2, glycosaminoglycans, aquaxyl, allantoin, bisabolol, squalane, shea butter, vitamin E, aloe, hyaluronic acid

BENEFITS

PostTx•1 was specially formulated to hydrate, repair and soothe skin after medical aesthetic treatments (laser, fractional laser, etc.). Aesthetic treatments can cause a temporary skin imbalance. Pro-Derm PostTx•1 restores balance non-occlusively by allowing the skin to breathe while recovering after treatments. This unique combination of ingredients is exclusive to PostTx•1 cream from the Pro-Derm Anti-aging line of products. PostTx•1 hydrates and protects the skin while keeping it radiant after aesthetic treatments.

ACTIVE INGREDIENTS

AQUAXYL™ Mixture of complex sugars that capture water. Optimization of water reserves in the tissues. From vegetal sources.

GLYCOSAMINOGLYCANS Soothe skin and reduce inflammation and swelling. From marine sources.

CERAMIDE-2 According to current cosmetic knowledge, this is apparently the greatest discovery of all times of an active molecule when topically applied to the skin. Ceramide-2 is a pure substance, identical to the natural molecule, unique as a cosmetic product. Ceramide-2, with medium and short chains, plays an essential active role, because it is involved in maintaining hydration within the stratum corneum's bilayers. Ceramides play a central role in maintaining skin functions. They are essential skin molecules that both capture and retain the water that the epidermis needs to remain soft, smooth and moisturized and, through complex regulation phenomena, fight aging.

ALLANTOIN This vegetal active ingredient stimulates cellular renewal, giving it healing properties. Effective against irritated or dry skin.

BISABOLOL This vegetal active ingredient has anti-inflammatory, calming and soothing properties. Recommended for delicate skin.

ALOE VERA Vegetal extract with moisturizing, softening and healing properties. This natural anti-stress agent for the epidermis is recommended for couperose-prone, dry or delicate skin.

NATURALLY DERIVED PROPANEDIOL An emollient and moisturizer not derived from petroleum. The advantages of propanediol include purity, absence of skin irritation and sensitivity, and eco-friendliness.

HYALURONIC ACID Contrary to popular belief, because of the size of this molecule, hyaluronic acid is not absorbed by the skin. Instead, it forms a light, totally invisible, visco-elastic surface film, letting the active ingredients penetrate the skin. This molecule helps to retain the skin's moisture, and thus increase hydration. Hyaluronic acid is a water reservoir that has no side effects, and increases skin softness and hydration.

SQUALANE Squalene is one of the main components of the hydrolipidic film. Squalane is a derivative of squalene that is resistant to oxidation. Squalane of vegetal origin is easily absorbed by the skin, and thus helps to restore the skin's moisture and softness.

SHEA BUTTER This active ingredient is particularly rich in unsaponifiable matter (anti-wrinkle factor protecting the skin's elasticity), vitamins (A, D, E and F) and essential fatty acids. It has cleansing, healing, regenerating, softening, stimulating, protecting and moisturizing properties. Shea butter is also a natural sunscreen.

NATURAL VITAMIN E (α-TOCOPHEROL) Vitamin E's main antioxidant function is to prevent lipid peroxidation. Several studies have documented the photoprotective effects of α-tocopherol applied topically to the skin. Vitamin E also enhances the effect of moisturizing ingredients. ■

POST TX•2

CATEGORY
SPECIALIZED

Healing Cream. Anti-aging, moisturizing and soothing. Suitable for all skin types.

+ Paraben-free
+ PEG-free
+ Fragrance-free
+ Main ingredients: Regestril™, Vinci O2 IS™, SOD (superoxide dismutase), allantoin, bisabolol, squalane, shea butter, rutin, calendula, vitamins E and B5

INSTRUCTIONS

Use as often as desired *(Do not use calendula if pregnant or nursing, follow your physician's recommendations)*:

+ after an ablative treatment;
+ on dry skin (face, body).

BENEFITS

PostTx•2 was specially formulated to hydrate, soothe and repair skin, especially after a treatment. Peptide synergy: oligopeptides, tetrapeptide-7 and hexapeptide-3 work together to restore the skin's balance and health. Aesthetic treatments can cause a temporary skin imbalance. PostTx•2 by Pro-Derm restores balance non-occlusively; in other words, it allows the skin to continue to breathe while recovering after a treatment. This unique combination of ingredients, which are found only in this product from the Pro-Derm Anti-Aging line, provides the skin with solid protection while keeping it radiant.

ACTIVE INGREDIENTS

REGESTRIL™ (RUTIN, PALMITOYL TRIPEPTIDE-1, PALMITOYL TETRAPEPTIDE-7, PHASEOLUS LUNATUS) The peptides found in Regestril™, because they have an effect on fibroblasts, help to generate extracellular matrices such as collagens I and IV and fibronectin. In addition to stimulating proteoglycan synthesis, rutin also provides protective effects, while phaseolus extract counteracts proteolytic enzymes, trypsin, chymotrypsin and elastases freed by mast cells and macrophages (inflammatory leukocytes).

HEXAPEPTIDE-3 (VINCI 02 IS™) By promoting the production of integrin, peptide Vinci 02 IS has an effect similar to that of fibronectin. Fibronectin is a skin matrix glycoprotein that provides structure and biochemical signals to control cellular functions such as adhesion, differentiation and migration. Peptide Vinci 02 IS is a biomimetic peptide that strengthens the adhesion of cells to extracellular matrices (ECM), enhancing matrix remodelling and skin healing.

CALENDULA EXTRACT Calendula officinalis flowers contain flavonol glycosides, triterpene oligoglycosides, oleanane-type triterpene glycosides, saponin and sesquiterpene glycosides. A cream containing calendula and allantoin offers remarkable epithelialization. Calendula helps to reduce inflammation, controls bleeding and soothes irritated tissued.

SUPEROXIDE DISMUTASE SOD is a powerful enzyme produced by our body. SOD is present in the dermis and epidermis. It regulates the metabolism and certain functions of the cell, especially the fibroblasts (collagen-producing cells). SOD is a powerful antioxidant and antiradical. Free radicals are responsible for cell damage. This damage reduces the ability of the cell to reproduce, and is therefore responsible for what we commonly refer to as aging. SOD restores cells' ability to reproduce. It protects hyaluronic acid against oxygen radicals and also protects the skin from the lipoperoxidation caused by UV rays.

ALLANTOIN This vegetal active ingredient stimulates cellular renewal, giving it healing properties. Effective against irritated or dry skin.

BISABOLOL This vegetal active ingredient has anti-inflammatory, calming and soothing properties. Recommended for delicate skin.

ALOE VERA Vegetal extract with moisturizing, softening and healing properties. This natural anti-stress agent for the epidermis is recommended for couperose-prone, dry or delicate skin.

PROPANEDIOL A vegetal emollient and moisturizer. Its advantages include: purity, absence of skin irritation and sensitivity, and eco-friendliness.

VITAMIN B5 Promotes the healing process, accelerates the cellular renewal process and reacts in synergy with allantoin. Vitamin B5 helps to prevent premature aging of the skin and is a firming agent. Particularly recommended for the prevention and treatment of blemishes and blotchy skin.

SQUALANE Squalene is one of the main components of the hydrolipidic film. Squalane is a derivative of squalene that is resistant to oxidation. Squalane of vegetal origin is easily absorbed by the skin, and thus helps to restore the skin's moisture and softness.

