Medical Radiography Technology

Computed Tomography Theory 2

COURSE INFORMATION

COURSE NUMBER	**MRAD 281**
TOTAL HOURS	**50**
THEORY	**50**
PRACTICAL	**0**
PREREQUISITES	**ANPH 252 - Anatomy and Pathology 2** **MRAD 202 - Patient Care 2** **MRAD 240 - Specialized Imaging 1** **MRAD 251 - Computed Tomography Theory 1** **MRAD 254 - Fluoroscopic Imaging** **MRAD 256 - Radiographic Technique 2** **MRAD 358 - Clinical Integration 1** **PRCT 353 - Clinical Placement I**
CO-REQUISITES	**None**
ACADEMIC UNIT RESPONSIBLE FOR COURSE	**Allied Health Education**

STUDENTS, PLEASE NOTE

This course contains information that may be required to substantiate learning for professional recognition. It is your responsibility to retain a copy for your own use during your program and after graduation.

©Edenbrook College of Health, Business and Technology

COURSE DESCRIPTION

Computed Tomography Theory 2 covers routine computed tomography (CT) procedures and protocols along with the cross-sectional anatomy of the abdomen, chest, head, neck, pelvis, spine, and extremities. In addition, focus will be placed on identifying anatomical structures on various cross-sectional imaging planes.

COURSE OBJECTIVES

Following completion, the student will be able to:

1. Explain computed tomography (CT) Imaging for an examination of the abdomen.
    - 1.1 Describe the CT protocols followed when imaging the abdomen.
    - 1.2 Describe the CT angiography protocols followed when imaging the abdomen.
    - 1.3 Examine indications and contraindications for procedures of the abdomen.
    - 1.4 Describe anatomical structures of the abdomen.
    - 1.5 Label anatomical structures of the abdomen on a cross-sectional CT image.
    - 1.6 Identify exposure factors and image display parameters on a CT scanner for the abdomen.
    - 1.7 Identify positioning parameters for a CT of the abdomen.

2. Explain computed tomography (CT) imaging for an examination of the chest.
    - 2.1 Describe the CT protocols followed when imaging the chest.
    - 2.2 Describe the CT angiography protocols followed when imaging the chest.
    - 2.3 Examine indications and contraindications for procedures of the chest.
    - 2.4 Describe anatomical structures of the chest.
    - 2.5 Label anatomical structures of the chest on a cross-sectional CT image.
    - 2.6 Identify exposure factors and image display parameters on a CT scanner for the chest.
    - 2.7 Identify positioning parameters for a CT of the chest.

3. Explain computed tomography (CT) imaging for an examination of the head.
    - 3.1 Describe the CT protocols followed when imaging the head.
    - 3.2 Describe the CT angiography protocols followed when imaging the head.
    - 3.3 Examine indications and contraindications for procedures of the head.
    - 3.4 Describe anatomical structures of the head.

©Edenbrook College of Health, Business and Technology

3.5 Label anatomical structures of the head on a cross-sectional CT image.

3.6 Identify exposure factors and image display parameters on a CT scanner for the head.

3.7 Identify positioning parameters for a CT of the head.

4. Explain computed tomography (CT) imaging for an examination of the neck.

4.1 Describe the CT protocols followed when imaging the neck.

4.2 Describe the CT angiography protocols followed when imaging the neck.

4.3 Examine indications and contraindications for procedures of the neck.

4.4 Describe anatomical structures of the neck.

4.5 Label anatomical structures of the neck on a cross-sectional CT image.

4.6 Identify exposure factors and image display parameters on a CT scanner for the neck.

4.7 Identify positioning parameters for a CT of the neck.

5. Explain computed tomography (CT) imaging for an examination of the pelvis.

5.1 Describe the CT protocols followed when imaging the pelvis.

5.2 Examine indication and contraindication for procedures of the pelvis.

5.3 Describe anatomical structures of the pelvis.

5.4 Label anatomical structures of the pelvis on a cross-sectional CT image.

5.5 Identify exposure factors and image display parameters on a CT scanner for the pelvis.

5.6 Identify positioning parameters for a CT of the pelvis.

6. Explain computed tomography (CT) imaging for an examination of the spine.

6.1 Describe the CT protocols followed when imaging the spine.

6.2 Examine indication and contraindication for procedures of the spine.

6.3 Describe anatomical structures of the spine.

6.4 Label anatomical structures of the spine on a cross-sectional CT image.

6.5 Identify exposure factors and image display parameters on a CT scanner for the spine.

6.6 Identify positioning parameters for a CT of the spine.

7. Explain computed tomography (CT) imaging for an examination of the extremities.

7.1 Describe the CT protocols followed when imaging the extremities.

©Edenbrook College of Health, Business and Technology

7.2 Examine indication and contraindication for procedures of the extremities.

7.3 Describe anatomical structures of extremities.

7.4 Label anatomical structures of extremities on a cross-sectional CT image.

7.5 Identify exposure factors and image display parameters on a CT scanner for the extremities.

7.6 Identify positioning parameters for a CT of the extremities.

COMMON STUDENT LEARNING OUTCOMES

Upon successful completion of Edenbrook College programs, the student will:

Learn

Students will actively and independently acquire, apply, and adapt skills and knowledge to develop expertise and a broader understanding of the world as lifelong learners.

Think

Students will think analytically and creatively to explore ideas, make connections, draw conclusions, and solve problems.

Communicate

Students will exchange ideas and information with clarity and originality in multiple contexts.

Integrate

Students will demonstrate proficiency in the use of technologies in the broadest sense related to their field of study.

Act

Students will act purposefully, reflectively, and respectfully in diverse and complex environments.

EVALUATION

COLLEGE GRADING SYSTEM

The student must achieve an overall minimum grade of 70% on course assessments to be successful.