SHEA BUTTER This active ingredient is particularly rich in unsaponifiable matter (anti-wrinkle factor protecting the skin's elasticity), vitamins (A, D, E and F) and essential fatty acids. It has cleaning, healing, regenerating, softening, stimulating, protecting and moisturizing properties. Shea butter is also a natural sunscreen.

NATURAL VITAMIN E (α-TOCOPHEROL) Vitamin E's main antioxidant function is to prevent lipid peroxidation. Several studies have documented the photoprotective effects of α-tocopherol applied topically to the skin. Vitamin E also enhances the effect of moisturizing ingredients. ■

ANTI-REDNESS COMPLEX

CATEGORY
SPECIALIZED

Reduces the appearance of skin redness, soothes irritated and dry skin and provides an immediate concealing effect.

+ Powerful combination of vegetal extract and peptide that helps control redness
+ Contains: Narcissus Tazetta Bulb Extract, Peumus Boldus Leaf Extract, Olive Leaf Extract, Rosmarinyl Glucoside, Caffeyl Glucoside, Gallyl Glucoside and Palmitoyl Tripeptide-8
+ Green-tinted, as a colour complementarity, to allow partial coverage of skin redness
+ For all skin types including the most sensitive
+ Non-irritating and non comedogenic
+ Paraben-free

INSTRUCTIONS

Morning and evening, on a thoroughly cleansed skin, apply to the entire face. For the day, complete with the Pro-Derm SPF 50 Sunscreen as the last step. This product can be used under makeup. For external use only, avoid contact with eyes and mucous membranes. If irritation develops, discontinue use. Keep out of reach of children.

BENEFITS

Proderm Anti-Redness Complex is a light and melting emulgel, formulated with vegetal extracts and a peptide. It will visibly reduce the appearance of skin redness, soothe irritated and dry skin and provide an immediate concealing effect. Regular use on redness-prone skin will provide a uniform and healthier-looking complexion. This daily emulgel contains a light green tint, to allow partial coverage of skin redness.

ACTIVE INGREDIENTS

NARCISSUS TAZETTA BULB EXTRACT A natural aqueous extract from narcissus bulbs in dormancy that has powerful anti-aging properties and helps with sebum production. Reinforces natural protection against environmental stress.

PEUMUS BOLDUS LEAF EXTRACT Regulates and balances skin flora through activation of ß-defensin synthesis. It can also help reduces pore size and the appearance of oily skin and reduce imperfections on acne prone skin.

OLIVE LEAF EXTRACT Protects and preserves skin's hydration. It provides an anti-dehydration effect and decreases the appearance of redness. Promotes skin elasticity and moisturization and protects skin against irritation and acne inflammation.

ROSMARINYL GLUCOSIDE, CAFFEYL GLUCOSIDE AND GALLYL GLUCOSIDE Powerful blend that prevents skin redness and improve rosacea. It controls major skin inflammation factors that helps reduce skin irritation and redness.

PALMITOYL TRIPEPTIDE-8 A multifunctional active that calms and soothes irritated skin caused by UV, immune reactions, and mechanical stress and helps to maintain and restore a normal skin sensitivity threshold. It is also designed to reverse signs of redness and swelling. ■

RADIANCE TX PEEL

CATEGORY
PEELS

Radiance TX Peel combines the power of AHA, PHA, tranexamic acid and nonapeptide-1 to work on hyperpigmentation and radiance.

+ Hyperpigmentation
+ Dull and/or uneven complexion
+ Loose, sagging skin
+ Photoaging
+ Intense moisturizing effect
+ Designed to restore the natural skin pH gradient
+ Activates exfoliating enzymes to renew the skin gradually
+ Total acid content: 25.6%

BENEFITS

+ The superficial peel increases radiance, refines skin texture and helps to fade brown spots.
+ Improves superficial skin and pigment problems.
+ Decrease in skin roughness, appearance of wrinkles and dilated pores.
+ Decreased superficial scars.
+ Improvement of keratosis pilaris.
+ Decreased seborrhea and acne.
+ Decreased pigmentary disorders (freckles, brown spots, epidermal superficial pregnancy mask, dull complexion, etc.)

ACTIVE INGREDIENTS

PHYTIC ACID

+ Naturally present in the seeds of many cereals and legumes.
+ From oats, wheat and barley.
+ Mild keratolytic.
+ Promotes the dispersal of pigment spots, stimulates collagen production.
+ Anti-inflammatory.

MANDELIC ACID (AHA)

+ Found in almonds.
+ Large AHA will penetrate more slowly = less irritation.
+ Keratolytic.
+ KeratolyticBacteriostatic, anti-inflammatory - similar to macrolide antibiotics.
+ Lightening of the skin by keratolytic action.
+ Lifting effect - stimulates the synthesis of collagen and elastin.
+ Cytoprotective (antioxidant).
+ Comedolytic.

GLUCONOLACTONE (PHA)

+ Occurs naturally in honey and royal jelly as gluconic acid.
+ Effect very similar to that of AHAs but more beneficial.
+ More hydrating than AHAs because of the 5 hydroxyl groups on its molecule.
+ Less irritation and burning sensation, since it is a bigger molecule.

LACTOBIONIC ACID (PHA)

+ Formed by the oxidation of lactose - consists of thermally bonded gluconic acid and galactose.
+ Penetrates gradually into the skin, layer by layer.
+ Minimal irritating effect - suitable for all skin types including sensitive skin.

NONAPEPTIDE-1

+ α-MSH antagonist mechanism of action.
+ Decreases α-MSH induced melanin synthesis.
+ Reverses pigmentation without toxicity.

TIMELESS TX PEEL

CATEGORY
PEELS

Timeless TX Peel combines the power of AHA, PHA and 3 expert peptides to work on skin aging.

+ Skin aging
+ Photoaging
+ Skin sagging and loss of tone
+ Dehydration
+ Designed to restore the natural skin pH gradient
+ Activates exfoliating enzymes to renew the skin gradually
+ Increases overall skin radiance
+ Total acid content: 27.7%

BENEFITS

+ The superficial peel increases radiance, refines skin texture and helps to fade brown spots.
+ Improves superficial skin and pigment problems.
+ Decrease in skin roughness, appearance of wrinkles and dilated pores.
+ Decreased superficial scars.
+ Improvement of keratosis pilaris.
+ Decreased seborrhea and acne.
+ Decreased pigmentary disorders (freckles, brown spots, epidermal superficial pregnancy mask, dull complexion, etc.)

ACTIVE INGREDIENTS

GLUCONOLACTONE (PHA)

+ Occurs naturally in honey and royal jelly as gluconic acid.
+ Effect very similar to that of AHAs but more beneficial.
+ More hydrating than AHAs because of the 5 hydroxyl groups on its molecule.
+ Less irritation and burning sensation, since it is a bigger molecule.

LACTOBIONIC ACID (PHA)

+ Formed by the oxidation of lactose - consists of thermally bonded gluconic acid and galactose.
+ Penetrates gradually into the skin, layer by layer.
+ Minimal irritating effect - suitable for all skin types including sensitive skin.

MANDELIC ACID (AHA)

+ Found in almonds.
+ Large AHA will penetrate more slowly = less irritation.
+ Keratolytic.
+ Bacteriostatic, anti-inflammatory - similar to macrolide antibiotics.
+ Lightening of the skin by keratolytic action.
+ Lifting effect - stimulates the synthesis of collagen and elastin.
+ Cytoprotective (antioxidant).
+ Comedolytic.

ACETYL HEXAPEPTIDE-51 AMIDE

+ Mimics activity of FOXO3a, involved in cell repair, renewal and longevity.
+ Protects DNA from damage, stimulates its own repair pathways, reverses senescence in fibroblasts.
+ In vivo: repair of UV-induced DNA damage.

PEELING CLEAR UP TX PEEL

CATEGORY
PEELS

Clear Up TX Peel uses the power of salicylic acid to help eliminate blackheads and comedones.

+ Impurities
+ Acne
+ Blackheads, dilated pores
+ Oily skin with or without blemishes
+ Folliculitis
+ Seborrheic dermatitis
+ Total acid content: 25%

BENEFITS

+ The superficial peel increases radiance, refines skin texture and helps to fade brown spots.
+ Improves superficial skin and pigment problems.
+ Decrease in skin roughness, appearance of wrinkles and dilated pores.
+ Decreased superficial scars.
+ Improvement of keratosis pilaris.
+ Decreased seborrhea and acne.
+ Decreased pigmentary disorders (freckles, brown spots, epidermal superficial pregnancy mask, dull complexion, etc.)

ACTIVE INGREDIENTS

SALICYLIC ACID (BHA)

+ A SINGLE BHA: Salicylic acid.
+ Found in its natural state in two plants: white willow and queen-meadow - but the one used in cosmetics is generally synthetic.
+ Liposoluble molecule = dissolves in a fatty substance concretely, it means that it can penetrate inside the pores to the sebaceous gland and help eliminate comedones.
+ It also works on the surface and has the same exfoliating effect as AHAs, but it also acts inside the pores.

LACTOBIONIC ACID (PHA)

+ Formed by the oxidation of lactose - consists of thermally bonded gluconic acid and galactose.
+ Penetrates gradually into the skin, layer by layer.
+ Minimal irritating effect - suitable for all skin types including sensitive skin.

MANDELIC ACID (AHA)

+ Found in almonds.
+ Large AHA will penetrate more slowly = less irritation.
+ Keratolytic.
+ Bacteriostatic, anti-inflammatory - similar to macrolide antibiotics.
+ Lightening of the skin by keratolytic action.
+ Lifting effect - stimulates the synthesis of collagen and elastin.
+ Cytoprotective (antioxidant).
+ Comedolytic.

GLUCONOLACTONE (PHA)

+ Occurs naturally in honey and royal jelly as gluconic acid.
+ Effect very similar to that of AHAs but more beneficial.
+ More hydrating than AHAs because of the 5 hydroxyl groups on its molecule.
+ Less irritation and burning sensation, since it is a bigger molecule.

SOOTHING & REPAIRING PLANT COMPLEX Licorice, sagebrush, *Gingko biloba*, *Centella asiatica*, Blueberry and brier rose

+ Antioxidant, anti-inflammatory, antimicrobial, soothing.
+ Strengthens the skin barrier, softens rough skin.
+ Shield of protection against environmental stress.

CLEANZYME ENZYME CLEANSING POWDER

CATEGORY
PEELS

Gently removes makeup and impurities.

+ Very gentle
+ Hypoallergenic
+ pH identical to that of the skin
+ Biodegradable
+ 100% natural origin
+ Without sulphates (SLS or SLES)
+ Without preservatives

INSTRUCTIONS

In a small glass cup, using the small measuring cup, pour 3-4 ml of water and add 2-3 ml of powder. Using a fan brush, dissolve the powder and lather the mixture.

Using the brush, apply a thick layer on the entire face and leave for 1-2 minutes. If the patient is wearing make-up, emulsify by lightly massaging for about 20-30 seconds. Rinse two or three times, using wet compresses (until the compresses are perfectly clean after being used on the skin). The skin must be perfectly clean. Dry the skin gently.

BENEFITS

Gently removes make-up and impurities with a light enzymatic action to prepare skin for clinical treatments.

ACTIVE INGREDIENTS

PAPAIN A keratolytic plant enzyme which activates on contact with water.

ANIONIC CLEANING AGENTS DERIVED FROM AMINO ACIDS Very gentle, hypoallergenic, pH identical to that of the skin and biodegradable.

DEGREASING SOLUTION

INSTRUCTIONS

Using a gauze pad, apply the degreasing solution to the entire face, applying slightly more pressure than usual.

BENEFITS

Eliminates excess sebumon the skin before a peel. Increases the water content of the epidermis to facilitate the penetration of acids. Eliminates dead cells and impurities.

CATEGORY
PEELS

Eliminates excess sebum on the skin before a peel. Increases the water content of the epidermis to facilitate the penetration of acids. Eliminates dead cells and impurities.

+ Alcohol
+ Polysorbate 80
+ Lactic acid

Pro-Derm

CARBOXY NEUTRALIZING SOLUTION

CATEGORY
PEELS

Neutralizes the action of acids in the peeling solution, while improving microcirculation and subcutaneous metabolism to stimulates fibroblasts; promotes collagen synthesis.

+ Sodium bicarbonate
+ Water

INSTRUCTIONS

Using the fingertips, apply 3 ml of Carboxy Neutralizing Solution to the face, following the same sequence of application (start with the forehead, then the left side of the face, followed by the right side and ending with the bottom of the face).

The neutralization reaction creates foam on the surface of the face. This means that the solution is neutralizing the acids. When the foaming action subsides, the process is complete. Patients may experience tingling during the neutralization process. This is caused by the Bohr effect, which promotes tissue oxygenation.

Once the reaction is complete, rinse carefully with moist gauze pads. Don't forget the areas of potential peel pooling (commissure of the lips, alar-facial junction).

BENEFITS

+ Sodium bicarbonate.
+ Neutralizes the action of acids in the peeling solution.
+ Improves microcirculation and the subcutaneous metabolism.
+ Stimulates fibroblasts, promotes collagen synthesis.
+ Bohr effect (carboxytherapy): when it comes into contact with the peeling solution on the skin, the baking soda will react with the different acids to produce sodium salts and will generate a strong release of carbon dioxide. This creates a foam and a massive release of CO_2, which results in stimulation and increased oxygen production in the tissues.
+ The diffusion of CO_2 can temporarily cause a tingling sensation.

AHA-BHA LOTION 5-2 Water/Eau • Propanediol • Glycolic Acid • Isopropyl Myristate • Cetyl Alcohol • Triethanolamine • Salicylic Acid • Glyceryl Stearate • PEG-100 Stearate • Magnesium Aluminum Silicate • Polysorbate 20 • Aloe Barbadensis Leaf Extract • Panthenol • Allantoin • Bisabolol • Stearic Acid • Zinc PCA • Aniba Rosaeodora (Rosewood) Wood Oil • Lavandula Angustifolia (Lavender) Oil • Xanthan Gum • Dimethicone • Disodium EDTA • Sodium Hydroxide

AHA-BHA LOTION 8-2 Water/Eau • Propanediol • Glycolic Acid • Isopropyl Myristate • Cetyl Alcohol • Triethanolamine • Salicylic Acid • Sodium Hydroxide • Glyceryl Stearate • PEG-100 Stearate • Magnesium Aluminum Silicate • Polysorbate 20 • Aloe Barbadensis Leaf Extract • Panthenol • Allantoin • Bisabolol • Stearic Acid • Zinc PCA • Aniba Rosaeodora (Rosewood) Wood Oil • Lavandula Angustifolia (Lavender) Oil • Xanthan Gum • Dimethicone • Disodium EDTA