Students who achieve a failing grade of less than 70% may be eligible to write a supplemental examination to gain course credit. Remedial assistance will be required prior to writing the supplemental examination. Students will not progress in the program without achieving a passing grade in the course.

COURSE EVALUATION

Assignments (2)	65%

©Edenbrook College of Health, Business and Technology

Final Exam	35%
TOTAL	**100%**

ASSESSMENT RATIONALE/ CRITERIA

Achievement of learning outcomes will be assessed through class participation, class work, group activity, assignment, tests, project, mid-semester examination, and end of semester examination. Assessment will require students to demonstrate understanding and application of all the topics taught.

LEARNING MATERIALS

REQUIRED TEXTS

Kelley, L. & Petersen, C. (Last Published). Sectional Anatomy for Imaging Professionals (Current ed.). St. Louis, MO: Elsevier.

Romans, L. (Last Published). Computed Tomography for Technologists: A Comprehensive Text (Current ed.). Philadelphia, PA: Wolters Kluwer.

SUGGESTED READINGS

To be determined by the instructor.

REFERENCE TEXTS AND MATERIALS

Bontrager, K. L. & Lampignano, J. P. (Last Published). Textbook of Radiographic Positioning and Related Anatomy (Current ed.). St. Louis, MO: Mosby.

Seeram, E. (Last Published). Computed Tomography: Physical Principles, Clinical Applications and Quality Control (Current ed.). St. Louis, MO: Elsevier.

TEACHING/LEARNING STRATEGIES

Lectures on all the topics, power point presentations, video presentations, classwork, assignments, groupwork. All the students are expected to familiarise themselves with foundational knowledge prior to class. Personal study before and after classes and use of online resources are essential.

COLLEGE POLICY STATEMENTS

Refer to the Edenbrook College Student Handbook for more information on the following policies.

ACADEMIC RESPONSIBILITY – STUDENTS

©Edenbrook College of Health, Business and Technology

1. Each student must know the due dates for assignments, tests, and examinations.
2. Each student must maintain their own academic record of work covered each Unit/term.
3. Each student must maintain paper and electronic copies of assignments for the academic year.
4. Each student must arrange academic discussion time with a faculty member to discuss progress.
5. Each student must perform self-evaluation on progress in the course.

PERSONAL CONDUCT – STUDENTS

1. Students must arrive on time for class and be prepared to work when the instructor begins.
2. Students must be courteous to faculty and classmates.
3. Eating in classrooms and clinic is not allowed.
4. Cell phones, Text messengers and other electronic devices must be turned off during class time.

ACADEMIC ADVANCEMENT

At mid-point and at the end of each academic term, the members of the Faculty Team (FT) for the Medical Radiography Technology program meet to review the progress of all students. Following these meetings each student is advised orally and in writing of their status in the program.

Students experiencing difficulty will be counseled regarding assistance available to foster academic success.

At the end of each term, the Medical Radiography Technology Program Instructor and or Director of Education will make recommendations after deliberating on all relevant information. Decisions regarding each student may include (but are not limited to) the following. S/he has:

- Successfully completed all program requirements and can graduate.
- Successfully completed all requirements and is promoted to the next academic level in the program.
- Been granted supplemental privileges for courses not successfully completed and if successful will graduate or be promoted to the next academic level. **Supplemental privileges are not automatically granted and will be limited in number.**
- Not successfully completed all elements in the academic level but may remain in the program to repeat failed portions and continue toward program completion according to an individualized timetable.
- Experienced such difficulty that repetition of the entire academic level is required, and a space will be provided for the student in the program at the earliest opportunity if the student wants to return.
- Experienced such difficulty that the student is asked to leave the school and if s/he desires readmission must complete the admissions process in competition with other applicants.

ATTENDANCE

Attendance is mandatory – The College reserves the right to determine whether absences are excused or unexcused (may affect student funding) and to request any medical evidence that may be required.

©Edenbrook College of Health, Business and Technology

Student tardiness is unacceptable, and students are expected to demonstrate professional behaviour at all times, in class or on a clinical placement. Students are entirely responsible for catching up on their own or for missed material and demonstrations. A doctor's note may be requested for each absence.

Absence from Missed Test/Assignment Due Protocol

Upon return to school, the student is to provide a doctor's note or approved excusable absence to the instructor prior to admission to the make-up test/submission of late assignments. Failure to submit an approved excuse within 5 school Units upon return, the student will receive a zero for all missed, tests and late assignments.

Absence from Class Protocol

The College monitors attendance closely. A student who is absent from a class more than 3 times in a term, will be identified at risk and required to submit a doctor's note or approved excusable absence to their instructor(s) and the Program Instructor prior to readmission to the class.

Make-Up Procedure

All students are expected to take exams at the scheduled time. Make-up exams will be arranged only in recognized emergency cases. The instructor must be informed before or during the exam, to be eligible. Refer to the Edenbrook College Student Handbook for protocols. Quizzes are taken in class and at the time specified by the instructor. Late students will be given no extra time for the quiz. Quizzes given in the classroom cannot be made-up.

CHEATING AND PLAGIARISM

Any evidence of cheating will result in a failure for the course. Evidence of plagiarism will result in a failure for all students involved in the plagiarism. Plagiarism is turning in the work of someone else as if it was your own. When working on assignments in a group setting, students must submit their assignments using their own words. Identically worded assignments submitted by multiple students are acts of plagiarism.

MOBILE PHONES

Mobile phones are to be turned completely OFF while class is in session. Please use laptop computers responsibly. Web browsing, messaging, emailing, and recording are otherwise prohibited during class. Students who abuse the privilege of using their laptops will be asked to put it away for the duration of the class.