ANTIOXIDANT SERUM Water/Eau • Propanediol • Ethoxydiglycol • Butylene Glycol • Glycerin • Pentylene Glycol • Resveratrol • Ferulic Acid • Citric Acid • Sodium Metabisulfite

ANTI-REDNESS COMPLEX Water/Eau • Butylene Glycol • Isostearyl Alcohol • Glycerin • Propanediol • Isononyl Isononanoate • Dicaprylyl Carbonate • Butylene Glycol Cocoate • Squalane • Methylglucamine • Cetyl Alcohol • Cetearyl Alcohol • Sodium Levulinate • Xanthan Gum • Narcissus Tazetta Bulb Extract • Olea Europaea (Olive) Leaf Extract • Sodium Anisate • Titanium Dioxide • Peumus Boldus Leaf Extract • Ethylcellulose • Rosmarinyl Glucoside • Gallyl Glucoside • Caffeyl Glucoside • Dextran • Acrylates/C10-30 Alkyl Acrylate Crosspolymer • Parfum/Fragrance • Propylene Glycol • Disodium EDTA • o-Cymen-5-ol • Chromium Oxide Green • Palmitoyl Tripeptide-8 • Pentylene Glycol

BARRIER REPAIR CREAM Water/Eau • Cetearyl Alcohol • Glycerin • Niacinamide • Caprylic/Capric Triglyceride • Cetyl Alcohol • Cholesterol • Ceteareth-20 • Dimethicone • Isomerized Safflower Acid • Hydroxypropyl Bispalmitamide MEA • Ricinus Communis (Castor) Seed Oil • Potassium Phosphate • Euterpe Oleracea Sterols • Galactaric Acid • Lavandula Angustifolia (Lavender) Oil • Dipotassium Phosphate • Aniba Rosodora (Rosewood) Wood Oil • Salicylic Acid • Hydrogenated Castor Oil • Pelargonium Graveolens Leaf Oil • Sorbic Acid • Copernicia Cerifera (Carnauba) Wax • Linoleic Acid • Oleic Acid • Linolenic Acid • Benzyl Alcohol

DAY CREAM SPF 20 Medicinal Ingredients: Ethylhexyl Methoxycinnamate (Octinoxate) 7.50% • Butyl Methoxydibenzoylmethane (Avobenzone) 3.00%

Ingredients: Water/Eau • Glyceryl Stearate SE • Glycerin • Caprylic Triglyceride • Cetyl Alcohol • Myristyl Myristate • PEG-8 • Squalane • Phenoxyethanol • Cholesterol • Butylene Glycol • Titanium Dioxide • Sodium Citrate • Allantoin • Panthenol • Magnesium Ascorbyl Phosphate • Tetrasodium EDTA • Potassium Sorbate • Zinc PCA • Alumina • Tocopherol • Sodium Hexametaphosphate • Triethanolamine • Retinyl Palmitate • Citric Acid • Helianthus Annuus (Sunflower) Seed Oil • BHT • Sodium Methylparaben

DERMAFILINE CREAM Water/Eau • Caprylic Triglyceride • Glyceryl Stearate SE • Glycerin • Propanediol • Cetyl Alcohol • Caffeine • Squalane • Butylene Glycol • Butyrospermum Parkii (Shea) Butter • Myristyl Myristate • Stearic Acid • Rosa Rubiginosa Seed Oil • Benzyl Alcohol • Panthenol • Galactaric Acid • Salicylic Acid • Aloe Barbadensis Leaf Juice • Aniba Rosodora (Rosewood) Wood Oil • Lavandula Angustifolia (Lavender) Oil • Pelargonium Graveolens Oil • Tocopherol • Sorbic Acid • Cetyl Hydroxyethylcellulose • Rutin • Palmitoyl Tripeptide-1 • Palmitoyl Tetrapeptide-7 • Phaseolus Lunatus (Green Bean) Extract • Sodium Hydroxide

EYE CONTOUR CREAM Water/Eau • Glycerin • Propanediol • Glyceryl Stearate SE • Squalane • Caprylic Triglyceride • Cetyl Alcohol • Butyrospermum Parkii (Shea) Butter • Allantoin • Magnesium Ascorbyl Phosphate • Caffeine • Palmitoyl Tripeptide-1 • Palmitoyl Tetrapeptide-7 • Glycosaminoglycans • Tocopherol • Panthenol • Aloe Barbadensis Leaf Extract • Polysorbate 20 • Maltodextrin • Sodium Hydroxide • Trisodium EDTA • Butylene Glycol • Sodium Citrate • Galactaric Acid • Salicylic Acid • Citric Acid • Carbomer • Benzyl Alcohol • Sorbic Acid • Phenoxyethanol • Potassium Sorbate

EXFOLIATING CLARIFYING SOLUTION Water/Eau • Alcohol Denat • Glycolic Acid • Ammonium Hydroxide • Salicylic Acid • Triethanolamine • Cucumis Sativus (Cucumber) Fruit Extract

GENTLE CLEANSER Water/Eau • Aloe Barbadensis Leaf Juice • Cetyl Alcohol • Cetyl Betaine • Disodium Cocoamphodiacetate • Cocamidopropyl Betaine • Allantoin • Butylene Glycol • Panthenol • Kaolin • Hydroxyethylcellulose • Glycolic Acid • Caprylyl / Capryl Glucoside • Sodium Cocoyl Glutamate • Glyceryl Caprylate • Polyglyceryl-6 Oleate • Sodium Surfactin • Polyquaternium-7 • Lavandula Angustifolia (Lavender) Oil • Cymbopogon Martini Oil • Acrylates/C10-30 Alkyl Acrylate Crosspolymer • Sodium Benzoate • Tetrasodium EDTA • Potassium Sorbate • Citric Acid • Triethanolamine

GROWTH FACTOR PLUMPING CREAM Water/Eau • Propylheptyl Caprylate • Ethylhexyl Palmitate • Glycerin • Cetearyl Alcohol • Ricinus Communis (Castor) Seed Oil • Acacia Senegal Gum • Cetyl Palmitate • Dimethicone • Jojoba Esters • Triundecanoin • Glyceryl Stearate • Butylene Glycol • Butyrospermum Parkii (Shea) Butter • Vigna Aconitifolia Seed Extract • Paeonia Albiflora Root Extract • Oligopeptide-20 • Oligopeptide-24 • Palmitoyl Tripeptide-1 • Palmitoyl Tetrapeptide-7 • PEG-40 Stearate • Ceteareth-20 • Sorbitan Oleate • Sorbitan Laurate • Myristyl Malate Phosphonic Acid • Hydrogenated Castor Oil • Copernicia Cerifera (Carnauba) Wax • Beeswax/ Cire d'Abeille • Crocus Chrysanthus Bulb Extract • Sodium Acrylates/Beheneth-25 Methacrylate Crosspolymer • Hydrogenated Polydecene • Lauryl Glucoside • Titanium Dioxide • Caprylic/Capric Triglyceride • Isostearic Acid • Alumina • Polyhydroxystearic Acid • Stearic Acid • Polyglyceryl-3 Polyricinoleate • Lecithin • 1,2-Hexanediol • Caprylyl Glycol • Tropolone • Methyl Glucose Sesquistearate • Phenoxyethanol • Sorbic Acid • Magnesium Aluminum Silicate • Tocopherol • Ammonium Acryloyldimethyltaurate/VP Copolymer • Disodium EDTA • Sodium Cocoyl Glutamate • Polysorbate 20 • Stearyl Stearate • Paraffin • Carbomer • Xanthan Gum

HA PLUMPING SERUM Water/Eau • Methyl Gluceth-20 • Niacinamide • Propanediol • Hydrolyzed Viola Tricolor Extract • Tamarindus Indica Seed Gum • Hydrolyzed Hyaluronic Acid • Sodium Hyaluronate • Disodium Acetyl Glucosamine Phosphate • Rosmarinyl Glucoside • Xanthan Gum • Cellulose Gum • Pentylene Glycol • Polysorbate 20 • Phenoxyethanol • Ethylhexylglycerin • Citrus Aurantium Dulcis (Orange) Peel Oil • Citric Acid

HYDROGEL Water/Eau • Aloe Barbadensis Leaf Juice • Propanediol • Caprylyl / Capryl Glucoside • Glycerin • Phenoxyethanol • Crithmum Maritimum Extract • Bisabolol • Mentha Piperita (Peppermint) Oil • Panthenol • Allantoin • Helichrysum Angustifolium Flower Oil • Pelargonium Graveolens Leaf Oil • Sodium Surfactin • Glyceryl Caprylate • Polyglyceryl-6 Oleate • Sodium Cocoyl Glutamate • Carbomer • Citric Acid • Tetrasodium EDTA • Sodium Hydroxide

LIFTENSE Water/Eau • Squalane • Glyceryl Stearate SE • Propanediol • Glycerin • Cetyl Alcohol • Caprylic Triglyceride • Stearic Acid • Butyrospermum Parkii (Shea) Butter • Butylene Glycol • Rosa Canina Fruit Oil • Allantoin • Aloe Barbadensis Leaf Extract • Panthenol • Sodium Hyaluronate • Acetyl Hexapeptide-8 • Palmitoyl Tripeptide-1 • Palmitoyl Tetrapeptide-7 • Glycosaminoglycans • Aniba Rosodora (Rosewood) Wood Oil • Cholesterol • Galactaric Acid • Salicylic Acid • Manganese Gluconate • Superoxide Dismutase • Tocopherol • Carbomer • Steareth-20 • Polysorbate 20 • Sorbic Acid • Chlorhexidine Digluconate • Maltodextrin • Potassium Sorbate • Benzyl Alcohol • Phenoxyethanol • Pentylene Glycol • Sodium Hydroxide • Tromethamine • Trisodium EDTA

LIFTENSE CONTOUR Anthemis Nobilis Flower Water/Eau • Helichrysum Italicum Flower Water/Eau • Propanediol • Water/Eau • Glycerin • Palmitoyl Tetrapeptide-7 • Palmitoyl Tripeptide-1 • Sodium Hyaluronate • Glycosaminoglycans • Manganese Gluconate • Aloe Barbadensis Leaf Extract • Caffeine • Salicylic Acid • Benzyl Alcohol • Butylene Glycol • Xanthan Gum • Carbomer • Polysorbate 20 • Maltodextrin • Peg-40 Hydrogenated Castor Oil • Dimethicone • Trisodium EDTA • Lactic Acid • Potassium Sorbate • Sorbic Acid • Phenoxyethanol • Sodium Hydroxide

LIFTENSE LTL Water/Eau • Aloe Barbadensis Leaf Juice • Caprylic Triglyceride • Propanediol • Cetyl Alcohol • Cetaryl Wheat Straw Glycosides • Glycerin • Cetaryl Alcohol • Myristyl Myristate • Butyrospermum Parkii (Shea) Butter • Squalane • Palmitoyl Tetrapeptide-7 • Palmitoyl Tripeptide-1 • Acetyl Octapeptide-3 • Sodium Hyaluronate • Xylitylglucoside • Allantoin • Butylene Glycol • Anhydroxylitol • Panthenol • Xanthan Gum • Glycosaminoglycans • Rosa Canina Fruit Oil • Xylitol • Aniba Rosodora (Rosewood) Wood Oil • Galactaric Acid • Salicylic Acid • Zinc PCA • Tocopherol • Sorbic Acid • Carbomer • Lavandula Angustifolia (Lavender) Oil • Pelargonium Graveolens Flower Oil • Polysorbate 20 • Manganese Gluconate • Sodium Hydroxide • Benzyl Alcohol

LOOSE POWDER SPF 50 DARK Medicinal Ingredients (p/p): Zinc Oxide 24.8% • Titanium Dioxide 23.4%

Ingredients: Kaolin • Aluminum Starch Octenylsuccinate • Alumina • Modified Corn Starch • Hydrogenated Polydecene • HDI/Trimethylol Hexyllactone Crosspolymer • Hydrogen Dimethicone • Hydrogenated Vegetable Oil • Caprylyl Glycol • Ethylhexylglycerin • Triethoxycaprylylsilane • Jasminum Officinale (Jasmine) Flower Extract • Silica • Water/Eau • Iron Oxides (CI 77491, CI 77492, CI 77499) • Boron Nitride

LOOSE POWDER SPF 50 LIGHT Medicinal Ingredients(p/p): Zinc Oxide 24.8% • Titanium Dioxide 23.4%

Ingredients: Kaolin • Aluminum Starch Octenylsuccinate • Alumina • Modified Corn Starch • Hydrogenated Polydecene • HDI/Trimethylol Hexyllactone Crosspolymer • Hydrogen Dimethicone • Hydrogenated Vegetable Oil • Caprylyl Glycol • Ethylhexylglycerin • Triethoxycaprylylsilane • Jasminum Officinale (Jasmine) Flower Extract • Silica • Water/Eau • Iron Oxides (CI 77491, CI 77492, CI 77499) • Boron Nitride

How would you describe your skin type?	◯ Dry ◯ Oily ◯ Mixed (oily/dry) ◯ Sensitive
How does your skin react to the sun?	◯ It always burns ◯ It turns red and then tans ◯ It tans very easily
Do you go to tanning salons?	◯ Yes. How often? _____ ◯ No
Do you suffer from any of the following conditions?	◯ Psoriasis ◯ Eczema ◯ Dermatitis ◯ Herpes (cold sores) ◯ Skin rash/hives ◯ Lupus ◯ Vitiligo ◯ Other:
What medications or topical creams are you currently using?	_____
Do you use vitamin A acid (Retin-A)?	◯ Yes. What concentration? _____ Since when? _____
Have you ever used Accutane?	◯ Yes. How long ago? _____
Do you do facial hair removal?	◯ Yes. When was the last time? _____ What was the type of procedure? _____
Do you suffer from a hormone imbalance?	◯ Yes ◯ No
Do you have regular periods?	◯ Yes ◯ No ◯ Menopausal
Have you ever been pregnant?	◯ Yes ◯ No
What types of skin problems do you have?	◯ Sun damage ◯ Brown spots ◯ Melasma ◯ Freckles ◯ Redness/ rosacea ◯ Wrinkles ◯ Other: _____
Are you receiving any of the following aesthetic treatments?	◯ Laser ◯ IPL ◯ Microdermabrasion ◯ Injections

CHEMICAL PEEL
Treatment protocol

Pro-Derm

Prepare the necessary equipment to carry out the procedure, including a timer.
Before starting the procedure, put on protective gloves.

STEP 1. CLEANSING WITH CLEANZYME ENZYME POWDER

- In a small glass cup, using the small measuring cup, pour 3-4 ml of water and add 2-3 ml of powder. Using a fan brush, dissolve the powder and lather the mixture.
- Using the brush, apply a thick layer on the entire face and leave for 1 to 2 minutes.
- If the patient is wearing make-up, emulsify by lightly massaging for about 20 to 30 seconds.
- Rinse 2 or 3 times, using wet compresses (until the compresses are perfectly clean after being used). The skin must be perfectly clean.
- Dry the skin gently with a tissue.

STEP 2. DEGREASING SOLUTION

- Using a gauze pad, apply the degreasing solution to the entire face, applying slightly more pressure than usual.
- To check the quality of the degreasing, perform the following resistance test: Touch the skin with your finger and slide it towards you. When your finger pulls on the skin, you should feel a certain resistance, confirming that the skin is sufficiently degreased. If there is no resistance, apply the degreasing solution a second time.

STEP 3. PEEL SOLUTION

- Apply Vaseline to areas of potential peel pooling (commissure of the lips, alar-facial junction).
- Cover the eyes with cotton pad that have been moistened and folded in half (or better still, install protective eyewear / black eye shields used for laser treatments).
- In a small glass cup, pour 5 ml of the peel solution. Fold a 2''x 2'' (5 cm x 5 cm) gauze pad in 4 and saturate with the peel solution before starting the application. Apply the solution over the entire face, starting with the forehead, then the left side of the face, followed by the right side and ending with the bottom of the face.
- Wait 3-5 minutes. ***IMPORTANT:*** *The face should remain moist (it should not be sticky). Check frequently.*
- Apply a second layer in the same way as the first, respecting the same sequence (start with the forehead, then the left side of the face, followed by the right side and ending with the bottom of the face).
- Wait 3-5 minutes. ***IMPORTANT:*** *The face should remain moist (it should not be sticky). Check frequently.*
- It is important to note that up to 4 layers of the peel solution can be applied to optimize effectiveness, depending on the type of skin. The total quantity of peel solution needed for 4 layers is 10 ml.
- Subsequent peels can be done after 7 days. We recommend 5 sessions.

  IMPORTANT TIPS The wait time for each layer may vary depending on the reactivity of the skin, the sensitivity of the individual or the specific skin problem. Here's how to adjust the wait time between each layer and the number of layers:

  1. Assess the sensations felt by your patient:
     Ask the patient "How does your skin feel on a scale of 1 to 10?" If the answer is 6 or more, DO NOT apply an additional layer.
     If the patient evaluates the sensation between 1 and 5, apply another layer of peel solution and allow it to penetrate.
     Wait about 3 to 5 minutes between each layer before applying the next one or going to the next step.
  2. Use your experience and instinct: You can also evaluate your patients by observing their body language. Are they comfortable? Do they show signs of discomfort? Your experience and your instinct are important tools.

STEP 4. CARBOXY NEUTRALIZING SOLUTION

- Using your fingertips, apply 3 ml of Carboxy Neutralizing Solution to the face, following the same sequence of application (start with the forehead, then the left side of the face, followed by the right side and ending with the bottom of the face). The neutralization reaction creates foam on the surface of the face. This means that the solution is neutralizing the acids. When the foaming action subsides, the process is complete. Patients may experience tingling during the neutralization process. This is caused by the Bohr effect, which promotes tissue oxygenation.
- Once the reaction is complete, rinse carefully with moist gauze pads. Do not forget the areas of potential peel pooling (commissure of the lips, alar-facial junction).
- Dry the skin gently with a tissue.

STEP 5. FINAL STEP

- Complete the treatment by applying **Hydrogel** and/or **PostTx-1** to the entire face. Then, for daytime, follow with **Daytime Fluid Broad Spectrum Sun Protection SPF 30**.

CHEMICAL PEEL
Instructions to patient

Pro-Derm

PRE-TREATMENT INSTRUCTIONS

IN THE 14 DAYS PRIOR TO YOUR APPOINTMENT, AVOID RECEIVING:
- a chemical peel
- injectable medical aesthetic treatments
- microdermabrasion treatments

IN THE 10 DAYS PRIOR TO YOUR APPOINTMENT, AVOID:
- exposure to the sun or visiting a tanning salon, which could result in burns

---

POST-TREATMENT INSTRUCTIONS

- These superficial peels require little or no recovery time.
- Make-up can be applied the day after the peel.
- Use post-peel products recommended by your doctor.
- If your skin is exposed to the sun, regularly apply sunscreen with a minimum SPF of 30.

RECOMMENDED CARE

1. **DAILY CARE ›** To thoroughly cleanse your skin and protect it from damage caused by the sun, use the following products daily:

◯ **Gentle Cleanser** ◯ **Daytime Fluid SPF 30** ◯ **Loose Powder** *Light* **SPF 50** ◯ **Loose Powder** *Dark* **SPF 50** ◯ **Day Cream SPF 20**

2. **PREPARING THE SKIN ›** For optimal results, it is recommended that you prepare your skin over a one- to two-week period. Before bedtime, apply the recommended product(s). In the morning, apply sunscreen, as recommended in the "DAILY CARE" section above.

◯ **Night Cream 5% AHA** ◯ **Night Cream 10% AHA** ◯ **AHA-BHA Lotion 5-2** ◯ **AHA-BHA Lotion 8-2** ◯ **Ultra-C ßw Cream**

In cases of hyperpigmentation, use Ultra-C ßw cream alternately with your AHA product.

3. **DAY OF TREATMENT TO DAY 4 ›** Following the procedure, you may experience mild redness, a feeling of tightness, peeling, flaking or temporary dryness. To help your skin recovery, apply the following products in the morning and evening:

◯ **Hydrogel*** ◯ **PostTx-1** ◯ **TerreusMasque** ◯ **Regenerating Cream**

** Hydrogel can be used as needed.*

4. **AS OF DAY 5 ›** Between procedures, in the evening, you can reintroduce the products from Step 2 "PREPARING THE SKIN". This will allow you to smooth and quickly improve your skin's texture, and optimize the benefits of the peels.

5. **MAINTAINING RESULTS ›** Following a series of treatments, once the skin has healed, use the recommended products, as specified by your doctor:

◯ **Gentle Cleanser**
◯ **Microdermabrasion Exfoliating Cream**
◯ **Day Cream SPF 20**
◯ **Daytime Fluid SPF 30**
◯ **Loose Powder** *Light* **SPF 50**
◯ **Loose Powder** *Dark* **SPF 50**

◯ **Eye Contour Cream**
◯ **Liftense**
◯ **Liftense LTL**
◯ **Liftense Contour**
◯ **Regenerating Cream**
◯ **Hydrogel**

◯ **StemYouth** *Light* **Day Cream**
◯ **StemYouth** *Rich* **Day Cream**
◯ **StemYouth Night Cream**
◯ **StemYouth Serum**
◯ **StemYouth Tissue Mask**
◯ **Retinal Serum**

◯ **Night Cream 5% AHA**
◯ **Night Cream 10% AHA**
◯ **Lotion 5-2**
◯ **Lotion 8-2**
◯ **Micro-Peel Mask**
◯ **Serum C-10%**

◯ **Ultra-C Cream**
◯ **Ultra-C ßw Cream**
◯ **Ultra-C Eye Contour Cream**
◯ **PostTx-1**
◯ **PostTx-2**
◯ **TerreusMasque**

YOU SHOULD NOT GET A PEEL:

- If you suffer from one or more of the following skin conditions or diseases: cancer of the face, past or present, (including squamous cell carcinoma, basal cell carcinoma and melanoma), metastatic cancer, dermatological diseases of the face (e.g., porphyria), blood disorders or platelet abnormalities, or if you are undergoing any of the following treatments: chemotherapy, steroid treatments or anticoagulant treatments (e.g., warfarin)
- If you use: Retin-A, Renova, Differin, Tazorac, Accutane or glycolic acid with a concentration above 5%
- If you are pregnant or planning to become pregnant
- If, in the past week, you have had facial hair removal using waxing, electrolysis or another laser procedure

Comments: _____

If you have concerns about any the above-mentioned conditions, feel free to ask questions.

POTENTIAL RISKS AND COMPLICATIONS

A chemical peel is among the safest skin rejuvenation procedures. However, this aesthetic procedure is not an exact science, and the degree of improvement can vary from person to person. I understand that, although I may notice a change after my first treatment, three to five sessions may be required to achieve the desired results.

I have been warned that, although complications resulting from a Pro-Derm peel are rare, they are possible, and the nature of these complications cannot be accurately predicted. Consequently, there is no guarantee, expressed or implied, that the treatment will have a successful outcome. Infections caused by bacterial contamination can occur if the post-peeling instructions are not followed.

The procedure and side effects, including other methods, and their advantages and disadvantages, have been explained to me.

I know that the results following a peel are not permanent and that the skin will deteriorate naturally over time.

This consent form is valid for five Pro-Derm peels, after which I may have to fill out a new form. I declare that I have read the information (or that the information has been read to me) and that I understand the consent form and its contents.

I have had the opportunity to ask questions about the procedure, including the risks and other methods, and I acknowledge that all of my questions about the procedure have been answered in a satisfactory manner.

This consent form is valid until it is revoked in writing, in full or in part, by me.

I consent to have _____ perform a Pro-Derm peel.

RX PROCEDURE: MICRODERMABRASION

To maximize the results of microdermabrasion treatments, recommend the use of Pro-Derm products to prepare the skin for treatment and ensure optimal recovery.

TREATMENT PREPARATION

Have the patient start using the following Pro-Derm products as soon as possible and for at least one week before the first microdermabrasion appointment.

MORNING	**1.** Cleanse skin with Pro-Derm Gentle Cleanser. Use a small quantity and delicately lather for one minute at the most, then rinse well. **2.** Apply Pro-Derm Hydrogel as needed throughout the day if skin is dry, red or irritated. **3.** Apply Pro-Derm Eye Contour or Liftense Contour Cream as needed. **4.** Apply the Pro-Derm Cream best best suited for your skin condition. **5.** Apply Pro-Derm SPF protection.
NIGHT	**1.** Cleanse skin with Pro-Derm Gentle Cleanser. **2.** Apply Pro-Derm Eye Contour or Ultra-C Eye Contour Cream. **3.** Apply TerreusMasque™ for 10 minutes and rinse completely. **4.** Apply Hydrogel. **5.** Apply Regenerating Cream.

THE DAY OF YOUR TREATMENT

1. Apply Pro-Derm Hydrogel after treatment. You may feel some tingling. This is normal.

2. Apply Pro-Derm Regenerating Cream, recognized for its anti-aging properties due to the combination of vitamins C (MAP), A and E, and Matrixyl. The Regenerating Cream hydrates and regenerates sensitive or irritated skin.

3. Apply Daytime Fluid SPF 30 or Mineral Loose Powder SPF 50.

AFTER YOUR TREATMENT UNTIL THE 5TH DAY

Continue the same morning routine. At night, continue the same evening routine, leaving the TerreusMasque™ on for 20 minutes during step #3.

AFTER DAY 5

Maintain care routine with these modifications:

MORNING	During the day, the SPF 30 cream can be replaced by Regenerating Cream if you aren't going to be exposed to the sun, and if you don't have problems with hyperpigmentation or melasma.
NIGHT	At night, omit step #3. However, we recommend that you do this step at least once a week.

RX PROCEDURE: MICROPEEL BY FRACTIONAL LASER

To maximize the results of laser treatments, we recommend that you use Pro-Derm products to prepare your skin for treatment, ensure optimal recovery and maximize results over the long term.

TREATMENT PREPARATION

To prepare the skin properly, start using Pro-Derm products as soon as possible and for at least one week before your laser treatment appointment.

DAY OF TREATMENT AND DAY 2:

1. You may experience a slight burning sensation and notice the presence of redness or swelling, or an increase in pigmentation.
2. Apply a cold water compress for ten minutes and repeat every hour if needed to relieve the burning sensation.
3. Immediately after the compresses, reapply a thin coat of Pro-Derm Post-Tx•1 to keep the skin soft and hydrated.
4. Apply TerreusMasque for 20 minutes in the evening and rinse well.
5. Reapply a coat of Pro-Derm PostTx•1 cream for the night.
6. Be sure to sleep in a semi-seated position or with an extra pillow to help prevent and alleviate swelling.

N.B.: We recommend that you continue this routine for 24 to 48 hours more if your skin is particularly fragile or if the treatment was more intense.

DAYS 3 TO 5:

Your skin is still in the active healing stage; it is very important that it remain well hydrated during this period.

MORNING

1. Gently cleanse skin with a small quantity of Pro-Derm Gentle Cleanser and rinse well.
2. Apply _____ cream, which promotes hydration and healing. Apply as needed throughout the day.
3. Apply Pro-Derm SPF protection.

NIGHT

1. Gently cleanse skin with a small quantity of Pro-Derm Gentle Cleanser and rinse well.
2. Apply TerreusMasque™ for 20 minutes before removing it and rinsing well.
3. Apply _____ cream.

DAY 5 AND AFTER (TO OPTIMIZE RESULTS):

MORNING

1. Pro-Derm Gentle Cleanser
2. Recommended Pro-Derm eye contour care: _____
3. Recommended Pro-Derm day care product: _____
4. Apply the recommended Pro-Derm SPF sunscreen: _____

NIGHT

1. Gentle Cleanser
2. Apply the recommended Pro-Derm eye care product: _____.
3. Alternate AHA exfoliating product _____ or brightening product _____ with the recommended Pro-Derm hydrating product: _____

Twice a week, apply the Pro-Derm Micro Peel Masque for 20 minutes then rinse well. This helps to exfoliate the skin deep down, keep pores tightened and maximize the effects of the other products in the Pro-Derm line. This customized skincare program can be re-evaluated after the series of laser treatments or as needed.

RX PROCEDURE: IPL (INTENSE PULSED LIGHT)

To maximize the results of laser treatments, we recommend the use of Pro-Derm products to prepare the skin for treatment, ensure optimal recovery and maximize results over the long term.

TREATMENT PREPARATION

Before the treatment, 10 days prior to the procedure, begin preparing the skin:

1. Avoid all direct exposure to the sun without appropriate sunscreen protection.
2. No tanning salon sessions.
3. No abrasive procedure on skin that is not medically necessary.

5 TO 10 DAYS BEFORE THE PROCEDURE, PRIOR TO THE TREATMENT:

1. The day of the treatment: Serum-C with M²PE, then Pro-Derm SPF_____ with UVA-UVB protection
2. At night: the recommended AHA product: _____. The goal is to reduce the thickness of the stratum corneum in order to increase the effectiveness of the pulsed light.

DAY OF THE PROCEDURE, AFTER THE TREATMENT:

1. Use the Pro-Derm SPF best suited to your skin type.
2. Apply the Terreuse Masque for 20 to 30 minutes, then rinse thoroughly (optional, to reduce redness, sensation of heat and discomfort.

FOR 3 TO 4 WEEKS AFTER TREATMENT:

1. In the morning, cleanse skin with Pro-Derm Gentle Cleanser and rinse well.
2. Apply Serum-C with M²PE until absorbed.
3. Use SPF product _____.
4. Avoid unprotected exposure to the sun without protection for three to four weeks.
5. RECOMMENDED Pro-Derm PRODUCTS:
   Serum-C with M²PE
   SPF Day product
   AHA Exfoliating product
   Optional: TerreusMasque (soothing)
   Hydrogel (soothing)

TO MAXIMIZE AND MAINTAIN RESULTS:

6. In the morning, cleanse skin with Pro-Derm Gentle Cleanser and rinse well.
7. Apply Serum-C with M²PE until absorbed.
8. Apply hydrating product _____.
9. Use SPF product _____.
10. At night: Pro-Derm Gentle Cleanser
11. Alternate AHA product _____ with brightener _____ or anti-aging moisturizer_____.
12. This customized care program can be re-evaluated by the professional after three months or as needed.

RX PROCEDURE: ABLATIVE LASER (CO_2, ERBIUM, ETC.)

To maximize the results of laser treatments, we recommend that you use Pro-Derm products to prepare the skin for treatment, ensure optimal recovery and maximize results over the long term.

TREATMENT PREPARATION

To prepare the skin for the treatment, at least one week before the planned treatment date, start using the customized Pro-Derm care product protocol with the regimen to follow beginning on day 6.

TREATMENT DAY UNTIL DAY 4:

1. Gently cleanse skin with a small amount of Pro-Derm Gentle Cleanser.
2. Apply Post TX•1 to keep your skin hydrated.

DAYS 4, 5, 6:

1. Cleanse skin morning and evening with a small quantity of Pro-Derm Gentle Cleanser and rinse well.
2. Apply TerreusMasque™ for 10 minutes morning and evening and rinse well.
3. Apply Pro-Derm Post-Tx•1 and repeat as often as necessary to keep skin moisturized throughout the day and at night.

DAY 7 AND AFTER:

Once skin has returned to normal, use Pro-Derm products to help protect skin for optimized results. Suggested customized care protocol:

MORNING

1. Pro-Derm Gentle Cleanser
2. Recommended Pro-Derm eye contour care: _____
3. Recommended Pro-Derm day care: _____
4. Apply the recommended Pro-Derm SPF sunscreen: _____ _____

NIGHT

1. Gentle Cleanser
2. Recommended eye contour product: _____
3. Alternate AHA exfoliating product _____ or brightening product _____ with hydrating product _____ most appropriate for skin type. Twice a week, apply the Pro-Derm Micropeel Mask for 20 minutes, then rinse well. This helps to exfoliate the skin deep below the surface, to keep pores tightened and to maximize the effects of the other products in the Pro-Derm line.

RX PROCEDURE: PHOTODYNAMIC THERAPY (ALA)

To maximize the results of phytodynamic therapy, we recommend that you use Pro-Derm products that prepare the skin for the treatment and ensure optimal recovery.

TREATMENT PREPARATION

To prepare the skin for treatment, at least one week before the planned treatment date, start using the customized Pro-Derm care product protocol with the regimen to follow beginning on day 5.

DAY OF YOUR TREATMENT AND DAY 2:

1. Apply TerreusMasque™ for 20 minutes in the evening and rinse well.

DAYS 3 TO 5:

The skin will still be in the active healing phase. It is of the utmost importance that the skin be optimally hydrated and well protected from the sun during this phase.

MORNING

1. Gently cleanse skin with a small quantity of Pro-Derm Gentle Cleanser and rinse well.
2. Apply Pro-Derm Regenerating Cream. Regenerating Cream may be reapplied as needed throughout the day.
3. Apply Pro-Derm SPF protection according to skin type, condition and activity.

NIGHT

1. Gently cleanse skin with a small quantity of Pro-Derm Gentle Cleanser and rinse well.
2. Apply TerreusMasque™ for 20 minutes and rinse well.
3. Apply Pro-Derm Regenerating Cream.

DAY 5 AND AFTER:

MORNING

1. Pro-Derm Gentle Cleanser
2. Pro-Derm eye contour care: _____
3. Pro-Derm day product: _____
4. Apply Pro-Derm SPF sunscreen as recommended, according to skin type and activities _____

NIGHT

1. Gentle Cleanser
2. Eye contour product: _____
3. Alternate AHA exfoliating product _____ with Pro-Derm hydrating product.

Twice a week apply Micropeel Mask for 20 minutes then rinse well. This helps to exfoliate the skin deep down, keep pores tightened and maximize the effects of the other products in the Pro-Derm line. Always avoid handling the skin or trying to remove peeled skin.

RX PROCEDURE: INJECTABLE SUBSTANCE TREATMENT

To maximize the results of injection treatments, we recommend the use of Pro-Derm products that prepare the skin for the treatment, ensure optimal recovery and maximize results over the long term.

PREPARE SKIN FOR TREATMENT

To prepare the skin for treatment, as soon as possible, start using your Pro-Derm care products according to the regimen to follow beginning on day 2.

DAY OF YOUR TREATMENT

1. Gently cleanse your skin with Pro-Derm Gentle Cleanser and rinse.
2. Apply eye contour product: _____
3. Apply Liftense product: _____

DAY 2 AND AFTER:

MORNING

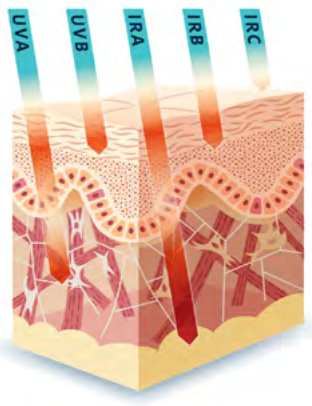

1. Pro-Derm Gentle Cleanser
2. Pro-Derm eye contour care: _____
3. Pro-Derm Serum-C with M^2PE
4. Apply Liftense _____
5. Apply Pro-Derm SPF sunscreen as suggested according to your skin type and activities _____

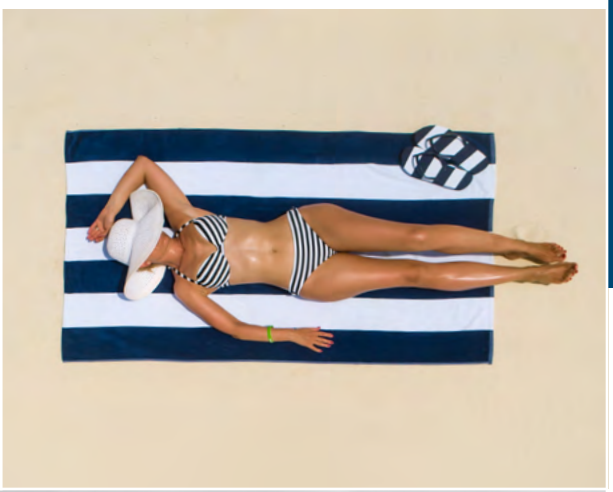

NIGHT

1. Gentle Cleanser
2. Eye contour product: _____
3. Alternate AHA exfoliating product _____ or _____ with Liftense _____.

Apply Pro-Derm Micropeel Masque twice a week for 20 minutes then rinse well. This helps to exfoliate the skin deep below the surface, to keep pores tightened and to maximize the effects of the other products in the Pro-Derm line. This customized care program can be re-evaluated by professional after three months or as needed. Twice a week for 20 minutes then rinse well. This helps to exfoliate the skin deep down, keep pores tightened and maximize the effects of the other products in the Pro-Derm line.
